At Ascot, on Thursday, the Roua Memorial Stakes, oue mile and five furlongs, was won by Chiselhurst, Limestone second, R. Jardine's four-year-old colt third. P. Lorillard'a Sachem ran. The race for the Gold Cup, about 2½ miles, was won by Tristan, Dutch Oven second, Wallenstein third. Fleur L'Orange also ran. The New Stakes, 5 furlougs and 136 yards, for two-year-olda, was won by Wild Thyme, P. Lorillard's Pontiac second, Offspring third. There were aix atartera.

A floating salmon cannery is a novely on the Columbia river. It ia a two-story screw steamer, 160 feet long, 35 feet beam. It has quartera for white, Indian and Chinese fishermen, and has cost about $40,000.

The wheat crop of the Glenn farm this year, it is thought, will yield $700,000.

The Colusa farmers report the prospects of having 8,000,000 bushels of wheat for sale.

Oregon Notes.

Hitherto the apricots in California have all come with a rush in three weeks, which is inconvenient. The Ventura *Free Press* says that Mr. G. G. Finney, noticing that some of his trees were rather earlier than others, and that even one side of a tree would sometimes mature its fruit before another, began three years ago budding from his very earliest and very latest trees, and with such success that he expects to spread his ripening season over six weeks.

Well-posted men estimate that Wyoming Territory now has 2,000,000 head of cattle, Idaho and Montana 1,500,000, and Texas 4,000,000. The Texas drive will be less than last year, but it will reach 300,000. Nevada has at least 300,000 head of stock cattle now.

Tehama county claims that its wool crop will bring at least half a million dollars this year.

Sales of 5,500 head of sheep are reported in Umatilla county at $2 37½ a head.

The Hood river peach crop will be an entire failure this year.

The salmon run so far this year is light.

Donald Dinnie's Challenge.

Donald Dinnie after surfeiting himself by giving public exhibitions, wants to get on a contest and to that offers the following challenge open to any athlete on the Coast:

First—He offers twelve feet start at heavy and fifteen feet at light hammer-throwing.

Second—At putting stones he will allow twelve inches at heavy and twenty inches at light.

Third—At tossing the caber he will allow twelve inches cut-off.

Fourth—If neither of these propositions be accepted, he will back himself to beat the best records in America (admitted by the New York *Clipper*), at throwing heavy hammer over five feet, light hammer over eight feet.

Fifth—He will match himself to lift from the ground, to stretch of arms above head, a heavier dumbbell than any other man.

Sixth—He will meet any man in the world at a general heavy-weight contest.

Either of these can be fixed by calling on D. Dinnie, Russ House, this city, within one week, and for stakes not less than $250 a side.

The numbers and values of farm animals in California, as shown in the special report of the Department of Agriculture for February, are as follows: Number of horses, 240,587; value, $13,204,723. Mules, 30,066; value, $2,134,085. Milch cows, 314,280; value of the same, $7,750,346. Oxen and other cattle, 575,000; value, $15,801,000. Sheep, 5,907,680; value, $11,933,514. Hogs, 856,000; value, $6,111,840. Total value, $56,935,508. The average values of these animals throughout the entire United States and Territories are: Horses, $70 59; mules, $70 49; milch cows, $30 21; other cattle, $21 80; sheep, $2 53; swine, $6 75. The aggregate value of the whole is given at the enormous sum of $2,338,197,968. The statistician of the department says that the average value of horses shows an increase over the valuation of last year of $12 07; of mules, $8 14. The iucrease in the value of milch cows is $4 32; of other cattle, $1 91. The advance in the value of sheep is 15 cents per head; in swine, $1 20. Milch cows in California average $36 17, or 17 cents more per head than in Massachusetts.

The fair of District No. 11, comprising the counties of Sierra, Plumas, Lassen and Modoc, will be held at Quincy, Plumas county, this year. There was a lively competition among the principal towns of the district this season to secure the fair, and the directors decided to give preference to the locality offering the greatest bonus to the society. Quincy's bid was a free racetrack and all privileges, a free hall and all privileges, and $2,011 in coin. Greenville offered a free hall and racetrack, and $1,500. A premium list and speed programme, aggregating $4,300, has been made up, and it is predicted that 1883 will see the most successful fair and race meeting ever held in the mountains.

On heavy soils, eapecislly abounding in clay, or made from the decomposition of granite rock, there is usually no lack of potash or other mineral plant food. These substances are apt, however, not to be in condition for immediate use. We have found good results from light dressings of wood ashes on land where analysis showed an abundance of all mineral elements. Thus, active lime is often used as a fertilizer by farmers on limestone land full of this element. The lime and active potash are especially effective if used when a large amount of green or stable manure is plowed under. They render the decomposition much more rapid, and fit a large amount of plant food for immediate use.

The programme of the August meeting of the Blood Horse Association is near completion, and will probably be ready for publication next week. For the information of owners and trainers we will atate now that all the fixed fall events of the association will be run in the August meeting, with many supplemented stakes and purses.

The hean crop, like all the others, is looking remarkably well. From a gentleman who made a trip over the beau land toward the Pismo and through the Arroyo Grande, we learn that the prospect could not be better.—*San Luis Obispo Tribune.*

The St. Helena *Star* says: "The largest shipment ever made by one house in any one month from St. Heleua was by William Scheffler in the month just closed; being 53,300 gallons of wine. He alao shipped 320 gallon of braudy."

A band of 3,000 sheep, which were shipped by rail from Crow Creek, Tulare county, to Texas a few weeks since, arrived at their deatination with the loss of but one sheep.

John M. Burnett and Henry Hopper will shoot a pigeon match at Petaluma to-day for the championship of Sonama county. The former holds that position at preseut.

There has not been a ohange in the pacing record of stallions for ton years.

Butte county will also have 8,000,000 bushels of wheat for sale.

Fashion Stables.—This favorite establishmeut offers every accommodatiou for the boarding of horses—large stalls, good ventilation, and a well-selected corps of grooms and attendants. The location, 221 Ellia atreet, is especially desirable for those who desire to reach the Park without driving over cables and car tracks.

YACHTING.

THE GREAT YACHT HARBOR.

A Description of Cowes and its Unique Surroundings.

[Written for the BREEDER AND SPORTSMAN.]

Every gentleman who owns a yacht, from a one-ton plunger to a 400-ton schooner, takes considerable interest in Cowes, the great yacht rendezvous of Europe, but it has not fallen to everyone's lot to visit that delightful spot, and therefore a short description of the place and its surroundings may not prove uninteresting. It is a good many years since the fortunes of a rather changeful life took me to Cowes, but every salient point in the quaint old town and its glorious harbor is as clearly before my mind's eye, as I write, as it was before my actual vision in the old days when I was wont to go out sailing with one of the brightest girls in the garden spot of England, and would lazily lie on my back in the little cockpit of her tiny una hoat pretending to tend the main and only sheet, while she, by virtue of her position as owner, captain and hostess, bossed the tiller. "What!" some reader will exclaim, "do young ladies in Cowes own yachts and take their friends out sailing?" They do indeed, and no more pretty sight can be imagined than a pretty girl clad in navy blue serge, brass-buttoned, and with straw hat, with its burgee-trimmed ribbon, skillfully steering a brightly varnished nna hoat in and out among the countless craft that lie at auchor in Cowes Roads.

But to return to our subject, as the parsons say after an uncommon lengthy digression on some ulterior topic into which their eloquence has led them: Cowes is situated on what the natives technically call the inside of the Isle of Wight, that is the side nearest to the mainland of England. It faces the Solent, an arm of the channel running np to Southampton, once the headquarters of the East Indian and China and South American trade. From Cowes to the mainland is between four and five miles, perhaps a hit more. I never measured the distance, hut once started to swim from Cowes to Lymington, the nearest point in the county of Hampshire. I was only recovered, after a hard battle with the tide, by a hoat which the commander of H. B. M. S. "Royal Sovereign," sent ont to pick up that d—d idiot, as he graphically and truthfully described me to his first lieutenant, just as the full sweep of the tide from the Atlantic, compressed into a narrow channel, was just beginning to sweep me down to the cruel rocks of the Needles. There are two divisons of Cowes, East and West Cowes; the one stately, grand and aristocratic, blessed with the presence of Queen Victoria some four mouths in every year; and the other a small, narrow-streeted town, dependent for its existence on a little fishing in the winter, and a great influx of strangers with money, from all parts of the world, during the three last summer months. Yachting is almost the sole support of Cowes, and without it the dirty little town, with its three high-priced fourth-rate hotels, and innnmerable eligible villas, wonld soon sink back to its pristine condition—a resort for oyster men and smugglers. East and west Cowes are divided by the river Medina, a brackish creek some six miles long, which runs up as far as Newport, the capital of the Isle of Wight. The Medina river is crossed by a miserable floating bridge, and is celebrated for its oyster beds aud as a winter l<ing place for yachts out of commission. On either side for a distance of two miles dnring the winter the yachts are so closely packed in, that their sides often touch. Four miles of yachts, side on, is a good corrall full of ships, as our granger Harbor Commissioner would say, but even then not a third of the yachts which rendezvous at Cowes during the season are represented.

East Cowes is a place of villas and high tone, West Cowes a haunt of highway rohbers, extortioners, brigands and English tradesmen, all of which I believe are synonymous terms in a watering place or summer resort. East Cowes sneers at West Cowes, and West Cowes retorts that God Almighty only made East Cowes to act as a wind-break to West Cowes harbor. Whatever the Almighty's intention, such is about the fact, for East Cowes is at right angles to the Cowes Roads and, being on the ocean side, acts as a wind-break and makes Cowes harbor nearly a land-locked hay. Then, too, nature provides an enormous sand-bar reaching from Osbonrue Bay, which is a continuation of East Cowes shore line, to Ryde, and which was the reason *d' ztre* for the building of Ryde Pier so that boats of moderate draught could land passengers for Ryde at all stages of the tide. This sand-bar is a splendid natural breakwater for Cowes harbor and for its protection a law was passed years ago making it a punishable offense to remove from it sand or gravel as some skippers were wont to do for ballast. Standing on shipboard in Cowes harbor facing the town, West Cowes rises dead ahead, a green-herbaged hill sprinkled with white villas ont of an azure blue sea. On the left hand are the tree-clad hills of East Cowes with the two white turrets of Osbourue Honse hardly visible above the tall oaks; on the right the narrow channel with the dangerous rocks of Egypt corner and Gurnet Ledge, just peeping out above the foam of the breakers, while behind is the low lying shore of Hampshire, the Solent and the narrow neck of land on which stands Netley Hospital, a huge building one quarter of a mile and four yards in length, and which shuts out a view of the great Portsmonth dockyard and the huge convict works of Portsea.

The town of West Cowes is the part inhabited by strangers and yachtsmen, and, in fact, East Cowes is a sort of a private appendage to Osbourne House anyhow, and seldom penetrated by any unhallowed foot. It is fenced in, and when the Qneen is at Osbourne an armed sentry challenges all unknown persons and demands a strict account of their business before they are allowed to pass on towards her Majesty's home or the pretty little village of Wippenham, which is an appendage of the royal domain. Were West Cowes analyzed, it would be fonnd to consist of about one main street and a lot of narrow alleys. The main street runs in a devious line from the Medina river to the uttermost limits of Cowes. This street is narrow and flanked on either side hy dingy brick houses with heavy wooden framing in the style of the fifteenth ccntury. Down near the river is as glorious a collection of old junk stores as one would wish to see, dirty, squalid and odorona. Towards the extensive dry-dock and shipyard of Mr. John White, the roadway widens and the place has an air of business, hut it narrows again and becomes even more dingy than before until the ship-yard of Mr. Edward Ratsey ia reached. Wherever yachting ia a sport, there the name of Ratsey is familiar. He built for Mr. Aahbury, the Brighton wine merchant, the celebrated yacht Cambria, once the champion of the English fleet. Wheu Ashbury got tired of the Cambria, Ratsey built him the Livonia, and, if I recollect aright, there was a heap of bother about the job, Ashbury swearing that the yacht was not up to the agreement, and vice versa. I do remember, though, that yachtsmen, as a rnle, did not go mnch on Ashbury. He was blackhalled in the R. Y. C. until he got sick of applying for admission. Lower down, the street narrows again until it becomes so narrow that a vehicle of moderate width cannot pass along without grinding the curh on either side. On one occasion I stood on the north sidewalk and shook hands with a friend who was standiug on the south sidewalk. The street was muddy, and we did not care to cross nor excite the enmity of the townspeople hy jumping clear across their one-horse thoroughfare, for the narrowness of their streets is a sore spot with them. That reminds me of a funny incident, at least it seemed funny to me at the time. On a fine spring day the Queen took a notion to drive throngh Cowes and show herself to the towspeople. As nsual her carriage was preceded by ontriders, who cleared the way. Just at the spot where the street was narrowest a graceless sinner, hy name Simmonds, was selling vegetables out of a cart drawn hy a good sized donkey. Simmonds was allowed to be the meanest man in West Cowes, and his donkey was admittedly meaner than Simmonds, and it was just what everyone expected when in reply to a "get up there" and a lug on the reins all Simmond's donkey did was to set np a loud "he haw," plant his legs firmly and refuse to budge. Blows, threats, entreaties, and even an offer of carrots from Simmond's own cart failed to tempt the donkey to move ahead, and at last the Queen's carriage was hronght to a halt by the obstinate hrnte. Whether or not Simmonds felt pleased at being the means of delaying royalty's passage I cannot say, but I always believed he did, and when the Queen, who took in the situation at a glance, smilingly spoke to John Brown, I almost fancied that Simmonds chuckled. Bnt the people of Cowes were far too loyal to delay her Majesty long, and so a dozen stalwart tradesmen rnshed from their stores, and arching their broad hacks heneath the donkey and his cart, they incontinently lifted the whole arrangement and carried it down a passage-way called "Sun Slip," and dumped the whole lot into the sea, there to remaiu till the Qneen passed by.

Passing along the main street west, one leaves the business town of Cowes and gets right into the yachting quarters. A narrow passage-way from the street leads to a broad esplanade, open to the sea, and presenting a picturesque view that has no eqnal in Eugland. This is the popular promenade of the place. At its western end is a stone-turreted building fronting the sea, and nsed as a clnh honse and headquarters by the Royal Yacht Squadron, the most select and high-toned club in Great Britain, with the royal familes for members and the hest blood in Europe on its committees. Near the club house is a handsome residence owned by Mr. Stephenson, a grandson of the great engineer, and then one comes on to Prince's Green. This is a hroad, long expanse of green sward, dotted with seats, and enclosed in iron chain railings; as lovely a bit of ground as one would want to see. Shade trees are dotted all over it, giving a truly rural aspect to the green. Beyond the green is Egypt Corner, as a jutting row of rocks is called, and beyond that Gnrnet Ledge, and theu a bare and little-frequented patch of rocks. Inland, and behind the narrow street and esplanade, are heantiful villas, snrrounded by lovely grounds, the most restful, pleasant retreat for which the heart of man could wish. During the yachting season the place is crowded and everyhody talks yacht until the names of yachts are about the only thing one can remember of a day's conversation. All the men wear yachting snits of blue or white flannel and all the ladies blne serge suits trimmed with white braid. Nearly everybody wears the name of his or her yacht painted on the hat-band and in addition the bnrgee of the sqnadron or club to which their yacht belongs. For yachting clothes, when I was there, everyone went to a man named Redfern, the boss milliner of the place. And how the old pirate could charge! My recollection of him was that he wore a wig and went to church, a most respectable tradesman. A pretty feature of the place was the gaily-uniformed yachts crews, who roamed about the place, lounged around the landing waiting to take their masters and mistresses on hoard the yachts, or pulled ahont the harbor in handsomely-eqnipped hoats. One can judge of the number of these fellows to be seen aronnd when he learns that each yacht carries a crew of from one to twenty-five men. I once stood on the battery near the R. Y. S. clnh house and counted 412 yachts of all sorts and sizes, from the huge steamer Northumbria, Stevenson's yacht, to the little una hoats, so-called from the fact that they have only one sail and are built to carry only one person.

While in harhor it is the custom for each yacht to moor a huoy with a backed anchor, or else a mnshroom, and nse that for a permanent mooring-place.

Regatta week is the great event of the year in Cowes. Then from all parts of the country the yachts come to participate in the great races or look on as spectators. I cannot remember the programme, hut I know that one day was given up to the race for the Queen's Cup, sixty miles to windward and hack, one day to the race for the visitors' cup and one day to the town regatta, in which the yachts contest for prizes, given by the people of Cowes, who, on that occasion, only let go of a portion of the wealth they have drawn from their visitors' pockets. On the day of the town regatta prizes are given for rowing, swimming, harge racing and all kinds of aquatic sports, and the whole affair winds up with a grand display of fireworks, every yacht in the fleet burning powder and pyrotechnics to add to the display.

An Ocean Race.

The good people of Honolulu and parts adjacent want to see an ocean yacht race with their heautiful harbor as a finishing point. Life in the islands is rather a dreamy sort of an existence, and the expectation of seeing a close finish and the excitement of speculating on the first hoat in would he looked upon as a godsend to quicken the blood and stir up the lassitude that is always a part of life in the tropics. In return for the excitement expected the Sandwich Island folks promise a valnable prize—presumahly a cup—to the first boat in, hut make the condition that at least three yachts shall start. J. D. Spreckels' new keel yacht, the Lurline, like Barkis, ia willing, and H. L. Tevis' Halcyon is eager for the fray. As a third competitor I. Gutte's Chispa, a centerboard yacht, is named as being likely to start in charge of her builder, Captain Matthew Turner. If the race can be made it will give a rare impetus to yachting on this coast. Gentlemen who have been satisfied with a semi-annual cruise to Vallejo, and once or twice a year have wrestled with the nmhrageous trees that har the dangerons passage up Napa creek, will then yearn for the hroad Pacific as a racetrack and the whole waste of waters as a cruising ground. Loiterers aronnd the Saucelito Club honses will he apoken of as land lubbers and lougshore sailors, and even that bold and huccaneering sailor mau, Captain Fulton S. Berry, whose craft has taken the swash from every yacht in the fleet, not excepting the Tommy, will be looked upon as a rather small earth-fruit compared to the heroes of the Honolnlu trip. How eagerly will be read the log of the winning yacht and, perpetuated in print with covers of blne and edges of gold, like the story of the Danntless' race, from Sandy Hook to Cape Clear, it will form a part and parcel of every true yachtsman's library to take rank on his shelves only second to Hunt's *Yachting Magazine* and the "Handbook of Nanticul Terms." Then the special correspondent for the New York *Herald*, who will accompany the yachts if Jim Bennett has to send a steamhoat along, how he will revel in tales of sea craft and the gallant behavior of the hoats. The press of the whole civilized world will teem with stories of the race and perhaps George Augustus Sala will send out one of his young men to take a sketch of the finish for illustratiou in the London *News*. The race will he an epoch in the history of San Francisco. "Events may be forgotten," as O'Doherty says, "epoch never." Incidents will date from the start or the finish of the great race as events in England are dated to-day from the time when Ashbury's Cambria beat the Yankee yachts. It will be a glorions theme for yachtsmen's talk and not the least interesting part of the affair will be the hnstle of the preparation, the escort of yachts out to the Golden Gate, the happy send-off and the anxious awaiting for news of the winner.

William Moody's new forty-foot schooner is nearly finished and her spars are ready. She will have a good deal of sail. Her howsprit is 27 feet outboard and the main boom is 32 feet long. The cahin is quite roomy. The cockpit also is large. This yacht will carry a Bermudian mainsail, and will have almost as mnch freeboard as the new keel yachts.

It has been suggested by several members of the San Francisco Yacht Club that it would be a good plan to charter a moderate-sized yacht for the nse of such members as do not own yachts themselves. The plan has met with approval and now only funds are needed to put it into effect.

Mr. T. Swan's yawl Chiqnita has been put in commission but has not yet left her safe harbor in Oakland creek.

BICYCLING.

The annual meet of the L. A. W. took place in New York city on Monday, the 28th nlt., the privilege of certain portions of Central Park having been granted for this occasion. Abont one thonsand bicyclists were present in their varione nniforms, making a very fine spectacle, which was witnessed by ahont 15,000 spectators. Line was formed on Fifth avenue, between 55th and 60th streets, and was reviewed by the Commander in Chief, Dr. N. M. Beckwith, with his aids. From 60th street the column moved south to 59th street, aronnd the circle in Central Park, and thence to 116th street, to Seventh avenue, to Central Park, down the west drive to 59th street, countermarching to 72d street, to the Riverside drive, where, npon the slope known as Mount Tom, the group was photographed with Park Commissioner Vick at the head.

The annual business meeting of the L. A. W. was held at Riding Hall, 214 East 34th street, on the morning of the 28th nlt., and the following officers elected: President, N. M. Beckwith, N. Y.; Vice President, W. H. Miller, Columbus, O.; Corresponding Secretary, Fred Jenkins, N. Y.; Recording Secretary, A. S. Hibberd, Milwankee; Treasnrer, W. V. Gilman, Nashna, N. H. In the evening a dinner was given at the Metropolitan Hotel and was a great snccess, over 500 people heing present, including many prominent city officials. Speech-making and toasts were the order of the evening after the cloth was removed.

Eleven members of the San Francisco Club met in response to a call for a run to Menlo Park on the 3d, starting at 9:30 a. m. Captain London being absent, the command devolved npon First Lieutenant Quinn, who led the first division, while Lient. McLaughlin took charge of the second. The racing division, finding the road snitable for the purpose, went off at snch a rate that the others soon lost sight of them, and have only their word for some very fast time said to have been made hetween Belmont and Redwood City. At Menlo arrangements had been made for lunch, and the party returned hy afternoon train to this city.

Country roads will soon become cut up by heavy teaming, as harvesting commences, so that extended trips will be out of the question.

Yearling Sales of 1883.

One of the leading topics of the week has been the annnal sales of yearlings in Kentucky, and, although the Woodburn and Runnymede sales did not realize the prices they did last season, there were excellent reasons for it. Turfmen, in purchasing colts for racing pnrposes, are governed by relationship and crosses. A brother to some famons horse or a colt from some mare noted as the mother of winners, is certain to excite the keenest competition; bnt colts from untried mares, however good looking, are slow to arouse bidding. Such was the case at Runnymede. It happened that there were no colts from Mercedes, Fancy Jane, Distraction, or any of the favorites of that young stud. The yearlings were exceedingly handsome, healthy and promising, hut they were from young mares, mostly untried, and not all Billet'a popularity was sufficient to raise their price. The Woodburn sale did not reach last season'a figures from reasons much the same as those which operated against Runnymede. The Woodburn mares were tried and found true, hnt they had heeu newly crossed, that is to say, the colts and fillies offered were the result of crosses hetween sires and dams which had never before heen mated. Bnt if Runnymede and Woodhurn fell helow their last year's average, Elmendorf more than made up the discrepancy, selling forty-three head of youngsters for $47,130, which almost eqnals Woodburu's splendid average of 1882.

Indeed, the Elmendorf sale was a most signal success, and as the yearlings offered were the first of Mr. Swigert's own hreeding, the result must prove very encouraging to him. The sales, taken as a whole, show that the demand for yearlings is quite as good as last year when we compare the fignres. In 1882 the combined sales disposed of ninety-six yearlings for $75,870, an average of $790 31 each. Last week ninety-five were offered, bringing $74,725, or an average of $786 57. Following the very successful sale at Belle Meade so closely, the present season's sales surpass those of 1882, and prove that the hreeding of racehorses is one of the most profitable ventures of the day.—*New York Spirit.*

THE GUN.

A Sweepstakes Match.

A handicap pigeon shoot came off at the Oakland trotting park last Saturday at 15 single birds, Hurlingham rules. The contestants were Woodworth 29 yards, Gould 27 yards, Gordon 29 yards, F. Smith 27 yards, and A. Havens, the nominal scratch man, at 30 yards. The pigeons provided were an average lot and all things considered, the shooting was very good. Of Woodworth's first dozen 7 were incomers. Gould got a larger proportion of tailers than any man in the match. Gordon won the match and $100 stake money with 13 kills, missing his 10th and 11th birds, both twisting trailers. The score was:

Woodworth	1	1	1	0	1	1	1	1	1	1	1	0	1	1	0—12
Gould	0	0	1	1	0	1	1	0	1	1	1	1	1	1	1—11
Gordon	1	1	1	1	1	1	1	1	0	0	1	1	1	1	1—13
Smith	1	1	1	0	1	1	1	0	0	1	1	1	0	1	1—11
Havens	1	0	0	1	1	1	0	0	1	0	0	1	1	1	1— 9

The Law About Doves.

The daily papers have made a mistake in reference to the game law, which is likely to get many well-intentioned people into trouble. They have stated, and notably bas the *Call* done so, that the close season for doves would expire on June 1 instead of July 1, as heretofore. Such is not the case. The close season for doves will not expire until July 1, 1883, and all persons who shoot doves before that time are liable to prosecution. It will be the especial work of members of the State Sportsman's Association to see that the law is not broken, and intending violators will do well to pay heed to this caution. None of the amendments to the game laws go into effect before July, and it will not be until next year that hunters will have the privilege of slaughtering doves before July 1.

The Yuba City Gun Club held its weekly shooting match last Friday afternoon near the Farmers' Union frame warehouse, and the scores show a marked improvement. The first match resulted in a tie between S. Starks, P. George, Will Clark, Rose and Charles McQuaid on eight balls out of a possible ten. The second match was a tie between Will Clark and Charles McQuaid on ten straight balls. The third match was shot at eight rotary balls and declared a victory for W. S. Harkey, who broke six. John L. Duncan —the "mammouth" shooter—was awarded the leather medal, having broken three out of ten.—*Sutter Farmer.*

The Mission Amateurs held a glass-ball shoot on Decoration Day, at which the following scores were made: J. Bruns 18, Edgar Foster 18, W. Rose 17, Eugene Foster 17, J. Dunschee 15, F. Monson 14, H. Vnker 14, E. Ludlum 5. J. Bruns and Edgar Foster divided first and second money. The shooting off of ties for second money resulted in favor of Rose.

Last Saturday seven sportsmen assembled at Adems Point to compete for the Scott Trophy. Mr. Lambert was the winner of the medal, breaking 10 out of the 15 clay pigeons. The shooting was done at 15 yards rise. F. A. Spaulding was the last holder of the trophy, which is shot for every other Saturday.

Last Saturday at Adams Point Nic Williams and Mr. Spaulding broke 42 and 43 clay pigeons, respectively, ont of 60, tying on every round but the last. A match for money is being arranged between these two men, as they shoot so evenly.

To-morrow the California Pigeon Shooting club will hold the fonrth live pigeon shooting match at San Bruno for club medals. The shooting will beat 12 birds, 30 yards rise, and the rules of Hurlingham will govern the match.

The Sportsman's Club of California has issned a notice that fishing on Lake Temescal is now open to members and permits can be obtained free of charge at the Secretary's office.

This afternoon (Saturday) the Alameda County Sportsman's club will shoot for the club medals at the Oakland Trotting park.

After the main match several sweepstakes were shot, Woodworth and Gordon taking the money.

The following, from the *Kentucky Live Stock Record*, presents a novel idea, and we give it for the consideration of dairymen. There may be something in it, and there may not: For one, instead of favoring, I wish to lift up my voice against anything producing 20 pounds of butter or more per week; and it would be still better, in my opinion, to limit the quantity to 14 pounds per week as the utmost that a cow should make. To obtain a larger profit than this, as a general rule, I will say, she has to be highly stimulated with extra food, which throws the poor animal into a feverish state, and renders her milk and the butter made from it more or less unhealthy. Furthermore, it is notorious that the larger the butter product the more liable the cow is to be attacked with milk fever. I think if a greater success is anticipated from keeping such extraordinary butter-producing cows, it will be found illusory. Even if we cast aside the greater risk of death from milk fever and some other diseases, and the extra labor and care to assiduously look after such animals, I am of the opinion that a herd of cows yielding not over ten to thirteen pounds of butter per week during the best of the season, or 350 to 450 pounds per annum, would be found more profitable, in the long run, than a herd yielding much more than this; and especially if it doubled it, as some breeders of Jerseys are now straining their utmost to accomplish. Cows unstimulated, but kept along in a natural way, will last much the longest, require less labor to be looked after, produce better offspring, and milk and butter of superior flavor and healthfulness.

Aylesbury ducks have long been considered by most breeders of this class of fowls as standing at the head, all things being taken into account, as the best variety of ducks known. Their distinctive characteristics consist of a plumage of unspotted white, a pale flesh-colored bill, a dark, prominent eye, orange legs, stately carriage, prolificness and excellent quality as market birds. The weight of the grown fowl averages, if properly fed, from ten to twelve pounds a pair (duck and drake). The ducks often weigh eight and ten pounds each. The ducks are prolific layers. Instances have been known where 300 eggs have been obtained from two ducks in one year, besides which one of them sat twice and the other once during the time, the three nests giving thirty young ducks. It is also claimed for Aylesbury ducks that their consumption of food is less than other sorts, besides obtaining maturity at an early age as compared with common ducks and being far more marketable for their superior appearance when plucked. The females are good sitters and excellent mothers.

THE RIFLE.

At Newark.

Last Sunday a number of riflemen, members of the National Guard, assembled at the above mentioned place to hold friendly competitions between teams chosen on the grounds. Several of the San Jose shooters were up and met the San Francisco and Oakland boys at the train. There is only one range, 200 yards, but this is the the best one there is in this vicinity, being well protected from the winds and connected with the shooters' stand by electric wires. There are eight targets. The first match was between teams picked by Townsend and Haight, which was won by the former by fourteen points. The scores made by both teams stand:

CAPTAIN TOWNSEND'S TEAM.

Townsend	4	2	3	5	3	3	4	3	4—34
Sime	5	4	4	4	5	4	4	5	5—45
Sherman	3	3	3	4	2	3	4	4	5—36
Foss	4	3	3	2	0	0	3	3	0—21
White	4	3	4	3	4	4	4	5	4—40
Ranlett	3	4	3	4	5	4	4	3	3	5—38
Total										214

CAPTAIN HAIGHT'S TEAM.

Haigbt	4	4	5	3	4	3	4	4	4—39
Loryea	4	5	4	4	4	4	4	3	4—40
Verbeck	4	4	3	4	4	3	3	4	4—37
Coykendall	3	3	0	4	5	4	3	0	2	3—27
Talbert	4	0	2	3	3	2	0	0	3	0—17
Kellogg	3	4	4	4	4	4	4	5	4—40
Total										200

After dinner the principal match of the day was shot, with Col. Kellogg and Lieut. Sime as the captains. The teams were made up irrespective of companies. The scores are:

COL. KELLOGG'S TEAM.

Private Kellogg, O. L. C.	4	4	4	4	4	60
	4	3	4	4	4	
	4	4	5	4	4	
Sergt. Major Haight, 5th Bat.	4	4	4	4	4	60
	5	4	4	4	4	
	3	5	3	4	4	
Private White, Co. C, 1st Reg.	4	2	3	5	4	56
	4	3	4	4	4	
	3	5	4	3	4	
Corp. Townsend, Co. B, 1st Reg.	4	3	3	4	3	52
	4	3	4	3	3	
	3	4	3	4	4	
Lieut. Verbeck, 5th Bat.	5	3	4	4	4	52
	4	3	3	3	4	
	3	0	4	4	4	
Priv. Foss, Co. B, 5th Bat.	0	3	2	2	3	35
	0	2	4	3	2	
	2	3	0	4	4	
Total						315

CAPT. SIME'S TEAM.

Lieut. Sime, Co. C, 1st Reg.	5	5	4	5	4	66
	5	4	5	4	4	
	4	5	3	4	5	
Priv. Loryea, Co. B, 5th Bat.	3	4	4	3	5	57
	4	4	4	3	4	
	4	4	3	4	4	
Lieut. Col. Ranlett, 5th Bat.	3	3	5	5	4	59
	4	4	4	3	4	
	4	3	4	5	4	
Priv. Sherman, Co. G, 1st Reg.	3	4	4	4	5	54
	2	4	3	2	4	
	3	4	4	4	4	
Priv. Coykendall, Co. B, 5th Bat.	3	3	0	4	4	49
	0	3	3	3	3	
	0	4	2	4	3	
Priv. Talbert, Co. B, 5th Bat.	3	3	3	3	4	31
	0	0	3	0	2	
	3	0	0	4	3	
Total						306

After this a match was shot under the same captains and in this Capt. Sime's team was victorious as the following shows:

Sime	4	4	4	4	4—20	Kellogg	4	4	4	4	3—19
Loryea	4	5	4	4	4—21	Ranlett	3	3	4	4	2—16
White	3	4	4	4	4—19	Verbeck	3	2	3	0	3—11
Townsend	4	4	4	3	4—19	Sherman	4	4	4	3	4—19
Foss	0	3	2	3	4—12	Coykendall	2	2	0	3	3—10
Total					91	Total					75

Time not permitting any more shooting to be done, the shooters started then toward home all well satisfied with the sport.

The rifle match between Lieut. H. J. Mangels and W. E. Erhen will come off to-day at Shell Mound. This match has attracted considerable comment among rifle shots, as both men are good marksmen. The conditions are 100 shots each, at 200 yards, for $50 a side, United States Springfield rifles to be used.

To-morrow Companies C and G, First Infantry Reg., N. G. C., will hold their regular monthly medal shooting at the Shell Mound Range. The members of the companies are taking a lively interest now in shooting matters, and are consequently making much improvement with the rifle.

A battalion match at rifle shooting will take place June 23 at Shell Mound Park between teams from companies from Vallejo, San Jose, Oakland, Petaluma and the staff officers comprising the Fifth Battalion.

The United States regulars of the Presidio will shoot in teams at the Presidio one week from to-day.

The interest in Jersey cattle seems to be on the increase, and during the month of May, the month of the Jersey sales, the records show that 1,500 animals were disposed of at auction, and in the last two days of the month 119 animals were sold for the aggregate sum of $113,370, an average of $952,68 per head. Who can say that Jerseys are not in demand and tell us when we shall get our fancy cow at a moderate price? It is a fact that we have on this coast Jerseys of the most approved strains that can be and are, bought for one-third the prices given at the New York sales; and there is no good reason why the handsome gazelle-eyed Jersey cow should not be a fixture in every home where the family cow is possible.

On Wednesday last William Muldoon and Donald Dinnie met and arranged for another public wrestling match to come off on Wednesday next. The stake is $250 a side, $100 of which is already up and the balance is to be deposited by the 9th. By the terms of the match Dinnie agrees to throw Muldoon ten times in Cumberland style while Muldoon throws him five times Græco-Roman style. Both the men are to wear undershirts while wrestling back holds, to avoid slipping the hold by reason of perspiration. Muldoon also deposited a forfeit of $100 to wrestle Farrell of Petaluma for $500 a side, one fall collar and elbow, one fall Græco-Roman and one fall "catch as catch can."

Proper Feed for Chickens.

A Duchess county (N. Y.) poultry raiser sends the following excellent and practical article to the *Country Gentleman*: "For young chicks just hatched I use a custard made of equal parts of eggs and milk. The young things eat very little, and that little must be wholesome and satisfying. To have strong, sturdy chicks, they should remain on the nest at least forty-eight hours after hatching. As soon as all the eggs which will are hatched, I clear the nest of shells and unhatched eggs, throw the hen off the nest (having previously placed food and drink within her reach) and allow her to remain until her wants are relieved, after which she will return and be quiet for the forty-eight hours, or until time to remove her, with her brood, to the coop or building where they are to remain until weaned. If a steady sitter, and the eggs are all right, the hen will hatch them out uniformly. Long before the chicks begin to hatch all unfertilized eggs should have been removed from the nest. At the end of the first twenty-four hours I place some of the custard on a shingle in front of the nest, and the hen, if a good mother, will call her brood and feed them. This food is the very best they can take, being soft, digestible and nutritious. It is nearly the same nourishment that heretofore has supplied the growth of the chicks. I generally arrange to have several broods hatch at the same time, when there is little trouble. I feed the chicks sometimes half a dozen times a day when small. They do not run at large, except in the very warmest portion of the day, until after several days, and if the weather is bad, not before a week old. I continue this custard, beginning, when two or three days old, to introduce with it cracked corn, wheat or buckwheat, so that they may become accustomed to it by degrees until capable of subsisting on it entirely. When fed whole grain, or even meal, the chicks must be allowed plenty of fresh drink (water is the best) and run on the ground or where they can have free access to gravel or coal ashes. For green food I use chopped onion tops if I can get them. If not, I give finely cut lettuce, fresh tender grass or running mallows, of which they are very fond when in confinement. My chicks always thrive; I seldom lose any. To make the custard I take one egg, well beaten, and add three tablespoonfuls of new milk and bake in a small, shallow pan. This preparation makes a custard so stiff that it will break into lumps and none is wasted, as would be the case with softer food. It is better than hard-boiled eggs. I have used bread and milk, but it is not so good. One egg makes sufficient food per day for eight or ten chicks at first, of the small breeds. The larger breeds of chickens can sooner be weaned off. The expense is not great, taking into account the nice, thrifty condition of the fowls. They keep ahead of all diseases, and there is no loss if careful to prevent accidents. They make fine birds when grown up, and splendid hens for egg production. With the closest calculation it takes about a bushel of corn per year for a hen. If other grain is used with it of course less will be required, but all fowls for thrift and profit must be given one feed of corn daily. Without it they stop just short of the desired result, whether it be flesh or eggs. I feed adult or laying fowls a soft, warm feed in the morning, and find the quantity of eggs increased by doing so."

Importation of Fine Stock.

April 11 last R. W. Carey and family, of Marion county (near Salem), left this city for a visit East. At that time this gentleman informed us that he intended bringing back some good stock. They went by the Southern Pacific route, a thing, Mr. Carey says, he would not do again if he were going East. Having seen in the *Rural Spirit* an account of the large sale of Polled cattle which was to take place at Kansas City, Mo., April 26, Mr. Carey made it a point to be there. Here he fell in with his old friend Mr. Watson, formerly of this State, who soon introduced him to all the black muleys. At the sale of Hon. M. H. Cochrane, proprietor of Hillhurst Farm, Compton, P. Q., Canada, which took place on the day before stated, Mr. Carey purchased two Aberdeen-Angus yearlings, a heifer and a bull. Leaving this point, our friend proceeded to Greenwood, Ill., where he bought twelve ewes and one ram from Mr. Hurst, the celebrated breeder of American Merino sheep. The breeding farm of E. Peck & Son, Geneva, Ill., was then visited, and in a short time he added to his purchases five ewes and one ram of American Merinos. Before departing for Mr. Abner Strawn's, Ottawa, Ill., Mr. Carey visited the great Percheron breeding farm of M. H. Dunham, Wayne, Ill. When the time arrives, says Mr. Carey, for Oregon to have such a breeding farm as this one, the inhabitants of the islands of the seas will visit us to see what has been accomplished in equine breeding. From Mr. Strawn three Cotswold ewes and one ram, and a pair of Shropshire Downs, were purchased. After visiting many stock farms, he purchased of C. S. Dole, Crystal Lake, Ill., a pair of yearling Jerseys. The purchase of a remarkably fine-bred Berkshire boar seven months old completed Mr. Carey's investments. The very many courtesies of Mr. Dole were such as to induce Mr. Carey to make this the starting-home point. Ere the 12th of May the family began singing "Home, Sweet Home," and on that day they bid to "Crystal Lake, good by," returning home on the Union and Central Pacific, arriving here on the 27th ult. Sunday last we saw the stock at The Grand Stable, where many congregated to see the newcomers, especially the black doddies, they being the first that ever inhaled the stimulating oxygen of the North Pacific. Sheep judges declared that Mr. Carey had made no mistake; swine critics avowed that the like of such Berkshirea was only now and then to be seen, while the well-versed Jerseyites were satisfied with the automatic creameries; and the black muleys—well, all hands were lond in praising the "Bonnie Scots." Much has been said in these columns of this breed of cattle regarding its unquestionable adaptability to our State, but we confess that these models, for form as well as size, are far superior to what we expected. The sheep are all young. Not an animal did Mr. Carey bring except such as are registered. The stock is all pure. We regard this as one of the most important importations ever made here; and now that we have a pair of the Aberdeens and will soon have a herd of Herefords, the North Pacific can begin to say we have at least two of each variety. But let it be remembered that the temperament of our people is such that Mr. Carey will not be long the only owner of such cattle.—*Rural Spirit, Portland, Or.*

J. C. Reardon of Vallejo has moved from his Vallejo breeding farm to San Francisco. Among the stock he brought with him is his two-year-old colt Blue Gown, by the well-known trotting stallion "Gus," from a G. M. Patchen mare, her dam by Jack Hawkins, a thoroughbred. Blue Gown is a colt of promise. At the age of fourteen months he trotted at the races for Petaluma district colts, winning the first heat in 3:10½. Goldsmith, who drove him, said that only the colt's weakness, caused by pinkeye, he would have [illegible] mile as good as 2:50.

THE
Breeder and Sportsman.
PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.
THE TURF AND SPORTING AUTHORITY OF THE PACIFIC COAST.
OFFICE, 508 MONTGOMERY STREET
P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith

JOSEPH CAIRN SIMPSON, - - - EDITOR

NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J street.

ADVERTISING RATES.

Displayed, $1 50 per inch each insertion or pro rata for less pace. Reading Notices set in brevier type and having no foot marks, 20 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, Saturday, June 9, 1883.

The Dove Law.

The close season for doves does not expire until July 1, all statements to the contrary notwithstanding. Any person found shooting doves before July 1, will be liable to prosecution.

The Railroad and Immigration.

However rabid in his anti-monopoly views a man may be, there are few who will not agree with us that the Central Pacific Railroad Company has made a good move in establishing agencies in the East to promote emigration from the "other side of the mountains" to this coast. The hypercritical may charge that it is bringing fish into the big net that is now making immense hauls, and that the motive which governs is that of selfishness. That every immigrant has to pay tribute, and that the increase of population means an increase of business for the great arteries of traffic through which they must flow. Granting that such is the case, we never could understand why a slice of bread should be rejected because some more fortunate individual received a loaf, nor why one peach should be thrown away on account of a basket being the share of another. Now it is evident that an increase of population is the great want here, and that if the number of residents in California could be quadrupled by the time the next national census is taken, there are few who would not be benefited. In fact the only ones to suffer by an influx of the right kind of "settlers" are those who control large bodies of land now belonging to the government. The large grain growers, the large breeders of domestic animals who own the land, may be loth to sell any portion of the vast possessions, but when they discover that large operations in these fields cannot be made as profitable as by selling the greater part and giving closer attention to the remainder, they will be glad to dispose of that which is in reality an incumbrance. There is no country in the world better adapted to sustain a dense population than the valleys and rolling lands of California. There is scarcely a limit to the capacity of the soil, that capacity being secured by climatic advantages. A small field of ground, donated to certain pursuits, may keep a family in comfort, and a very few acres be comparative affluence. The residents of cities, towns and valleys can readily understand that an increase of population is an increase of prosperity to those who congregate in centers of supply, and it does not require long arguments to prove that there is a corresponding benefit to the rural portion of the community. There may be a sort of Robinson Crusoe independance in chanting "I am lord of all I survey," but even the satisfaction of owning all the "land that joins" is apt to become irksome when there are compulsory conditions to balance the autocratism. The men who have advanced as the outskirts of civilization encroached their fancied liberty, who dreaded the sound of the steam whistle far more than the warwhoop, are becoming scarce. From following the Indian in the march towards the setting sun they have been driven to side courses, as the Pacific barred the way to western advances, and when the railway took the place of the covered wagons the "far west" became a myth and there came an end to the old-fashioned migrations. In former years there was a steady pressure impelling the outside to move first. It is not long ago since "the west" was Ohio, and then Indiana, Michigan, Illinois, Wisconsin. When the glittering metal was unearthed in the mill-race, Iowa had a narrow belt of inhabited lands along the main streams, and the restless white-covered wagons started on the weary pilgrimage. It required the golden stimulus to make that long journey general, and the solitary wagon was merged into a throng of caravans that marked a broad trail across the prairies and plains. But so large a majority of the travelers were intent only on obtaining enough of the dust to enable them to return, that the idea of seeking homes did not enter into the calculation. The trip was thought to be too trying for women and children to endure, and while the frontiersman when changing his locality was always accompanied by wife and weans, the argonauts counted the days anxiously that would return them to the hearth around which all their hopes clustered. California was rated a land of arid plains, huge mountains, deep canyons, and these impressions are not entirely removed at the present time. It was thought to be entirely unfitted for agriculture, its capacity narrowed to a pasture-field which required leagues to sustain the flocks and herds that roamed over such a wide extent that an ordinary-sized township was necessary to constitute a farm.

To dispel these illusions, which still hold sway, to afford emigrants an opportunity of learning the exact standing of the country, is the object of the railway company. At the eastern agencies there will be furnished intelligence that can be depended upon. Measures will be taken to convince the inquirer of the trustworthiness of the facts presented, and this has a bearing of great moment. So many rosy-hued stories have been sent from here that there is a general distrust, and statements may be well inside of the line of absolute facts, as there is a tendency to disparage, and "California bounce" is the verdict of the listener. The railway managers can make these agencies more effective than it would be possible for individual enterprise to accomplish, in fact, beyond what the State could do. There will be a sub-agent at every station, and that agent impressed with a sense of the importance of the duties assigned. Statistics will be collected at these points, showing what crops are grown, and the character of the soil. Thermal conditions are important to guide the person in making a location, and a hundred questions will be met with ready answers.

It is a great enterprise and well worthy of meeting with the hearty support of every resident of California. A circular has been issued calling attention to the establishment and this informs us that I. N. Hoag has been appointed commissioner, his location for the present being Chicago. A long residence in California, an intimate acquaintance with every portion of the State, and years of service as Secretary of the California State Agricultural Society, insures Mr. Hoag being the right man for the place. That it will not be long before the wisdom of the move is apparent we have full faith, and that the scheme will result in adding to the material resources of the country is beyond question.

The Fifty-Mile Race.

On July 4 there will be a fifty-mile riding race at the San Jose racetrack under the management of the San Mateo and Santa Clara Fair Association. Four riders will start, C. M. Anderson, P. Figueroa, J. N. Ganong and John F. Taylor. Under the conditions of the race the men will change horses at the end of every mile, dismounting and mounting without assistance. These long distance races are more common in California than any other part of the United States and it is right here that the best records have been made. Up to a few weeks since the time of the best fifty-mile riding record was two hours, one minute, thirty seconds. At Los Angeles Cardinal Pugh, in a race with C. M. Anderson, cut ten minutes off the record, riding the distance out in one hour, fifty minutes and thirty seconds. In this race Anderson, who will be one of the contestants at San Jose, was close up to Pugh at the finish and led him when twenty-seven and thirty-six miles out. The fastest mile made in that race was 1:57 and the next best 1:59, both times including dismounting. This is a feat that Anderson has got down to a science. He can easily vault from one horse to another while both are going at full speed. Besides riding several 50-mile races, Anderson also won a six-day race at the Bay District race track and an eight-day race at the Union base ball grounds. In both of these races several records were broken but the time was not kept with sufficient care to make the performances generally acceptable as records. Figueroa has also ridden several long-distance matches and bears a splendid reputation as a rider of endurance. In this match the result will depend as much on the quality of the horses used as on the skill of the riders. Pugh demonstrated that when he beat Anderson at Los Angeles. He had the best stock and, while he had no advantage as a rider, easily won the match. These long-distance contests are such a novelty, especially to visitors, that it would not surprise us to see San Jose crowded on July 4, and a large attendance at the race track.

An American Victory.

Last Wednesday the unnatural old "mother" England, had a first class beating from her overgrown son, Young America. This time the turf was the arena, the Ascot biennial stake the event, and James R. Keene's chestnut colt, Blue Grass, the champion, it being his second win on English soil this year.

One swallow does not make a dinner, and one win does not prove conclusively that American horses are superior to English horses, but all the evidence and all the signs are pointing to the conclusion that in a year or two, England will have to come to America or Australia for race-horses to fill out her depleted studs, or confess herself beaten at her own great national sport. The situation was ably and truly expressed by an Australian home breeder who paid us a visit this week, and who was just returning to his colonial home from a business and and pleasure trip to England. Said this gentleman: "There are too many weeds in England, and they have nothing else to breed from."

Going further with the matter, this gentleman gave his views on thoroughbreds more fully. Said he: "Every sale of horses in England is attended by large delegations of buyers from Germany, France, Italy, Spain, Russia, Portugal, Australia and America. The Germans are the most liberal bidders. They will buy the best, no matter what the cost. The Colonists will give any price for extra fine brood mares, and by the time all the foreign buyers have done there is nothing left for home use except the weeds and a few very fine horses that no money can purchase. In England a thoroughbred is good for nothing except racing. They are too light for hunters, not compact and cobby enough for driving, and so they must either show form as racers or be cast aside altogether.

"Consequently the racing stables are the only home of the thoroughbred mare. Farmers don't want them and won't breed them. In Australia it is different. There are many uses for the thoroughbred and a good market for other purposes than racing, so that a mare showing a lack of speed qualities is preserved and her produce are often found valuable. In my opinion it is only a question of time when England will find her best blood entirely gone and will have to go into the business of buying thoroughbreds instead of selling them."

The Chico Fair.

The great impetus given to colt trotting by the fine performances of California colts has been so generally felt that all the large associations are alive to the necessity of helping the boom along. The Chico Association, which is a progressive and go-ahead body, has recognized this fact and by reference to our advertising columns it will be seen that a special race for colts has been added to the Chico programme. The Directors have been very liberal in this matter, offering a purse of $250 for two-year-old colts, two in three heats. This race should draw out quite a large number of entries, mostly confined to Butte, Colusa and Tehama county horses. The colt race is to be trotted on the first day and will be followed by the trot for the three-minute class.

On Wednesday, the second day of the fair, the programme includes three running races. First is a three-quarter-mile dash for two-year-olds, next the Union Hotel Stake, a 1⅛-mile-dash for three-year-olds, and lastly the Reavis Stake, three-quarters of a mile and repeat, free for all. Thursday and Friday are to be devoted to trotting and Saturday to running. All entries will close on July 20, at 11 p. m., with J. H. Krause, Secretary of the Association, at Chico.

Will not Go East.

Late in the week we heard that E. J. Baldwin had ordered Gano and Lucky B back from Salt Lake to Santa Anita, and also that Stemler & Ayres were about to bring Joe Howell and Fred Collier back to Sacramento. All the California heroes have been scratched for the handicap engagements East, and it is more than probable, though we have no definite information on the subject, that George Howson's pair, Augusta E and Jim Douglas, will not make their expected Eastern trip. The sickness in Baldwin's stable is the cause of this failure of the California horses to fill their Eastern engagements. The expense of transporting one or two horses would be so much in excess of any sum they could possibly win that the owners did not feel justified in continuing their trip on from Salt Lake. We are sorry that such is the case. Gano, Lucky B, Douglas, Howell, Collier and Augusta E would worthily have upheld the fame of California racers on the Eastern tracks, and would have been a splendid advertisement for the horse-breeding interests of the Golden State.

The Sacramento Expulsion.

Last week we copied from the Sacramento *Bee* a card written by Charles H. Shear and indorsed by the signature of M. M. Odell, which apparently exonerated Shear from the charges that led to his expulsion. When we gave further publicity to the card and made it the theme for extended comment, we took into consideration the fact that it had first appeared in a Sacramento paper of large circulation where it must have been seen and read by all the parties. Ten days elapsed between its publication in the *Bee* and our reproduction of it at Shear's request, and in all that time there was no intimation that the facts stated in the card were incorrect or that Mr. Odell's indorsement had been improperly obtained. The card was never denied, so far as we can learn, before we published it, but now it appears that the case is not as Mr. Shear claimed it was. Mr. M. F. Odell of Sacramento makes the following statement in relation to the card:

I, M. F. Odell, owner of the pacing horse Shaker, never subscribed my name to the card published by Chas. H. Shear in the Sacramento *Bee* and copied in the BREEDER AND SPORTSMAN of June 2, 1883. These are the facts: I was called upon by Mr. Shear to deny the statement made that I had snpported him during the winter. I went with him to the *Bee* office and authorized Mr. McClatchy to deny that assertion; but I did not authorize any one to sign my name to anything else. The name signed was M. M. Odell, which is not my name. Mr. W. F. Smith was substituted by me in Shear's place at the earnest solicitation of my friends, who had been to the judges and obtained permission. I do not intend to exonerate Mr. Shear in the card he published, only so far as it relates to his being or having been supported by me. M. F. ODELL.

Sacramento, June 2, 1883.

Mr. M. M. Odell was not in Sacramento, and took no part in the affair, so it does not seem clear by what right Shear used his name in the *Bee*; that he had no right to use the name of M. F. Odell, the owner of Shaker, is evident from the above card. As to the facts of the expulsion, we learn the following from a most trustworthy source:

After the third heat, the relatives and friends of Mr. Odell went to the stand and asked the judge to put up a new driver behind Shaker. Some one suggested the name of Wilbur Smith. The judges assented to his driving. When Smith got in behind the horse Shear said to him: "I'll bet you can't drive him in 38. There ain't no man can win this race with him." After Smith won the race with him the judges had some intentions of ruling Shear off then, but thought they would wait and obtain some more evidence. The club sent for Mr. Odell and Harry McConn, who had noticed the horse somewhat. Upon being questioned, Mr. Odell stated that, after the second heat, he was satisfied that Shear was not trying to win, and after consultation with his friends concluded to change drivers, and did so; that he had taken the precaution to send a man to the stable with him after each heat, as he did not have confidence in this man Shear. McConn stated that the horse had the appearance of having been filled up with water; that he looked as though he had been given salt and water, and that only the day before he knew of Shear taking $25 from a man with the intention of pulling Sadie S in her race, he being substituted as driver in last heat or next to last. Bad as was Shear's conduct as driver, if this statement be true, it is far less infamous than using the name of a gentleman without his consent, and to bolster up a statement which was not correct. The matter now appears in such a shape that the botom facts must come out, and the public must know beyond a doubt exactly who is right. The gentlemen who saw fit to expel Shear have it in their power to obtain from Mr. M. M. Odell a positive statement in regard to the use of his name. If it shall appear that his name was used without authority, as the statement of his son, Mr. M. F. Odell, leaves no doubt but that it was, we hardly see what course Shear can pursue except to modestly retire from the notice of the racing world. We have purposely left the question open in this discussion, believing that when unassailable proof can be obtained it is better to wait for it a few days than predicate strong denunciation on evidence that is only collateral, though of the most convincing character.

The Wrestling Match.

Smarting under his late defeat and eager to retrieve his lost coin and laurels, Donald Dinnie has made another match with Muldoon under more favorable conditions to Dinnie than was the former one. We believe that Muldoon has engaged to perform a harder task than his strength and skill can handle, and it would be no surprise to us to see Dinnie the victor. We do not aim to forecast the future, and only make these remarks that our readers may understand clearly that the match is a hard one for Muldoon to win, and, should he lose, it will be the fault of stringent conditions. The enforced wearing of a Leotard, or some kind of jacket, gives Dinnie a great advantage and prevents Muldoon from slipping his hold and avoiding Dinnie's superior reach and back strength in the Cumberland-atyle wrestling.

The Salt Lake Trouble.

The first dispatches received from Salt Lake announced that Patsy Duffy had been ruled off for foul riding, it being alleged that he deliberately fouled and cut down Ordnance, injuring her so badly that she was not expected to recover the use of her leg. This news was quite a painful surprise to Duffy's many friends and admirers on this side, and it was generally believed that some mistake had been made in the dispatch. For this reason many people, ourselves among others, suspended judgment on the case until they should have heard the full particulars from an authoritative source. Such information has not yet come to hand, and still we have no official evidence about the case, but from outside and apparently unprejudiced sources we have learned further particulars that have led us to believe that Duffy was not as guilty as at first represented, and, further, that it is more than likely that the Salt Lake Jockey Club will reconsider its first action, and reinstate Duffy at an early date. One gentleman, in whose word we have a good deal of confidence, says that he saw the affair plainly, and that while it is true that Fred Collier cut Ordnance down, it was a sheer accident that no jockey in the world could have avoided under similar circumsteuces. We hope that this is the case, and that Duffy will be able to convince the Salt Lake Club of the fact. We always liked and admired Duffy as a jockey. While thoroughly alive to his owner's interest, he never took any unfair advantages in any of the races we have seen him ride; he was never troublesome to starters, and when he had a complaint to make of any nature, he made it in a proper manner. He never made foolish nor trivial complaints, obeyed instructions readily and always, so far as we know, rode to win. He certainly had the confidence of owners to an unlimited extent, and enjoyed the reputation of being one of the best riders and the best finisher on the coast. This is high praise, but it is our deliberate conviction, and, we believe, nothing more than is due him.

Late on Friday we received the following statement from an eye-witness, and the accuracy of which is vouched for by several well-known California turf men in whose judgment and honesty we have the most implicit confidence.

EDITOR BREEDER AND SPORTSMAN: I noticed in the daily press of Saturday last a telegram from Salt Lake purporting to give an account of the race between the horses Fred Collier and Jocko, and the mare Ordinance, in which Patsey Duffy, rider of the former, was ruled off the track for the alleged fouling of the latter. The dispatch went on to state that the mare was "ruined for life," and after censuring Patsey in terms of falsity, proceeded to uphold the dignity of the Salt Lake judges who had willfully wronged the boy by their action.

Now, the real facts of the case are these: I was a witness of the race from beginning to end, and ont of simple justice to an honest rider, desire to tell all whom it may concern just the extent of blame that can be attached to Collier's rider for cutting the mare down. The track at Salt Lake is a half-mile in circumference, and is noted principally for its sharp turns and extremely bad condition, making it dangerous to the life and limb of any horse or jockey that braved its curves. The race in question was a two mile and a quarter dash. Jocko had the pole, Ordinance second and Collier on the outside. In this position they ran for a mile and three-quarters, and had just passed the judges' stand on the last time around. Jocko still led, with Ordinance lapping him and Collier trailing a length behind. One of the sharpest curves on the whole track is encountered shortly after passing the grand stand, and Duffey saw that Jocko and Ordinance, in order to properly make the turn, would have to swing away from the pole toward the center of the track. With that quickness of perception that has distinguished him in moves in a hard-won race, he saw that by lugging the pole and making a brush for the lead he could secure the former from Jocko; with this in view he urged his horse between the others and the point designated, but the rider of Jocko, anticipating his designs, pulled his horse towards the inside of the track, thus preventing Collier from coming up. At this moment, Patsey, in order to save the race, swayed Collier towards the outside, but in so doing struck the hind legs of the mare and cut her down, purely by accident, as all present could see. Jocko won, Collier second and Ordinance far in the rear. Her injuries, however, were not near so bad as at first reported, an examination showing merely a small cut on the inside of one of her hind legs, so slight that to speak of her permanent injury is all bosh and Mormon ignorance and ill-will. The "latter-day" judges placed Ordinance second, Collier third, and ruled Patsey Duffy off the track. A dispatch from him on Wednesday, however, conveyed the information that he had been reinstated, a move on the part of the Salt Lake Jockey Club as blundering as the first was wrong, because, having ruled him off the track, they have no authority to deal further with him, as that rests with the Court of Appeals.

To credit him with wrongful intentions in the premises is worse than silly. He is under contract, at a salary of $2,000 per year and percentage of winnings, to ride the coming season for Messrs. Curlisle & Corrigan of Colorado, owners of the famous racer Pearl Jennings, and he could not afford to do a bad act on the turf, laying aside the fact that his record heretofore has been as pure and clear as that of any rider that ever lived or died. Very respectfully,

HORACE STEVENS.

Sacramento, Cal., June 7, 1883.

The Santa Cruz Fair.

The Santa Cruz Agricultural Association has claimed the dates of July 31, August 1, 2, 3 and 4 for its second annual fair. The speed programme will be advertised in due time.

Editorial Notes.

In answer to various inquiries as to what McInerney, the Eastern oarsman, intends to do, the Lowell man states that he will return as soon as possible to Lowell and try to get on a match with Driscoll, his old antagonist. His opinion of San Francisco oarsmen has greatly improved and it is likely that his experience will be the means of giving the Eastern men a better idea of the quality of the Pacific Coast scullers. When Leahy made his remarkably fast five-mile record at Richardsons Bay the Eastern sporting papers laughed at the idea of a San Francisco sculler lowering the record and have refused to give Leahy a place in the table of aquatic records. There are plenty of men who will bet their last dollar that Dan Leahy in good fix can beet Peterson in his best form on any course longer than two miles, and Peterson has shown himself to be able to vanquish with ridiculone ease a man whom the Eastern authorities place in the second class.

The regular monthly meeting of the California Coursing Club was held at their rooms 539 California street last Wednesday, Vice President John Hughes in the chair. Dominick Shannon, one of the earliest coursers in California, was elected a member of the club. It was decided to hold the fall meeting at Merced on the 8th and 9th of November, leaving San Francisco on the 7th. As this will be the first match for the club's $500 gold cup, a large entry list is assured, and the attendance is certain to be larger than ever before. None but greyhounds belonging to club members will be allowed to contest for the cup. The usual money prizes will also be given at the meeting. The club will meet as usual next month.

St. Julien has began the season in becoming style, having beaten Fanny Witherspoon straight heats at Cleveland on Thursday in 2:18¾, 2:19½, 2:21. Mr. Hickock has succeeded in getting a race with Clingstone, and a match has been arranged between the whilom demon and St. Julien for $1,000 a side to be trotted over the Chicago Driving Park on July 19. It promises to be a sensational event, as the Chicago Association add $5,000 to the stake and $1,000 additional if the time of Maud S is beaten. The stakes are now in the hands of Secretary Hall.

The excellent programme of the San Mateo and Santa Clara county Agricultural Association will be found in our advertising columns. The late hour at which it was recorded precludes review this week. And this is not the sole reason for deferring comment. The BREEDER AND SPORTSMAN office has been this week in the throes of change. Carpenters and confusion have held possession and if readers descern jolts and square corners in the editorial *ensemble* they may understand what distracting influences have been at work. We hope to hear the glad acclaim of peace before Monday dawns and will undertake to supply delinquencies when the calm has settled.

The Californians have suffered two defeats from the Haverleys. Yet that club is not down-hearted, and it is understood that at the next game, which takes place on July 15, they will wager any sum from $100 to $500 that they will win. Their nine is to be reorganized and strengthened.

The Base Ball game to-morrow will be between the Woonsockets and the Redingtons, and as the clubs are evenly matched, it will undoubtedly be an exciting and interesting one. The Woonsockets have made some changes in their fielders.

Ordnance, the mare injured at Salt Lake, is five years old; by War Dance, out of Bonnie Kate by imported Knight of St. George. The latest advices are to the effect that she was but little injured, and will soon be in a condition to resume work.

Blue Grass Biennial.

On Wednesday last, June 6, James R. Keene's chestnut colt Blue Grass won the race for the Ascot Biennial stakes for three-year-olds over the T. Y. C. course, the last five furlongs and 136 yards of the "new mile." J. H. Houldsworth'e Lilac ran second and E. E. T. Weaver's John Jones third. There were seven starters, including Keene's Potosi. Betting at the start was nine to one against Blue Grass, five to one against John Jones, six to one against Lilac and six to one against Potosi. Potosi, who was ridden Watts, led to the distance stand, when Blue Grass, ridden by Cannon, drew out and won by half a length from Lilac, who was only a neck in advance of John Jones.

The race for the Royal Hunt cup was won by Gerald's Elzevar, Lord Bradford's Nessiliff second, W. Gilbert's Despair third. Twenty-two started, including P. Lorillard's Sachem.

Blue Grass, the winner of the Ascot Biennial stakes, is a chestnut colt by Pat Molloy, dam Amy Farley, by Planet, out of Lulu Hortou, by imported Albion. He is owned by James R. Keene, and was bred by A. J. Alexander, Woodburn Stud, Kentucky. He was purchased when a yearling by Colonel S. D. Bruce for $950 and shipped to England in the fall of 1881. He started three times unsuccessfully in 1882 as a two-year-old. He started first at the Newmarket second October meeting in the Ditton stakes, and was second to Prince Soltykoff's Lord Brudenell. At the same meeting he ran unplaced in the great Challenge stakes, won by W. S. Crawford's Energy. At the Newmarket Houghton meeting he ran unplaced in the Cheveley stakes, won by Mr. Beauchamp's Pastry Cook. He won the Burwell stakes at the Newmarket second meeting, making his winnings in all some £1,170.

Pat Molloy, the sire of Blue Grass, is by Lexington, dam Gloriana, by American Eclipse, foaled 1865. He has been a fair getter of race horses, notably Effie, who won seven times, three times second and ten times third out of twenty-eight starts.

Silk Culture.

Parties claiming to be posted in sericulture assert that this State can annually produce $30,000,000 worth of raw silk. This is about twice the amount of gold yield, and it would seem that, as mining gives out, sericulture might be profitably entered upon.—*Sacramento Bee.*

It would be indeed a happy thing for the State and the country if California could secure by her own productious some portion of the millions of money that are annually sent abroad for foreign silks. The effort is worth making, notwithstanding the signal failures that have heretofore attended experiments in silk culture in the United States. Whatever is done, let it be done in cold blood. We want no repetition of the silkworm craze that swept over the country several years ago, resulting in disappointment and disaster for the experimenters.—*Los Angeles Mirror.*

THE KENNEL.

A Talk From the Inside.

San Francisco is badly in need of a gennine kennel club composed of geutlemen who will take an active interest in the breeding of dogs for tbe pleasure they have in a fine animal. This is not intended in any way as a reflection on tbe old club hut, tbe fact is the old club needs reorganization and the admission of so mucb blood, before it can be of any use, tbat, like tbe knife that needed new blades, springs and bandle, it would be perhaps cheaper and easier to get up a new club.

Was the old club ever any good? some people may ask. Truthfully one can answer, "it was." It made dogs and their doings more prominent than ever before in this state and set tbe sportsmen to work looking for complete and correct information about dogs. It is true that the club is in a measnre to blame for tbe dreadfnlly had management of the late bench show, hut its only sin lay in placing confidence in the ability and desire of Mr. Levy to carry out his promises. It seems necessary to be plain-spoken about this affair and fix tbe blame where it belongs, for so far the status of the club in tbe show does not appear to he fully understood. The American *Field*, after speaking in a very kindly manner anent the show, says: "It seems that tbe show was financially a snccess, for which reason tbe exhibitors were not satisfied with the value of the prizes awarded, and some of them determined tbey wonld not exhibit another year. Such a basty conclnsion is not wise. It is trne the prizes were not of great value, but tbe honor of winning must be taken into consideration, and cannot be weigbed in the scale with money; and again, the club mnst he encouraged. With a fund on hand tbey can do better, and no douht will, next year."

More's the pity tbe kenuel club canuot accept this kindly encouragement, though the members are not nngrateful for it. The mauagers of the show got all the money (which hardly paid expenses); the club did all the work and incured a good deal of odium which, as they were originally responsible for the show, they partly deserve. Tbe cluh allowed the managers to run the show aud pocket the proceeds, if there were any. The managers agreed to furnish feed, care, hall, attendance and valuable gold and silver medals for prizes. The cluh lent the force of their names and influence, and agreed to he responsihle for the judging. In other words, the club did nearly all the work, aud the mauagers took all the pecuniary risks and money if there was any to take. It was a foolish arrangement to make, bnt the clnb was small, had no friends and could not spare the time to attend to the husiness departmeut of the show. The club kept its side of the contract. It got all the entries possible and judged the dogs to the hest of its members' ability. Mr. Levy did furnish some valuable medals, but he also gave many that were trash not worth having. The dogs were neither properly cared for nor properly fed, as the managers agreed, and the members of the club who were aware of this neglect, fonnd they could do nothing unless they did it with their own hands, and at their own expense. A lawyer was consnlted regarding their power to make Mr. Levy fill his agreemeut to the letter, and he advised that the club had no legal standing, not having been incorporated under the laws of the State. Perforce the club had to submit, as they had no power except moral snasion. The exhibition and the club euffered alike. The one was not treated fairly, and the other had to bear the blame for faults not their own, and which they could not remedy. But as the cluh primarily got the show up, they are not in the best possible position to make a zealons effort to extend their influence. They doubtless feel that it wonld be better for new men to undertake the task of furnisbing a clnb that would be a kennel clnb in the broadest sense of the name. The material is here, and we hope to see the work done. J. W. Bassford, T. A. Taft, A. W. Havens, Tristam Burgess, A. Miller, Crittenden Robinson, W. Hearst, H. M. Briggs, Fred Sharon, James Flood Jr., Homer Fritch, W. Z. Tiffanny, W. P. Willard, E. H. Farmer, O. A. Tolle, H. Payot, C. N. Post and H. A. Bassford are all lovers of the dog, and know the needs of the State, and it wonld be a good thiug for them to call their friends together and start a club that would command the respect of every dog fancier in the State.

A Member of the Old Club.

Thibet Dogs.

An Englieh writer gives tbe following account of the importation of a pair of Thibet dogs by the Prince of Wales:

"It ia a century aince Warren Hastings, whose predilection for rare animals and desire to acclimatize them aerved to occupy and amuse the leisure of bis later yeare, endeavored in vain to obtain specimena of the far-famed dog of Thibet, and we are not awarc that any other person has been snbsequently more successful in introducing a breed into this country. Owing, however, to the kindness of Count Szechenyi, a Hungarian nobleman, an account of whose interesting travels in tbe far east was published some two years ago, the Prince of Wales has become the possessor of a male and female of tbe race, and will probably, with his wonted liberality, afford tbo public an opportunity of seeing them in Regent's Park during the ensning season. Connt Szecbenyi had heard so many reports in China—where, however, they are almoet as great strangers as with us—of the aize and beauty of theae dogs that he was very anxious to become personally acquainted with them, and on the first opportunity that presented itself at Batang, the frontier town of Cbina, on the route to Lassa, he pnrchased three, at a very coneiderable price it is understood. He found that they were fully deseving of their reputation in looks, courage and sagacity. In some respects they are said to reeemble the handsomest specimens of tbe Newfoundland breed, but have a head very much larger, to which, moreover, an air of imposing dignity if not fierceness is added by a thick, shaggy mane, which grows forward ao as to encircle the face like a frill. Their formidable aspect is still further enhanced in tbeir native mountains by artificial means, for tbe shepherds and herdsmen who employ and are very proud of theae useful yet dreaded animals often fasten round their necks hoa-like wreaths made of the bristly hairs of the yak, and painted red, a species of decoration which gives them a still more leonine appearance than that which they owe to nature.

German Field Trials.

The following particulars of field trials held in Germany in April have been forwarded to us by Prince Albert Solms: 1. Berlin Field Trials—(a) German Derby: Beat setter, Mr. Friedman's Irish setter hitcb Freya. Beet pointer, Prince Albert Solms' pointer dog Grant, bred by Mr. Grant by King (739) out of Maid of Medina (10,097); Grant beat [illegible] and won tbe Derby. (b) All-Aged Stakea: Several well known prize winners competed in this stake, amoug them the pointers, Naso III, and Quail (Mr. Rickof's, formerly the property of Prince Albert Solms) and the English setter Roderick. Tbe stake was won by Prince Albert Solm's English setter Tam of Braunfels ("K. O. S. B." 1,140), a brother to Sir Allister, by Tam O'Sbanter out of Daisy; second prize, Herr von Zansen Osten's English setter Jacqnes. 2. Cologne, Field Trials—(a) Puppy stakes: First prize, Prince Albert Solms' pointer dog Grant (tbe Berlin Winner); second prize, Mr. Kreuser's pointer hitcb Belle, by Naso II (8,123) out of Young Flounce (11,361), bred by Prince Albert Solms. (b) All-Aged Stakes: First prize divided between Prince Albert Solms' Tam of Braunfels and Mr. Freiderich's pointer Wotan, by Naso II, out of Venus of Braunfels, (11,359), bred by Prince Albert Solms; second prize divided between M. Dodgement's Do and M. Micband's Priam, both pointere belonging to Belgian gentlemen. Seventeen dogs competed in this stake, among them being Mr. Cockerell's English setter Prince and pointer Borax, both formerly the property of Baron Amerongen.—*Kennel Gazette.*

English Kennel Club Trials.

Tbe Kennel Club field trials were held at Tarrant Granvil, England, on the estate of Mr. H. R. Farquharson, May 1, 2 and 3. The Ninth Derby, for pointer and setter puppies bred in 1882, was the first on tbe card, and was won by Mr. Llewellin's hlack, white and tan setter dog Dashing Clinker, hy Dash II—Countess Rose. Mr. James Bishop's lemon and white dog Brave Bijou, by Fop—Bonny Laurel, won first for best pointer; Mr. R. Lloyd Price's lemon and white hitch Bribery, by Lord Lieutenant—Professional Beauty, second. In setters Mr. Llewellin was second to his Dashing Clinker, with Duke Pbœnix, by Dashing Duke—Phantom. Tbe setters and pointers in tbis stake are run separately, the best of each breed getting £50; second best of each breed £20, and £50 additional to the absolute winner. This is the fourth time Mr. Llewellin bas won the Derby. The all-aged stake was won by Mr. E. Bishop's Little Bess, by Blue Boy—Maud. Sixteen started.

A Great Dane Club.

The English have lately taken a great fancy to the breed of dogs classified by Yonatt & Stonehenge as Great Danes, and often spoken of as Siberian mastiffs, or Danish boarhounds. A club has been formed. In it was carried "that the club be called the Great Dane Club," and a notice to this effect he forwarded to the Kennel Club, reqnesting tbem to alter the name in their schednles, stud book, registration forms, etc., from boarhound to the Great Dane. The following members were then enrolled: Lord Charles Innes Ker, Sir Peyton Skipwith, Bart.; Captain Lindoe, Rev. N. J. Mellon, Rev. N. J. Harvey, Rev. G. F. Sams, Messrs. Frank Adcock, R. Leigh Pemberton, Bambier Bolton, L. E. Shirley, J. Bengongh Clark, T. B. Phillips, F. G. Fenwick, Thomas S. Davy, R. Bryan, R. Groom, J. M. Drew, M. Hazehrigg, James Kennedy, Arther Vares, C. Petrzywalski, J. T. Engerran, J. B. Berrie. Prince Albert Solmes wes elected President.

Rather too Warm.

William Lambert has matched his dog, Roderick Dhu, against T. Cronin's Lilly of Killarney for $25 a side; the match to be run at Newark on June 29. R. Warwick and John Sillery have been selected as judges and to choose a referee. This may be good sport for the spectators but is rather warm work for the dogs and rough on the hare. Messrs. Lambert and Cronin may have forgotten that coursing ie ont of season from March 15 to November, because the weather is too warm for dogs to run safely.

Mr. C. F. Willard, Jonesboro, Ill., has lost by death his Gordon setter dog champion Grouse, from heart disease. Grouse was one of the most noted prize-winning Gordons in this country, and was for a nnmber of years looked upon as the typical Gordon setter. Mr. H. Campion, Philadelphia, Pa., has lost by death, from poison, his setter dog Don; a dog with quite a local reputation as a field dog. He was of the Gildersleeve family.

Mr. G. W. Bassford of Colusa, like many another exhibitor at the late bench show, has been doctoring dogs ever since the show wae over, and has a bad prospect of loosing his fine pointer dog Ranger Boy, from a combination of diseases contracted at the sbow through drafts, neglect and uncleanliness.

A Pacing Thoroughbred.

We have stated time and again that we have seen thoroughbred horaes pace and rack, and mentioned such horees as Yorick, by imported Yorkshire, dam imported Lady Scott, by Androssan, Robert Bruce, hy Clinton, dam by Sir Archy, imported Knight of St. George; Denmark, hy imported Hedgeford, dam Betsy Harrison, by Aratus, and a nnmber of others. But as these horses were dead before the question arose whether a thoroughbred ever paced or racked, it was impossible to point to a living example; and therefore the atatement was doubted by many. There are many in the last few years who have seen Aaron Pennington, Calvin, Billy Walker and Taxgatherer pace when coming np to start; but we have a strong living illustration of a pacing thoroughbred that the curious can investigate for themselves. In November, 1880, Messrs. G. W. Bowen & Co., Runnymede Stock Farm, Paris, Ky., bought at public sale in New York City the bay mare imported Regatta, by Knight of the Garter, dam Henley, by Oxford, in foal to Vedette. May 25, 1881, Regatta produced a dark brown or black colt, The Admiral, that was a natural pacer at his birth, paced as a yearling, and paces now, and goes all the saddle gaits. The Admiral is now in Messrs. Bowen & Co.'s string of racehorsee, and the curiona on this subject can investigate the matter for tbemaelves. He is a very promising youngster as a racehorse, and would, we think, pace fast, if the gait was cultivated.—*Kentucky Live Stock Record.*

Tbere is no profit in keeping a hog until it is eightee months old, and, althongh auch an animal may posibly reach the weight of 400 pounds, the heavy weight will not compeneate for the food conaumed. A pig farrowed in April and slaughtered about Christmas will more than return his cost, for it muat be taken into consideratiou that during that period he will be but a pig, and the earlier feedings small in quantity. He ahould weith 250 pounds when killed. especially if a grade Essex or Berkahire, and the carcass will contain a fair admixture of lean and fat. Very large hogs are very often only fit for the lard tubs, and very often only for the aoap market. Tbe quantity of the meat influences the price, and the differeuce of only one cent a pound amounts to quite a aum in the whole. The profitable hog is the one tbat ia grown quickly, fatted without delay and marketed before it begine to consume the food laid up for winter.—*Farm and Garden.*

BASE BALL.

League Games.

Games won and lost by clubs of the California Base Ball League from April 1 np to date:

	Woonsocket.	Haverly.	California.	Redington.	Total Games won.	Runs Made.	B. H. Made.
Woonsocket	.....	.....	1	1	2	22	36
Haverly	2	.....	2	*	4	52	45
California	.....	.....	.....	1	1	19	18
Redington	1	*	1	....	2	19	23
Total Games Lost	3	0	4	2	9	112	122

* Game postponed on account of rain.

California versus Haverly.

Tbe California base hall mine was bnt slightly strengthened by tbe accession of Sharkey of the old Star Clnb as pitcber, a fact demonstrated by last Sunday's game with the Haverlye at the Recreation Grounds. Hack, the former pitcher, was sent out into the center field. Whalen, the other new player, was a blank. Tbe score—13 to 1—showed clearly enough that no better playing can be expected from the Californias this season. McDonald, their catcber, is a hard worker, but be cannot throw a ball to the second base without giving tbe runner a chance to make third, and several players at tbird got home on bis passed halls. Smith ie an excellent first haseman, Piercy good at the third, and Emerson would make a good short stop if he were not so careless. The remaining members of thie nine deserve no special mention. The Haverly nine ie excellent throughont. Meegan pitches a hct, curving ball, that the batters can do nothing with, and, in fact, the Californias scored hut one base hit during the game, tbis by Smith, in the ninth inning, on which he ran three bases, and desperately tried to reach home, bnt was put out by Carroll, who caught the ball from Johnson away off in the field. Carroll, as catcher, rarely misses or muffs, and throwe to bases with great accuracy. As may he seen by the score, the one run of the Californias was made in the fourth inning by Smith. He secured his first base on called halls, stole second, ran to tbird on a strike hy Emerson to Gagus, thence to first, where the batter was pnt ont hy Barnes, and he reached the bome-plate on a grounder from Angus to Johnson. The only inning in which the Haverlya made no rnns was the eighth, then Barnes, Levy and Morris were put out at the first base hy Smith. During the course of the game the spectators upon several occasions manifested, by calls, criea and hoots, their dissatisfaction at tbe nmpire's rulings, and this was very nnjust, since Van Court has all along endeavored to be strictly impartial. His ruling in each case was undoubtedly correct. Following is tbe complete score, kept by J. Hennessy.

The Acmes and Mntnals played a game yesterday at the Presidio, resulting in a victory for the former by a score of 4 to 1.

Muscle at the Bat.

Tbe following facetions account of John L. Sullivan's late exhibition in the hall field is from the New York *World* of the 29th: When J. Lawrence Sullivan stepped out on the diamond at the Polo Gronnds yesterday, ladies on the Grand Stand waved their handkerchiefs and clapped their hands, tbe numerous sportiug celebrities engaged in "knocking out" achooners rushed away from the "cafe," forgetting to deposit their nickels, and shonted in nnison with the small boys, who had come over the fence to save the ticket collectors trouble. It was a royal welcome, and the hero of much less than a hnndred battles smiled and folded his arms and felt what a glorious thing it was to be a "champion knocker-out."

"Mnscle!" remarked a big man in a gray snit, "look at that for muscle," and tbe speaker and a bundred others immediately declared that it was a most astonishing display of muscle. Of conrae it made no difference to these critics that Mr. Sullivan was dressed in a baggy haseball suit and that no muscles conld be seen.

When the umpire called time the champion went to his position as pitcher. Cheer after cheer went np while Sullivan went through the cnstomary rontiue of rubbing his hands on the ground and wiping them off on his white trowsers. When he picked up the ball he rolled it first in his palms, and theu held it for a minute or two in his rough hand. The crowd was silent, and every one felt that the little man behiud the bat who was to officiate as catcher had been an imprudent man, if he were not padded with sheet iron.

Of course the hall he was about to deliver would split some boards in the Grand Staud if it went hy tho catcher. This was a foregone conclusion.

"'Eave 'er, John," suddenly cried a shrill voice from the grand staud. Mr. Sullivan immediately looked where Harry Hill and Gabe Case were burying their noses in Milwaukee and a sad smile flitted across his features. But the smile was there only for a second. Then his hack bent, the big, powerful hand, so well known to Paddy Ryan and Mitchell, stole slowly back behind and the next momeut the hall shot forward.

Was the catcher killed? Was the batsman knocked out? No. The batsman struck the hall fairly and squarely, driving it far out in the field. Mr. Sullivan looked sick, Harry Hill was disgusted aud declared the knocker-out a failure. Thia was true. Mr. Sullivan was a failure, a most obvious one, so far as pitching went.

But the crowd was still hopeful; if Sullivan couldn't pitch he at least could bat.

When "Sullivan to the bat" was called out, the cheering was deafening, but no Sullivan appeared. The great benefit man was sitting on a camp-stool, rubbing his arm, which was aching from the effects of his pitching. He got up at length, and in two minutes, actual time, walked from his camp-stool to the bat, a distance of forty feet.

He plauted his heels squarely in the earth and prepared to knock out the ball.

The first ball delivered had a strong outward curve. The pugilist saw the ball but not the curve, and the bat swung around his head like a pin wheel as he aimed a most terrific blow at the sphere. Had the bat been about a yard longer and the ball been pitched a great deal higher, there is good reason to believe Sullivan might have hit it. Sullivan puffed like a horse after this effort, and looked at the pitcher in a bewildered way, and then sadly at the sporting celebrities dipping their mustaches in beer. He did finally hit the ball, sending it twenty feet away from where he was standing, and made a dash for first base.

Esterbrook picked up the ball and threw it to Brady, on whose error Sullivan got his second base. He only got to his third base and there was left. Sullivan was undeniably the chief feature of the game after its first inning. Creden, R. D., the pitcher of the picked nine, and Murphy, R. D., the catcher, assisted Sullivan in getting his bases.

The most brilliant play made by the pugilist was in the sixth inning. He had got to his third base, by the good batting of the "Mets," and attempted to run home on a hall knocked to left field. An average base-runner would have made three bases on the hit. Cramer stopped the ball and threw it in to Murphy, R. D. Sullivan was within one foot of "home" when Murphy, R. D., caught the ball and jammed it into Sullivan's stomach in the most scientific fashion. The fighter doubled up in a heap at the base. He had been knocked out and was now rolling on the ground. When he got up he looked at Murphy, D., with an admiring smile and then sadly shook his head.

Sullivan received half the gate receipts, amounting to $1,585 95.

The best and most hotly contested game of base ball ever seen in Stanislaus county was played at Modesto on the afternoon of Decoration Day between the Hudes and the Dudes, for a purse of ten dollars. The day was cloudy, with a stiff breeze from the north, which swelled the number of runs. The game was a tie to the last inning, when the Hudes won by a score of 13 to 12.

Hunting in the Neutral Strip.

The dreary, wailing wind
Sweeps over the billowy plain;
I hear the coyote's whimpering cry
As he runs in the chase again.
Miles and miles of prairie,
Arid, dun-colored and cold,
Where antelope graze,
And the mustang plays,
As they have for years untold.

South of Southwestern Kansas is a narrow strip of land that is in no state or territory. It was formerly part of Indian Territory. It runs east and west, is about one hundred and fifty miles long, and about thirty miles wide. The Cimarron canyon, that heads in the Raton mountains thirty miles east of Trinidad, crinkles in and out of it and Kansas on the north side. It is inhabited by a few cowmen, who love to live where the tax collecter comes not, and where they can be a law unto themselves. It is under the jurisdiction of no state or territory, and is not in the market for purchase or entry. Antelopes are plenty and tame. If one can find where they are bunched up in winter, it is quite easy for a couple of men to load a wagon.

November 1, 1882, Mr. A. S. Tracy, a sheep-man, who hunts two-thirds of the time, and I, started from Cimarron station, nineteen miles west of Dodge City, Kan., bound for the Neutral Strip. A span of Texas ponies, a farm wagon, lots of bedding, a three-weeks supply of grub, and a few cooking utensils completed the outfit. Tracy shoots a needle gun, or rather a compound. He first bought a Springfield needle gun, .50 cal., and being dissatisfied with the caliber, he sent the breech to Remington and got a 40-70 barrel fitted to it for $10. It is a tough looking gun, but shoots pretty well. I have got a Winchester, 45-60, and I believe it is the best kind of gun for me in the world. I am excitable, and if I miss the first shot I can generally fetch the game before it gets out of range.

Fording the Arkansas river, a broad, shallow stream, about up to the hubs in the deepest places, we went straight north over two miles of bottom-land, six of low sand hills, and then the journey seemed to commence. Twenty miles over ground that looks as level as a floor, you seem to make no headway on it. No game in sight. At three o'clock we struck the head of a draw leading into Crooked creek, and went down it. Saw a few antelopes in the valley below us, so we stopped, unhitched the horses, and went after them; but they either caught a glimpse of us or got the wind, for when we rose up to look, when we were, as we supposed, within shooting distance, all we saw was one old doe, about 400 yards off, looking straight at us, and the others beyond her, walking off. I looked at Tracy, and thought that if I had been alone I might have done better, and he probably thought the same thing. We had a little difference of opinion in regard to the best way of approaching them, and I had given in. Going back to the team we drove down to Crooked creek, and camped in a hollow, with plenty of wood, and passed a comfortable night, agreeing to pitch up in the morning, and go ont to Wild Horse lake, fifteen miles southwest. I filled the water keg after breakfast, and while picking up some wood to carry with me saw smoke half a mile up the creek. Went up there and found a cow camp—two white men and a colored cook—who had been put there to watch the cattle that were grazing on every side. There is a freight road near, and the boys were put there to keep people from killing cattle more than anything else. They wanted us to stop with them, but we declined and rolled out for Wild Horse lake.

After traveling about two miles we saw a band of antelope, ten or twelve, who moved off south, and stopped on the further side of a shallow draw about two miles away. Stopping the team, we got into the head of the draw and commenced crawling down it. After a half hour's hard work we landed in a hole about 125 yards from the unconscious antelope. Tracy, who shoots with rest sticks, arranged them, and I drew a coarse sight on a buck that stood broadside to me. "You shoot first," said I when I had a steady sight. Our guns cracked almost simultaneously; and his doe fell in her tracks; mine staggered, recovered, and trotted up over the hill after the retreating herd. I ran after him, and as soon as I got on the knoll saw him about 200 yards away, standing, humped up, stern toward me. I shot again, and he sat down, one hind leg broken. I had shot too low. Running up to within 100 yards, I sat down, and taking careful aim, rolled him over with a bullet in the eye. My first shot had gone too high, and hit him under the backbone, but above the heart. Disemboweling him, I went back where Tracy was just finishing the same job on his doe. We started for the wagon. I thought it was one way, he another; we each went our own way, and found it about half way between.

Driving down and picking up the game, we went on over another big flat, and as we crossed a little divide saw a big buck antelope, all alone, just ahead. Tracy jumped off the wagon, made a run, stopped and fired, and the buck ran off with a broken hind leg. We watched him, and he did not stop running for three miles, and we gave him up. It is a pity to wound an animal and not get him; the coyotes generally catch them. I have got a dog now, and don't lose wounded game. After looking regretfully after the puff of dust that still marked the retreating antelope, Tracy came back and said he wished he had not shot, and we went on. Just before sunset we came to a large dry lake that we thought could not be our lake, for the cowboys on Crooked creek told us that we would be sure to find water at Wild Horse, so we went on down the road, and soon met a wagon. The driver told us that the dry lake was Wild Horse, and that it was thirty miles to water if we went on, so we turned back, and together made a dry camp at Wild Horse. There had been water a few days before in a hole; it was still muddy, and all trampled up with horse and antelope tracks. We had supper together, and passed a jolly evening around our camp fire. The two men we met were strangers from North Park, Colorado, who had been hunting a stock ranch, and were going back to Dodge City, having found one that satisfied them in the Neutral Strip. We picketed the horses near the wagon, and went to bed.

Tracy nudged me after a while, and whispered: "Look at the wild horses." A band of twenty or so were feeding near us, and the stallion was fooling around our mare, which was picketed not twenty yards away. Tracy jumped up and went to the mare, and the horse trotted off a little way, but he could not make out what Tracy was, it being so dark, and was not frightened. We hitched the mare to the wagon, for if the stallion had got her loose he would have run her off, and it would have been good by mare. The band had probably come down in search of water. I watched their dim forms for a while, and then fell asleep. It arouses odd feelings to camp at ease on a prairie that it seems as if you could see every foot of for miles, with not a living thing in sight, and after dark to see shadowy forms drifting around. Wild horses, antelopes and wolves move around a good deal in the night.

At daybreak not a thing was in sight but our own horses. Tracy and I decided to hunt on foot till noon, and then turn back to Crooked creek for water. Our camp-fire companions struck out for Dodge at a lively gait, and Tracy went off on foot south, across the dry lake, while I struck north in the direction from whence the mustangs came and went. After a two-mile walk over level prairies, I saw two antelope running straight for me, heading for the lakes. I crawled into a buffalo wallow, and lay very flat till they came close to me. The doe, which was in the lead, stopped about 100 yards off to wait for the buck, and at the crack of the gun she fell, jumped up, ran a few yards and lay down. The buck stopped at long range, and I broke his hind leg near the ham. I aimed at his shoulder, but I did not have the trigger set, and pulled the gun off to the right, and also miscalculated the distance, as usual. He limped off, occasionally trotting a short distance. At last he crossed a draw that came in from the north, and I sneaked down into it after I had fixed my doe, and went after him, and by keeping out of sight in the bottom of the draw finally got up close enough and drowned him. After disemboweling him, and fixing him on his back with a leg stuck up so that I could find him easily, I started for camp.

Before I had gone far I saw a band of horses off east, traveling toward me, so I lay down to watch them. They came within a quarter of a mile, a stallion, four mares, and three colts. I aimed my rifle at a colt, and had a great mind to try him, but did not. Some people eat them. Johnson, of Aubrey, kills colts whenever he can, eats them, and says they are good. I heard that Bud Johnson sent six hind quarters of tough old mustang to Kansas City for buffalo, and made it stick. The horses finally scented me, and, after snorting and prancing around a little, ran off. In a few minutes they disappeared over a ridge, and I went toward the camp. Tracy had been stirring the game up some, south of camp, and several bands passed me going north. Finally I got a shot at a doe, and wounded her so badly that I drove her back toward the wagon as I would a cow. She had a yearling that hated to leave her, and I intended to shoot him when I got him near the wagon. I could have shot him several times but waited too long, for he got frightened and ran off at last. I walked up to within forty yards of the doe, and shot her in the head.

Just then Tracy came up, and asked, "What luck?" He had killed one, and just as we were hitching up the team another came to the dry lake, on the opposite side from us, and stopped in the tall grass. I told him to go for it, and I would take the team and bring my game first. When I came back I saw him shoot just as I came in sight, but could not see whether he had killed or not; when I got there he had him, and we soon got the other two, and rolled on the back track for Crooked creek.

We went straight to the cow camp and passed the night with the boys. We sat around the fire and told curious tales till late, and we slept in their tent, for the skunks were very numerous, and came into camp every night as soon as the fire went down. I could hear them rattle the pots around the fire whenever I was awake during the night. In the morning we hung up our game in some little trees, and struck out south with the wagon for the head of Spring creek, twenty miles south. We saw some antelope on the way, and did not get in till about dark. We found the spring, but no wood. It got very cold, and snowed about an inch during the night, but we were in a deep, narrow valley, and the wind did not strike us. We got up late and were cooking breakfast when I had occasion to go to the spring after water. We had camped purposely at a little distance from the water, in order not to disturb the game when they came to drink. Just as I got to the spring I looked up, and there stood a large herd of antelope staring at me. No gun, of course, so I played I didn't care, filled my keg, and the antelope ran off. I told Tracy what I had seen, and said I was going to watch the spring, and I did for two days, but did not see an antelope, while Tracy ranged out and killed two the first day and one the second.

The third morning I went with him and saw antelope after we had walked two miles over an awful rough country. We crawled up to them together in good shape, and both fired; Tracy shot too high, and hit his through the shoulder, and I shot too low, and broke my antelope's foreleg. He got his, and I chased mine about ten miles on foot, and I hope the coyotes caught him, for he acted awful mean.

I went down into the bed of the dry creek that went past them, and crawled along quietly until I had got close to the ones lying down, keeping perfectly still till I got rested, and my heart stopped beating hard, set my Lyman sight for about 200 yards, turned it down to shoot the first shot with open sight, rose up quietly, and killed an old buck near me so dead he never got up, set up the Lyman, and got in six shots as they went up the hill. I ran after the herd, passing two more dead ones, then sat down and killed one that was standing humped up on the hill, and then followed another wounded one, and shot at him, I think, about fifteen times, at distances varying from 100 to 400 yards, till at last I got him, when I sat down by him to rest, and take a chew by way of celebration.

The Lyman sight is the best thing I ever saw, when you once get used to it, for shooting on the run. When you get the fore sight of an animal running, and are looking through the ring, you can't miss him. It is as easy to shoot an animal on the run with it as with a shotgun. I never think of the back sight, and it seems almost as if I did not have any. I bought a Lyman sight, but did not like it because I did not get the hang of it; sent it back to New York, and then saw another man use one, and sent for it again, and now I would not sell it for any price. It must be just the thing to shoot deer with on runways before bounds.

I fixed my game, went to camp, harnessed up, went out and fetched them in, and just as I got there Tracy came in. He opened his eyes, I tell you; and when I asked what luck said, "Only one."

"I suppose you shot about a bushel of cartridges at them antelope, didn't you?" Tracy remarked as he chewed away at a piece of meat that was left from breakfast, to which I replied:

"No, not more than a peck," and smiled at him blandly. I am one of the disciples of Winchester, and shoot on the run, and he is a single-shot man, who shoots from two sticks set up crosswise, and it takes him about two minutes to get aim, and then he never gets but one, but he generally gets that. When I do get my lick in, I make it count—but I have bad luck occasionally, and it seems sometimes as if I could not hit a flock of barns.

Tracy finally went out and got his buck, and we loaded all we had into the wagon so as to be ready for an early start for home. Tracy found a little owl in one of the antelope that had been hung up for several days. He reached in his hand for the owl, and the owl reached out hill and claws for him, and then they both let go, and the owl flew away. I saw a large bevy of quail; hunted them a little while without a gun; then the sun set, and the coyotes laughed and gibbered till we went to sleep to their music and that of the skunks rattling the pans around the smouldering camp-fire.

At daybreak we started for home, with the wind blowing strong at our backs; reached the Arkansas at sunset, got stuck fording the river, and had the mare down for a while; got her up, procured another span of horses, and pulled out in good shape, Tracy and I both wet through. Home, dry clothes, supper, and such a good sleep.—*Cimarron, Kan., Cor. American Field.*

Raising Calves by Hand.

This article should begin much like Mr. Glass' famous receipt for cooking hare: "First catch your hare." First be sure that you have a calf that is worth raising. Get one that comes of good stock, of the sort of cattle that you wish, whether it be those famous for milk, butter, beef or work.

It need not necessarily be a thoroughbred in the common acceptation of the term, but it should be, upon the side of the father at least, descended from a line of ancestry famous for the quality you wish to perpetuate, and it should be well formed in every particular.

Let it be taken from the cow when about three days old, and at the usual hour of feeding give it, in a clean pail or dish, a little milk taken directly from the dam or some cow that has lately calved. Have the milk so fresh by drawn that it will not have lost much of its natural warmth, and then wet your finger, which should be perfectly clean, in the milk, place it in the calf's mouth, and if he begins, as he usually will, to suck the finger, bring your hand into the dish, so that the finger and the calf's nose will come just in contact with the milk. Frequently a well-behaved calf that has been handled quietly up to that time will make out to get two or three swallows before drawing his head away.

Then repeat the operation, but do not keep it up until the milk gets cold. Before the temperature is much less than blood heat replenish with more warm milk. Do not try to make it take too much at one time, as it will learn to drink sooner if allowed to get up a good appetite for the next meal. After two or three feedings you may gradually slip the finger out of the mouth while drinking, and although the animal, missing the finger, will need to have its head conducted back to the dish several times by the use of the finger, it will soon learn that the food is in the dish and not in the finger, and at ten days old will be drinking from the pail as naturally as an old cow.

Until this point is reached, the feed had best be milk fresh drawn from the cow. After that date a part skimmed milk, about blood warm, may be given instead of all new milk. At three weeks old, the food may be all skimmed milk, if care be taken that it is of the same temperature as new milk and is perfectly sweet. By another week the change to cold milk may be gradually made, and at two months old it will not matter if the milk is slightly sour. Before this time it will have begun to eat grass, and many farmers take the milk away at about that age, but if you have plenty of sour skimmed milk and wish to see your calf growing finely, you may continue on with it much longer.

When it comes a hot day, if your calf is staked out, remember that he may like a drink of cold milk or, perhaps, even better, a drink of pure cold water about noon. Managed in this way, there is but little chance for sickness; but if the scours, the most prevalent disease in calves, should appear, remove the calf to a place not soiled with his excrements, then beat up an egg and add a teaspoonful of pulverized charcoal, and give at once. This usually will cure any case if given when the disease is first seen. If you know the cause, whether improper food, irregular hours of feeding, or a chance of taking cold, which is often the cause, try to remove the cause and thus prevent a repetition of the difficulty.

I finally used a strong tea made of white oak bark, which I used in the drinking water as a preventive. When a fowl was taken sick I used it pure, giving several teaspoonfuls at a time, four or five times a day. I have taken fowls so far gone that they were past eating and drinking, and cured them in a few days with this simple remedy. As a disinfectant I use crude carbolic acid, pouring it on boards in the chicken house and on the perches, coops, etc., or anywhere that the fowls frequent. If W. will try this plan for a while, removing all infected fowls from the flock, and keeping surroundings clean, I think he will soon get rid [illegible]. *Cor. Country Gentleman.*

Deserving of Confidence. There is no article which so richly deserves the entire confidence of the community as Brown's Bronchial Troches. Those suffering from Asthmatic and Bronchial Diseases, Coughs and Colds shonld try them. Price 25 cents.

Herr Von Behr, one of the most distinguished German piscicultnrists, mentions the catching of a California salmon in the river Isa. It is believed that in time they will work their way to the Black Sea.

Market Report.

FLOUR—We qnote: Best City Extra, $5 50@$5 95; medium grades $4 50@$5 25; Sbipping Superfine, $4@$4 25 ℔ bbl.

WHEAT—Business ligbt. Milling, $1 67½@$1 70; No. 1 sbtpping, $1 65@$1 57½; No. 2, $1 50@$1 52½.

BARLEY—We quote: No. 1 feed, 95@97½c; good Brewing, $1@$1 02½ offered.

OATS—Fair Feed, $1 80@$1 90; Good, $2@$2 10; Choice, $2 15 ℔ ctl.

RYE—Quotable at $1 50@$1 50 for fair to good.

FEED—Gronnd Barley, $22@$23 ℔ ton; Cracked Corn, $35 ℔ ton; Sborls, $16@$17 ℔ ton; Oilcake meal, tbe oilworks sell to tbe trade at $35 ℔ ton, less the usual discount; Middlings, $20@$22 ℔ ton for lots at the mill.

HAY—Alfalfa, $9@$11; Wheat, $14@$16; Barley, $12 50@$14; Wild Oat, $14@$16; Mixed, $12@$14 ℔ ton.

STRAW—60c@75c per bale

PROVISIONS—Eastern Hams, 16½@16¾c; California, Hams, 15@15½c for plain, 15¾@16¼c for sugar-cured canvased; Eastern Breakfast Bacon, 15@16½c; California Smoked Bacon 15@15½c for heavy and medtum, and 15@15½c for ligbt and extra light; Clesr Sides, 15½@15½c; Pork, $18 50@$19 for Extra Prime, $20@$20 50 for Prime Mess, $24 50@25 for Mess, $25 50@$25 for clear and 26 50@$27 for extra Clear; Pigs' Feet, $16@$18¼ ℔ bbl; Mess beef, $15 50 for bbls and $8 60 for hf bbls; Extra Mess Beef, $16 50 for bbls and $8 75 for bf bls; Family Beef, $18@18 50 ℔ bbl; California Smoked Beef, 13½c.

FRUIT—We quote lots as follows: Apples, new, 75c@$1 ℔ box; Apricots, 40c@55c ℔ box for Pringle and 90c@$1 00 ℔ box for Royal; Cherry Plums, 50c@60 ℔ box; Currants, $4@$4 50 ℔ cbest; Raspberries, 8@12c ℔ bskt; Strawberries, $7@$10 ℔ cbest; Cberries, $6@$9 ℔ cbest for good to cboice; Gooseberries, 4@6c ℔ ℔; Peacbes, 8@10c ℔ ℔; Lemons, $7@$8 ℔ box for Sicily; California Lemons, $1@$2 ℔ box; Limes, $8@$12 ℔ box for Mexican; Tamartnds, 12@13c ℔ ℔; Bananas, 1 50@$3 ℔ bunch; California Oranges, $1@$1 50 for common and $2@3 for good to cboice.

VEGETABLES—We quote: Summer Squasb, 8@10c ℔ ℔; Carrots, 37½c@50c; Turnips, 50@75c; Cauliflower, 25@50c ℔ dozen; Cabbage, 60@80c ℔ ctl; Garlic, 3½c ℔ ℔; Celery, 50c ℔ doz; Dried Okra, 20c@25c; Dry Peppers, 10c@12½c ℔ ℔; Green Peas, 1½@2c; Rbnbarb, 6@8c per ℔; Mushrooms, 75c@$1 ℔ box; Tomatoes, $1 50@$3 ℔ box; Cucumbers, 12c@$1 50 per doz.; Asparagus, 65c@$1 ℔ box; Sprouts, 3c ℔ ℔.; Articbokes, 10c@15c ℔ doz.; String Beans, 6@7c ℔ ℔.; Green Corn, 25c ℔ doz.

POTATOES—$1@$1 50.

ONIONS—50@55c for good.

BEANS—Bayos, $5; Butter, $3 75 for small and $3 60@$4 for large; Lima, $3 40; Pea, $3 40; Pink, $4 75@$4 80; Red, $4 50@$4 70; small White, $3 50; large White, $3@3 25 ℔ ctl.

BUTTER—We quote jobbing lots: Fancy, 23½@24c; choice, 22@23c; fair to good, 17@22c; inferior lots from country stores, 15@17c; firkin old, 20@22½c for cboice; new, 22@25c; pickled roll, 24@26; Eastern 17@20c. Sometimes under.

CHEESE—California, 12½c for cboice; 10@11c for fair to good; do, factory, in boxes, 14@16c; Eastern, 15@17c.

EGGS—California, 27@28c ℔ doz; Eastern, 25@27c per doz.

POULTRY—Live Turkeys, gobblers, 18@20c; do, Hens, 17@19c; Roosters, $7 50@$8 for old and $9@$12 for young; Hens $6 50@$7 50 Broilers, $3 50@$7, according to size; Ducks, $6@$8 50 ℔ dozen; Geese, $1 50@$1 75 ℔ pair; Goslings, $1 50@$2 25 per pair.

IN THE STUD.

J. F. CARROLL'S GREYHOUND DOG, PAUL JONES, OENTLEman Jones—Brancb. Fee, $25. Apply at this office.

MAMBRINO WILKES.

Black Stallion, sixteen hands in height, by George Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christman by Todhunter's Mambrino or Idol, son of Mambrino Chief. Second dam by Pilot Jr. Third dam by Kentucky Whip. Idol's dam was thoroughbred and was by American Eclipse.

THIS IS THE LARGEST AND ONE OF THE BEST COLTS OF George Wilkes (weighing at this date 1,260 pounds) combining the Hambletonian and Mambrino strains and also several thoroughbred crosses. His colts demonstrste that he possesses in an eminent degree the same faculty of transmitting tbe family qualities to his offspring wbicb put George Wilkes in the front rsnk as a sire of trotters.

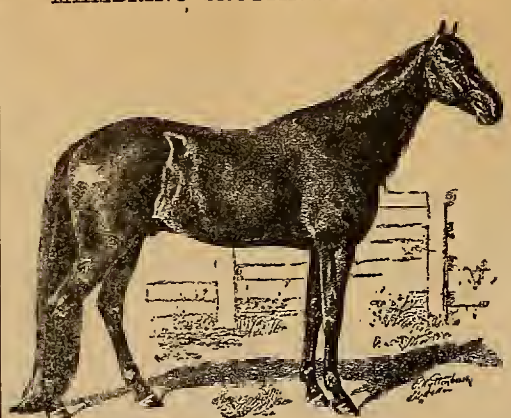
☞ George Wilkes has twenty representatives in tbe 2:30 list, of which 10 have records of 2:25 or better, 4 of 2:20 or better and 3 of 2:18 or better.

Will make tbe ensuing season, beginning February 1st, 1883, at STOCKTON.

In putting tbe price by the season at the low figure of $40 the owner does not acknowledge, thereby, any inferiority on the part of this horse to the other sire of Trotters.

IRVIN AYRES.

MAMBRINO TROTTING STALLION



ABBOTSFORD.

☞ Record at Six Years old, 2:21½. ☜

PEDIGREE.

BY WOODFORD MAMBRINO, HIS DAM COLUMBIA BY YOUNG Columbus. Woodford Mambrino by Mambrino Chief, his dam Woodbine by Woodford, a thorougbbred son of Kosciusko.

Woodford Mambrino is recognized to be tbe best son of Mambrino Chief. His own record is 2:21¼, and there are a large number of his get in the 2:30 list. Among them: Abbortsford, 2:21¼; Convoy, 2:22½; Magenta, 2:24½; Lady McFatridge, 2:29; Dacia, 2:29½; George A. Ayer, 2:30.

Besides tbose having public records, be is the sire of the two celebrated mares owned by Robert Bonner—Manetta and Malice. Manetta, witb a running mate, and barnessed to a road wagon, trotted two miles in 4:27¼, and Malice trotted a trial, on tbe same track, a mile in 2:19¾. Woodford Mambrino is also the stre of Princeps, tbe sire of Trinket; record, 2:14. Woodbine is also tbe dsm of Wedgewood, record, 2:19. Young Columbus, tbe sire of tbe dam of Abbottsford, bas nine of his get in tbe 2:30 list, so that on both sides of tbe house tbere are notable performers. Abbotsford is a ricb rosewood brown, 15¾ hands, and of very high form. His get are very promising, his daughter Jasmine having won the Embryo Stake for yearlings in 1881, and every one which has been put in tratning has sbown good speed.

TERMS.

Seventy-five dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the followtng season free of charge. Good pasturage at reasonable rates, and extra pains taken, bnt no liability for acctdents or escapes.

LOCATION.

Abbotsford will make tbe ensuing season, 1883, on tbe ranch of S. B. Whipple, Esq., San Msteo, sesson commencing Febrnary 15tb and ending June 1st, 1883. For full history see tbe issue of BREEDER AND SPORTSMAN of August 5th, 1882.

GEORGE BAYLIS. Agent, San Mateo, Cal.

No. 20—Running; one mile dash for all ages; $50 entrance, $15 forfeit, $125 added, second horse to receive his entrance and one-third of added money.

CONDITIONS AND REMARKS.

All trotting races are the best three in five, unless otherwise specified; five to enter, and three to start. Entrance fee, ten per cent on purse, to accompany nomination.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, three or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowances for mares and geldings.

Those who have nominations in stakes must name All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above.

Those who have nominations in stakes must name to the secretary in writing, the horse they will start on Monday, on the Saturday previous; and on Wednesday, the Monday previous; and on Friday, the Wednesday previous, and on Saturday, the Thursday previous, by 12 o'clock m.

No added money paid for a walk-over.

Horses entered in purses can only be drawn by consent of the judges.

Winners of all trotting races in their respective classes, at Oakland, Sacramento and Stockton, must go to wagon.

In all district races horses must have been owned in the district prior to June 1, 1883.

Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.

All entries to be made in writing, giving name, sex, color and marks of horses; also, name and residence of owner. In running races, full colors to be worn by rider; and drivers in trotting races are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by colors worn by drivers.

Entries to all the above races, unless otherwise specified, to close with the secretary on Wednesday, August 1, 1883.

Write "entries to races" on the outside of the envelope. **A. KING,** President.
T. S. MONTGOMERY, Secretary.

CONDITIONS AND REMARKS.

National Trotting Association rules to govern all trotting and pacing races.

In all trotting and pacing races, five to enter, three to start. Entrance, ten per cent, to accompany all nominations.

The Pacific Coast Blood Horse Association rules to govern all running races.

Non starters for running races will, be held for entrance.

No money paid for a race without a contest.

Non-starters must be declared out the day previous to the race they are engaged in, before 8 o'clock p. m.

Horses distancing the entire field in one heat will be entitled to first and third money only.

Horses entered for purses can only be withdrawn by consent of the judges.

All entries for races to close with the Secretary at Chico, August 1, 1883, at 11 o'clock p. m.

The Board of Directors will have absolute charge of the track and grounds during the week of races, and guarentee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the races will be strictly enforced in every respect, and all purses and stakes will be paid after the judges have rendered their decision, and before leaving the stand.

C. C. MASON, President.
J. H. KRAUSE, Secretary.

STOCK FARMS.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TAbles, with trotting statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

TWENTY

Fine & Highly-bred Broodmares

hred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There are in use at Fairlawu over one hundred HIGHLY-BRED BROODMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and raising fine, highly-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, made in 1881; another with a record of 2:23¼, another with a record of 2:26, made in 1882; another with a record of 2:28½, and a grandson with a three-year-old record of 2:23½, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20¼ to 2:30, a larger number than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records ranging from 2:15½ to 2:27½. No son of Rysdyk's Hambletonian has made as good a showing at same age.

ETHAN ALLEN JR., full brother of Daniel Lambert, who has twenty-two of his get with records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Ethan Allen, dam Fanny Cook, by old Abdallah; second dam by Stockholm's American Star; third dam by Red Bird, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23½ to 2:28¾, all of them being sons of his own pedigree.

The Fairlawn stallions have in 1882 had eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaughter to trot into the 2:30 list, viz.: Maud T, 2:28, by Hamlin's Almont Jr.; Carrie Medium, 2:27½, by Happy Medinm Jr.; and Carrie B, 2:28¾, by Elial G, son of Aberdeen. The stallions on no other breeding farm in America have made such a showing in 1882.

These stallions will be permitted to serve

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares, at $50 the season, with privilege to return such mares in 1884 as fail to stand. A few approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE OF EVERY ANIMAL FOR SALE IS PRINTED IN THE CATALOGUE. These prices will neither be advanced nor reduced A SINGLE DOLLAR until after May 1, 1883. PURCHASERS FROM A DISTANCE CAN BUY ON ORDERS AT EXACTLY THE SAME PRICE AS IF PRESENT IN PERSON AND ALL STOCK SOLD ON ORDERS WITHOUT THE PURCHASERS SEEING THEM CAN BE RETURNED BY THE PURCHASERS IF THEY DO NOT IN EVERY RESPECT COME FULLY UP TO THE DESCRIPTIONS GIVEN. Full written descriptions will be given auy applicant who contemplates purchasing.

Time will be given responsible parties at regular bank rates of interest.

ASHLAND PARK

TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Ballots, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

2-17y1 **B. J. TREACY,** Lexington, Ky.

Jerseys and Guernseys.

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Schuate, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the accepted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

TO

Sportsmen & Pleasure-Seekers.

TH

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTERREY,

THE MOST CHARMING

Summer and Winter Resort of the Pacific Coast,

with its heantiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Barracuda, Pompino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE

"HOTEL DEL MONTE,"

ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains

SPACIOUS SWIMMING TANKS

(150x50 feet) for warm salt water plunge and swimming batbs, with

ELEGANT OOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ,

IS VIA TH

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISSIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of rauge at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to

FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggagemen. Train Baggagemen are instructed to issue CHECKS for all dogs received in Baggage Cars.

☞In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leatber cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, and No. 2 New Montgomery street, Palace Hotel.

A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. and Tkt Agt.

JOHN A. McKERRON,
230 and 232 Ellis street,

SOLE AGENT FOR THE PACIFIC COAST.

WHITMAN PARK SADDLE.

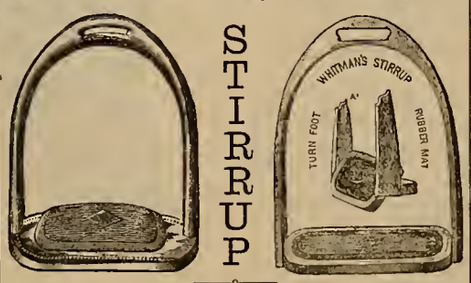
EASY AND SAFE

Riders or those who intend to become good riders should try these saddles. In conjunction with the WHITMAN COMBINATION HALTER-BRIDLE and the WHITMAN RUBBER-FOOTED STIRRUP these are the most stylish and comfortable outfits in use. They can be finished to suit any taste at from $15 upwards.

JOHN A. McKERRON,

230 and 232 Ellis St., Sole Agent for Pacific Coast.

WHITMAN'S RUBBER-FOOTED STIRRUP



THESE STIRRUPS ARE VERY HANDSOME AND THE RUBBER MAT A GREAT CONVENIENCE AND COMFORT TO THE RIDER, AS THE SLIGHT AMOUNT OF ELASTICITY PREVENTS SHOCK, WHILE THE ADHESIVE PROPERTY OF THE RUBBER HOLDS THE FOOT IN PLACE WITHOUT EFFORT.

No person ofter once using them will use any other.

JOHN A. McKERRON,

230 and 232 Ellis Street, Sole Agent for the Pacific Coast

ANTEEO.

DARK BAY COLT, NEAR HIND FOOT WHITE; FOALED MAY 5th, 1879; bred by Joseph Cairn Simpson, Oakland, California.

BY ELECTIONEER.

1st dam—Columbine, by A. W. Richmond.
2nd " Columbia, by imported Bonnie Scotland.
3rd " Young Fashion, by imported Monarch.
4th " Fashion, by imported Trustee.
5th " Bonnets o' Blue, by Sir Charle
6th " Reality, by Sir Archy.
7th dam—By imported Medley.
8th " By imported Centinel.
9th " By Mark Anthony.
10th " By imported Janus.
11th " By imported Monkey.
12th " By imported Silvereye.
13th " By Spanker.

See Bruce's American Stud Book, vol. 1, p. 207, and vol. 3, p. 79.

Will make the ensuing season, 1883, from February 15th to June 15th, at the Oakland Trotting Park. Terms $50 the season.

JOSEPH CAIRN SIMPSON,
Oakland or 508 Montgomery street, San Francisco.

THOROUGHBRED STALLION

X X,

BY MALCOLM, HIS DAM COLUMBIA, WILL MAKE THE ENsuing season at the Oakland Trotting Park. Terms, $25 the season.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam, Columbia, also by imported Bonnie Scotland, hence his name. Malcolm was one of the best racehorses of his day, and Columbia was also a fine race mare. For extension of Columbia's pedigree see advertisement of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wanamita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his breeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

JOS. CAIRN SIMPSON, Oakland,
or 508 Montgomery street.

Mares intended for either of the above stallions, and [illegible] by Donahue, Petaluma, Sacramento or Stockton boats [illegible] W. Morshead, City Front Stables, will be received, [illegible] of them and forwarded to Oakland

(Self-Adjusting) 1y1

The Corner Stone.

The ceremonies attending the laying the corner stone of the Pavilion of the California State Agricultural Society were imposing, as always are those of the Mssons. We have not space to give the whole, but inamuch as the prebatory remark, of the President of the Association appear to cover the ground our readers will get the cue from the appended account. As usual, Mr. Finigan has been happy in stating tersely with few words the scope and intention:

Ladies and Gentlemen: We have assembled to-day for one of the grandest purposes that can be imagined: The laying the corner stone of a building that is destined to be of vast benefit to the people of California. It is a difficult task to convey in few words the fnture importance of the structure to be reared on this foundation, and even the most sanguine of the present time can only realize in part the good which will come. It is eminently proper that it shonld be located where the inhabitants have shown their hearty appreciation by responding so liberally to the call for fnnds. In one afternoon, the committee which had the matter in charge secured a contribution of $40,000, an amount equal to what the State gave, and I have little hesitation in saying that there are few cities of the same or even larger population in the whole country, that would have shown such liberality. While every citizen of California can point with laudable pride to a building which is worthy of the grand country in which its products will be exhibited, the people of Sacramento can truly say: It is to us you owe this temple which will be dedicated to progress, and our endeavors have been crowned with a success in which the whole Pacific coast has an interest. Time with ruthless hand will demolish the wood which is used in the construction, but the spirit which prompted the act will always live, and the descendants of those who grace with their presence the laying of the corner stone to-day will rebuild it with marble from the quarries of California and ornament it with onyx and precious metals from our own hills and mines. Never was money donated for a better purpose. There will be lessons thst do not end with the annual fairs. There will be sermons more eloquent than fall from pulpits; homilies that will result in happier homes; teachings that will advance the well being of thousands and thousands. Agriculture will find a potent helpmate, and science find a field for better display of the wonders it makes, and the art which adorns the walls will spread over the whole country and make brighter the hearths and homes of a happy people. It is here where the home-teachings will be. At the park the utile is boldly presented. The best breeds of domestic animals, the noble horse, the lordly Durham, the graceful Devon, the milk-giving Ayrshire, the honeehold pets brought from the islands which were famous centuries ago for excellence of dairy breede, and the massive Holstein with the strong contrasts of color, eheep, swiue, the eilken-fleeced cashmere, poultry of a hundred varieties, a congregation in fact that no other State can equal. In the pavilion utility and beauty will be harmoniously assimilated. Ceres, Pomona, Flora, all represented by euch a profueion of offerings that again we can challenge comparison with a world. It is not necessary to rehearse to a large majority of thie assemblage what the products of our California fields are. Sacks of wheat, the kernele plump, amber-colored perfection, and of these bursting eacke, sixty-eight bushels, perhape, to a eingle acre. Barley, oats, maize, that neither the Mississippi nor Wabash valleys can eqnal, and a collection of cereale and vegetables, any one of which would be a show at an Eaetern exhibition.

Grand as the display is over which Ceres presides, her sister goddese Pomona outranke her in offerings. The melting peach, the juicy pear, nectarines, apricots, plums, and yet above all, the grapes. Purple, rosy-hued, topaz-colored, emerald bunches that require a strong arm to lift; clusters without a faulty specimen.

They bring visions of vine-clad hills, of slopes green when all else is sere. They tell of a future when this favored land will be the point from which vessels, wine-laden, will sail for all ports of the world; when a few acres will be a competence; a quarter-section a rich inheritance. Enriched by the copions libations which flow from the snow-clad Sierras, the deserts of the past will be the gardens of the future, and the demon drouth, banished by the aqueduct, will be followed by the damsel with a cornucopia from which rolls abundance.

Even at a time when the glad songs of the harvest home ring over the land, Flora has not deserted us. A stroll about your city at this glad period of the year would lead a stranger to imagine that in any clime which was north of the tropics there could not be such a gorgeous bloom at other times than in the months which we call springtime. There is a perpetual springtime in California, a succession of flower-decked seasons. Let the skeptic visit this place when September is well under way, the coming September (should no unlooked for hindrance arise), and it will be unnecessary to go outside of the building which will then be a bower of beauty, redolent with the perfnme of our autumn flowers.

There will be every care taken by the directory of the California State Agricultural Society that the building which will result from the munificence of the residents of Sacramento shall be an ornament to the city and, still better, of great advantage to the State. The first is secured by the selection of a plan which is beautiful in design and admirably adapted for the intended purpose. The second will be gained by a well-directed endeavor to perfect a display which none can be so dull as not to derive advantsge from and so attractive that the heedless will be forced to admire and adopt the lessons presented.

The Champion Runner.

William Cummings, of Preston, England, arrived in New York on the 7th, by the steamer Wyoming. Cummings is the fastest mile runner in the world. He has run numerons races and has now the best professional record in the world at 1,000 yards, run in 2:17; one mile, 4:16 1-5, and one and a half miles done in 6:43½.

The one-mile run of Cummings was a most wonderful performance and broke the record of 4:17¼, Lang's and Richard's dead heat, which had stood for so many years that many thought it never would be excelled. In his attempt to break the record May 14, 1881, Cummings had as a helper William Duddle, to whom he conceded twenty yards start, defeating him by two or three yards.

Cummings was brought to this country by Geo. D. Cameron (Noremac), the pedestrian, who has matched him as an unknown to run William Steele, who recently defeated Charles Price in a ten-mile race on the Manhattan Athletic Club grounds.

The distances at which Cummings and Steele will run are five and ten miles. The stakes for each amount to $1,000, and the first race, at the former distance, will be run in New York, June 16.

Cummings will also make other matches, and prefers to arrange a race at ten miles or one honr with George Hazael. He will aleo give any man in America a start to be agreed on, for a race at hie favorite distance—a mile.

He will also try to make arrangements for an exhibition with L. E. Myers, the amateur champion, at the eame distance at which George and Myere met in November last. There are, however, little prospects of such exhibitions taking place, as the amateur lawe expressly prohibit any exhibitions between a professional and an amatenr where gate money is charged. If, however, private trials between the two men, with competent officials, could be arranged, and the distances be made a half-mile, 1,000 yards and three-quarters of a mlle, some new records would probably be made, and those now on the siate wiped out.—*World.*

A Vermont sheep raiser claime the footrot can be entirely eradicated from a flock of sheep by dippiug the feet of every member of the flock, whether lambs or not, into kerosene oil, and then putting a pinch of sulphur between the hoofe. One repetition of the treatment at the end of two weeks, he claims, will be snfficient. They ehould be kept in a dry place for a few hours after each application of the kerosene.

Heavy Weights on Racehorses.

I wond er much whether this subject will ever be thoroughly understood. It only will he, I think, when we have men to the manner born, as it were, and with knowledge of horseflesh from their very youth up, at the head of affairs, and not before. Ask any trainer whether the small boys, weighing from 70 to 80 pounds, or the lads from 115 to 120 pounds, break down the the most horses during their preparation, and they will one and all tell you that the light weights do the most mischief. Why? Because they are not strong enough to hold their animals together in fast work; and if they cannot do it at exercise, when cool and collected, how are they going to in the heat and excitemout of a race? Seeing lads of 75 pounds to 80 pounds with wraps round their wrists, struggling to get round these sharp turns, makes my blood run cold, and backing snch pigmies is sheer lunacy. Talking of wraps, where in God's nsme did they learn that drop? It is the very worst and most dangerous practice I ever saw. First, teaching a lad the way to hold a thoroughbred is a game of "pull devil, pull baker" for one thiug, instead of handling his mouth like silk, and giving the urchin but little chance of getting clear of his horse should he make a mistake and roll over, for another. It is the first time I ever saw anything of the kind, and I hope it will be shortlived. To continue: The amount of money lost on these light weights is astonishing. The boy gets tired before his horse, and when you want him to really assist his mount past the post he is worse than useless, aud rolling all over the place. However, we have got good all at once in the State of New York, and the powers that be have tried hard to pnt down all betting, so it may be necessary to meet them on other grounds. We will take, therefore, the two of humanity and common seuse. Is it or is it not real cruelty, not only to the lads themselves but to all the jockeys in the race, puttiug up a bit of a boy to ride in a big field ronnd these turns who has no more idea of mansging his horse than a dummy? There is but one answer. If Mr. Bergh would put his foot down on the practice he would certainly hit the right nail on the head and have more support than he did over championing the little bicyclists. Now for gronnd No. 2. It is an ascertained fact, we will say, that snch and such a horse, with 130 pounds, can do a mile and a half in 2:44, and you have to handicap thst horse with another in the race that could not do a mile in less than 2:46 with any fair racing weight. I take the time test because it is the custom in this country. How are you going to put these two together? Clearly by raising the top weight some five pounds. It is useless lowering the bottom weight; it has not the desired result. Then why not do it? Because, you argue, the owners will not aceept with such heavy imposts on their horses, and the public comes to see the crack animals run. Jnst so. But this is through ignorance of the subject. I have ridden thoroughbreds all day, both in Eugland and Ireland, and at speed when behindhand, with 175 to 180 pounds on their backs, over all sorts of fences aud occasionally deep ground, aud yet seldom did one any harm. How is, therefore, carrying 135 pounds for a mile or so over a carefully prepared track going to injure a horse? As to chance of wiuuing, the nnmber of times I have seen a top weight win when run ou the off chance is legion, and this has made me study the class and never the weight a horse carries when trying to pick the wiuner of a haudicap. What I want owuers, therefore, to understand is this: That running a horse with 135 pouude on his back, with a good jockey to ride him, is far less risky than with 80 pounds aud a pigmy to haudle him, with wraps round his wrists to get him the turns, and that they ought to study more the class of animals they are called upou to beat with good horses thau the actual weight they have to carry. It is with great eatisfaction that I see the weights raised this year, as it gives the good men the chance of riding, aud I have but little doubt that the raciug will be much better in cousequence.—*Insignis, in New York Sportsman.*

The athletic directors of the Olympic Club have arrauged the followfng progmmme of sport for their meeting, which will be given at the Olympic Club Grouuds, Oaklaud, July 4: One-huudred-yard handicap race, open; 250-yard scratch race, open; three-quarter-mile handicap race, opeu; runuing high jump; half-mile haudicap bicyclo race, open; one-mile scratch bicycle race, open; five-mile scratch bicyclo race, open; one-milo handicap race (professional), open; $20 to firet, $12 50 to second, and $5 to third; entries free. For winners of the events for amateure gold and silver medals will be awarded. The open 100-yard haudicap will probably bring Haley and Masterson together once more and it is more than likely that Haley will start in the 250-yard handicap race.

ROWING.

More about Hanlan and Kennedy.

Tbe New York exchanges furnish fuller accounts of the Hsnlan-Kenuedy race than those which came by telegraph. The race was witnessed by about 5,000, and the crowd would have been much greater had they uot thought another postponement would result. At 4 o'clock a smart shower lasting for fifteen minutes heat down the waves and left the water as smooth as a mill-pond. The steam launch Escort, which was the judges' boat, steamed rapidly over the course as Referee Chsrles L. Knapp of the Lowell Vesper Boat Club ordered tbe men to come out. Tbere was a long delay in the coming of the men after everything was ready. Darkness was fast coming on, a breeze which had sprung up was ruffliug the water, and the crowd was getting auxious. At last at 6:30 o'clock the two men came swinging down the course, followed by a cheer running along the crowd upon the beach. At the word "Go," Kenuedy, who had the inside, took the water a little before Hanlan and got a lead of half a length at the start, which he kept duriug the first mile, Hanlan, however, keepiug him well up to his work. It was a pretty race for that distauce. There were fesrs of a fonl and indications that both meu were going out of the course. Hanlan was appareutly the first to discover this and thereby gaiued several lengths. By this time he had headed Kenuedy and tnrned the stake-boat four or five lengths in advauce.

After the first mile Hanlan evidently had the race in his own hands, and after turniug the stake-boat occasionally reduced his stroke to the miuimum and rowed at his ease, while Kennedy kept nearly the same stroke throughout the race. The official time—Hanlau 19:04, aud Kennedy 19:52—showe hy computation that Hanlan won by about twenty lengths.

When Hanlan crossed the line, beatiug Courtney's best record of 21:14½ by more than s miuute, there was the wildest enthusiasm. He appeared as though returning from a practice spin rather than a match race.

Kenuedy crossed the line in 19:52, also beating the record. The race was rowed on its merits, as Kennedy's friends acknowledge. $50,000 was up on the race, but of this not more than $20,000 was staked ou Kennedy. After the race Hanlan was followed to the Hotel Pines where he had made his headqnarters. Ou reaching the balcony he was loudly cheered and in response to the demand for a speech said that he had upheld the record of the honest oarsmen of America at home and abroad and was again ready to uphold it. The oarsman he had rowed agaiust to-day was a perfect gentleman and it was the hardest race he had ever rowed.

Keunedy was seen at bis room at the conclusion of the race, and upon being asked if he had expected to win said that his defeat was unexpected. He further said: "When I left the boat-house, after rowing four or five strokes, I found some trouble with my sliding seat which prevented me rowing more than three-quarters of a full stroke. I rowed an eighth of a mile out of the course, but, notwithstanding this, I consider Hanlan the better man, and had all my conditions been favorahle he would still have beaten me, although he would have been ohliged to make a record below nineteen minutes to accomplish it.

Is It a Ghost.

Considerable excitement has been caused in the neighborhood of Long Bridge for some time past by tbe spectacle of flickering lights in the Pioneer boat house at most unreasonable hours of the night. The old house has at best a mouldy look and the phenomenon alluded to confirmed the suspicion that the ancient shanty was haunted.

No matter how windy the weather or rough the water the lights appeared nigbt after night and as they shot their unsteady rays over the bay the anxious natives of the Potrero hngged their children to their breasts and the more superstitious offered up fervent prayere for the repose of the souls of the "old crew" who were supposed to have come back to raise the drooping energies of their club. The other night a belated sailor wbile stumbling over the bridge observed the lights and stopped to learn the cause of the illumination. After a clattering of chains that nearly froze the marrow on tbe bones of the inquisitive tar, the doore of the honse were snddenly flung open and a bare-headed, bare-armed and bare-legged man with side whiskers came out lugging a wherry uuder hie arm. He descended the steps and had nearly reached tbe water when the large log-chain attached to the outrigger of his craft suddenly pulled him back with a jerk that made bim exclaim: "Japers, ef I didn't forget to unlock me bhoat. It'e hell to be in the eame house wid that fellow White!" Having unloosed the eix-pound padlock from his wherry, the ghostly oarsman carefully deposited her in the water and sprang into her as if she had been a dry-goode box. A moment afterward the terrified sailor thought all tbe ferry boats in the State were churning up Mission Bay. With one mighty stroke tbe ghoetly oarsman shot up to the Point of Rocks, anotber giant pull eent him to the Rolling Mills, a tbird terrific stroke shot him round the mile buoy and two more brought him back on the rnshing ebb tide. As he landed and pnlled the sculls out of his rowlocks the astoniehed sailor heard him mutter to himself: "I guess that's good enuff fur any of them ecrubs. Ef I don't bate that bhoy from North Beach thie time, me name ain't——." The eailor failed to catch the name and when found in the morning by Bob Goble was lying flat on the bridge and nearly dead with cold and terror. A few jorums restored hie power of speech and enabled him to tell the strange etory here given.

Last Saturday Mr. George Searle made a trip to Felton in the hope of catching a few trout. He fished a couple of miles of Boulder Creek and sixty fine trout rewarded bis exertions. He caught no tritons, half a pound being the biggest fish in his basket. He discovered a fine pool, almost iuaccessible, where lie many finny moneters and there he will repair on eome future occasion. He keeps the location of this pool a secret and as yet has sternly refused all offere of reward for any information.

The bold fiehermen who sailed on the steamer Edith to the Farallone Islands last Sunday, there to catch the savage cod, and the gay and festive sea bass of commerce, retnrned to thia city soon after daylight with empty hands. Stress of weather forced them to put back and at one time instead of catching fieh for food, they came near becoming food for fish.

Arrangements bave about been completed for a barge race between fonrteen men from the receiving ahip Independence and a like numher from Vallejo. Tbe Mare Island men will pull the Alaska's barge and the Vallejoite in tbe barge belonging to the Adams. It has not yet been decided what distance will be rowed.

Fourth of July Regatta.

The regatta committee of th Fourth of July committee met on Tuesday aud decided to adopt with some slight alterations the programme of last year. The sum of $460 was appropriated for the regatta, aud with this the committee should make a very creditable showing. It will be impossible to have the programme this year exactly as it was last year, as at present there are no four-oar-shell crews in training. The programme of lsst year was a good one, but too long, and the result was that before the last event was decided many of the spectators went home.

Long bridge is not a pleasant place ou which to stand in the strong wind of a whole summer day and the committee will act wisely this year if it limits the races to those in which a good many starters can be obtained. It is of no advantage to have a four-oar-shell race if the only object of the competitors is to get the prize without rowing honestly for it. At present the Ariel four have the call on the prize and any other crew that can he put in will only be entered to enable the fsvorites to get $50 of the city's money. Moreover the Ariel four are not anxious to wiu the money and in fact reject with scorn such a paltry reward of seven weeks' traiuing. It certainly is very small, but as the desire of the regatta committee appears to be to get up as large a programme as possible noue of the prizes can be of much value. The matter might be arranged with more satisfaction to the oarsmen, who have to train for weeks, aud with greater pleasure to the public, by reducing the number of events and increasing the value of the prizes. In the large Eastern regattas they never present such a long programme as that given at Loug Bridge last year, when there were second-class barge races and lapstreak races. Such a thing as a second-class race of auy kind, in au open and consequently a professioual regatta, is out of place. There should be first-class events only and thus make every man win on his merits. The single scull race should be rowed in the forenoon as early as possible, as after 11 a. m. the course is almost certain to be swept by half a gale of wind. In the afternoon there should be a wherry race, four-oar-shell race, barge race and Whitehall boat race, and no more. This programme will occupy several hours and no ordinary admirer of aquatic sports wants to staud ou the bridge auy longer. The distribution of prize money should be iu proportiou to the importauce of the eveut and the number of starters. Thus for example tbe wherry race should command but a small prize in comparison with the single scull race, as there will be no man in the wherry race who can get within hail of the winner of the single scull race, whoever he may be. The wherry rowers will be nearly all novices.

The single scull race will be a hard contest iu which every good man on the bay except Peterson will be entered, aud amougst oarsmen will attract more atteution than any other eveut. There will be at least five starters and the man who wins in euch a field will have well earned a good prize. The four-oar-shell race ie always an important event as crew-rowing on a shell is the acme of the art and entitled to liberal reward if only for the purpose of encouraging it. The barge race will be a less scienti6c contest than the race in four-oar shells but is nearly always exciting and serves admirably to fill up a programme for the afternoon when the wind is fiercest. A whitehall boat race invariably attracts a large number of starters and is consequently deserving of a place on the programme. Judging by the number of men in training at present the single scull race and the wherry race will be the two most exciting events of the next regatta. The Ariel four-oar-shell crew, which was the only one in training, etopped work on Wednesday as soon as it wae announced that the prize would not be over $50. The crew own the shell in which they intended to row and refused to be bound by a by-law of their club which compels the winner of prizes to donate a portion to the club. Deducting the club's share out of the $50 offered by the city, would leave the crew ecarcely anything for their work but glory and that is not regarded by professionale ae a commodity worth toiling for. The regatta committee has offered a special prize to be competed for by Dsn Leahy, Henry Peterson, Austin Stevenson and P. McInerney. Leahy desires it to he stated that he has not sat in a boat for two years and would not row a boy without six weeks' training, as he turns the scale at 200 pounds.

Stevenson's brother announces that the champion will not meet Peterson in any race for a smaller stake than $500 and McInerney saye he will be back in Massachuesetts before the Fourth of July and besides would never again race on our unfriendly and turbulent bay.

Courtney made his first appearance of the season at Cazenovia on the 25th of May in the presence of a small crowd. His opponent was James Ten Eyck. Courtney looked etrong and healthy but was in no condition to row. He had undergoue no training and had had but little practice. His weight was 197 pounds, while his rowing weight is only 1ß0. Ten Eyck was in much better condition, having trained himself carefully for the contest. It was nearly 6 o'clock when these oarsmen slipped iuto their shells and took up their positions. Ten Eyck won the toss and took the course next to the shore. At the start Courtney got a slight lead. He held it for a moment ouly, wben Ten Eyck closed up the gap, and the shells moved side by side to the quarter huoy. Ten Eyck theu pushed ahead and took the lead. Then both came together and would alternate in spurts and leading, until, at the close of the last quarter, Courtney pulled away from Ten Eyck and passed the line halfa boat's leugth ahead. The distance was three milee. At the time of the race the wind had died down and the water wae as smooth as glass. The official time was given as 21:52, but wae close to 24 minutes.

Tbe eiugle-scull race on the 4th of July at Long Bridge promisee to be a hotly-contested affair. There will be at least five entries and possibly seven. Several of the competitors will be new meu. Davis of Vallejo, who is mentioued as a starter, is spoken of as a good man. Hen ry Peterson's younger brother will also compete. He is said to he almost as fast as his stalwart relative. The Piouеer Club will enter Sullivan, White and Flynn; the Ariels will be represented by Fred Smith, who is unqucstionably a good mau, and by some younger scullers.

The barge which John Twigg is makiug for the Ariel Rowing Club hids fair to be the best racing craft of the kind ever made on this coast. She is of Mexican cedar and white piue and will weigh not more than 110 pounds, although her dimensions are thirty-eix feet long, three feet four inches beam and twelve inches deep. She will be finished by the 27th inst.

Most of tbe streams near Santa Cruz are about fished out, though there is plenty of water in them. The trouble is that tbere are too many fishermen on the beaten linee of travel, city anglere being unable to strike out for the better stocked though less acceseible streame farther from the railrosde.

Hanlan is tweuty-eight years old. Keunedy, who made such a game race with the champiou the other day, is thirty years of age, and took up rowing as au exercise to benefit his health, which had become affected by his trade as a jeweler. He successively defeated John Fayer of Portland, Me., John O'Donnell of the same city, Dauiel Driscoll of Lowell, George W. Lee and James A. Riley. He was beateu by F. A. Plaisted in a three-mile turning race at Silver Lake, June 17, 1879; Edward Hanlau, July 1 following, four miles aud one turn, at Brockville, Ont.; James H. Riley, August 29, 1878, three miles; Riley, August 9, 1879, at Pittsburg; Hanlan, August 18, at Barrie, Out. On August 20, 1882, he challenged Charlee E. Courtney to a three-mile sculliug race for a stake of $1,500 a side, bnt the latter decliued to make the match. Kennedy has also rowed nnmerous double-scull races and gained many victories therein. He is at present a member of the firm of Morgan & Kennedy of No. 933 D street, N. W., Washington, D. C.

The Long Bridge critics think that Dobbins of the Golden Gate Rowing Club has an easy thing in tbe Fourth of July wherry race. Welch of the Ariels is to enter. Growuey is lookiug for a boat and says that Mr. Dobbins will not get tbe money without rowing for it. Dobbius certainly sculls in better form thau any of the wherry rowers but "the race ie not always to the swift."

The Golden Gate Rowing Club will enter a barge crew for the Fourth of Jnly regatta, with a full-blown supervisor, Mr. Griffin, as stroke oar. The Pioneers will try to match this official crew with auother stroked by Supervisor Sullivau.

Louis White has purchased a wooden shell of Twiggs manufacture, and, although not in good fix for a race, will row in the Fourth of July regatta. Louis is the kind that never spoils sport.

Trickett raised the money to send Jack Largan here. Jack had the worst of luck, and lost his three fiue boats in addition to all his races.

Double-Team Performances.

Twenty-oue years ago Mr. Robert Bonner astonished the horse world by driving Lady Palmer aud Flatbush Mare a mile to road wagon in 2:26, and three days after sent them two miles in 5:01¼. The team had not been keyed up for the performance, which made the feat all the more remarkable. Douhle-team trotting became fashionable both on the track and the road. Ben Franklin and Jessie Wales, Coufidence and Leviathan, Honest Ance and Latham, India Rubber aud Rosa, and other noted teams essayed to beat the trial time of Mr. Bonuer's team without success, uutil, in 1867, Bruno and Bruuett trotted ou the same track in 2:25¼, driveu by John Lovett. Neither of theee performauces were records. Black Harry and Belle Strickland were the first team of trotters to make a technical record of 2:30. This was on October 5, 1869, for a purse of $2,000. Honest Allen and Jessie Wales got the first heat in 2:32¾, Black Harry aud the mare winning the others in 2:32, 2:30, 2:32¼. The following September they were beaten by Honest Alleu and Jessie Wales, in straight heats; best time, 2:29¾. In 1871 George Wilkes and Honest Allen cut the record down to 2:28, repeating the performance within a month. Perhaps no finer tesm of entire horsee wae ever seen on the turf, and both were great single as well as double.

The stallions' time was not beaten for five years, when, in 1876, Jessie Wales and Darkness lowered the record one-quarter of a second. The year after Gen. Cobb aud Lulu May trotted together in California in 2:27½. Molly aud Nigger Baby, owned in Philadelphia, were the next to beat time, trotting in 2:25½ in 1880. The year 1881 had a number of eensational events in team trotting. In fact, wealthy owners and lovere of the sport vied with each other in having the honor of owning the fastest team. Mr. Vanderbilt led off with Small Hopes and Lyssnder at the Gentlemen's Driving Park, June 23, driving the team a mile to top wagon iu 2:24¾. Mr. John Shepard of Boston, two days after, had his team Blondine and Mill Boy beat this time by a second, and on September 23 they went under the wire in 2:22. Matters did not rest here, as Lysander and William H, on the 7th of October following, teamed old Fleetwood track in 2:20. We will pass over the trial miles of Aldine and Early Rose in 2:16½ and Cleora and Independence in 2:21¼ last year. The fastest technical record to date is 2:16¾, by Edward and Dick Swiveller, made July last. There are aspirants for eclipsing the record of the chestnut and the bay, among the most notable being the team Enchantress aud Midnight, ownsd by Mr. Wm. Rockefeller of this city. This team a few days since reeled off a trial mile in 2:22¼, driven by their owuer after very little preparation. Judgiug from this performance they will be dangerous competitors either agaiust time or actual opponents. It will be noted that, with few exceptions, the teams with fast recorde have also had fast records in single harness, and, in some iustauces, such as Edward and Dick Swiveller, Molly and Nigger Baby, Blondine and Mill Boy, Lysander and William H, they have beaten their harness records when driven double. Aldine, Early Rose, Independence, Midnight, George Wilkes and Cleora have haruess records better than 2:25, while Enchautress, Small Hopes, Lady Mac, Independence, Bruno and Jessie Wales are within the 2:30 limit.

While the geueral public reads of these remarkable douhle-team records and trials there are few who fully realize how hard it is to bring about these performances. It is a very difficult matter to bring two horses together whose stride, speed, action, eubstance and size are equal. Color is a secoudary consideration; still, cross matches are not sought for as a general thiug. When two horses like Mr. Work's or Mr. Vanderbilt's team are secured, their owuer has indeed a prize. It is uot every horse that is good in single harness that is good to the pole. One of the hest teams it has beeu our good fortuue to hehold was the bay mare Adeliua R and mate, formerly owned by the late Gen. Brisbin. They were splendidly matched iu regard to color, size, action and style, and although not exceedingly speedy, were fast enough for a gentlemau's purposes. The perfect rhythm of their movement constituted their value. Perfectly halauced, with a beautiful sweeping gait, of fine conformation and style, they were an ideal team. Forty years ago 2:40 in siugle harness was considered good time, hut there is a wide difference between that and 2:16¾ to a road wagou. It only goes to ahow the possihilities of the Americau trotter iu double harness.—*New York Sportsman.*

A swimming match between the men of the receiving ship Iudepeudence will take place on the Fourth of July. The course will be from the ship at Mare Island to the upper buoy and return. The entrance fee is one dollar, and the following have entered: Poutus Hulton, L. M. Ayers, Frank Peareou, J. B. Brotherton, J. F. McWilliams, J. T. Gearin, J. B. Lewis, Charles Cassell, Frank Johnson.

TURF AND TRACK.

THE FALL MEETING.

Open and Closed Events of the Blood Horse Association—Closing Day for Nominations.

The fall meeting of the Blood Horse Association will be held at Oakland Park on August 11, 13, 16 and 18. The following programme of races will be observed:

First Regular Day—Saturday, August 11.

No. 1—Introductory scramble; purse $200, of which $50 to second horse; free for all; five-eigbths of a mile; entrance free.

No. 2—Ladies' Stake; for two-year-old fillies; $50 entrance, $25 forfeit, $200 added; three-quarters of a milé; second to save entrance; closed witb tbe following nominations:

No. 1. J. K. Gries' b f Nettie Hill, by Joe Daniels—Mary Wade.
No. 2. E. J. Baldwin's b f by Rutherford—Glenita.
No. 3. E. J. Baldwin's ch f by Grinstead—sister to Clara D.
No. 4. E. J. Baldwin's ch f by Grinstead—Josie C.
No. 5. E. J. Baldwin's ch f by Grinstead—Mollie McCarty.
No. 6. Theo. Winters' ch f Callie Smart, by Norfolk—Mattie A.
No. 7. Palo Alto's br f by Monday—Riglin.
No. 8. Palo Alto's s f by Norfolk—Glendew.
No. 9. Palo Alto's bl f by Wildidle—Frolic.
No. 10. Palo Alto's br f by Norfolk—Lizzie Whipps.
No. 11. Palo Alto's s f by Norfolk—Frou Frou.
No. 12. C.Van Buren's cb f Fiamma, by Monday—Abbie W.
No. 13. W. L. Pritchard's ch f by Bazaar—Tibbie Dunbar.
No. 14. W. L. Pritchard's ch f by Bazaar or Leinster—Minerva.
No. 15. J. B. Haggin's b f by King Alfonso—Miranda.
No. 16. J. B. Haggin's b f by Pat Malloy—Glenuine.
No. 17. J. B. Haggin's b f by Monarchist—Heliotrope.
No. 18. J. B. Haggin's b f by Monarchist—Alert.
No. 19. J. B. Haggin's b f by imported Glenelg—Edna.
No. 20. J. B. Haggin's ch f by imported Glenelg—Susie Linwood.
No. 21. J. B. Haggin's br f My Love, by Virgil—Ligbtfoot.
No. 22. J. B. Haggin's b f by King Alfonso—Titania.

No. 3—Vestal Stake; $25 eacb, p. p., $300 added; second to receive $100; third to save stake; for three-year-old fillies; dash of one and a quarter miles; closed with the following nominations:

No. 1—J. C. Simpson's b f Lady Viva, by Tbree Cheers—Lady Amanda.
No. 2. P. Robson's ch f May B, by Shannon—Jessie R.
No. 3. P. Coutts' bl f Flou Flou, by Monday—Jennie C.
No. 4. Thos. Aitchison's b f by California—Rosetland.
No. 5. Theo. Winters' b f by Norfolk—Ballerina.
No. 6. Theo. Winters' b f by Norfolk—Balinette.
No. 7. Tbeo. Winters' ch f by Norfolk—Mattie A.
No. 8. J. B. Cbase's b f Marian, by Hubbard—Electra.
No. 9. J. B. Cbase's ch f Laura, by Sbannon—Folly.
No. 10. W. A. J. Gift's br f Miss Gift, by Wildidle—Kate Gift.
No. 11. Caleb Dorsey's ch f by imported Partizan—Pet.
No. 12. Caleb Dorsey's ch f by imported Partizan—by Lexington.
No. 13. Palo Alto's ch f by Leveller—Frou Frou.
No. 14. Palo Alto's ch f by Hnbbard—Tebama.
No. 15. Palo Alto's ch f by Shannon—Camilla Urso.
No. 16. J. B. Haggin's b f Nubia, by Leinster—Ada A.
No. 17. J. B. Haggin's ch f Irene, by Leinster—Ireue Harding.
No. 18. J. B. Haggin's ch f Sopbia, by Bazaar—Sophia Jennison.
No. 19. J. B. Haggin's ch f Belle, by Leinster—Flusb.

No. 4—Hnrdle race; pnrse $250, of which $50 to second horse; $25 to third; one mile and repeat over four hurdles; entrance free.

Extra Day—Monday, August 13.

No. 5—Purse, $200, of which $50 to second horse; free for all; dash of three-quarters of a mile; entrance free.

No. 6—Rancho del Paso Stake; $25 eacb, $10 forfeit, $200 added, of which $50 to second horse, third to save stake; for two-year-old fillies; dash of tbree-quarters of a mile.

No. 7—Selling race; purse, $200, of which $50 to second horse; entrance free; dash of one and an eighth miles. Horses entered to be sold for $1,000 to carry tbeir entitled weight; two pounds allowed for each $100 under tbat valuation; horses entered for over $1,000 to carry tbree pounds over entitled weigbt for each $100 above tbat valuation.

No. 8—Pnrae, $300, of which $75 to second horse; free for all; daeh of two and a half miles; 100 lbs. up; entrance free.

Second Extra Day—Thursday, August 16.

No. 9—Purse, $200, of whicb $50 to second horee; free for all; dash of seven-eightbs of a mile; entrance free.

No. 10—Filly Stake; $25 entrance, $10 forfeit, $200 added, second to receive $50, third to save atake; dasb of one and one-sixteenth miles; for three-year-old fillies; entrance free.

No. 11—Palo Alto Stake; $25 entrance, $10 forfeit, $200 added, of which $50 to eecond horse, third to save stake; for two-year-old fillies; dash of three-quartere of a mile.

No. 12—Purse, $250, of which $75 to second to horse; free for all; dash of one mile and five hnndred yards; entrance free.

No. 13—Hurdle Race; purse, $250, of which $50 to second horse, $25 to third; dash of one and a half miles over six hurdles.

Second Regular Day—Saturday, August 18.

No. 14—Purse $200, of which $50 to eecond horse; free for all; dash of a mile; entrance free.

No. 15—Finigan Stake; for two-year-olde; dash of a mile; $50 each, $25 forfeit, $250 added; second to save atake; closed with the following nominations:

No. 1. J. K. Gries' b f Nettie Hill, by Joe Daniels—Mary Wade.
No. 2. E. J. Baldwin's b c by Rntherford—Maggie Emereon.
No. 3. E. J. Baldwin'a b f by Rutherford—Glenita.
No. 4. E. J. Baldwin'e ch f by Grinstead—sister to Clara D.
No. 5. E. J. Baldwin'a ch f by Grinstead—Josie C.
No. 6. E. J. Baldwin'e br f by Grinstead—Mollie McCarty.
No. 7. Tbeo. Winters' ch c Prince of Norfolk, by Norfolk—Marion.
No. 8. Tbeo Winters' ch f Callie Smart, by Norfolk—Mattie A.
No. 9. Joe. Cairn Simpson'e b c Sir Tbad, by Norfolk or Thad Stevens—Lady Amanda.
No. 10. Palo Alto'a b c by Norfolk—Boyodana.
No. 11. Palo Alto's b c by Norfolk—Nova Zembla.
No. 12. Palo Alto's b c by Sbannon—Demirep.
No. 13. Palo Alto'a br f by Monday—Riglin.
No. 14. Palo Alto's s f by Norfolk—Glendew.
No. 15. Palo Alto's bl f by Wildidle—Frolic.
No. 16. Palo Alto's br f by Norfolk—Lizzie Wbipps.
No. 17. Palo Alto's s f by Norfolk—Frou Frou.
No. 18. C. Van Buren's b g Jou Jou, by Mouday—Plaything.
No. 19. C. Van Buren's ch f Fiamma, by Monday—Abbie W.
No. 20. W. L. Pritchard's br c by Leinster—Addie A.
No. 21. W. L. Pritchard's b c by Leinster—Lilly Simpson.
No. 22. W. L. Pritcbard's ch f by Bazsar—Tibbie Dunbar.
No. 23. W. L. Pritchard's ch f by Leinster or Bazaar—Minerva.
No. 24. J. B. Haggin's b f by King Alfonso—Miranda.
No. 25. J. B. Haggin's b f by Pat Malloy—Glenuine.
No. 26. J. B. Haggin's b f by Monarchist—Hcliotrope.
No. 27. J. B. Haggin's b f by Monarchist—Alert.
No. 28. J. B. Haggin's b f by imported Glenelg—Edua.
No. 29. J. B. Haggin's ch f by imported Glenelg—Susie Linwood.
No. 30. J. B. Haggin's br f My Love, by Virgil—Ligbtfoot.
No. 31. J. B. Haggin's b f by King Alfonso—Titania.
No. 32. J. B. Haggin's b c Winnemucca, by imported Billet—Lottie.
No. 33. John A. Cardinell's bl c John A, by Monday—Lady Clare.

No. 16—Fame Stake; $100 eacb, $25 forfeit.

No. 1. J. C. Simpson's b f Lady Viva, by Three Cbeers—Lady Amanda.
No. 2. P. Rohson's cb f May B, by Sbannon—Jessie R.
No. 3. P. Coutts' br c Auriol, by Monday—Bellina.
No. 4. P. Coutts' b c Panama, by Sbaunon—Abbie W.
No. 5. P. Coutts' bl f Flou Flou, by Monday—Jennie C.
No. 6. T. Atchison's b f by California—Rosetland.
No. 7. Theo. Winters' b c by Norfolk—Addie C.
No. 8. Theo. Winters' ch c by Norfolk—Maggie Dale.
No. 9. Theo. Winters' ch c by California—Puss.
No. 10. Theo. Winters' b f by Norfolk—Ballinette.
No. 11. Theo. Winters' b f by Norfolk—Ballerina.
No. 12. Tbeo. Winters' ch f by Norfolk—Mattie A.
No. 13. J. B. Chase's b f Marian, by Hubbard—Electra.
No. 14. J. B. Chase's ch f Laura, by Sbannon—Folly.
No. 15. W. A. J. Gift's br f Miss Gift, by Wildidle—Kate Gift.
No. 16. E. J. Baldwin's ch c Grismer, by Grinstead—Jennie D.
No. 17. E. J. Baldwin's b c Lucky B, by Rutberford—Maggie Emerson.
No. 18. Palo Alto's ch f by Leveller—Frou Frou.
No. 19. Palo Alto's ch f by Hubbard—Tehama.
No. 20. Palo Alto's br f by Shannon—Camilla Urso.
No. 21. W. Boots' ch c hy Bob Wooding—Lizzie Marshall.
No. 22. J. B. Haggin's b f Nubia, by Leinster—Ada A.
No. 23. J. B. Haggin's cb f Belle, by Leinster—Flusb.
No. 24. J. B. Haggin's ch f Irene, by Leinster—Irene Harding.
No. 25. J. B. Haggin's ch f Sophia, by Bazaar—Sophia Jennison.
No. 26. J. B. Haggin's b g Del Paso, by Sbannon—Maggie O'Neil.

No. 17—Baldwin Stake; a post stake for all ages; $250 each, p.p., $1,000 added; second to receive $400; third to save stake; dash of four miles.

No. 17—Consolation Purse; $200, of which $50 to second borse; one mile and repeat; borses beaten once allowed five pounds; twice, ten pounds; and three times, fifteen pounds.

Nominations for all these open stakes and entries to the purees will close Augnst 1. On the same day nominations will also close for the following fixed events for 1884:

Spring meeting—California Stake; for two-year-olds, $50 each, $25 forfeit, $250 added; to be run on the first day of the spring meeting; second to save stake; dash of half a mile.

Gano Stake—Dash of three-quarters of a mile for two-year-olds; $50 each, $25 forfeit, $250 added; second horse to save stake. Wben any California two-year-old beats the time of Gano, 1:15 for tbree-quarters oi a mile, the stake to be named after tbe colt which beats it.

Fall meeting—Ladies' Stake; for two-year-old fillies; $50 entrance, $25 forfeit, $200 added; three-quarters of a mile; second to save entrance:

Finigan Stake—For two-year-olds; dash of a mile; $50 eacb, $25 forfeit; $250 added; second to save stake.

Also on the same day nominations will close for tbe following fixed events of 1885:

Spring meeting—Winters' Stake; for tbree-year-olds, to be run the first day of tbe spring meeting; dash of one and a half miles; $100 each, $25 forfeit, $300 added; second to bave $150, third to save stake.

"Spirit of tbe Times" Stake—Dash of one and three-qnarter miles; for all tbree-year-olds; $100 each, $25 forfeit, $300 added, $150 to second, third to eave stake.

Fall Meeting—The Vestal Stake; for three-year-old fillies, one and a quarter miles; $25 p p; $300 added, second to receive $100, third to save stake.

Fame Stake—For three-year-olds; dash of two miles; $100 each, $25 forfeit, $500 added, second to have $150, third to save stake.

Betting on Races.

It may be a very ainful act to bet on a horse-race. It must be so in the eyes of many excellent Christians, inasmuch as there is a law prohibiting it on the statute book. Tbere is no corresponding enactment against betting on tho price of etocke, making "books" on "puts and calls," or gambling in fntures on the Produce Exchange. But no comparison can be fairly made between the two pursuits. On a horse-race a man's risks are limited, as he cannot well bet a very large sum, and his chances of winning depend mainly on bis own judgment. In the Wall-street sport he can stake millions, if be has tbem or can eteal them, and his chauces of winning depend on the operations and tricks of others.

It ia very certain that in the depravity of human nature betting is tbe life of horse-racing, and that our tracks might as well be abandoned and our "flyers" sold under the hammer if it is to be blotted out. The strength of the "original sin" was seen at Jerome Park in last week's racing. A temporary injunction against police interfereuce with book-making actually crowded tbo track, wbile if uo betting had been permitted a very amall number of people would have been in attendance. In Saratoga and at Coney Island no attempt or pretense to enforce tbe law is made and the racee are all successful. Jerome Park, wbich has been tbe pioneer and great promoter of the aport, and whicb stands deservedly at tbe head of the turf in this country, haa been almost ruined by tbe enforcement of tbe law on its track.

Of course wben a etatute is in existence it ought to be respected and obeyed. But what reepect can be entertained for a law which is enforced in New York County and openly treated ae ae a dead letter in Kings and Saratoga?—*New York World.*

Trotting in Australia.

Tbe Elsternwick Trotting Club had a meeting on May 14, the detaile beiug thus given in tbe *Federal Australian:*

Tbe weather was of tbe most delightful description imaginable; hnt tbe attendance was certainly anytbing but numerous, although two trottiug races, a flat race and a burdle race were a good bill of fare, whilst, besides these attractions, Mr. J. J. Miller treated tbe pnblic to an exbibition of the trotting powers of Honesty, his recent purcbase. The advertised sport proved very unuteresting; but the exhibition trot was well worth seeing. The raciug opened with tbe trot for the three-minute class. Tbere were only three runners, and as Mr. Milsom, who owned two, declared to win with Dick Goldsbrough, tbe race resolved itself iuto a match. Dick Goldsbrough, a son of the Premier borse Yellow Jack, was made a hot favorite, and won the first beat easily. In tbe second be seemed to have tbe race at his mercy wben the applanse of the crowd caused bim to swerve and break; but ere he settled down again Dagworth was landed a winner. In tbe third heat, however, Dick Goldsbrough won easily. In the trot for the 2:45 class, five appeared in tbe straight in tbe first heat, which Sylph wou cleverly from Von Moltke Jr., Fright beiug third. For the next beat Captain Darborn and Dick Goldsbrough retired, and a similar result to tbat of the first heat was chronicled. In the third heat Sylph and Von Moltke trotted side by side; tbey broke alternately, but the mare looked an easy winner until she left her feet in the straight, and Von Moltke got home first. For the fourth heat the mare forced the pace from tbe word go, and won as she chose, the horse again breaking. The Flying Stakes brought sixteen to the post; after a little delay caused by the lads' persisteuce in standing in front of tbe post, and the refusal of Queen Elizabeth and Borderman to join their horses, Fred Johnson sent them away to a good start, Gudarz, King Charles and Sinking Fund being first to sbow; at tbe first turn, tbe latter stumbled, throwing bis rider, and Gudarz, forcing a pace, won cleverly from King Cbarles, with Westbury a fair tbird. Tben came Glycerine, followed by Sinking Fund, riderless, on tbe outside. The exhibition of trotting, in which Honesty, Contractor and Oliver took part, was next, and tbe first-named horse was greatly admired, and was certainly well-named, as no squarer gaited and more honest goer could possible be found. A handicap hurdle race brought five to tbe post, and Merry Main, who was backed in earnest, won easily from Cavalier, Trump coming down when going well. Below are details of the sport:

Trotting, three-minute class; purse of £30; for colonial-bred horses, bar Talk; second borse to receive £5 of tbe purse; two-mile heats; best two in three.

Mr. G. Milsom's ch g Dick Goldsbrough, by Yellow Jacket, aged	(owner)	1	2	1
Mr. M. Griffin's b g Dagworth, aged	(owner)	2	1	2
Mr. G. Milsom's blk m Nelly, six years	(H. Milsom)	dis.		

Time—5:54, 5:51½, 5:49¾.

Betting: Two to one on Dick Goldsbrough.

First heat—After a lot of delay a moderate start resulted, Dagwortb, who was driven, getting slightly tbe best of it. Before the quarter pole was reached Dagworth broke, and Dick Goldsbrough took tbe lead and led for the rest of tbe distance, passing under the wire four lengths ahead of Dagworth. Nelly was distanced, and her rider fined £1 for having delayed the start by not coming up with the others.

Second heat—Dick Goldsbrough led all the way until inside the distance, and was winning easily, wben he shied at the applause and broke, allowing Dagworth to win by about tbree lengths.

Tbird heat—Dick Goldsbrough led from end to end, and, owing to Dagwortb breaking several times, won easily by four lengtbs.

Two-forty-five class; purse £50; mile heats, best three in five; second horse to receive £10 of tbe purse.

Mr. J. A. Robert's b m Sylph, six years	(Mullholland)	1	1	2 1
Mr. C. Collath's b b Von Moltke Jr., aged		2	2	1 2
Mr. J. J. Miller's b m Fright, five years	(M. Griffin)	3	3	3 3
Mr. F. Rolin's b g Captain Darborn, aged	(Owner)	0		
Mr. G. Milsom's ch g Dick Goldsbrough, aged.	(Owner)	0		

Time—2:48½, 2,47½, 2:48¼, 2:48¼.

Betting: At first, 5 to 2 against Captain Darborn, 3 to 1 against Sylph, 5 to 1 against Fright and Von Moltke Jr. In the fourtb heat, 2 to 1 on Sylph, 6 to 4 against Von Moltke.

First heat—A straggling start resulted. Von Moltke on the inside went to the front, followed by Sylph and Frigbt. Rounding the turn Sylph left her feet, but caught tbem quickly, and going in good style caught Von Moltke, who broke near the three-quarter pole, and tbe mare, trotting grandly, led under tbe wire, six lengths ahead of bim, and be was five lengths in front of Fright. Captain Darborn and Dick Goldsbrough were never dangerous.

Second beat—They got away evenly, and Sylph at once made play. Von Moltke and Frigbt broke repeatedly, whilst Sylph kept going, and won by three lengths from Von Moltke, wbo was coming very fast in tbe straight when he broke badly, as also did Fright.

Tbird heat—Von Moltke got a slight lead of Sylph, but broke at the turn, but caught his feet quickly. At tbe back of the track the mare broke, and Von Moltke again misbebaved. Sylph led into tbe homestretch, and was winning easily when sbe broke again, and Von Moltke won by two lengths.

Fourth heat—Sylph led from the etart, and as Von Molt ke broke at the balf pole, and again at tho three-quarter polo, be lost all chances, and tho mare won easily.

Corneilns Stagg, proprietor of the Ocean Houso track, has fitted up accommodations at tho Ocean Houso for athletes in training. A finer training ground cannot be conceived. Tbero is a lovely garden round tbe bouse, five roads to walk over, the beach close at haud, and near by is Lake Merced, a beautiful sheet of water, with plenty of boats for rowing exercise. Tho Ocean House ie so far distant from the city as to remove all city temptatione far beyond the athletes' reach, but is not so far away that friends and the curious find it too distant to pay a visit to a man in training.

Tbe projected racetrack in American Valley, Plumas Co., is now a fixed fact, as tbe work of construction is actively going on. The club has incorporated under the namo of tbo Rockwell Park Association, with J. W. Thompson President, D. W. Jenks Secretary and A. Hall, J. Stevens and W. E. Ward, Directors.

Last Saturday tbe Californin horses that took part in the lato meeting at Salt Lako arrived at Sacramento, and they are stabled at Agricultural Park. The car contained Joe Howell, Fred Collier, Gano, Lucky B, Jim Douglas and Augusta E.

Overman made tho account even with Deck Wright last Wednesday at Columbus, Obio, by beating him three straight heats. Time—2:25¼, 2:21¼, 2:23¾.

Satnrday racea have been inaugurated at C[illegible] Driving Park, Watsonville.

Racing at Visalia.

The spring meeting of the Tulare Valley Agricultural Association took place over its track on May 31 and June 1 and 2. The track has heen cousiderahly improved thie year. New hnildings have heen erected, the grand stand roofed over and the trees cut away, so that an nnohstructed view of the entire course can he had from the stauds and stretch. The track was a trifle slow hnt safe and generally satisfactory to owners and trainers. The following are the

SUMMARIES.

VISALIA, Cal., May 31.—Running; balf-mile dash; free for all; purse $75, $50 to first, $25 to second.

J. H. Jobnson's ch m Katie Pease	1
H. G. Samuel's b m Jennie G	2

Time—0:52½.

Jennie G was the favorite in the hetting and it was charged that she was pulled to the rear, hut the judges took no notice of the complaints.

Same Day—Trotting; tbree-minute class; purse, $100, first borse $60, second $30, third $10.

J. N. Ayers' br s Brilliant	1	1	1
E. Giddings' br m Alice	2	2	2
John Mackin's g g Dick Turpin	4	3	3
T. J. Selleck's b h Tommy	3	4	4
H. Robinson's s g Lochinvar	5	5	5

Time—2:59, 2:58½, 2:55½.

June 1.—Rnnning; mile dasb; purse, $75, $50 to first, $25 to second.

H. L. Samuel's br m Jennie G	1
—— Withington's blk h Bob	2

Time—1:58.

Same day—Trotting; single mile; free for all two-year-olds owned in the district. Purse $100, $60 to first, $30 to second, $10 to third.

E. Giddings' b c Bay Rose	1
S. F. Gilmore's b c John Kurtz	2

Time—not reported.

Same day—Special purse for saddle horses, one mile.

J. W. Oak's blk h Dick Turpin	1
J. H. Johnson's br b Shavetail	0
M. Seward's blk h Prince	0
C. Brown's br h Frank	0
— Meadow's — Bess	0
W. H. Fox's b f ——	0

Time—1:55.

June 2—Running; half-mile heats; purse $100.

H. L. Samuel's br m Jennie G	1	1
J. H. Johnson's ch m Katie Pease	2	2

Time—50, 52.

Same day—Pacing, 2 in 3. Purse $100.

J. M. Harter's b h Ben Butler	1	1
John Broeder's s h Col. Dickey	2	2

Time—2:39½, 2:38.

Same day—Trotting; two in three; free for all; purse $100, $60, $30 and $10.

J. M. Canty's b h Confidence	2	1	1
J. M. Halstead's s s Baldy	1	2	2
J. N. Ayers' br s Brilliant	3	3	3

Time—2:48½, 2:42, 2:41.

The Westchester Cup.

At Jerome Park on the 7th inst. Mr. Gehhard's Eole lowered his colors to Monitor. The race is described hy Mr. Crickmore in the *World:*

The starters on the present occasion were Fred Gehhard's Eole, the Yonkers Stahle's Gen. Monroe, and G. L. Lorillard's Monitor. Each of the first two named carried 123 pounds, while Monitor, as a gelding, carried only 123 ponnds. Although the "tip" for Eole was strong, the puhlic, for some reason, did not fancy him, and hoth of the others started hetter favorites, nine to five being accepted against Monitor, two to one against Gen. Monroe, and five to two against Eole. The trio took the flag together, from which Monitor took the lead and at the end of the first quarter he led hy a length, witb Eole second, nearly three lengths in front of Gen. Monroe. All three were running very easily. At the turu Monroe gained a trifle, hut during the whole of the mile Monitor beld the lead with the greatest ease, and althongh Monroe made several efforts to pass Eole, the latter retained second place, and at the end of the mile and a quarter Monitor led hy ten lengths, with Eole half a length in front of Gen. Monroe.

In the run to the turn hy the stahlee Fitzpatrick made a determined effort to get through next the rails, hnt Costello was not to he canght, and althougb Monroe headed Eole for a few strides, he again dropped hack third hefore they were half way round the turn, so that at the quarter, while Monitor lead hy three parts of a length, Eole was a neck in front of Monroe. The struggle between the three riders for the inner rail of tbe clubhouse tnrn was sharp aud resulted in Costello keeping it, and as Eole stumhled hadly in running down the hill, he dropped hack third and was really never again in the race.

At the tnrn for the south field Fitzpatrick again made a rush for the rails, which would give him the inside position for the final struggle, bnt Costello was not to he caught, and although Monitor only led hy a sbort length at the half-mile post, he held that advantage all round the south field to the three-qnarters, and thence to the homestretch. Halfway hetween the three-quarters and the seven-furlong post Fitzpatrick began riding, and for a few seconds it looked as if Monroe would reach Monitor, and thus score the triple honors for tbe first time. Bnt Monroe was unahle to snstain the lead, and although he struggled out in gallant style nnder tbe whip, Monitor held the lead to the end, and amid some enthusiasm won hy half a length. Monroe was second, ten lengths in front of Eole. Time, 4:07, of which the first mile was run in 1:51½, and the two miles in 3:39½, the miles from tbe turning stand hack heing run in 1:49¼ and 1:49¾.

On returning to the scales it was noticed that the saddle on Monitor had slipped out of position on account of the loosening of one of tbe girths, and it waa understood that Costello complained that it came near causing him to lose the race. Whether tbat he true or not, Monitor certainly ran a grand race, as also did General Monroe. Eole ran a good race as long as he lasted, hut he looked altogether too hig and fat for a hard race, and it ia no douht true that owing to had feet Snedeker has heen unable to give him the work necessary for a race like that for the Westchester Cup.

SUMMARY.

Seventeenth renewal of tbe Westchester Cup, a sweepstakes for all ages, at $50 each, play or pay, with $1,000 added, the secoud to receive $200 out of the stakes; the winner to carry 5 pounds extra; 0 subscribers; two miles and a quarter.

G. L. Lorillard's ch g Monitor, aged, by Glenelg, dam Minx, 121 pounds	(Costello)	1
Yonkers Stable's b h General Monroe, 5, by Tom Bowling, dam Minnie T. Morgan, 123 pounds	(Fitzpatrick)	2
F. Gebhard's b h Eole, 5, by Eolus, dam War Song, 123 pounds	(Donohue)	3

Time—4:07.

Betting—Nine to 5 against Monitor, 2 to 1 against Gen. Monroe, 5 to 2 against Eole.

Gr[illegible] Salem, MacCameron, Correcticue, Red Cross, and [illegible] Oakley, all American horees, are entered to trot for the [illegible]national Prize of 2,500 francs in gold, at Vienna, Anstria. [illegible] Salem and Boneeetter, a Russian borse, and Correcticua [illegible] MacCameron will trot double for tbe International Prize of 1,500 francs.

Director's Campaign.

Director hae begun his Eastern campaign hravely. His first race was at Pittshurg, Penn., on the 1st, when the day and track were fine, hut, judging from the placing and time, his competitors were a little soft. The following is a resume:

PITTSBURG, June 1.—Purse, $600; for 2:22 class.

J. A. Goldsmith's blk h Director, by Dictator	3	3	1	1	1
W. H. Crawford's b h Hambletonian Basbaw, by Green's Basbaw	1	1	3	3	3
Jeremiah Monroe's br m Alta, by Almont	4	2	2	2	2
D. Muckle's blk g Wilbur F, by Hinsdale Horse	2	4	5	4	5
W. H. McCarihy's b g Willis Woods, by Rescue	5	5	4	5	4

Time—2:25, 2:25½, 2:26, 2:28, 2:26.

He also won a race for the same class at Hartford last Wednesday, an affair of six heats, which is thus meagerly reported hy wire: At Charter Oak Park, class 2:22, for a purse of $1,000, Director won; Dan Smith second, Walnnt third, Cornelia fourth. Time—2:22½, 2:22½, 2:21½, 2:21¾, 2:22, 2:22¼.

At Salinas.

On Friday and Satnrday, the 1st and 2d inst., there were some turf amusements at Salinas. On the first day there was a trot for a small purse, for which six horses started, Michael Lynn's Lady Mollie heing the victor. On Saturday a running race of half-mile heats took place, which was rather an exciting event. A correspoudent informs us that a large amount of money was laid on the resnlt, and the race most hotly contested from first to last, hoth heats being won hy a nose only. Lucy was a strong favorite in the hetting.

SUMMARY.

SALINAS, June 2.—Matcb for $1,000; half-mile heats.

Cavanaugh & Flip's ch f Fannie	1	1
Handley Bros.' br m Lncy	2	2

Time—0:51, 0:51½.

A Misaprehension.

The Lakeview Oregon *Examiner* of last Satnrday says: "At a meetiug of the Lakeview Jockey Cluh held last week the question of whether the new or the old rules of the Pacific Coast Blood Horse Association were to govern was discussed. It was finally decided hy a vote that the old rnles he adopted hy the cluh for this year. The reason for this action is that a number of copies of the old rules were here and onr tnrfmen are more or less familiar with them, whereas a copy of the new rules wonld have to he sent for, which necessitate a loss of time." The Lakeview Cluh nndouhtedly confounds the trotting and runniug rules. The National Trotting Association frequently amends its code, but the Blood Horse Association has made no changes save that of weights since the cluh was organized. It has no old rules or new rules. If the Lakeview Clnh is in possession of the official edition of the laws, racing and bettiug rules of the Blood Horse Association, it has all the law in existence on that snhject.

As a specimen of the power of the English Jockey Cluh the following appears iu the recent issue of the *Racing Calendar:* "Mr. R. Peck, having on the 21st of April last given notice to Messrs. Weatherhy to scratch 'all horses in his name, except Baliol, out of all handicaps where Messrs. Weatherhy handicap, where the weights have appeared, or any handicap where the weights had not then appeared for which they handicap,' the stewards of the Jockey Cluh have directed Messrs. Weatherhy to decline in future to accept any entries of Mr. Peck's horses for handicaps to he made hy them, or to handicap any horses his property or joint property." This will prevent Mr. Peck from making any nominations for the Cezarewitch, Camhridgeshire or other hig handicaps.

During the late meeting of the Tulare Valley Agricultural Association a series of stallion premiums was offered, and the exhihition of horses was large and fine. The prize for thoroughbreds was awarded to Broder & Fleming's ch h Firetail, hy Norfolk—Fanny Howard hy Illinois Medoc. The first place among the roadsters was given to W. D. Hammond's sorrel pacer Oakland Boy, by Winthrop, and the hlue ribhon for the draft class was awarded to Warhawk, owned hy Uhlhorn & Maples of Tulare

Eleven persons made the first payment in the $5,000 purse for horses of the 2:21 class, to he trotted at Mystic Park, Boston, in Septemher. They are: O. A. Hickok (Overman), A. B. Cook (Joe Bunker), Dan Mace (Dan Smith), E. L. Stearns (Ezra L), B. L. Sheldon (Captain Lewis), W. J. Gordon (Clemmie G), John Mnrphy (J. P. Morris), Yellow Dock Company (Yellow Dock), T. D. Marsh (Forrest Patchen), C. S. Green (Mamie), James Golden (Kentucky Wilkes).

W. M. Hnmphrey's colt Marlet, bred at Palo Alto, took fright at a train on the elevated railroad in New York, a few daya ago, and fell on the pavement, injuring himself so much that he has heeu laid np.

The Derhy was this year worth £5,150 and the Oaks £3,475. The French Derhy was worth £4,707.

William Shaw, the former proprietor of the old Uuion Course on Long Island, is dead.

Appreciation.

A suhscriher in a note transmitting suhstantial proof of his earnestuess in the shape of cash in advance for his suhscription adds the following pleasant expression of commendation:

"I consider your journal one of the hest, if not tbe hest, of its class published iu the U. S. It certainly is as fair and honest in its convictions as any reasonahle man could wish, and I have no hesitaucy in saying that it has done more to foster the proper hreeding of stock and remove the stigma of disrepute that has clung for years like a barnacle around racing iu this State, than has heen accomplished hy all the other eources comhined. Keep up tbe good work, hecause all houest turfmen are with you."

Judge S. C. Denson of Sacramento has given his white saddle-hack to Govornor George C. Perkins. As Grand Commander of the Knights Templar of California, the Governor has to ride a white horse at the head of the procession during the conclave. Governor Perkins used to he a spleudid horseman, hut whether or not increased weight and political worry have looaened his seat and made his hand heavy is hard to tell until the conclave will give an opportunity to see him on horeehack once more.

Green food for young hogs ia strenuously advocated hy the *Indiana Farmer*. The most important reason for it is to delop the alimentary organe, and the reason is an excellent one. The etomach is the mill for grinding the concentrated food upon wbich the animal is to he finally fattened, and it must he large in capacity and in vigorous working order.

A Fine Orchard.

Fruit raising is a profitahle hnsiness everywhere, hut especially so in California. The inventions of the canner have made the market practically unlimited, and now that the Australian colonies have begun to he large huyers of California canned fruits, dry fruits, and such fruits as will hear a long trip, the demand is snch that prices cannot fail to advance. But fruit raising will not pay well nnless the work ahout the orchard is done in the most careful and scientific manner. A model orchard and one which all young growers wonld do well to take patern hy is that of Mr. Delos G. Kent, situated in the warm helt some fourteen miles from San Jose and ahout three miles from Saratoga Spriugs. Mr. Kent started in the husiness of fruit growing hut recently. His husiness was that of a hanker, hnt ill health made an outdoor life necessary. He took np ahout eighty acres of land, planted cherry, prune, peach, apricot and almond trees, and in lese than five years was selling the product of his orchard for $20,000 a year. This is a hig figure for eighty acres to produce, hut Mr. Kent helieves in fine work, and the secret of his success lies in cultivating his orchard np to the highest possihle pitch. We looked over the place last week, and do not hesitate to pronounce it one of the hest kept orchards we have ever seen. Not a weed could he seen, nor an atom of vegetatiou, except the fruit trees, from one end of the place to the other. The soil had been so well cultivated that it was loose and friahle at a depth of nine inches, and an inch or two helow the surface it was moist and mellow. All the treee were pruned low, and their fruit could he picked without the aid of ladders. This low prnning and ahsence of a long trunk Mr. Kent claims is the real secret of his success. His treee are never snnhnrnt, and so far his crop has never failed, which is more than some of his ueighhors who prune high can say. There are chemical reasons why a hranch taking its sap from near the root shonld hear hetter than one that takes its suhstauce higher np, hut the opponents of the low pruning system do not seem to understand them. The almond trees are all hearing well for yonng trees, a rather nncommon circumstance with that rather nnreliable crop. It costs Mr. Kent $12 per acre to cultivate his land and for all of his work he employs none hut white lahor. The hand hoeing at the end of the season is done by hoys. Near his place the hill slopes are rapidly being takeu up for fruit ranches. Mr. J. Searle has some eighteen acres, and a relative ahout sixteen more, planted with frnit trees. Even high np on the hill tops the land is heiug cleared for grape culture.

Dennis Gannon writes ns from Walla Walla, W. T., where he is uow located, a memher of the firm of Rnssell & Gannon, proprietors of the Walla Walla Driving Park. He says there are some twenty-five trotters now in training there, mostly two and three-year-olds, also fifteen runners taking regular work. They propose giving a meeting on the 2d, 3d and 4th of Jnly.

The famous Bidwell Bar orange tree is 25 feet high, 23 feet in diameter through its limbs, and its trunk is 44½ inches in circumference. It hore last year 2,075 oranges.

Market Report.

FLOUR—We qnote Best City Extra, $5 60@$5 90 medium grades $4 50@$5 25; Shipping Superfine, $4@$4 25 ₱ bbl.

WHEAT—Business light. Milling, $1 67½@$1 70; No. 1 shipping, $1 62½@$1 65; No. 2, $1 57½@$1 50.

BARLEY—We quote: No. 1 feed, 95@97½c; good Brewing, $1@$1 02½ offered.

OATS—Fair Feed, $1 80@$1 90; Good, $2@$2 10; Choice, $2 15 ₱ ctl.

RYE—Qnotable at $1 50@$1 50 for fair to good.

PROVISIONS—Eastern Hams, 15½@16¾c; California, Hams, 15@15½c for plain, 15¾@16¼c for sugar-cured canvased; Eastern Breakfast Bacon, 16@16½c; California Smoked Bacon 15@15½c for heavy and medium, and 15@15½c for light and extra light; Clear Sides, 15½@15½c; Pork, $18 50@$19 for Extra Prime, $20@$20 50 for Prime Mess, $24 50@25 for Mess, $25 50@$26 for clear and 26 50@$27 for extra Clear; Pigs' Feet, $16@$18 ₱ bbl; Mess beef, $15 50 for bbls and $8 50 for hf bbls; Extra Mess Beef, $16 50 for bbls and $8 75 for hf bls; Family Beef, $18@18 50 ₱ bbl; California Smoked Beef, 13½c.

FRUIT—We quote lots as follows: Apples, new, $1@$1 25 ₱ box; Apricots, 40c@55c ₱ box for Pringle and $1@$1 25 ₱ box for Royal; Cherry Plums, 50c@50 ₱ box; Currants, $3@$4 50 ₱ chest; Raspherries, 8@12c ₱ bskt; Strawberries, $8@$12 ₱ chest; Cherries, $6@$7 50 ₱ chest for good to choice; Gooseberries, 4@6c ₱ ℔; Peaches, 8@10c ₱ ℔; Lemons, $7@$8 ₱ box for Sicily; California Lemons, $1@$2 ₱ box; Limes, $8@$12 ₱ box for Mexican; Tamarinds, 12@13c ₱ ℔; Bananas, 1 50@$3 ₱ bnncb; California Oranges, $1@$1 50 for common and $2@3 for good to choice.

VEGETABLES—We quote: Summer Squash, 8@10c ₱ ℔; Carrots, 37½c@50c; Turnips, 50@75c; Cauliflower, 25@50c ₱ dozen; Cabbage, 60@80c ₱ ctl; Garlic, 3½c ₱ ℔; Celery, 50c ₱ doz; Dried Okra, 20c@25c; Dry Peppers, 10c@12½c ₱ ℔; Green Peas, 1½@2½c; Rbubarb, 6@8c per ℔; Mushrooms, 75c@$1 ₱ box; Tomatoes, $2 50@$4 ₱ box; Cucumbers, 12c@$1 00 per doz.; Asparagus, $1@$1 50 ₱ box; Sprouts, 3c ₱ ℔.; Artichokes, 10c@15c ₱ doz.; String Beans, 7@10c ₱ ℔.; Green Corn, 8@12c ₱ doz.

POTATOES—75c@$1.

ONIONS—50@65c for good.

BEANS—Bayos, $5; Butter, $3 75 for small and $3 50@$4 for large; Lima, $3 40; Pea, $3 40; Pink, $4 75@$4 80; Red, $4 50@$4 70; small White, $3 50; large White, $3@3 25 ₱ ctl.

BUTTER—We qnote jobbing lots: Fancy, 24@25c; choice, 21@22½c; fair to good, 19@20c; inferior lots from country stores, 15@17c; firkin old, 20@22½c for choice; new, 22@25c; pickled roll, 22½c; Eastern 17@20c. Sometimes under.

CHEESE—California, 12½c for choice; 10@11c for fair to good; do, factory, in boxes, 14@16c; Eastern, 16@17c.

EGGS—California, 27@28c ₱ doz; Eastern, 26@27c per doz.

POULTRY—Live Turkeys, gobblers, 24@26c; do, Hens, 23@24c; Roosters, $7 50@$8 for old and $9@$12 for young; Hens $9@$9 50 Broilers, $4@$7 50, according to size; Ducks, $7@$9 ₱ dozen; Geese, $1 25@$1 50 ₱ pair; Goslings, $1 50@$2 25 per pair.

GAME—Snipe, $2 25@$2 50 for English and 75c@$1 for common; Hare, $1 25@$1 75; Rabbits, $1 25@$1 50.

WOOL—We quote: Choice Northern Free, 23@25c; Choice Northern Burry, 20@21; Calavaras and middle counties, 17@20; San Joaquin and coast, choice, 14@17c; San Joaquin and coast, inferior, 14@17; San Joaquin and coast, year's clip, 14@18c.

HIDES AND SKINS—Dry hides, usual selection, 16½@17c ₱ ℔; culls one-third less, and Mexican Hides 2c ₱ ℔ less; Dry Kip, 17c; Dry Calf, 17c@22; Salted Steer, over 55 ℔s, 11c ₱ ℔; Steer and Cow, medium, 9½c@10c; light do, 8@8½c; Salted Kip, 15 to 30 ℔s. 9½@10c; Salted Calf, 13@15c ₱ ℔; Salted Veal, 12@13c; Sheep Skins, 25@30c for Shearlings, 30@60c for sbort, 50c@90c for medium, and $1@$1 40 apeice for long wool and wool skins. Butchertown Green Skins bring bigher prices.

TALLOW—Quotable at 8@8½c ₱ ℔ for rendered and 11@12c for refined, both in shipping order.

MEATS—Following are rates for whole carcasses from slaughterers to dealers:

BEEF—Prime, 8@9c; medium grade, 7½@7½c; inferior, 5@7c ₱ ℔.

VEAL—Large Calves, 7@8c; small ones, 9@10c ₱ ℔.

MUTTON—Wethers are quotable at 4½@5c and Ewes at 4@4½c ₱ ℔, according to quality.

LAMB—Spring is quotable at 5½@6c ₱ ℔.

PORK—Live Hogs, 7¾@8c for hard and 7@7½c for soft; dressed do 10½@10¾c ₱ ℔ for hard grain hogs.

THE KENNEL.

The Malcolm Standard.

Following is the Malcolm standard for Gordon settere as adopted at recent dog shows:

Skull	10	Feet	9
Nose	10	Stern	4
Ears, lips and eyes	4	Flag	4
Neck	6	Symmetry and quality	4
Shoulders and chest	15	Texture of coat and feather	4
Back quarters and stifles	15	Coal	4
Legs, Elbows and hocks	11		
		Total	100

Skull—The skull should be nearly like the English setter's, with the exception that the Gordon setter's head should be a shade heavier and wider; the heavy heads they now have must he gotten rid of.

Nose—The nose should be moderately long and wide; no fullness allowed uuder the eyes. From corner of eye to eud of nose should he from four to fonr and one-half inches; there should he a slight depression hetween the eyes; the nostrils should he a shade larger in the openings; the nose should he moist and cool, and the end of nose should be of a good hlack color.

Ears—With regard to the ears, they should he a trifle longer than the English setter's, hut in other respects they mnst resemhle them, and must he thin in leather; they should be set low and should lie closely to the cheeks, without showing any of the iuside; they should he well covered with hair, with as little wave as possihle.

Jaws—The jaws shonld he perfectly even in length; a "snipe nose" or "pig jaw" is a decided hlemish.

Lips—The lips should he like the English setter's, and must not be so full and pendulous as the present type.

Eyes—The eyes must he full of animation, of medium size, and of a rich color between a hrown and a gold, or like the ovary of the Italian bee.

Neck—The neck must he like the English setter's; it must not be throaty, hut must he clean and racy; it should show well hack into the shoulders.

Shoulders—The shoniders should have plenty of liherty, with deep, sloping shoulder-hlades; the elhows should he well let down; they shonld set straight, for otherwise you will confine the dog in his movements hy their close attachmeut to the ribs.

Chest—Now, herein lies one of the great faults of many of onr present show Gordon setters, and it must he gotten rid of at once, I mean his wide hulldog chest, and heavily loaded foreshoulders; on the contrary he shonld have a narrow, deep chest, with a nice racy front. What would one think of seeing a thoroughhred racer coming on the track with a Percheron horse's chest? Many of our present Gordon setters look to me jnst as ridiculous as the racer would look thus hred. The ribs must he well sprung hehind the shoulders, with a straight back and a good depth of back ribs.

Loins—The loins should be moderately arched; see that they are not slack, for if they are, endurance in the eetter is lost.

Hindquarters—Beware of stooping hindquarters, they show weakness and want of pace. The hindqnarters should be well guarded; they must he as strong or stronger than the fore; the thighs must he long from hip to hock.

Stifles—Moderately well hent and set wide apart to allow the hind legs to he well hronght forward, which will allow ease in his movements.

Hocks—The hocks must he straight.

Feet—They shonld he well looked after, for withont good feet anysetter is useless. Many differ as to how the foot should be formed. My preference is always for a "cat foot;" it looks better, is handled hy its possessor with more ease and grace, and when well filled in with hair hetween the pads you will not require a stronger or stouter foot, nor one with more endurance than such a foot possesses, either to hunt on the hills or the prairies. The fore legs should he straight, the hind ones moderately hent. The toes should he set straight. Any foot, either cat or hare shaped, hare of hair hetween the foot, is almost useless to the dog possessing it.

Stern—Shonld he well put on, and carried in very nearly a straight line; it should he "striug-like" at the end; a crooked tail at the end, or better known as a "teapot tail," is a decided hlemish, and though many Gordon setters are seen with it, it must be gotten rid of.

Flag—The flag should he shorter thau the English setter's and of more graceful form, heing hare two inches from root of tail, with flag flat and scanty, tapering to nothing at the end.

Symmetry and Quality—The Gordon setter should display much character, or, in other words, the general outline must be good, and at a glance taking to the eye of a sportsman.

Coat—Should he soft, flat aud close. A number of Gordon setters have wavy or curly coats; the curly coat is an abomination and should he bred out; the wavy coat should he treated in the same manner, hut it is the lesser evil of the two. The coat should he straight aud flat, hut shonld not he as long as the English setter's. The back and ribs should he well coated with softer, flatter and straighter hair than the present Gordon setter's. They should only show the setter coat on their profile, legs and tail.

Color—Where it is hlack it should be very glossy looking, and of a rich plum hlack. The tan markiug should be of a deep senna color, and should show on lips, cheeks, throat, epot over eyes, underside of ear, hut uot to show except faintly in upper corner edges nearly at skull; to show nearly to elbows, hind legs up to stifles, and on the under side of flag, but not running into its long hair. A Gordon setter with a white frill, or a white toe or two, shonld not he cast aside, as has too often been done in the past, but always aim to hreed them with as little white aa poesible.

Height—The Gordon setter ehould not stand at shoulder higher than twenty-four or twenty-four and a half iuches. Thie will give a nice-sized dog; he will look well; he will not look by any means squatty; hut stand well up.

Weight—The Gordon setter should not weigh less than fifty nor more thau fifty-five pounds.

Pedigree—No dog can win in a Gordon claes unlesa pedigree of aire and dam he of nndoubted purity.

The aportsmen and dog fanciere of London, Ont., recently held a meeting for the purpose of makiug preliminary arrangements to hold a hench ahow the coming antnmn. It waa decided that a dog ahow wonld he held the first week in October, under the auspicee of the Western Fair Association. The officers elected are as follows: President, Col. John Walker; Vice-President, G. T. Hiecox; Secretaries, C. A. Stone and J. Puddicomhe; Treasnrer, Dr. Skirhing; Executive Committee, Richard Gihson, George Macbeth, A. G. Chiaholm, H. B. Harrieon, T. G. Davey, T. H. Smallman, J. Coueins, W. B. Welle and Geo. Burns Jr.

Australian Coursing.

The following from the *Federal Australian* shows that the sport abroad is uot quite as smooth as the colonists would have us helieve:

"It is a very difficult matter for a judge to please everybody; in fact, it is outside the hounde of possihility. Mr. Pitt, however, performed his ouerous duties in a most satisfactory manner, aud, although one or two decisions gave rise to some commeut, I always, unless under very exceptional circumetances, bow to the ruling of the judge, for he may he, and no donht is, cognizant of mauy points in the running of a greyhound which thoee at a distance cannot possihly ohserve, even with the aid of a powerful field-glass. Banner was particularly successful in his old positiou as slipper, and the way in which he humored and coaxed the puppies, and the satisfactory mauner in which he got them away, wss a treat to witness. At times the youngsters, when in the slips, were very much incliued to quarrel, and great judgment had to be used iu gettiug them hoth fairly sighted and lcttiug them go just at the right moment on eveu terms, and in this respect Banner was particularly happy. The various officers of the club worked hard, and did all in their power to render the meeting a success.

"I now come to another matter which heare directly upon the future welfare and advancement of the Australian Coursing Club. It is no douht very kind aud considerate of the Messrs. Chirnside to allow the use of their valuable gronnd and plantation for the purposes of coursing. The close proximity to the mausion, however, precludes the possihility of the clubs ever advanciug beyoud their present position. They have a plantation in which hares can he conserved, and a magnificent stretch of ruuning ground for coursing purpoees; hut there all improvements must end, for the Messrs. Chirnside would certainly not allow the erection of any huildings immediately fronting their splendid honse and grounds. The members of the club are, therefore, debarred from making those improvements so necesssry, not only for their owu comfort, hut also for that of the visiting puhlic. Now that Plumptons are becoming recognized as absolutely indispensahle iu conneciton with coursing, it behooves every club wishing to advance with the times, not only to have the inclosures, hut also to he in a position to erect the necessary huildings thereon, which add so materially to the comfort of their patrons. I know that old aud enthusiastic lovers of the leash look upon Plumptons as decided innovations, and quite ignore the idea of their ever being generally adopted; hut they are steadily supereeding the old and time-honored custom iu England, and are fonnd to be a means, not only of insuring the accomplishment of a given numher of trials in a given time, as well as giving every dog au equal chance by running him over the same ground, hut also as a meaus whereby the funds of a club may he largely augmented, which, in these mercenary times, is an object of paramount importance. Sporting of all kinds, in order to ensure its successful development, requires the sinews of war, and the large monetary importance of a stake at issne is certain to claim the attention of the puhlic, and the interest thus created will be the means of bringing fresh grist to the mill."

The Chicago Bench Show.

The Chicago dog show heing held this week promises well. It is held in the huildiug known as D Battery, which is a grand place for a bench show, being situated near the depot, well ventilated and with a spacious field adjoining for the proper exercising of the dogs. The judges are as follows: For setters and pointers, John W. Munson of St. Louis; for mastiffs, St. Bernards, Newfoundlands, fox terriers, collies, hulldogs, hull and all other terriers aud pugs, James Mortimer of New York; for greyhounds, deerhounds and all classes of spaniels, foxhounds, beagles and dachshunds, James F. Kirk of Toronto; miscellaneous classes, Messrs. Kirk and Mortimer. The Malcolm standard for black-and-tan, or Gordon setters, has been adopted, an iudication that the new rules for judging this hreed of dogs are rapidly advancing in public favor. The recent Pittsburg dog show was first to adopt the Malcolm standard, and it has since been indorsed hy many of the most promiuent sportsmen and breeders in America.

Pointers vs. Setters.

It is curious to note the varying success which has fallen to the respective shares of poiuters and setters in field trials; for whereas in the early years of their institution pointers were more often winnere thau setters, it cannot he denied that during the past few years the setters have turned the tables upon the pointers wherever they have come into competition. It is, we believe, true that since the iutroduction of dog shows the breeding of setters has been greatly stimnlated, and notably in the sonth of England, where more attention has of late heen paid to that hreed than was the case some teu or fifteen years siuce. At the same time we have lost some of our hest pointer hreeders, and this kiud of dog seems to have deteriorated considerahly in quality.—*London Field*.

A special message from Paris to the New York *Evening Telegram*, under the date of May 26, gives the following item of information: "The great event of the week is the dog show at the Orangery, iu the Tuileries Garden. One can walk nearly 2,000 yarde through galleries douhle-lined with cauiues. Many animals look tired, as they have come a considerahle distauce. The Duchess D'Uzes exhibits a pack of forty hounds, attended by four *valets de chiens* in full hnntiug costume. One hundred and fifty prizes will he giveu. Meanwhile the animals keep up a not unmusical chorue, in which the hass notes of the mastiffs mingle with the sharp anapping and whimpering of spaniels, lapdogs and terriers. One has ample food for reflection upon the wisdom of Mark Twain's saying that the more you see of men tho more you get to like dogs."

It may he iuteresting to many connected with the stock interests of the Australian colonies, as well as to others, to kuow that the Victorian Poultry aud Dog Society is making arrangements to carry out a practical trial of working sheep dogs duriug the time of the Grand International Poultry aud Dog Show, which ie to be held in the exhibition building, Melbourne, ou the 26th, 27th and 28th of July next.

The Wisconsin State Agricultural Society will probably hold a beuch show in connection with the annual State fair, which takes place at Milwaukee in September. The society will of couree have the hearty support of Western breeders aud owners of fine dogs.

Fifty-three coursing matches are set to take place in the Australian coloniee between now aud August 30. About sixteen dog stakes are the average.

Suggestions on Coursing.

Mr. J. H. Short of Rockport, Illiuois, writes to the *American Field* as followe:

"I underetand from the *American Field* that a coursing club is to be formed in New York, and as I have had a good deal of experience in coursing and in trying to introduce the sport in Illinois, I heg to offer a few suggestions. In trying to carry out the idea of stocking their grounde with jackrahhits, the club would find much difficulty, as it ie almost impossihle to eecure sufficient rabbits for the purpose. Mr. Lotz and myself advertiscd freely throughout the Western States for jackrahhits, hut failed to secure any. Wheu I gave eome coureing exhihitions a year ago last fall, I nsed the common grey rabhit, aud found they answered the purpose very well; and those used would have given more satisfaction had I not kept them confined too long, and fnrthermore rabhits do not run as well on straage ground as they do on their 'native heath.' The clnh should get a good piece of ground suitable for coursing, aud have plenty of hurrows made, and stock the ground with several hundred rabhits. On the day of the race let the rabbite be all driven from their hurrows with a ferret, and the burrows stopped for that day. In this way plenty of game can be had, and 'cottontaile' ou their own grouud will be fouud to be full of run, and will afford good sport. Auy further information on the subject I would he pleased to furnish the club should they request it."

There can be no doubt of the goodness of Mr. Short's intention to advise well, hut, nnfortunately, his judgmeut is very faulty. If the New Yorkers want to enjoy the sport of coursing they must obtain hares or as they are called in the Western States "jackrabhits." Grey rabhits or cottontails even on their own ground will not make a good run or any kind of a run agaiust a pair of average greyhounds. In Englaud rahhit coursing is a common sport, bnt the rabbits are coursed with small dogs, either Italian greyhounds or a cross hetween that hreed and the stannch, quick kennel terrier, euch dogs as are nsed for dog racing in England and in this country at the matches promoted hy Arthur Chambere of Philadelphia. Rabhit dogs never weigh over thirty pounds and are no more to be compared to greyhounds than a Canadian pony is to a thoroughbred. During the months of July and August the Indians of Nevada can trap more jacks than the New Yorkers could nse, hut it wonld be necessary for some special arrangement to he made with an agent ou the spot, hut any trouhle would be hetter than making a farce of the royal sport of coursing hy nsing grey rahhits for game. The poorest hrace of greyhounds in California could run down a grey rabhit in 100 yards if he had 50 yards start, and a further objection is that the rabhit does not make the sitting turn like the hare and consequently the main point of skill in a course—turning short—wonld he lost. Even with haree the New Yorkers will do well to remember that they ought to he on the coursing ground at least two months before they are chased, and if kept in inclosnres need lots of room.

The Bulldog Show.

At the ninth show given hy the English Bulldog Club recently in London, England, there were 123 entries in the eighteen regular classes. Besides there was the challenge cup for dogs, and one for hitches. The exhibition was a good one, and, with few exceptions, the classes contained no poor specimens. Gamester won the champion prize and the challenge cup for dogs, beating Smasher and King Cole. The former, however, was not shown in good form. Ida won in the champion bitch class, and Britomartis won the cup. The latter is thought by good judges to he the hest hitch of her breed in England. In the class for heavy dogs that have won a first prize, Surplus won, Bliss getting the award in the correspondiug hitch class. Diogenes was first in the open small dog class, and Maratina won in the class for hitches. In the open classes for dogs that had not won a first prize at the Kennel Club or Bulldog shows, Toreador was first in the class for heavy dogs, and Britomartis first in the hitch class. Padlock won in the class for light dogs, Nettie getting first in the corresponding class for bitches. Toreador added another first to his list by winning in the class for dogs which had not heen previously exhibited. In the hitch class Saucy Girl won.

D. E. Goodman's bitch Daisy G, winner of a prize for English setters at the last bench show, whelped on last Thursday week, the sire of her litter being Goodman's Bob, who also took a third prize at the same show. Daisy G is out of Clayhrough's imported bitch Flash, and hy Peter Maeder's dog Dash. Boh is hy John Devaull's Billy, Billy by A. Trueman's Snow, and out of the Ralston bitch Beauty, brought to this country hy Sothern, the actor. Two of Daisy's dog pnps are pure white in color, a point for which certain breeders here earuestly labored, hut without success some years hack. We see no special field advautage in whito dogs, hut they are certainly very handsome.

Amongst the importations to the colouies I must mentiou the stud dog Debrett, by Master Sam—Death, sister to Doual, the winner of the English Waterloo Cup, he being by Master Burleigh, from Phœnix. Master Sam was hy Coutango from Carltou, and winner of the great Scarishrick Cup of 128 dogs. Debrett is own brother to Dehonnaire, twice winner of the English Waterloo Plate, and also to Marshal M'Mahon, winner of the Gosforth Gold Cup, Anglescy Cup and Kemptou Park Plate.—*Melbourne Sportsman*.

The entriee to the Eastern Field Trials Club's Derby close July 2. The stake is opeu to all pointers aud setters whelped on or after January 1, 1883. The purse is $500, of which $250 to first; $150 to second; $100 to third. Five dollars forfeit; $10 additional to starters. All communicatione should be addressed to the Secretary, Mr. W. A. Coster, Box 30, Flatbush, L. I.

Mr. George H. Peabody of Suisnn has suffered a serioue loss from the death of his haudsome pointer pup Victor Bow, by Ranger Boy, dam Royal Fau. Victor Bow took first prize for pointer pups in the late beuch show. While in the show he contracted a diseaee from ueglect, and after lingering some weeks, died. It will be a loug time before Mr. Peabody exhibits another dog.

At a sale of greyhounds recently held in Loudon five saplings by Misterton, from the New Zealand hitch Arama, by Ledgerkeeper—Magic, were snhmitted to auctiou. One brace of fawn dogs was disposed of for eighty-two guineas, but the reserve on the remainder was not reached. Arama is own sister to Ledgerdemain, the property of Mr. George Whittinghaun.

D. N., Marysville, is informed that Lord Lurgan's Master McGrath was by Dervock from Lady Sarah. He won the Waterloo Cup three times, but not in auccession.

If the correspondent who signs himself ' ' will send us his real name he may hear something to [illegible] Dogs.

HERD AND SWINE.

Feeding Young Pigs.

When about three weeks old the young pigs begins to look after other food than what the mother supplies—some earlier, some later, according to the supply. Some breeders tempt them early with delicacies, to induce them to feed; but I never knew any benefit from this course where the mother did her duty. To enable her to do so, it is necessary that her wants, which, with the great drain her family makes upon her system, are by no means limited, should be freely and judiciously supplied. A long, low trough, easily reached by the youngsters, is the proper one if all are intended to feed together; but perhaps the best course is to provide a small trough for them, to which she cannot get access, always giving the same food to the young as to the dam. I am convinced that food differing in quality or composition from what the mother feeds on always does harm to the young pigs while they continue to suck. Many thus give cow's milk, which always with me has disagreed with them more than anything else, except it has been given to both alike.

If it is obvious from the first that the mother's milk is deficient, or indeed in any case, it is well to supply the young when a fortnight old with a few crushed oats to amuse themselves with. These they will generally eat before anything else, and it is about the only corn that given thus early will benefit them. The mother may also have a share of the treat, as this will help her to keep up her strength; and the young ones may be enticed, as soon as possible, to partake of the food supplied to their mother, in this case consulting their taste and requirements. But, if it is found necessary to feed them differently from their mother, better take them away at once and bring up apart from her altogether. What she furnishes will only disagree with what is otherwise supplied.

If all goes on well, eight weeks after birth the young may be weaned. The sow then may have food with less moisture in it, and a little corn will help to dry up her milk, and dispose her to come quickly in season. This, as we mentioned before, will be from the third to the ninth day, most frequently from the third to the fifth; and as at these times she evinces less ardor, and continues in season a much shorter time than at others, she needs careful watching, so as not to miss her.

From a number of causes it may happen that a litter of pigs may be deprived of their mother's care. They need not, however, be sacrificed; for, when proper attention can be bestowed upon them, they are by no means difficult to rear. It is, however, a great advantage to them, if only once they can partake of their mother's milk, as nothing is so effective in clearing away the meconium as it, and those that have had the milk will do much better than those not so much favored. Cow's milk, as may be supposed, is the best substitute to replace the mother's, but not in its natural state. Though they may do well on it for a day or two, those so kept by me have always, at the lapse of a couple of days, gone into a sort of lethargic state, and died. The milk must be from a moderately new milch cow, and of good quality—a milk rich in butter rather than caseine to be preferred. It must always be boiled or well scalded, and to it must be added some coarse brown sugar, to make it sweet, and also a few drops of linseed oil, say a heaped desertspoonful of sugar and half teaspoonful of oil to the quart. Upon this the youngsters will thrive amazingly, and will hardly miss the care of their mother. Of course, they must be kept clean and warm, and be attended to and fed as often as they require, which, truth to tell, is rather frequently; about every two hours, or even oftener for the first week, night and day, they are ready for food, and require it. The greatest care must be taken not to let any of the vessels, etc., get sour; and only the required amount of food should be prepared at a time, as if it becomes at all sour, and their systems are once upset, it is a most difficult matter to get them right again; and all thrift is for a long time lost. The first time or two a teaspoon is the hardest thing to feed with, but in a few lessons they will learn to help themselves out of a basin or cup; and when two or three days old, will all feed together off a plate with as much selfish eagerness as their elders betray.

In early days no young animal can assimilate starch; but with age comes this faculty, and in a little time new milk may have skim added to it, and likewise scalded bread at first, and afterwards boiled potatoes, scalded fourths, and gurgins—till eventually they feed as others who have not been hand-reared. It is well to continue a portion of new milk as long as it can be afforded, or up to six or seven weeks old, while skim is by no means an extravagant food. A little sugar may also be continued to a similar age with advantage. Of course, it must depend in great measure upon the conveniences and facilities for so rearing a litter, and also upon the value whether it it is worth while to go to the expense and trouble or not. But when opportunity offers, and where good pedigree stock are kept, undoubtedly it will pay so to do, and even ordinary stock, when selling at fair prices, will leave a margin over expenses for the trouble incurred. For pigs so reared, some crushed oats, soon as ever they will notice them, will be of great benefit; and sliced raw roots, cabbage leaves, cut grass, etc., may be supplied with advantage directly they will take to them. It is well to ring with a fine hair-pin or fine ring very quickly, as all pigs that are early deprived of their mother are apt to contract the habit of rooting and nosing at each other, which habit prevents the repose and contentedness that so much assists growth.

I have more than once reared young pigs with great success upon the plan here mentioned; and it is well to know that should a sow be lost, or from any cause be unable to suckle all or any of her litter, they can be reared without maternal assistance. Nay, I have seen more than once the hand-reared pigs, at eight weeks old, considerably larger and better grown than the remainder of the litter, which had been under their mother's care. And this is sufficient proof of the feasibility of the practice.—*Live Stock Journal.*

Young cattle are reported to be dying in the upper part of John Day Valley, Oregon, with the same disease that caused so much loss on the Malheur and other parts of Eastern Oregon two or three years ago. Only yearlings and sucking calves are affected, so far. This disease causes the death of young, fat and apparently healthy cattle within a short time after the appearance of the first symptoms, and no remedy [illegible] known. Very fat cattle are more liable to its attack [illegible] ones.

[illegible]ny is selling on the Sacramento river for $8 per [illegible]

How to Feed the Nursing Brood Sow.

As all nourishment given the new-born litter passes first through the digestive organs of the dam, it is of prime importance that the latter be kept in the highest possible state of health. It is too much the practice to confine swine upon concentrated food, especially those not upon pasture. This has an application to brood sows that farrow in advance of the pasture season. It is not sufficiently considered that the hog, in a state of nature, is largely an eater of fibrous food, grass, weeds and roots. His digestive organs are adapted to this class of food, and the health is quite likely to suffer if it is withheld.

The hog, as he is bred now, has far more fat in his make-up than before the improvement. In fact he had, when fairly fed up, about the same amount of lean as of fat, as grass-eating animals in general. The hog cannot change the original character of the food he eats, so far as its elements are concerned. Therefore, if we would build up the muscular system, thus improving the hog as a maker of bacon and hams, we must rely more upon grass and less upon corn, and other rich fat-forming foods. It was formerly the custom to keep hogs penned up the year round—at least this was quite generally practiced, even upon farms. Sometimes, in localities where timber abounded, hogs were given the range of the wood lot, or a portion of it, where they could root, thus securing the roots of certain weeds, of which they were fond. This plan descended from the custom of hog-raisers before the Norman Conquest, when swine were fattened upon mast and roots, which their long, hardened snouts so well fitted them for digging from the earth.

But then, in many cases, the cultivated hog is made to suffer from the too artificial and concentrated foods of the present day. This would be destructive to the health of the fine-bred swine if modern views had not so generally introduced the pasture. The modern, variously-fed person, has digestion very different from the plain livers of a few years ago. For the same reasons highly-fed brood sows are not, as a rule, in the best state at farrowing time to give the young litter a good start in world. They are more likely to be in good condition in the fall than in the spring, for, unless closely restrained, they build up in vigor of digestion, as well as of muscle, though having access to grass and other green stuff during the drop season.

Breeding sows, however, that are wintered in the usual American fashion, without roots, are not in the condition they should be for either farrowing or suckling a litter. The sow herself is not in so great danger as the litter, for, as too many breeders have learned, the young things, if the sow's milk is not of the most healthy kind, are liable to show the ill effects of taking unhealthy milk within the first day or two of their existence. Fermentation within the sow will engender fermentation, and consequent bowel disturbance, within the young pig. To dose the pig, in such a case, with drugs, is useless. The disturbing element is within the alimentary canal of the sow, and must be reached by change of food, mild alkaline preparations—charcoal being no doubt the best for the purpose—with a change from confinement and concentrated food, having a tendency to ferment, to freedom, and access to the earth, and to grass, roots, etc.—*Live Stock Journal.*

Ages for Breeding Cows.

This is a subject which is undergoing considerable discussion at present in the agricultural journals, and the practice of too early breeding, I fear, will be carried out to an extreme. As a people, we are too much in a hurry, and too anxious to crowd on and anticipate results. With the smaller breeds of cows, like the Jersey and the intermediate Guernsey, Ayrshire and Devon, to have them served at fifteen months of age, to calve at twenty-four months, may not be too early, but for the larger breeds, like the Shorthorn and Hereford, it certainly is, and the old breeders of these, as a general rule, did not permit them to give birth to their first calf till three years old. They told me in Yorkshire, if their Shorthorne came in earlier, they would soon degenerate in size, weaken in constitution, and that it was essentially necessary to keep both of these qualities well up, if one expected to maintain a good, vigorous herd. Cows which are not quite so large, like the Sussex and the Angus sorts, may be allowed to calve safely, perhaps, at two and a half years old; but three years, I think, would be still better if the breeders wished to keep up a good size, and especially to enlarge upon it.

If a heifer of any large breed promises to grow up too coarse for a handsome appearance, then, in order to refine her, she may be served to calve at twenty-four to thirty months of age, as the case may be. The Holsteins and Friesians being eminently a dairy stock, perhaps they ought to come in at these ages; still, I think they will ultimately lose in size if this be tenaciously insisted upon. In breeding, it will not answer for us to follow, in every instance, the precise steps of other countries, for climate and food differ so much that it would make this hazardous. For example: England has a much more equable climate than America; the winters are not so cold, and the summers are not so hot. This gives her animals a better chance for a continued even growth. Again, she produces more, and a longer season of grass for pasturage, and the best of roots to substitute for this green food during the winter months. Such food is doubtless better for the growth of young cattle stock than so much dry forage and grain, which we are obliged to use, according to latitude, from four to seven months out of the year.—*A. B. Allen, in Live Stock Journal.*

It is an easy matter to train a heifer to stand quietly to be milked, but it is easier to train them to jump, kick, and run. The way to teach them to stand still is to require them always to do so. If there is naught to hinder a wild heifer from running, and if her fears prompt her to run, she will run. If she cannot run, in a short time she loses her fear and stands from habit; and habit is one of the most powerful influences in this world for either brute or man. If you want to transform a wild heifer into a well-behaved, well-trained cow, you must be patient and exhibit no temper. Never strike her. She must first of all get acquainted with you and learn that you will not hurt her. She must learn not to fear you. If in winter, it is best to milk in the stable, make as little fuss and as few alarming motions as possible; handle her very gently. Be careful not to pinch the teats. This is the great source of trouble. A cow naturally wishes to be rid of her milk. She stands quietly until some careless milker has given a squeeze that hurts, when she kicks and runs. By allowing such a course a few times, the habit will be confirmed. The best way to manage, if you have no stable, is to have a well-fenced yard, and teach your heifers to stand for milking in that; or, next best, to tie them, using them very quietly. No man or boy is fit to handle animals unless he can control them and control himself.

Rye for Pasture.

Just at the time when grass starts growing in spring, when stock that has been fed on dry feed longs for a change, then is when a good field of rye proves of greatest value.

Every farmer and stock-raiser knows that every spring stock of all kinds get tired of dry feed. Every sprig of grass that makes its appearance anywhere within reach of stock is eagerly eaten; and how many times stock (especially when fed upon one kind of feed all winter, as corn and fodder) will refuse to eat at all, and get poor and weak in consequence.

When mares are foaling and cows calving, a good rye pasture in which such stock can be turned proves indeed valuable. And as compared with the coet, will give a larger amount of feed and last longer than any other crop.

By having a good field of rye in which to turn stock you are enabled to allow your pasture to get a better start in the spring, and in this way support better and keep up easier a larger quantity of stock. If you can do no better, sow a small field of corn, and use until you have to plant again the next spring. This will be a great help, and, if then you are forced to plow it under, you are giving your land a heavy coat of manure in a way that is the least expensive.

For soiling, rye is invaluable, and where only a small amount of stock is kept it can be made very profitable used in this way.

One of the best farmers I ever knew—who only owned a small farm—claimed that he could keep a cow in fine condition seven months in the year on one-half an acre of red clover, by soiling. He would sow his patch to rye during the last of August, so as to get a good as growth as possible in the fall; by early spring he could commence cutting off his rye for feed. He sowed his clover early in the spring mixed with oats, and by the time the rye was gone (say in July), his clover, after the first year, was ready and the only expense was seeding the rye.

If a small field is sown to rye it should be sown, if possible, very early, not later than the middle of September, to get a strong, vigorous growth, so that when other pastures fail you can use this.

For sheep or young stock you will find it of great benefit to have such a field when the snow is off the ground for them to graze. You can keep them in such a field until your other pastures have made a good growth and then get a fair crop of seed from it; or if it is desired to crop the field to corn it is worth the trouble and expense as a manure. This, of itself, should entitle it to more consideration than it receives. It is, however, growing into favor. More farmers every year are sowing patches of it, and when once tried the experiment will not need much urging to have it repeated.—*Prairie Farmer.*

Mr. Corbin's Suggestions to H. W.P.

EDITOR BREEDER AND SPORTSMAN: Observing that my recent crude indorsement of the principal advantage you claim for tips has provoked comment, and believing the subject one of too great importance to become stale at this early stage of the discussion, I beg to offer some further suggestions. It is unquestionably true that the hare, brittle foot of an old horse as described by H. W. P.—a foot deformed and weakened by long-continued use of shoes—will soon crumble and wear away to the sensitive quick, when completely exposed to the friction of gravely roads; but instead of this being valid evidence against tips (which are intended to protect the sensitive part of the foot) it should be regarded as strong testimony in condemnation of shoes.

If the results from the cruel injury caused by shoes terminated with the death of the unfortunate victim, they might be tolerated indefinitely; but as the animal, if a mare, is often put to breeding, these acquired deformities, and the unsoundness from which she is suffering, are liable to be transmitted to her offspring.

On the other hand, if it is true that tips tend to preserve the feet in a state of perfect soundness, may we not ultimately overcome the defects now so prevalent in on horses' feet by breeding out the weakness, and ere many years roll around be able to produce a horse with feet of the gutta percha quality, peculiar to the get of "Nigger Baby," with some degree of certainty?

The experience of H. W. P. convinces him that "the longer a horse has worn shoes the more brittle and tender his feet become."

Every careful observer knows that this is true. It is equally true, however, that when the shoes are removed, the longer the animal goes barefooted the tougher and stronger the feet become; hence it is conceded that nature's best remedy for contracted, brittle or weak feet, is a run at grass with the shoes off.

It has been after such treatment that I have used tips with excellent results in preserving the benefits derived by the rest.

It is worthy of remark that tips seem to be coming into favor at a time when the radical or extreme use of toe-weights is being condemned.

Whatever advantage there is to be gained by weight in balancing a young trotter can, in my opinion, be more safely and advantageously used on top of the foot, rather than under it.

A light toe-weight and broad, thin tip will be admissible if not fashionable, on a gentleman's roadster, just as soon as it is understood that injury from concussion is lessened and that the strength and health of the rim, sole and frog can only be preserved by the exercise which direct contact with the road will supply. The sensitive portion of the sole nearest the toe alone needs the protection supplied by tips, and where the weight of additional iron is essential to lengthen the stride or regulate the action it can be applied with satisfactory results above the toe.

In the meantime each succeeding generation of trotters bred to the habit and form essential to perfect action will require less weight to overcome the influence of pacing, or other blood which has been potent in producing speed, but in conflict with the perfection of natural trotting action.

As a remedy for interfering behind, I have never found anything equal to tips or a three-quarter shoe—that is, a shoe made exceedingly thin and light to cover the outside of rim, and extending just around the toe, leaving the inside of foot bare. Care should be taken to cut away the horn where the shoe is to bear, equal to the thickness of the shoe, to preserve a level bearing.

A. CORBIN JR.

Palace Hotel, June 10, 1883.

When meat is exposed directly to thick smoke of a fire of any kind the lamp blackwill accumulate on it, giving it an unsightly and unsavory appearance. This may be avoided by putting the meat in sacks made of thin cloth, which will admit the creosote and keep off the coarse smoke. The bacon with the fine gold color exhibited at our fairs is smoked in this way.

BASE BALL.

League Games.

Games won and lost by clubs of the California Base Ball League from April 1 up to date:

	Woonsocket.	Haverly.	California.	Redington.	Total Games won.	Runs Made.	B. H. Made.
Woonsocket	.....	.....	2	1	3	24	37

Redington	1	*	1	....	2	19	23
Total Games Lost	3	0	5	2	10	115	126

*Game postponed on account of rain.

The California Club Beaten.

The California Club suffered another defeat last Sunday, this time at the hands of the Woonsocket nine. This would not have been, however, but for Hack, who has been tried in nearly every position afield, and who is really such a poor player, or, perhaps, is so indifferent that in their threatened reorganization he ought to be retired altogether. One wild throw of his gave the Woonsockets the two and only runs that club scored, but which were just sufficient to win the game. The weather was extremely unfavorable to good playing, and none of the eighteen rose above its influence. A cold wind swept the grounds all the afternoon and raised clouds of dust, in which the fielders and base men were lost A stereotyped one, two, three order of getting out was only varied by the three runs made and the two players—Start (Stewart) and Sullivan—left on bases. The Woonsockets played with two new men, Lamb and Barnett, who did nothing extra. The Californias went in first with McDonald at the bat. Lamb caught him out on a fly and Boyle, who followed him, knocked a ball to Finn, who threw it to Egan at the first base long before Boyle got there. Then Piercy bowled one to Sullivan, who threw it to first in time to stop him. Then Lawton of the Woonsockets knocked an easy one to Piercy and he put it to first, and Egan's grounder was stopped by Emerson, who sent it to first, and the side was out. The next two innings were barren of results, but in the fourth Piercy made a run. He knocked a ball on the bounce into Lamb's hand. Lamb put Boyle out at second and had a good chance for a double play on Piercy at first but he threw wildly, and the ball passed clear over Egan's head, beyond the row of spectators. Before it was recovered Piercy gained third, and soon after a good left fielder from Start let him home. It was not until the seventh inning of the Woonsockets that the monotonous routine of onts was broken. Then Swanton was at the second base and Donohue at first when Hack made his bad throw, bringing them both home. The eighth inning for both sides was played in less than five minutes. On the California side Harrison was put out by Egan, assisted Donohue; Emerson fouled and was caugbt out very cleverly by Lawton, who made a run for a bigh foul, and Hack was put out by Egan, assisted by Finn. Lamb, Barnett and Leary of the Woonsockets struck out. The ninth inning of the Californias was enlivened by a quarrel over a decision of the umpire, which, right or wrong, the players had no right to question in the course of a game. The Woonsockets did not play their ninth inning.

Madden, the new pitcher of the Californias, is a valuable acquisition. His opponents could do little with bis balls. He is only nineteen years old, and has played but little before. Last year he played several games with the Elite club. O. M. Boyle played with the Californias yesterday for the first time. He is an old player, but out of practice. He formerly belonged to the athletic club. Barnett is from the St. Mary's College nine, and Lamb played a few games with the Mystics last season.

Following is the score of Sunday's game:

WOO NSOCKETS.	TB	R	BH	PO	A	E	CALIFORNIAS.	TB	R	BH	PO	A	E
Lawton, c	3	0	0	5	2	0	McDonald, c	3	0	0	9	2	0

Runs earned—Mussel Slough 1, Fresno Stars 4. First base on balls—McVey, Monroe. Double play—Kenney. Three-base hit—Phillips. Two-base hit—Monroe. Time of game—Two hours and forty minutes. Umpire—R. Pratber. Scorer—J. P. Carroll.

"A lover of base ball" announces his anxiety to make a match for from $250 to $500 a side between the Haverly and California base ball nines, to come off on July 15.

The California Club will play in Sacramento to-morrow, Sunday.

Sacramento Base Ball.

A game of base ball was played at Agricultural Park, Sacramento, last Sunday, between the Unions and Eurekas of that city. Some excellent playing was done by both sides. It resulted in a victory for the Unions by a score of 5 to 1. Following is the score:

UNION.	TB	B	BH	PO	A	E	EUREKA.	TB	B	BH	PO	A	E
Carroll, p	4	0	1	0	14	3	Maher, c	4	1	0	11	4	2
Leonard, 1b	4	1	0	9	0	1	Robinson, 2b	4	0	0	0	3	0

Union	3	1	0	0	0	0	1	0	—5
Eureka	1	0	0	0	0	0	0	0	0—1

Earned runs—none. Second or third bases—none. First base on errors—Unions 4, Eurekas 4. Left on bases—Unions 2, Eurekas 4. Base on balls—Unions none, Eurekas 1. Struck out—Unions 5, Eurekas 7. Passed balls—McLaughlin 5, Maher 2. Wild pitch—none. Umpire—C. H. Chipman. Scorer—Waller Wallace. Time of game, two hours.

The California Base Ball League has requested the Fourth of July committee to make the customary appropriation for an athletic tournament at the Recreation Grounds on July 4. If they succeed, prizes will be given the winners.

Ed Morris, who has been playing third baseman for the Haverly Club of the California Base Ball League, bas accepted an offer to join the Athletics of Reading, Pa., and bas gone East to join that club.

The Fresno Stars would like to hear from clubs wishing games. Propositions addressed to L. A. Blasingame, Secretary, Fresno, will be attended to.

At Sacramento last Sunday the Californias of that city beat the Young Americas by a score of 6 to 1.

At Sacramento last Saturday the Niantics beat the Libertys 17 to 14.

FISH.

The Fish Commission.

The State Fish Commissioners met at Union Hall, Sacramento, last Saturday, and organized with R. H. Buckingham as president and A. B. Dibble secretary and treasurer. Hereafter meetings of the board will be held on the first Monday of each month in Room 49 of the Union Hotel. The office of the secretary and treasurer is at Grass Valley, Nevada county. At the meeting last Saturday it was stated that the Commissioners are doing everything within their power to punish those who violate the fish laws, and are endeavoring to supply the waters of the State with salmon and various kind of trout, carp and other desirable food fish. When the present board took charge of affairs they found no fish supply of any kind, nor any hatchery or other means for supplying fish, and they now are making efforts to furnish a supply. For such purpose they are building a temporary hatchery at Shebley's ranch, on the line of the narrow gauge railroad in Nevada county. A building twenty by forty feet has been put up, the boxes and screens set in place, a supply tank constructed, and the clear, cold water of a strong flowing spring is conducted to the establishment by means of wooden V-shaped troughs. The hatchery is almost in readiness to receive the trout spawn, the first of which is expected to arrive from Lake Tahoe. If it is found that the location is favorable, of which no doubt is entertained, this temporary hatchery will be converted into a permanent establishment, as the supply of water from several other springs can be obtained at a small cost. The Commissioners have arranged to receive a large amount of rainbow trout eggs from Fort Bidwell, Modoc county, and also for a large amount of silver-speckled trout eggs from Tahoe. J. A. Richardson, who has large experience, has been placed in charge of the Shebley hatchery, and he says he has no doubt but that it will prove entirely successful and supply trout equal to the large demand now being made on the Commissioners. The McCloud river hatchery will be operated this year as usual. Professor Baird says that the effort to introduce salmon into Eastern streams has failed. California salmon do not thrive in Eastern waters, and the United States Fish Commission's efforts on this coast will be confined to the stocking of the Sacramento river only. About $10,000 per year is expended by the United States Fish Commission at the McCloud hatchery, and in the future this State will reap the full benefit of the work done. California will, therefore, be more indebted than ever to the United States Fish Commission.

Myron Green, superintendent of the United States Fishery on the McCloud river, says that Fish Commisaioner Livingston Stone will be here in July on his annual visit to the fishery, and that work in the hatcheries will be pushed vigorously. Mr. Stone is now in Idaho arranging for the establishment of a hatchery at the headwaters of the Columbia. The salmon supply in the Columbia river is found to be decreasing, and some means have to be taken to keep up the finny population of its waters.

Salt Water Fishing.

During the past two weeks there has been but little fishing done around the bay. At present smelt fishing occupies most of the attention of our local fishermen; these are caught all around the bay, in fact the run is more than ordinarily good. In a stroll along the city front one finds the wharves well fringed with the dangling legs, fishing poles and cast lines of patient men and boys intent on alluring the toothsome smelt and tender tomcod from their native element. At Saucelito the run of the many kinds of fish still calls boatloads of recreation-seekers to the fishing grounds in that vicinity.

The latter part of last week Fish Commissioner Dibble and Judge Keiser made a trip to Lake Tahoe, where they took a row boat and went over to Sugar Pine Point. There they discovered that General Phipps had about 900 trout trapped in a little creek about three miles south of McKinuey's. Mr. Dibble gave Phipps forty-eight hours' time to liberate the fish, under penalty of legal proceedings, and placed a man in charge to notify him if the demand had been complied with. The fish were released.

Trout fishing is said to be good at Geyser Springs, Sonoma county.

The Boss Story Beaten.

EDITOR BREEDER AND SPORTSMAN: In your last issue you published a fish story said to have been written by Jim Gordon Bennett and ask if any of your readers can raise it some. The story is good enough in its way, but as a fish exploit does not approach one I will tell you and which has the merit of being true, while it must be plain to all that Bennett's story was nothing but a freak of his imagination. It was about two years ago when fishing for trout near Santa Cruz I came across a place called the gorge, a precipitous gulley or chasm cut through the mountains some 25 feet in width and having a perpendicular depth of not less than 200 feet. A small creek rippled along the bottom of the gorge and my experienced eye told me that in it reposed some fine trout, probably the fathers of all the trout in the stream. But how to get at these trout was what bothered me. I prospected along for more than two miles and failed to find any way of descending the awfully steep sides of the gorge. Finally I sat down and cogitated. At last a happy thought struck me and I proceeded to business. Joining four lines together I stood on the edge of the precipice and lowered the line. It had scarcely touched the water when a most tremendous jerk informed me that I had booked something, what I did not stop to consider, for that same jerk also yanked me over and I began to descend the chasm at a fearful rate. I had only rolled and bumped some fifty feet when a small tree arrested my downward career and in its branches I hung, fifty feet from the top of the cliff and suspended over 150 feet of space. The sheer wall of the cliff above me defied all my efforts to climb and at last I gave up the struggle in despair and sat still, hoping against hope that some one would pass. How long I waited I cannot say, for fear and fatigue had set me off into a semi-doze. At last I was awakened by a noise above and on looking up saw my faithful dog, my constant companion in all my trips, endeavoring to attract my notice. Soon I saw the end of a rope coming down the cliff and, thinking some person had come to my aid, I called out. I was only answered by the gleeful bark of my intelligent dog. Nearer and nearer came the rope until at last I grasped it with my hand and tested it to see if it was properly fastened. Luckily for me I had taken a good grip for, like a flash, the dog jumped away from the edge of the cliff, and then the rope began to ascend, drawing me up with it. The rough stones cut my face and hands, but I hung on and at last reached terra firma. Then I jumped to my feet to thank my preserver and judge of my astonishment when I could see no one near. A short investigation revealed the secret of my mysterous escape. Understanding my peril, my faithful dog had jumped on the saddle of my horse, who was grazing near by, unloosed the long lasso I always carry at my saddle horn and seeing that one end was firmly fastened to the saddle, had backed the horse to the edge of the cliff and lowered the rope down to me. When he saw I had hold of the rope he led the horse away from the cliff and rescued me from a position of frightful danger. Strangely enough, my line had become entangled round my body and on drawing it up from the bottom of the gorge I found a lovely three-pounder attached, albeit from his long stay in a dark place he was rather dark in color.

DR. DE VAUX.

Santa Cruz, June 11, 1883.

If weather and wind permit the managers of the Edith contemplate making a fishing excursion to Half Moon Bay. The boat will probably leave the wharf some time this evening for the above mentioned grounds.

BICYCLING.

Mr. A. Nixon left Upper Norwood at 9 a. m. on the 15th of May, timed out by A. E. Woodhouse, L. T. C., to try to put on a "record" for 100 miles, and reached Brighton (Cyclist Club), 50 miles, at 1:19, where his time was checked. He stopped there until 1:35 for lunch, and then started back, stopping five minutes at Hand Cross for refreshment, and reached Crawley at 4 p. m. The next stoppage was at Red Hill (4:55 to 5:05). Just before completing the 100 miles Mr. Woodhouse, by arrangement, met Mr. Nixon, in order that he might time him in at the finish by the same watch by which he started him, and also check his Stanton's log. Mr. Nixon completed the 100 miles at 6:22 p. m., making 9 hours 22 minutes, including 30 minutes for stoppages.

The status of the bicycle and the rights of its rider are coming to be interesting matters of discussion as the use of the silent steed increases. Bicyclists generally claim that the bicycle is a vehicle and that it has precisely the same rights on the street as any other vehicle. This opinion has been contested in some cities, where it is sought to regulate the use of bicycles by ordinance, and the controversy promises to hasten some legal decision. It will only be necessary to bring this matter into the courts in any place where it is sought to prevent their use, and have it quickly decided, as there are any number of decisions already to the effect that the bicycle has the same rights upon the street or road as any other vehicle, no more, no less.

Charles H. Le Roy, who contested the six-day race with horses against bicycles at the Boston Casino, says that he does not care to try it again. The race was not against horses so much as against the endurance of one man in keeping to the saddle. He was nearly worn out by the struggle, and says the physical strain was too severe to compensate for any honors that might be won. The bicycles had an advantage over the horses, inasmuch as Le Roy was compelled to rein in twice in every lap, while the bicycles could go along almost as fast on the turns as on the straight sides of the Casino.

H. W. Gaskell again won the ten-mile open race at the spring meeting of the Surrey Bicycle Club at Kennington Oval, London, Eng., April 28, riding the distance in 42:09 4-5. His time last year was 38:26 3-5. F. Preutice was second by ten yards, and Frank Moore (who visited the States last year, and made several records while here) third by six yards.

Five young ladies of Denver, Col., ride the bicycle "man fashion," clad in black velvet knee-breeches, woolen high stockings, a polo cap, and a sack coat, with low-cut bicycle shoes.—*Wheelmen's Gazette.* (We fear this is an Eastern romance.)

Local wheelmen are preparing for races on July 4, to take place in connection with the games of the Olympic Athletic Club on that day.

The natives of Calcutta ride the bicycle bare-foot.

Tom Aldcroft, a once well-known English jockey died recently at Newmarket. He won the Derby in 1[illegible] Ellington, and also steered many other good horses in eminent racing events.

THE
Breeder and Sportsman.
PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.
THE TURF AND SPORTING AUTHORITY OF THE PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET
P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith

JOSEPH CAIRN SIMPSON, - - - EDITOR

NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Enss House, 1,009 J street.

ADVERTISING RATES.

Displayed, $1 50 per inch each insertion or pro rata for less pace. Reading Notices set in brevier type and having no foot marks, 20 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, Saturday, June 16, 1883.

A Higher Code.

It must be manifest to all those who have given thought to the subject that there is a necessity for a higher standard of morality in the sports of the turf and track. Not alone for the government of drivers and jockeys, owners and trainers, but embracing all those who are inclined to speculate on the chances of gain or loss in public contests.

Much has been written in relation to the duties of those who have the active control of the horses engaged, and in all the volumes of advice and censure, not one word of surplusage, or a single sentence that was not warranted by the importance of the subject.

But little has been written in relation to a still more important phase of the question. There is an imperative necessity for a new code of ethics for the government of those who are partially outside of the contest, of judges of races, clubs and associations, and though it may prove beyond the power of the usual remedies to counteract the evil, there is one, without, which will certainly have some injurious result. The evil lies in persons who are not only willing but are eager to wager on races which are fraudulent, and who stake money with a thorough understanding that those parties on the other side are to be swindled. Although there has been a wonderful change for the better in California, and the brazen effrontery of a few years ago has given place to a more cautious method of working, as well as a curtailment of the field of operations, there is no question that a few are still inclined to tempt drivers and riders to do wrong, many who will avail themselves of a knowledge of intended villiany, and who have no scruples to derive pecuniary benefit from the information. When public opinion visits them with the same measure of opprobrium as is awarded those who are active in perpetrating the fraud, there will be a change. When it is reckoned just as odious to share in the division of the spoils as to perpetrate the robbery, and this the opinion of men who are not so bigoted as to believe that all wagers are a sin, there is good beginning for actual reformation. We have heard men boast of their astuteness in being able to detect the indications of contemplated fraud, and also relate how many dollars were the reward of their detective ability. In years past it was the practice of many bettors to pay no attention to the merits of the horses, delaying their investments until the cue was obtained from the actions of those who were supposed to be in the secret, and thus be in a position to retain the whole amount of the winnings without an accounting to the syndicate who had the venture in charge. We are inclined to the belief that the regeneration is more marked in this State than in the East, as there are frequently communications in the press of that country in which the writers have no hesitancy in declaring that a horse was not intended to win until the time came for a "killing." In some cases the author took upon himself the credit for this peculiar smartness, and unblushingly advanced the proofs of his own shame.

There is another point worthy of consideration. When the "plunger" was summoned before the jockey club, he justified his making large presents to riders that he did so encourage them to win. It was evident, however, that, if it "suited his book," there could be the same encouragement to lose. Drivers, especially of a certain class, whether they have horses in the race or not, are prone to offer advice to bettors with the understanding that they are to share in the gains. It may be that the advice is to back horses other than their own, and in such cases they become active "helpers," in place of doing their utmost to gain a victory. Oftentimes we have heard the remark, "there is no law to compel me to back my own horse," and the right of owners to "hedge" their stake by wagering on their opponents is conceded. The first position no one can find fault with. Many ardent supporters of the turf never wager; we sincerely wish that everyone eschewed the practice of betting against their horses, and, if the hopes of success are considered too slim to warrant support, decline investments of any kind.

It is not likely that men can be taught to ignore "points" when they think the source of information is superior to their own. The lessons of California and Pine streets are unheeded, and the "man on the inside" is credited with almost superhuman intelligence, although there have been frequent proofs of erroneous judgment or premeditated rascality.

California Fairs.

The California Circuit of fairs is in many respects superior to that of any State in the Union. The claim that these annual exhibitions are superior to those of several States is easily substantiated, and residents who are familiar with the Eastern expositions will readily indorse the position we have taken, and heartily subscribe to the award which gives them the front rank over all others. Here there are attractions rivaling those of the "Grand Circuit," and with these are combined such a display of agricultural, mechanical, horticultural, floral, scientific, etc., that every taste can be gratified, every penchant indulged. There is a happy conjunction of exciting contests and valuable lessons. The contests are not merely exciting episodes when the least mercurial are stirred with the eagerness of the fray, but they also show to the breeder procreative powers which must be used to insure success in his business. It has long been held axiomatic that "like produces like." While the truth of this is acknowledged in the main there are other things to be considered. To illustrate we will take the most prominent of all the breeds of horses which have a place in daily life, at least, in American life. This is the fast trotter, not merely gauged by his performances on the track, but when the other qualities are elements in the calculation. For purely track purposes, horses which can trot miles in the fastest time and repeat them with more than ordinary endurance have the greatest value. For the road there must be also a conjunction of form, docility, and soundness. The "speed programme" of the fairs gives a chance to test the racing qualities; the exhibition premiums decide which are entitled to the preference on other scores.

The advertising columns of this paper will show how complete is the classification of the fairs in regard to the racing and trotting, and it will not be long before the exhibition premiums are made public, when it will be found that there is no discrepancy in the whole of the arrangement. It may be premature now to write further of what the grand show will be, though we can safely promise that Anno Domini 1883 will witness still grander successes in the agricultural exhibitions.

Royal Ascot.

Although our horses were beaten at Ascot no one had the temerity or over-sanguineness to expect a different result. That it was a brilliant meeting notwithstanding, the reports show, and from the appended report of the Cup it will be seen that another Hermit has come to the front. Not for the first time, however, as Tristan has heretofore shown his ability, and was only beaten by Foxhall in the Grand Prix by a very scant amount, and it is now the general impression that he is the best cup horse in Europe:

At Ascot Heath on the 7th the race for the gold cup was won by Mr. Lefevre's five-year-old chestnut horse Tristan, with Lord Falmouth's four-year-old brown filly Dutch Oven second and Lord Ellesmere's six-year-old chestnut horse Wallenstein third. Lord Roseberry's three-year-old bay filly Fleur d'Orsnge also ran. The last betting was 7 to 4 on Tristan, 4 to 1 against Dutch Oven and 9 to 1 against Wallenstein. Tristan was ridden by Fordham, Dutch Oven by Archer and Wallenstein by Webb. Wallenstein led for the first mile. Tristan then went to the front and made the rest of the running. He won in a canter by three lengths. Wallenstein was a bad third.

SUMMARY.

THE GOLD CUP value 1,000 sovs., given from the fund, with 200 sovs. for the second and 100 sovs. for the third, added to a subscription of 20 sovs. each, half forfeit; three-year-olds, 7 st. 7 lbs.; four, 9 st.; five, six and aged, 9 st. 4 lbs.; maidens and geldings allowed 3 lbs. About two miles and a half; thirty-six subscribers.

Mr. Lefevre's ch h Tristan, 5 years old, by Hermit, out of Thrift.... 1
Lord Falmouth's br f Dutch Oven, 4 years old, by Dutch Skater, out of Cantiniere.... 2
Lord Ellesmere's ch h Wallenstein, six years old, by Waverley, out of Lady Wallenstein.... 3
Lord Roseberry's b f Fleur d'Orange, 3 years old, by George Frederick, out of Couleur de Rose.... 0

Petaluma.

Just as the foreman was clamoring about the necessity of all "copy" being in we saw the proof of the advertisement of the Sonoma and Marin Agricultural Society, and again it is only necessary to refer to it for conditions.

The prominent point is the frequency of the "district races." This precaution is undoubtedly justifiable and the limiting competition to horses owned in the district is praiseworthy from many points of view. In one we think there is error. By all odds, judging from the real test, actual work in races, Petaluma has the best trotting two-year-old in the State, and it would be well to open the contest so as to give those who are willing to tackle the champion a chance to meet him on his "own dunghill." Still there are plenty of opportunities and the colt which can beat him—better, perhaps, to say those who think they can beat him—will be granted the trial elsewhere.

However, every programme that comes in sustains the ground already taken that this will be a glorious year for the fairs. After all in looking at the conditions we see that "Dawn is barred," so that the objection fails. See advertisement for particulars.

San Mateo and Santa Clara.

Sacramento, Oakland and Chico were the first to make public the programmes of their fairs, and now that of the exhibition that is to be held in the Garden City is given to the world. When Santa Rosa, Petalnma, Stockton, Salinas, Los Angeles, etc., wheel into line, there will be an array that will thoroughly justify claims made elsewhere that California leads the world in the way of agricultural exhibitions. The beautiful valley in which nestles the fair-ground of the above counties is one of the richest in this rich State. There is everything to make it a desirable residence place, nothing to detract from natural advantages. The annual fair is always one of the best of the series, and the programme for this year is more than usually attractive. It is unnecessary to repeat the classification and the purses offered, as a reference to the advertisement will afford all the information desired. From that, however, it will be learned that it falls naturally into line and matches those which preceded it in publication. There is no reason to doubt that owners will liberally respond to the offers of the societies, and that the entry lists will be longer than ever before.

Tips.

We are well pleased to have our correspondents engage in the argument for and against tips. H. W. P. last week presented his objections. In this number. Mr. Corbin replies. We have heretofore stated, and desire to give that particular statement emphasis now, that the question of shoeing is the most important in the whole range of stable economy. We have the most implicit and thorough faith in the convictions that have been the result of so many years, experience and study, and still we greatly prefer that our correspondents have this tourney entirely to themselves, and feel under obligations to the gentlemen who favor us with their communications.

The Cattle Boom.

On last Thursday Lord Carlingford the British Minister of agriculture, was waited on by delegations from all the large towns. These gentlemen waited on his Lordship to protest against any restriction of the importation of American cattle and other foods. Carlingford stated the decrease in imported American cattle was due to the fact that better prices were obtained in America, and not from a system of compulsory slaughter at British ports. He said the Government would continue to act up to the spirit of its present laws and not strain them in the direction of further prohibition, as urged by opponents of the importation of American cattle.

This is a most significant fact but we wonder if all who read the dispatches read them aright, and took to heart the lesson they convey. They show first the increased value of cattle and secondly that this country is producing so little in excess of her domestic needs that there is but a very small margin for export. There can be no doubt that the outlook for cattle men was never so good as at present, but the old times of vast ranges and the yearly round-up are past. Cattle will have to be bred of finer quality than ever, and more care will have to be bestowed on them. There is vast profit in this cattle business, and no one realizes this better than those Englishmen whose land has been made virtually valueless by the importation of American cattle. They are seeking grazing lands in all parts of the country, and evince a disposition to do all in their power to keep England still the workshop of the world and let Englishmen still feed the workers. The cattle boom is at hand, and no one will reap a larger share of the harvest than those farmers and grazers of the Pacific States who have fine graded stock to sell.

The Great Green One.

On the 6th inst. at Cleveland, Ohio, an incident occurred that will be viewed with serious concern by many horsemen. On that day the six-year-old bay stallion Phallas, by Dictator, dam by Clark Chief, trotted the fifth and last heat of the race in 2:18¼. The event was for the 2:34 class. Phallas is in the technique of the turf a green horse. He has no record previous to that made at Cleveland, and the serious part of the matter to the interested horsemen is that Phallas has many engagements in the slow classes, being entered in the 3:00 class at New York, Clay Stakes at Long Island, the 2:40 and 3:00 classes at Chicago, the 2:40 class at Cleveland and the 3:00 classes at Buffalo, Rochester and Washington. It is not likely that the dark division contains any other phenomenon this season or it would have been whispered ere this. In the races mentioned above the purses are all large and first money is as good as won now. Owners of other entries are presented with this unpleasant fact, hence their tribulation. Phallas is half brother to Mr. Salsbury's Director, and is owned by J. I. Case of Racine, Wisconsin.

Our Trotters East.

Not much fault can be found with the doings of our horses in the East. It was only reasonable to expect that St. Julien would beat Fanny Witherspoon whenever they came together, but the two victories of Director are gratifying, as in both cases there were strong fields against him. Romero it is stated has not yet had work enough to enable him to keep up his great rate of speed. Overman is doing well enough to make amends, and there is little to fear that the California-breds will make a worthy showing before the green summer of the East fades into golden autumn.

Disfigurement of Bills.

We learn that some one pasted a bill of the *Breeder and Sportsman* over that of the Adelphi Theater. A suitable reward will be paid at this office to convict anyone who perpetrated the outrage.

EDITORIAL NOTES.

The California colts now in ths East are reputed to be doing well, and to show no unfevorahle effect of the journey and chenge of clime. Ths Palo Alto contingent are at Lincoln, Ill., where they heve the doubls adventage of a good mile treck and protection from lake winds. In the five-year-old race, second payments have heen made on hoth Wildflower and Bonita, which is taken as en intention to start both. Ths entries for thet event are numerous, but the only colts expected to disnute the first place with Palo Alto are Eva hy Sultan end Code hy Dictetor. Wildflower and Bonita ere elso in the race for five-yeer-olds with Phil Thompson, Ed Geers, Adelaide, Bronze and Jay Eye See. As Jey Eye See trotted a full mile at Clevelend on the 2nd in 2:16¾ it will he a great race whether he is heeten or not.

The Directors of the Chico feir have called our attention to to the fect that rece No. 6, trot, 2:40 class, is open to all and not limited to district horses, es published in the programme last week. We hope that this announcement will he sufficient to correct our omission and thet rece No. 6, 2:40 class, to be trotted the third dey of the feir, will receive a large numher of entries from all perts of the Stete.

Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

Dave, Sacramento:

You are mistaken about the Paris Mutuels. All pools are paid on the result of the races. In heat races poola are sold on each heat separately because the odds vary but pools are only paid on the final result, not on the result of the heat.

I. G. D., Stockton:

At the time "Horse Portraiture" was written the pedigree of Andrew Jackson was accepted as in the tabulated form given. There have been eo many nonsensical questioniugs of the old-time trotters, especially where racing hlood figured, that there is a maze of doubt. In "Horse Portraiture" the desire was to show that what was called a "predominatiug etrain" wes faulty. In the future we will endeavor to throw eome light on the subject.

G. H. B., Fresno:

1. We have no exact data ae to the age of Belle Hamilton. She is, if alive, twelve or thirteen years old. She has no record.

2. Belle Alta was a fine-lookiug bay horse, without white, about 15.3 and of good style and action. He was foaled in 1856, sired by Belmont, dam a handsome bay mare of unknown hlood owned by Capt. Simonds. He did not appear on the turf but once, in 1859 at San Jose, where he won a trot for three-year-olds, beating the field by a loug distance over a slow track.

W. O. H., Salinas:

1. We have made several ineffectual attempts to trace the psdigree of Argyle. His name appeers frequently in ths old California pedigrees, but no breeder has beeu, thus fer, able to meke his gsnealogy clear. He was foaled in 1856 iu Yolo county, and at that time wes said to be a son of a horse-of-all-work called Michigan Farmer, or of Michigan Farmer stock, his dam "Puss," a mare brought from the East, and said to be hy "Mege's Messenger." We havs no knowlsdgs of Michigau Farmer or Mege's Messeuger.

2. Capt. Wsbster, by Belmont, dam claimed to be hy Rysdyk's Hambletonian. Hs is owned hy R. F. Morrow of this city.

The Coaching Club's Meet.

No fewer than twenty-eight coeches—probahly the largest muster which hes ever taken plece in Hyde Park—took part in the Coaching Club's "inaugurel" meet of the season, which wes held on the north shore of the Serpentine, ueer the Royal Humane Sociaty's esteblishment, on May 20. Long hefore the hour eppoiuted for the meet ths roed leading to the Magezine wes thronged with carriages and equestriens. The carriages were three deep in some parts; but tne utmost order was observed without the intervention of ths police, who were present in force, and regulated the traffic at all the crossings. As the hour epproeched for the passing of the pegeant there wes a deadlock, a lane being left hy consent hetween the hordering rows of vehicles, so thet their occupents migbt have a clear view end every opportunity of observing end criticizing ths coaches as they wers "tooled" pest by their aristocratic drivers. The weather wes delightful, ths clouds which gevs sullen threatening et intervels during the morning having cleared off, and the sun shining hrilliantly on ths hright smerald spread of turf.

But the day was not too hot, the breezs which played over the lake end ths greteful sbelter of the trees affording all the relief and protection thet were desired. As the coaches began to arrive, the Princess of Wales drove up in an open carriege, and wes followed in a similar vehicle by the Duke and Duchess of Connaught and the Duchess of Teck. The first "turnout" to put in an appearance wes that of Count Munster, who drove up et a slow pace, with four splendid light chestnuts. Among the ladies on the roof were the Countess von Gohen and ths Countess Olga Munster. Colonel Thursby ran a good sscond in the order of arrival with four fine chestnuts, which compered very favorably with ths hest on the ground, and which hed heen well prepared for their puhlic appearance by being driven up from Yorkshire in tolerahly eesy steges.

Sir William Eden, who is well known to meny Californiens, heving spent severel seasons in the Yosemite, eccompanied hy Ledy Aucklend and others, drove four edmirable browns, Mr. Trotter four hlacks, end Ceptain Hamilton four beys. Mr. Crompton-Roherts piloted four bright bays. Mr. Albert Sandeman hed a scretch teem of two browns, a roen end e chestnnt; Sir Henry Meysey-Thompson four dark browns, and Mr. Seager Hunt four bleck-hrowns. Lord Hothfield (formerly Sir H. Tufton) drove four dark browns, end wes eccompanied by Lord end Lady Cremorns. Ths Prince of Wales end four other gentlemen, all enviehly mounted, rode up es the coeches were drawn up in Indien file ewaiting the signal to stert. The Duke of Teck had a seat on the hox of one of the coaches.

The procession was led by Lord Hothfield (in ths ebsence of the president, the Duke of Beaufort, and ths vice-president, Lord Cerrington), with his superh team of derk hrowns; and next in order came the Germen ambessedor, with his famous chestnuts; Colonel Thurshy's chestnuts, Ceptain Hemilton's bays, Mr. Henry Bressey's derk hrowns, Sir T. Consteble's chestnuts, Mr. J. Mitchell's bays and browns, Mr. Gessiot's roen end chestnuts, the Badminton Club's hays and black-hrowns, Sir W. Eden's hlack and browns, Sir H. Meyssy-Thompson's black hrowns, Colonel Aickmen's hays, Mr. Robert Morley's browns end heys, Major Trotter's bleck and browns, Mr. Crompton-Roberts' hays, Ceptain Bill's browns, bay and chestnut, Lord Cherles Beresford's hays, Mr. Darrel's browns, Major Allfrey's browns, Mr. Deichmenn's bays, Ceptain Hargreave's browns, Mr. Banbury's bays aud hrown, Mr. Colston's derk hrowns, Mr. Seager Hunt's hrowns, Mr. Jemes Brnce's hays, Mr. Albert Brassey's beys and browns, and Mr. James Foster's chestnuts, hey and gray. The cevalcade heving made the circuit of the park, the mejority turned off at Queen's-gate, while the remeinder trotted to the Hurliughem Club for luncheon. There wes a slight hitch et the start, owing to the restiveness of a horse, hut heppily there is no accident to record.

How to Grease a Wheel.

The *Coach Makers' Magazine* endorses the stetement that few people are aware they do wagons end carrieges more injury by greasiug too plentifully than in aay other wey. A well-made wheel will endure constent weer from ten to twenty-five years, if care is taken to use the right kind and proper amount of grease; hut if this matter is not attended to, it will he used up in five or eix years. Lard should never he used on a wagon, for it will penetrate the hub, and work its way out around the tenons of the spokes, aud spoiliug the wheel. Tallow is the hest lubricator for wooden axle-trees, and castor oil for iron hubs, hut many of the patent axle greases are also excellent and have tbe merit of heing cheaper and more convenient to handle. Just grease enough should be applied to the spindle of a wagon to give it a elight coatiug; this is hetter than more, for the surplue put on will work out at the ends, and be forced hy the shoulder bande and nut-washer into the huh around the outside of the boxee. To oil an iron axle-tree first wipe the spindle clean with a cloth wet with spirits of turpentine, aud then apply a few drops of castor oil near the shoulder and end. Oue teaspoonful is sufficient for the whole.

How it pays to improve the common sheep of the Southwest is shown by the *Texas Wool Grower* in thie clippiug from it: "The difference between the Mexican wool aud about the eecond cross by the Merino in the value of the staple by the pound ie ten cents per pound and upwards; the difference in weight of fleece double aud eometimee treble the quantity. Ifyou have the Mexicau sheep, or low grade, light ehearers of any mongrel breed, you must improve, and if you are not finaucially prepared to do so, go to a wool merchant and talk to him for a while, asking if the estimates above are nearly right, then go home, sell sufficient of your flock to buy good rams and place yourself in a position to go into the business right."

Fred Archer was, on the day after the Derby, reprimanded by the stewards of the Jockey Club on tbe complaint of the Duke of Portland for not keeping an engagement, the Duke having a second call on his services.

Driven Wells.

Good drinking water is just as essentiel to heelth as pure air; hut it is not always easy to determiue if water is purs through the senss of taste or sight; water that contaius considerahls organic matter is sometimes offensive to ths sense of smell, hut this is not elways the case. The hest method of testing for orgenic impurities is to drop into a tumhler of the water just enough "permengenate of potash," or of "Condy's fluid," to give the weter a pinkish color. Any organic matter contained in the weter is prscipitatsd after stending an hour, the water losing its color or hecoming brownish. If, however, there are no impurities to he ected upon, the water remains of a piukish color for hours. This is a very simple test, end a valuahle one, and were it more frequently employed, and its indications heeded, there would hs few cases of fever. The hest plan to get pure drinking water is by means of whet is gsuerally kuown es ths "driven well," hut which by our plan is nothiug of tbe sort. We heve seen an open well, ths water of which wes deugerous to health, within ten feet of a "driven well," in ths water of which no impurities could be dstected. It is elmost impossihle to find an open well of perfectly pure water, and it is herdly possihls to find a driven well where the weter contains impurities.

The easiest wey to meke a driven well is to get a piece of iron or steel pipe, six feet long and one and a querter inches in diemeter; make a cutting edge et one end hy heveliug off iuside the end of pipe, with a half round file; drive this pipe down a foot or two and then draw it up, end the earth from the hole will he found inside the pipe, and can he pushed out with en iron rod. Repeet this until you have gone six feet; then couple an inch pipe, six feet loug, to your cuttiug pipe; continue this until weter is reached; then attach a short piece of pipe having small holes in it, end drop it into the littls well you have dug; screw on a pump, and you have a well complste at ebout the price Mr. Green charges for the right to drive a pipe into the ground. In the dscision of the court in regard to the Green patent, the judgs said that where the earth wes raised up and teken out of the well, it did not infringe on Green's petent, which holds good only where a pipe is driven down so as to push the earth eside. But everybody knew that.

It hss always sesmed remarkahle that anyone should have bothered with Green's patent, when the plan above described is in all respects preferahle and is hampered by no patent. Though small, it is just as much an open well as if it were six feet in diameter, and anyone has ths undouhted right to construct such wells. If stones are encountered they mey be broken end penetrated by ettaching a piece of round steel, one inch in diemeter and two feet long, to the end of the inch pipe. The lower end should he drawn down to a blunt point. We constructed a well on the ahove plan, using en inch galvenized pipe, and the supply of water is ahundent for twsnty fsmilies.—*Hall's Journal of Health.*

Milk and Millet.

I have long tried all kinds of forage known to the country, end finelly settled on millet es preferebls, whsther cut green for soiling or cured for hay. There are two kinds—the common *(panicum meliaceum)* and the golden. Ths latter, some contend, is superior to the former, end the reeson it is not most generally cultivated is thet the retail price of the seed is ahont $2 50 per bushel, while that of the common is only $1 50. This ought not to he considered, for the difference in velue of the forage may more than meke up for it. If a considerahle quentity of seed was taken at one time it could hs bought at a liheral discount, and a sufficient number of fermers can he generally got together to form a club for such a purpose.

The soil for millet should he of good quality, and if not pretty rich, it must he made so hy plentiful manuriug, for it is only a weste of seed end the lahor of cultivation to undertaks to grow it in poor land, especially if it be a huugry sand or stiff clay. The soil must be free from weeds and well pulverized hefore sowiug. A previous carefully cultivated coru, poteto or other root crop, leaving the ground clean and in good heart, is an excelleut preparation. Sow a hushel of seed to the acre, hrush in well and roll. It matures in six oreight weeks after coming up. In a favorahle season we may calculate on a yield of green forege sufficient, if cured, to meke two or three tons of hay. For the letter purpose it must be cut when first comiug into hlossom, otherwise the stalk will become too hard and stiff to meke choice winter forage for an extra production of milk.

Millet may he sown as early in the season as corn-plenting, and if the climete be so mild as to carry warm weather into end through October, it can be sown in successive weeks through June. In this wey it would prolong the crop green for soiliug till supplemented with sweet corn. Hungarian grass *(Pernicum Germanicum)* is often called millet. This is also an excellent forege crop, green or dry, hut not equal in value, I thiuk, to true millet, nor does it yield so great a hurden per acre. Still it is worthy of cultivation, and perhaps eome soils are more suitahle for it than for millet. Considerahle experience hy each farmer in the cultivation of both will be necessary to decide this question. There are other plants also commonly called millet, which, after beiug tried pretty thoroughly, seem to be discarded, and our farmers settle down upon the two first described above as the hest for the purpose of producing an extra flow of milk.—*A Dairy Farmer.*

"Don't be afraid of killiug yourself with everwork, son," is the facetious way the *Burlington Hawkeye* has of counseling young meu to thrift. "Men seldom work eo hard as that ou the sunny side of thirty. They die sometimes, but it is because they quit work at 6 p. m., and don't get home until 2 a. m. It's the intervals that kill, my son. The work gives you an appetite for your meale; it lends solidity to your slumher; it givee you a perfect and grateful appreciation of a holiday. There are young men who do not work, my eou—youug men who make a living hy sucking the end of a cane, and who can tie a necktie in thirteen different knots and never lay a wriukle in it; who cau spend more moncy in a day thau you cau earn in a month, sou; aud who will go to Shoriff's to buy a postal card, aud apply at the office of the Street Commissioner for a marriage liceuse. So find out what you want to be and do, sou, and take off your coat aud make euccese in the world. The husier you are, the less evil you will be apt to get into, the sweeter will be your sleep, the brigbter aud happier your holiday, and the betterfed will the world be with you."

A Philadelphia paper eays that a gentlemau of that city hee a three-year-old colt hy tho thoroughbred colt James A (full brother to Parole), out of Belle of Augusta by Clark Chief, that is already quite a trotter, being able to ter than a three-minute gait.

THE GUN.

Flying Lead and Flying Feathers.

The Californie Wing Shootiug Club met et San Bruno lest Sunday to hold its fourth monthly shoot for the three club medals, last held by Robinson, Peerson and Walsh. The dey wes pleasant till 1 o'clock, wheu a stroug wiud sprang up which helped the flight of the pigeons, much to the discomfiture of the shooters. Murphy brought dowu a fine lot of pigeons. There wes not e very large assembly either of members or spectators, but a lively interest was felt iu the shootiug by those present. The shooting was at twelve birds under Hurlinghem rules. Robiuson wes the first to toe the steke; es nsual he made a clean score, followed by Pearson, who lost three birds which died out of bounds. Knowles lost his sixth eud seventh birds. Roche, Bogart, Lachman and Fey had very hard luck for good merksmen. Welsh did good work, losing his sixth eud uinth birds. The scores mede are:

Robinson	1	1	1	1	1	1	1	1	1	1	1	1—12
Pearson	0	1	0	1	1†	1	0	1	1	1	1	1— 9
Knowles	1†	1	1	1	1†	1	0	0	1	1†	1	1† 10
Roche	1	1	0	1†	0	0	1†	0	0	1†	0	1— 6
Jellett	1†	1†	1	0	1	0	1	1	1	1†	0	1† 0— 8
Bogart	1†	0	0	1	0	1	0	1	0	0	0	1— 6
Lachman	1†	0	0	0	0	0	0	1†	0	0	0	1	0— 3
Fay	0	1	1	0	0	1†	1	0	1	1	1	0— 7
Kerrigan	0	0	1†	1	1	0	1	1	1	1	1	1† 9
Walsh	1	1	1	1†	1	0	1	1†	0	1	1	1—10

† Both barrels used.

As above seen, Robinson kept the first prize, aud es Knowles end Walsh tied on ten birds each, the tie wes shot off at four siugle pigeons, Knowles killing three, teking second medel, Welsh none. Walsh took third medal. An intermission was then taken for lunch, after which came an eight-bird sweepsteke with $45 iu the purse, which wes divided into two purses of $27 50 for first, and $17 50 for second best shot. Five men withdrew to seve pigeons. Rohiuson egain killed all his birds and took the first money, but on the sixth end eighth rounds wes obliged to use his second berrel. Fey's seventh pigeon dropped dead out of bouuds but he got awey with the second money. The scores stand:

Fay	1	1	1†	1†	1†	1	0	1—7
Pearson	0	0	1†	w				—1
Robinson	1	1	1	1	1	1†	1	1†—8
Merryweather	0	1	0	1†	1	0	1	1†—6
Bogart	0	1†	1	0	w			—2
Slade	1	0	0	w				—1
Precht	0	1	1	1	1	0	w	—4
Walsh	1	0	1	1	0	w		—3
Roche	1	1	1	1	1	0	0	1—6

The next arranged wes a $20 sweepstekes, at eight birds, the purse 'divided into purses of $15 aud $5. Only four men entered, and agein Rohinson and Fay took the two pnrses. The score:

Fay	1†	1	1	1	1†	1	0	1—7
Pearson	1	0	1	1	1	1	0	w —6
Robinson	1	1	1	1	1	1	1	1—8
Precht	1	1	1	0	0	w		—3

The plunge traps were next put in order aud e $40 metch at three peirs of birds arranged. The money wes to have been divided iuto purses of 50, 35 end 15 per cent, but Merryweether, Bogert and Slade tyiug on five out of the six birds the whole purse was equally divided. The scores mede stand:

Lachman	11	11	00	—4	Jellett	11	11	00—4
Pearson	10	10	10	—3	Bogart	11	10	11—6
Merryweather	01	11	11	—5	Slade	11	11	10—6
Fay	00	w		—0	Roche	11	00	01—3

The lest was a $10 metch betweeu Bogart and Jellet at three pairs of pigeons with this result:

Bogart	11	11	11	—6	Jellett	11	11	10—5

W. L. Eyre and R. M. Brooks ected throughout as judges to the setisfectiou of all. A pleesant time was had by ell. Among the spectatore present was Mrs. Senetor Treylor. The presence of ladies et ell of the principal metches helps to plece pigeon shooting amoug the legitimate sports, for all thet sentimental persons can sey.

The Forester's Club.

The regular handicep shoot of the Forester Gun Club for the clnb medals took plece et Agricultural Perk, Sacremento, last Sunday. The dey was fine end the hirds excellent. There were four ties for the first medel, end ou the shoot-off it wes won by Odell. Followiug is the score:

Dase (26 yards)	1	1	1	0	1	1	0	1	1	1	1	0— 9
Vermilya (21 yards)	1	1	1	1	1	1	1	0	1	1	1	1—11
Todd (26 yards)	0	1	0	0	1	1	1	1	1	1	1	0— 8
Miller (26 yards)	0	0	1	0	1	1	1	1	1	0	0	1— 7
Young (26 yards)	0	0	1	1	1	1	1	*	0	1	1	1— 8
H. Gerber (21 yards)	0	*	0	0	0	1	1	1	1	0	1	1— 6
Hotz (21 yards)	1	1	1	1	1	0	1	1	1	1	1	1—11
Noble (21 yards)	0	1	1	0	0	1	0	1	1	1	1	1— 8
J. Gerber (26 yards)	1	1	1	0	1	1	1	1	1	1	1	0—10
Schroth (21 yards)	1	1	1	0	0	1	1	1	1	1	0	1— 9
Biederman (26 yards)	1	1	0	1	1	1	1	1	1	1	0	0— 9
Zuver (21 yards)	0	0	1	0	0	1	1	0	1	1	1	1— 7
Kilgarif (21 yards)	1	*	1	1	1	1	1	1	1	1	1	1—11
Odell (21 yards)	1	1	1	1	1	1	1	1	1	0	1	1—11

* Died out of bounds.

The tics were shot off with the following result:

Vermilya	10	11	10	—4	Kilgarif	11	01	01—4
Hotz	11	01	00	—3	Odell	11	11	10—6

Clay Pigeons.

This is from a Melbourne paper: "After all the old-womanish talk about pigeou shootiug, it ie satisfactory to know that the Princess of Wales hns uot vetoed the sport, as circulated. A etrange coincidence is that the paragraphe concerning the Priucess haviug declared she would not patronize Hurlinghum uuless the "clay pigeons" were used, appeared at the identical time of the iutroduction of the artificial articles. As the "clay-dubs" were manufactured in America, it is pretty plain that the paragraph which has heeu made so much of was also manufactured in Yankee laud. I shall have more to say on this matter in a future issue, iu the form of a leading article." Our Melbourne friend is for once in error. The paragraph referred to first appeared in the illuetrated London *News*, then *Truth* and the *Daily Telegraph* took up the cry and made vigorous attacks ou the pigeon shooters. Yankee ingeuuity may have much to auswer for, hut t is attack ou live pigeon shootiug is not one of the sins that can be laid at its door.

The ordinary run of men seem to think the enthusiasm we have for pigeon shooting is something wonderful. We hear that Mr. Ed Fay has engaged 300 dozen pigeons for his private practice aud amusement.

The Alameda Club.

On Seturdey afternoon lest the Alameda Sportsmen'e Club assembled et the Oakland Trotting Perk to hold its reguler monthly shoot for the first medel. Mr. Nic Williams presented the clnb with e beautiful setin-lined silver cigar case to be shot for as the second prize. The pigeons were an unusually fine lot of blue rocks. The day wes pleasant, with a good, strong wind from the west, and as soon as the treps were thrown open the pigeons turned teil and traveled without the loss of time. "The stern chase is a long one," so mariner says, but in this case it was a short (shot) one, for the most of the gentlemen did good work with their gune. The shooting was done under the rules of Hurlingham at twelve pigeons from five of the new and improved ground treps. The treps are hy fer superior to the old style ground traps. The club was well represented, es fourteen members entered; but few spectetors were present. Williems led off with a kill, following up with a miss on the second bird; he also lost the fifth, the hird dying just out of bounds. Mayhew kept his score cleen till he reeched the eighth round, also losiug on the ninth. Crellin did some good shooting, only missing two out of twelve, meking his kills with only one berrel, the ninth round excepted. Hopkins, too, proved himself a good shot, missing only two birds. The score stands:

Williams	1	0	1	1†	0	1	1	1	1†	1	1	1†—10
Spaulding	1†	1	1	1†	0	1	1	1	0	1	1†	0— 9
Haskell	0	0	0	1	1†	0	0	1	1†	1	0	1— 6
Bennett	1	1†	0	0	0	1†	0	0	1†	0	1	1†— 6
Mayhew	1	1	1†	1	1†	1	1	0	1†	1	0	1†—10
Tuttle	1†	0	1	0	0	0	1†	1	0	0	0	1†— 5
Adams	0	1	0	1	1	0	1	0	1	1	1	1— 8
Crellin	1	1	1	0	1	1	1	1	1†	0	1	1—10
Havens	1	0	0	1†	1	1	0	1	1	1†	1†	0— 8
Scholl	1†	1	1†	0	1	1	0	0	1†	1	1†	1— 9
Hopkins	1	0	1	1	1	1	1	0	1†	1†	1	1—10
Edwards	1†	1†	1	1†	1	0	1	1	0	0	0	1†— 8
Smith	1	1†	1	0	0	0	0	1†	1†	0	1	0— 6
Morton	0	1	1	1†	1†	0	0	1†	1	1†	1†	0— 8

As above seen, Williams, Meyhew, Crellin end Hopkins tied on ten pigeons each, so the tie was shot off at four single birds under the seme governing couditions. The first three uemed egain tied on three, Hopkins getting only one as seen below:

Williams	1†	1†	0	1	—3	Crellin	0	1†	1	1—3
Mayhew	0	1†	1	1†	—3	Hopkins	0	0	1	0—2

Again the three shot at four birds. Meyhew killed three and took the first prize medal and Williams and Crellin two eech. Crellin taking the silver ciger case for second prize. W. W. Moore acted es referee and M. J. White and W. L. Eyre as judges. Following this comes a six-bird sweewstake metch with $25 in the purse. In this match there were four ties on four birds out of the six.

Irwin	1	1	1	0	1	1—6	Haskell	0	0	1	0	w —1
Coffin	0	1	0	w		—1	Hopkins	1	0	1†	1	1—6
Williams	0	0	1	1	1	1—4	Havens	1†	0	0	1	0 1—3
Smith	1	1	0	0	1†	1—4	Mayhew	0	1†	1	0	w —2
Tuttle	1†	1†	0	1	1†	1—6	Adams	1	1	0	1	1 1—6

In shooting off the tie at four pigeons Tuttle made a straight kill end took first money, $15. Hopkins killed three and took second money, $10.

Irwin	1†	0	0	0—1	Hopkins	1	0	1† 1—3
Tuttle	1	1†	1†	1—4	Adams	1†	1†	0 0—2

(†) Both barrels used.

The last was a miss-and-out metch with one purse of $20. Smith, Meyhew and Coffin tied on three birde and divided the purse.

Mr. Precht to His Traducers.

EDITOR BREEDER AND SPORTSMAN: Informetion reeching me that a certain gentlemau or gentlemen, members of some of our locel gun clubs, have taxed me with unlewfully shooting doves last yeer, I beg, in the columns of your paper, to empheticelly deny auy such allegetions. I invite my underhand accusers to appear against me publicly, and not smirch my name in a private and cowerdly manner, es done, end of which no true gentlemen would he guilty. C. PPECHT.

June 12, 1883. 626 Cley Street.

The Santa Rosa *Republican* seys: "Compleint comes from Forestville of violation of the geme lew in that neighborhood, and ou Sunday particulerly. The proper course in such ceses is to arrest the offenders, and this can be readily done by the locel officers or by any citizen meking due complaint before the Justice of Peece. The remedy is in the hends of every community, of all upon whose lends the offenders trespess.

This afternoon the severnl competitore for the Scott trophy will egain shoot et clay pigeons for the posseseion of thie medal. The match comes off at Adams Point, Alemede. Mr. Lambert is the present holder.

There will he sweepstekes shooting at live pigeone to-morrow at the Oakland Trotting Park. A good lot of birds are on hand, end quite a number of sportsmen will be present.

The Pacific Gun Club hold their reguler shoots on the lest Sunday of every month. Their next shoot comes off at Birds Point, Alemede, on Sunday, the 24th of this month.

To-morrow the Lincoln Gun Club will hold their third monthly clay-pigeou metch at Colme. The shooting will be for the club's three medale.

Next Seturdey, June 23, the Alemeda Sportsmen's Club will hold their regular shooting at cley pigeone at the Oakland Trotting Park.

Two German scientists heve been experimenting in the matter of the influence of feed on the milk of ewes, with the following reeults: They fed a ewe upon one pound berley and two pounds roote a day for thirty deys, and she was milked three times a day, when the milk beceme normal, which did not occur until twenty-five hours after lambing. The meximum yield wee given ebout the ninth day, the dry matter, much at first, rapidly fell till the fifth day, when it became regular, the same being the case with the specific gravity. With elloweuce of food steted, the weight of the animal and the milk production remained constant. After the expiratiou of the thirty days the ewe wes shorn, and then the quantity of milk fell from 962 grame to 733 grems—thet is, it decreased about one-fourth; the addition, however, of linseed cake to the food brought the milk yield up to what it had been previously. Here we get brought out en interesting physiological fact, that when the ewe wee celled upon to grow wool, she did so at a secrifice iu the production of milk. Incidentally it ie mentioned that the ewe'e milk is remerkable for its perceutage of dry matter, elbuminoide end fat.

Hie couiferous nibe, hie sequoial nibs end plain Bigler left for the lake ou Thureday last. Only those in poeeession of the cypher will he able to catch ou to this joak.

THE RIFLE.

The Mangels-Erben Match.

Lest Sunday the mnch-talked-of match between Lieut. H. J. Mangels and Wm. C. Erben for $50 a side came off et Shell Mound Perk. The conditions were 100 shots each at a 12-ring target for the above eum. The wind blew very strongly from the west, so thet the wind ganges were put over five points. The atmosphere wes cleer and light good. Both men shot very well, es the following ecores show:

H. J. Mangels	4	0	8	4	5	8	6	3	8	5—51	629	
	9	8	9	10	9	4	8	6	4	11—78		
	8	6	8	8	11	0	2	0	10	3—66		
	8	5	7	9	1	7	6	2	6	3—53		
	7	10	7	3	8	4	11	11	12	8—81		
	10	7	12	7	6	4	8	8	4	0—66		
	8	6	11	11	10	7	6	0	3	0—61		
	2	9	0	9	6	6	3	7	10	3—63		
	11	8	9	2	3	9	8	6	5	0—61		
	9	6	2	9	4	8	2	8	11	10—69		
W. C. Erben	3	1	7	6	9	0	2	0	3	1—32	496	
	1	1	4	8	3	0	0	7	6	4—33		
	9	7	1	6	6	6	0	1	9	6—47		
	2	4	1	10	11	1	6	10	8	9—62		
	9	6	0	9	3	4	11	6	11	11—69		
	4	12	9	3	8	3	3	8	6	9—65		
	6	2	0	4	6	1	0	6	4	3—30		
	0	0	8	6	2	4	2	0	7	2—31		
	0	0	7	12	8	10	11	11	8	3—70		
	9	7	8	6	7	2	6	1	1	10—56		

As seen by the above, Mangels was the winner by 134 points. There ie some talk of a return metch, but nothing definite hae heen done yet about it.

At Harbor View.

A closely contested rifle metch between Mr. P. H. McElhinney and Mr. Robt. Hoff was shot last Seturday at Herbor View Range. The ecores made stand:

McElhinney	6	4	4	4	4	4	4	4	5	5—43	85
	4	4	5	4	4	6	4	4	4	4—42	
Hoff	4	5	4	4	4	4	4	4	4	6—42	83
	4	4	4	4	4	6	4	4	4	4—41	

At the Target.

Last Sunday the rifle teem of Compenies C end G, First Infentry Regiment, held their monthly shoot at Shell Monnd Range. The ettendance wes very small end the shooting hardly up to the everege. The shooting done by the first class was very feir, bnt the second, third and fourth classes ere herdly worthy of notice. The evident leck of intereet in rifle shooting is to be regretted, for when these company teame ere in prectice they meke excellent showing at the target. The first clese shoot at 200 and 500 yards. Following ere the scores:

	TWO HUNDRED YARDS.							FIVE HUNDRED YARDS.							Grand Total.
Cummings	4	6	6	5	6	4	6	4	4	4—45	4	4	5	6	4	6	3	6	6	5—45	90
Perkins	4	4	6	6	4	4	4	5	5	4—44	4	3	3	3	4	4	4	4	4	6—40	82
Sime	5	3	4	4	6	4	4	4	6	6—44	3	4	4	4	3	3	4	2	5	4—36	80

The second cless shooting over the seme ranges mede scores es follows:

	TWO HUNDRED YARDS.							FIVE HUNDRED YARDS.							Grand Total.
Sherman	4	4	4	5	4	4	4	4	4	4—41	4	6	3	5	4	5	4	3	4	5—42	83
J. S. Campbell	2	4	2	2	0	3	3	3	3	3—25	4	3	4	4	4	4	4	4	4	5—40	65
Burmeister	3	4	2	4	4	2	6	3	4	4—35	0	0	2	4	4	3	4	3	2	2—24	69
Manning	4	3	3	5	3	3	3	4	3	4—35	3	5	3	3	5	4	3	3	0	3—33	67
Elder	3	3	3	3	2	4	3	3	4	2—30											

The scores of the third end fourth clesses we will omit till such a time as the shooters mauifest some interest either by meking good scores or hy a good attendance. These companies have the materiel for good marksmen but they leck the snep and enthusiesm necessery for them to echieve sharpshooters 'honors.

In a few deys there will be a rifle match hetween the Sen Frencisco Police Rifle Team and e teem composed of the crack shots emong the soldiers at the Presidio. The shooting will be done on the 200, 500 and 600 yard ranges at the Presidio. Twenty shots will be ellowed each men on each renge. As this is the first metch that the Police Rifle Teem will teke pert in, it promises to he an interesting affair. The two teame will be nuder the cepteincy of Sergt. Ches. Nesh of the Police force end Sergt. Geery.

The American team practice at Creedmoor lest Wednesdey wes at 200, 500 and 600-yerd ranges. The average at the three distences was 93.15, the highest mede thus far. There appears to be no doubt of their going, funds sufficient heving been pledged for their journey. They will seil for Eugland cu Tuesday.

YACHTING.

Captain Edwin Moody of the San Frencisco Yacht Club has mede a very hendsome design of a Sen Fraucisco yawl, which he hes forwarded to ex-Commodore R. L. Ogden, who will present it to the New York Yacht Club for its clnb-room.

The Aggie has been teken out of Oekland creek end into fresh water to prevent her from getting injured by worme which cling to and bore into the plenking of yechte if they are left too long in one locelity.

The Nellie, Con O'Connor end Fleur de Lis were out lest Sundey with excursion parties aboard. The Halcyon and Lurline were also out. The Frolic and Emerald cruised from Oeklend creek.

The Lolita hes e new topmest. She cerried oue awey in the night recently while racing up San Peblo bay with the eloop Nellie.

It ie underetood the Conclave Committee will give prizes for a yacht regatta to teke plece during the festivities here in August.

The Bohemien Yacht Club will probebly give e regatta eerly in July.

Brown's Bronchial Troches, ee a remedy for Coughs and Throat Troubles: "Great service in subduing Hoarsenese."—*Rev. Daniel Wise, New York.* "Greatly relieve any nneasinese in the throet."—*S. S. Curry, Teacher of Oratory in Boston University.* "Iudispensable to me, having used them through all my ministerial life."—*Rev. C. S. Vedder, Charleston, S. C.*

Cleau out the springe and brooks thet furnish drinking places for the live etock, and eepecially where cows drink. Filthy water does not help a cow to give pure milk.

ATHLETICS.

DONALD DINNIE AGAIN BEATEN.

Muldoon Wins by one Fall and Three-fourths of a Second.

The wrestling match between Donald Dinnie and William Muldoon at the Grand Opera House last Wednesday night was witnessed by a crowd only limited by the size of the building and estimated best by the ticket seller's tally of a $4,200 house. The terms of the match were ten falls Cumberland style, five falls Græco-Roman, Dinnie undertaking to throw Muldoon ten times Cumberland in the same time that Muldoon threw him five times Græco-Roman.

Muldoon chose for his judge Jack Hallinan, who has coached him in all his previous matches. Dinnie was waited upon by Jules Rijal, whom Muldoon recently defeated, and the two selected for referee Charles P. Duane, a gentleman as well known in California as the Palace Hotel or the Golden Gate. Uncle Billy Jordan acted as master of the ceremonies as usual and kept the crowd in good temper between the waits. For ten falls the styles of wrestling were alternated and then Dinnie had the remaining five falls all in his own style. Dinnie was in the better condition, Muldoon, who had been in training ever since he came to the city, appearing rather stale and lacking vitality. According to agreement the men wore Leotard shirts all through the match, thereby preventing the loss of a hold through the hands slipping over perspiring flesh.

Muldoon won the toss and the first fall was in Græco-Roman style. Time was called at 8:45 p. m. Muldoon rushed at Dinnie trying for an arm hold; Dinnie dodged him off with his hands until Muldoon in trying to get a lock went down and twisted Dinnie over, but the wary Scot just saved a fall. Muldoon then tempted Dinnie by offering him his back, a courtesy Dinnie declined until finally Muldoon ended the bout by falling with Dinnie on top and then turning Dinnie over by a side body twist until Dinnie's broad shoulders were flat on the floor. Time 1:24½.

The next bout was eagerly anticipated, for the boys wanted to see if Muldoon had learned anything of Cumberland wrestling since his last match. They came to the conclusion that he had, for he kept Dinnie away rather easily in spite of the letter's fine grip on his shirt. At last Dinnie drew Muldoon up to him and threw him squarely with an outside left back heel. Time, 0:54½. This was greeted with cries of "Well done, Mul," "Won't do, Dinnie," showing that the American's friends predominated in the house.

Muldoon evidently wanted to give the people some idea of his recourses in Græco-Roman, for the next bout, which was in that style, he treated them to an entirely novel fashion of subduing Dinnie's obdurate intention to hug the floor. After nearly a minute's play, Dinnie went down and lay spread-eagled on the floor. Muldoon stood astride of him, and, placing his arms under Dinnie's, locked his hands behind Dinnie's head. Then he quietly and methodically went to work to bend Dinnie's neck downward. Pretty soon Dinnie's neck reached the limit of its elasticity, and its owner was forced to the conclusion that unless his body kept up with the procession, so to speak, something unpleasant would happen. To avoid this, he allowed his body to follow his neck, and, turning over his own head, lost the fall. Time, 1:44. This display was greeted with cheers from Muldoon's and a few hisses from Dinnie's friends. Dinnie felt his neck when he got up, to see if it was securely on his shoulders. He found it there in good shape, but he also found a lump as large as a seagull's egg where Muldoon's clenched hand had been fixed under his ear.

The second bout, Cumberland style, was rather prolonged for that style of wrestling. Dinnie tried to back heel ineffectually several times, finally winning the fall by drawing Muldoon up to him as before and hearing him over by his superior length of body and limb. Time, 1:05. Muldoon smiled confidently at the end of the fall, and well he might, for he was nearly a minute ahead on the time and had all the best of the match.

The third bout, Græco-Roman, Muldoon showed still another throw. Dinnie spread-eagled as usual, and, instead of using the neck hold, Muldoon took him around the waist with his hands crossed, and lifted him fairly from the floor. Dinnie caught Muldoon's leg to save himself, and Muldoon called "foul," but before the point could be decided Muldoon himself settled the question by turning Dinnie in the air and dashing him to the ground. Time, 1:37. This style of throw is known as the "left-handed belt," and is extremely difficult, not so much from the strength required to pick up a 200-pound man as from the trouble of keeping him from slipping down to the floor.

The third bout, Cumberland, gave Muldoon a set-back, and put Dinnie ahead on time. He rushed in from the start and getting an inside back heel threw Muldoon square on his back. Time 0:16, leaving Dinnie 14½ seconds ahead.

The fourth bout, Græco-Roman, was a new revelation to Dinnie and the spectators. Muldoon took Dinnie under the arms and with a sudden twist picked him off the ground and threw him clear over his shoulders, Dinnie describing the arc known in Cornish parlance as "the flying mare." Dinnie's shoulders did not touch, however, and after a little wrestling on the floor he arched himself on his hands, neck and feet, keeping his shoulders up. To break this combination Muldoon hurled the full weight of his body on Dinnie's breast bone and with a groan Dinnie gave up the struggle. Time 1:12. Dinnie looked rather solemn at this and asked his judge how the time stood.

The fourth bout, Cumberland, was short. Dinnie lifted Muldoon off his feet a couple of times, and then getting his usual hitch threw him squarely. Time 0:34, making Dinnie 16½ seconds ahead on time.

By a strange coincidence it took Muldoon just the same time as the last fall to throw Dinnie in the fifth and last Græco-Roman bout. Dinnie went down to avoid a grip and Muldoon seizing him by the neck and shoulder turned him over. Time 0:34. This ended the Roman wrestling, Muldoon having taken just 6:31½ to down Dinnie five times, while Dinnie had thrown him four times Cumberland in 2:49½, leaving him 3:42 to win six falls, or an average time of thirty-seven seconds for each fall. This was announced to the spectators and the next fall was eagerly awaited.

The fifth bout, Cumberland, Muldoon tried to keep away, acting on the defensive, but Dinnie bringing his great strength of arm and back into full play forced a fall in the same old style. Time 0:38, leaving him 2:53½ to win five falls, or an average of 0:34½ a fall, but Dinnie having taken 3:38 for the first five falls was really 0:44½ behind his own average time.

The sixth bout, Cumberland, was short, Dinnie winning the fall in 0:24. During the five minutes wait Jordan announced that on Sunday there would be an exhibition of wrestling at the pavilion, Muldoon, Rijal and others taking part. Some one in the gallery brought down the house by asking Jordan if he would dance, but Billy craftily turned the tables by replying that he would if his interlocutor would pay the fiddler.

The seventh fall, Cumberland, was the slowest in that style, Muldoon avoiding all Dinnie's hitches cleverly, and it was not until 1:15¾ had passed that Dinnie won the fall. This left Dinnie only 1:13¾ or about 24⅝ for each, of three remaining falls, to win.

The eighth fall, Cumberland, sent Dinnie's stock away up for by a back heel right he downed Muldoon in 10½ seconds, leaving him 1:3¼ for two falls or 3:19 1-6 for each fall. Muldoon was well aware of his exceedingly ticklish position and in the ninth bout, Cumberland, he worked frightfully hard to stand off his huge opponent. He managed to get his shoulder across Dinnie's breast, making the Scotchman's height of no avail. The crowd was literally dumb with excitement and expectation. A second's time would cover one or the other with the glory of victory. Once more fortune and skill favored the American, for before he fell one minute and four seconds had elapsed and he stood the winner by one fall to the good and just three-quarters of a second. This was duly announced and the vast crowd slowly filed out of the building.

The timers of the match were Dave Eiseman and Hiram Cook of the Olympic Club.

Both Dinnie and Muldoon occupied the same dressing room, and as they were peeling off their jackets Muldoon, who evidently disliked the closeness of the match, walked over to Dinnie and said: "Look here, Dinnie, you have made two matches all your own way, now I want to propose a match that will be more even. I will wrestle you catch-as-catch-can for $1,000 a side any time within three months, any place you name. I should prefer San Francisco, as the people here have shown more appreciation for athletic sport than any place I have seen." Muldoon then put up $100 forfeit in the hands of Tom Vivian, sporting editor of the *Chronicle*.

Dinnie replied that he would cover the forfeit if he could find a suitable trainer. A good deal more challenge talk passed among other parties, but no more money was put up.

Looked at from an athletic standpoint, the match of Wednesday has one meritorious feature; that is both men tried to win. But while it gave opportunity for two men to display their skill at different styles of wrestling, the utter ignorance of both respecting their opponents' style was such as to make them alternately on the defensive. Muldoon hardly tried to win a fall Cumberland, and Dinnie made no attempt to throw Muldoon Græco-Roman.

A Professional Foot-race.

Last week we intimated that the professional foot-racer was abroad in the land. This is how the Visalia *Delta* describes a recent performance:

"The contestants were Harvey of San Diego and Gibson of San Francisco. Gibson came here direct from Hanford, and was backed by Mussel Slough men. The race as agreed on was $250 a side, 115 yards, score and start. Both men were heavily backed, Harvey betting his own money. When the men made their appearance on the track, stripped for for the contest, murmurs of admiration for their fine physical appearance could be heard on all sides. After considerable scoring, each man trying to catch his rival over the score and behind, the dash was finally made, and they were both off down the track. Harvey got about three feet ahead the first 50 yards and kept it up to 100 yards. This is his distance, and Gibson, whose race is 125 yards, commenced gaining on him almost imperceptibly, but Harvey struck the string less than a foot ahead. The 115 yards was run in 0:12¾."

We have not the pleasure of any acquaintance with Harvey of San Diego, yet we were wont to flatter ourselves with the conceit that every foot-racer in the State of any special merit was known to us. Perhaps Harvey of San Diego is a rival phenomenon and then again it is more likely that the metropolis knows him by another name. But we do know that Gibson can run 100 yards in 0:10¾, therefore the man who beats him three yards in that distance must be better than a ten-second man or else Gibson could not have tried. Further, we know that Gibson has run 120 yards in 0:12½, therefore we assume that either Harvey of San Diego is not Harvey at all but some such man as Harmon, or else we take the hypothesis that Gibson did not try to win. If Harvey of San Diego is really Harvey of that interesting city, and thinks that he can beat Gibson on his merit at 115 yards or 100 yards, we know a man who has been beaten by Gibson, yet who would like to bet many hundreds of dollars that he can beat Harvey of San Diego 100 yards; and further, a man whom we know would like to bet several hundred dollars that he can beat Harvey of San Diego 50 yards as badly as that gentleman beat Gibson.

Horace Fletcher, for many years past President of the Olympic Club, has sent in his resignation to the board of directors to take effect immediately and it has, so we understand, been accepted. We know nothing except from the merest rumor of the cause that led to Mr. Fletcher taking this step, but we believe that the same causes which have reduced the list of practicing members to a mere handful had something to do with it. For some months Mr. Fletcher has taken no active interest in the club's affairs and, therefore, it is useless to indulge in any lamentation at his withdrawal from its head. What Mr. Fletcher has done for the club in the past is well known and best appreciated by the members of the club. We presume that until the next election Vice President M. J. Flavin will perform the duties of president. If he does they will be performed. Mr. Flavin is a thorough man at everything he undertakes. He showed the club a short time since what his business qualifications were by bringing to terms a recalcitrant landlord, who was trying to get a little the best of the club.

On Sunday afternoon and evening an athletic exhibition will be given at the Mechanics' Pavilion. Jules Rijal and Celestin Dietman will wrestle Græco-Roman style. Muldoon engages to throw three opponents Græco-Roman, Rijal included; one down the other to come on, inside of half an hour. Dinnie and McMillan will wrestle collar and elbow and Dinnie will meet all comers back bold. Muldoon will meet all comers catch-as-catch-can. There are to be ten events, five to take place in the afternoon and five during the evening. A good deal of sport is anticipated. Muldoon will have an opportunity to show what he can do at catch-as-catch-can wrestling, which allows of any kind of hold being taken, tripping and leg holds.

L. E. Myers is credited with very fast time at the picnic of the Protective Brotherhood of Plumbers held in New York, June 5. The report from the New York *World* follows: "Half-mile Run, open.—L. E. Myers, Manhattan Athletic Club (scratch), first; time, 1:58 4-5; H. Fredricks, Manhattan A. C., 25 yards, second; time, 1:59. The track on which the men ran was in poor condition, and the performance under the circumstance was a remarkable one."

Colonial Batting and Bowling.

The *Australian* publishes the following table of batting and bowling averages made by the English and Australian eleven in two matches in Melbourne and one in Sydney.

ENGLISH ELEVEN BATTING AVERAGES.

Who is Hatchet?

On June 30 at Santa Barbara Fred Harmon is to run a 100-yard race against C. Hatchet of Santa Barbara for $500 a side, Harmon to concede his opponent a start of three yards. Fernando Rodays is the stakeholder. We do not know who C. Hatchet of Santa Barbara is, but we do know that unless he is some first-rate man Harmon can beat him with three yards allowance. If he is a good local runner, even as good as 10½ seconds, and the State does not hold five such men, Harmon can give him three yards in 100 and beat him a yard at the finish.

For the last week or two Professor Miller and Mr. Edward Blackburn of Sandhurst have, through the *Sportsman*, been trying to negotiate a match for £100 a side. The difficulty has been that Miller claims the championship of the Græco-Roman style, while Blackburn is most expert at the Border style of wrestling. As the two, however, were anxious to meet, each expressed himself willing to make certain equitable concessions. A meeting was accordingly held in the *Sportsman* office, when, after some discussion, it was agreed to adopt the "mixed" style, that is, catch-as-catch-can above the waist, tripping allowed, two shoulders and one hip, or two hips and one shoulder, to constitute a fall.—*Melbourne Sportsman.*

A wrestling exhibition took place at St. Louis, June 10. The first contest was between Christol and Zacbratz, Græco-Roman style, and was won by Chriatol in ten minutes. The second contest was between Bibby and Bixerwos, Græco-Roman; won by Bixerwos in six minutes. The third contest was between Connor and Whistler, catch as catch can; won by Whistler in forty-five minutes. The fourth contest was between Chrietol and Bixerwoe, Græco-Roman; won by Chrietol, no time reported. The fifth contest was between Connor and Christol, Græco-Roman, which continued for half an hour without a fall to either, and was then postponed.

Uncle Johnny Oiler of Morro, was in town Thursday with his four fine mares and their colts. His stock of mares comes from the Belmont stock and a mare from the stable of Stonewall Jackson, having good blood on both sides. He has given all the leading horses a show in this matter, having one colt by the well-known horse Altoona, one by Taylor's Duke McClelland, one by Silver Duke and one by Boxler, a horse raised by Webb of Cambria. They are all beauties, attracting much attention wherever he takes them, and will do much to establish the reputation of the above named horses. It would take coin enough to stock a bank to get them away from Uncle John.—*San Luis Obispo Tribune.*

There are two mules on Rancho Chico aged about thirty years each. They are truly pioneers of the place. They have grown up with the country, and have always worked hard. They are still hard workers, and seem as hardy as colts.

Pinkeye in horses is now receiving great attention from British veterinarians. The papers are full of directions for treatment and learned disquisitions on the character of the disease.

A. M. Barley of Chico has purchased one-fifth of the wool clip of Tehama county. He paid $40,000 for 640 sacks of wool at that place on Friday.

Dogs that worry sheep or goats may now be legally [illegible] and the owners or harborers of the vicious beasts be [illegible] pay for their ravages.

Thos. S. Day of this city has pnrchased the Adamson place of 400 acres near Whitehall, Mendocino connty, and is now refitting and beantifying the premises. He will give his attention to breeding fine stock, mainly thoronghbred and trotting horses, and has designed an extensive system of buildings and other fixtures for that purpose. The rolling hills and vitalizing atmosphere of Mendocino make it a capital place for stock rearing and we expect to see Mr. Day's project resnlt in decided snccess.

Sonoma AND Marin District ASSOCIATION.

—AGRICULTURAL DISTRICT NO. 4.—

At Petaluma

FROM AUG. 27 TO SEPT. 1 INCLUSIVE, '83.

The District Comprises the Counties of Sonoma, Marin, Napa, Solano and Lake.

SPEED PROGRAMME.

FIRST DAY, TUESDAY, AUGUST 28, 1883.

No. 1—Walking race for district stallions, weighing less than 1,400 pounds; one mile; purse $25.
No. 2—Running race, free for all; balf-mile beats, best tbree in five; purse $400.
No. 3—Trotting race for district horses; tbree-minute class; purse $500.

SECOND DAY, WEDNESDAY, AUGUST, 29.

No. 4—Trotting race for district two-year-olds; purse $250.
No. 5—Running race for district two-year-olds, one-mile dasb; purse $250.
No. 6—Trotting race, free for all: 2:37 class; purse $500.
No. 7—Trotting race for district three-year-olds; purse $300.

THIRD DAY, THURSDAY, AUGUST 30.

No. 8—Walking race for district draft stallions, weigbing 1,400 pounds or over, one mile; purse $25.
No. 9—Running race, free for all; mile and repeat; purse $600.
No. 10—Running stake race, free for all; dasb mile and a balf; $25 entrance and $200 added.
No. 11—Trotting race, free for all two-year-olds; purse $500.

FOURTH DAY, FRIDAY, AUGUST 31,

No. 12—Running race for district three-year-olds; mile and repeat; purse $300.
No. 13—Trotting race for district borses; 2:45 class; purse $400.
No. 14—Trotting race, free for all; 2:27 class; purse $600,

FIFTH DAY, SATURDAY, SEPTEMBER 1.

No. 15—Trotting race, free for all; 2:20 class; purse $800.
No. 16—Running race, free for all; two miles and repeat; purse $500.

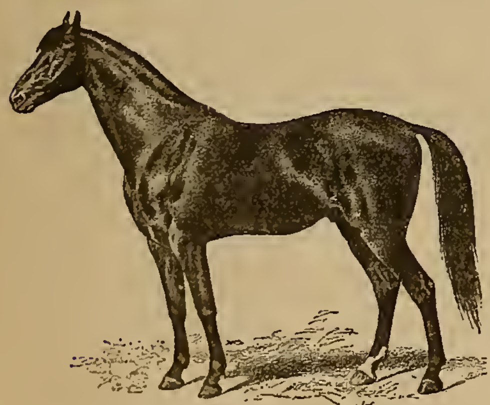
CONDITIONS.

All trotting races are best tbree in five, except the two-year-old races, wbicb are two in three. Entrance fee, 10 per cent on purse, to accompany nómination.
Purses divided at tbe rate of 50 per cent to first horse, 25 per cent to second, 15 per cent to third, and 10 per cent to the fourth horse. In tbe walking races all money goes to first horse.
In all, five to enter and tbree to start. National Trotting Association rules to govern trotting, bnt the Board reserves the right to trot beats of any two classes alternately, if necessary to finisb any day's racing, or to trot a race between besis.
No money will be paid for a walk-over.
Horses entered for purses can only be drawn by consent of tbe judges.
Rules of tbe Pacific Coast Blood Horse Association to govern running races.
All entries to be made in writing, to give sex, color and marks of borses, also name and residence of owner, and, in running races, colors to be worn by rider.
Marin barred ln 2:45 class, and Blancbe and Dawn will not start in District races.
Entries to all tbe above races to close with the Secretary on Wednesday, August 1, 1883.
Write "Entries to Races" on outslde of envelope.

J. McM. SHAFTER, President.
W. E. COX, Secretary,

IN THE STUD.

J. F. CARROLL'S GREYHOUND DOO, PAUL JONES, GENTLEman Jones—Brancb. Fee, $25. Apply at this office.

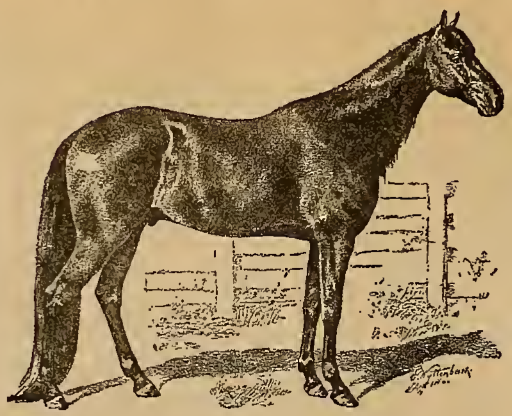


MAMBRINO WILKES.

Black Stallion, sixteen hands in height, by George Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christman by Todhunter's Mambrino or Idol, son of Mambrino Chief. Second dam by Pilot Jr. Third dam by Kentucky Whip. Idol's dam was thoroughbred and was by American Eclipse.

THIS IS THE LARGEST AND ONE OF THE BEST COLTS OF George Wilkes (weighing at this date 1,260 pounds) combining the Hambletonian and Mambrino strains and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.
George Wilkes has twenty representatives in the 2:30 list, of which 10 have records of 2:25 or better, 4 of 2:20 or better and 3 of 2:18 or better.
Will make the ensuing season, beginning February 1st, 1883, at STOCKTON.
In putting the price by the season at the low figure of $40 the owner does not acknowledge, thereby, any inferiority on the part of this horse to any other sire of Trotters.
IRVIN AYRES.

MAMBRINO TROTTING STALLION



ABBOTSFORD.

☞ Record at Six Years old, 2;21½. ☜

PEDIGREE.

BY WOODFORD MAMBRINO, HIS DAM COLUMBIA BY YOUNG Columbus. Woodford Mambrino by Mambrino Chief, his dam Woodbine hy Woodford, a thoroughbred son of Kosciusko.
Woodford Mambrino is recognized to be the best son of Mambrino Chief. His own record is 2:21¼, and there are a large number of his get in the 2:30 list. Among them: Abbottsford, 2:21½; Convoy, 2:22¾; Magenta, 2:24½; Lady McFatridge, 2:29; Dacia, 2:29¼; George A. Ayer, 2:30.
Besides those having public records, be is the sire of the two celebrated mares owned by Robert Bonner—Manetta and Malice. Manetta, with a running mate, and harnessed to a road wagon, trotted two miles in 4:27¼, and Malice trotted a trial, on the same track, a mile in 2:19¾. Woodford Mambrino is also tbe sire of Princeps, the sire of Trinket; record, 2:14. Woodbine is also tbe dam of Wedgewood, record, 2:19. Young Columbns, the sire of the dam of Abhottsford, bas nine of his get in the 2:30 list, so that on both sides of the house there are notable performers. Abbotsford is a rich rosewood brown, 15¾ hands, and of very high form. His get are very promising, his danghter Jasmine having won the Embryo Stake for yearlings in 1881, and every one which has been put in training has shown good speed.

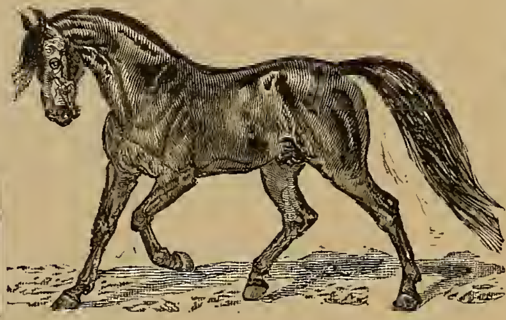
TERMS.

Seventy-five dollars the season, to be paid before removing tbe animal. Mares not proving in foal can be returned the following season free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

LOCATION.

Abbotsford will make the ensuing season, 1883, on the ranch of S. B. Whipple, Esq., San Mateo, season commeucing February 15th and ending June 1st, 1883. For full hlstory see the issue of BREEDER AND SPORTSMAN of August 5th, 1882.
GEORGE BAYLIS, Agent, San Mateo, Cal.

TROTTING STALLION

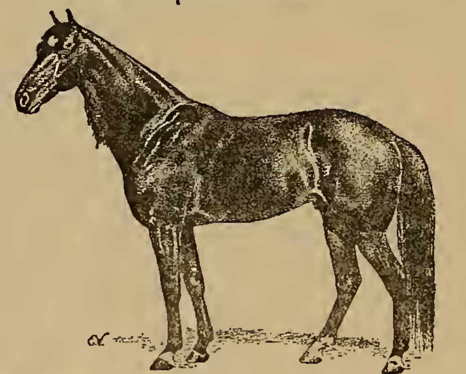


Eugene Casserly.

SIRE OF SWEETBRIAR, 2:26¼; NAPA QUEEN, 2:38¼; ROCKwell, 2:39; Bill Woodward, 2:40; Smoothhriar, two-year-old record 2:57; May Day, two-year-old record 2:59¼. Will make the season of 1883 at Oakland on Thursdays, Fridays and Saturdays and at Walnut Creek Sundays, Mondays, Tuesdays and Wednesdays. He was sired by General Taylor, dam Jennie hy Lexington. Terms $30 for the season. Good pasturage at reasonable rates. No responsibility for accidents or escapes. Address

THOMAS S. BREMNER.
Seventeenth street and Telegraph Ave.,
Or J. M. Heinold, 1426 San Pablo Avenue, Oakland.

THE TROTTING STALLIONS



SINGLETON AND LA HARPE.

SINGLETON WILL MAKE THE COMING SEASON, FROM Mach 1st to July 15th, 1883, at the farm of the owner, three miles nortb of Chico, Butte Co., Cal.

PEDIGREE.

Singleton is hy Willie Schepper, a son of Rysdyk's Hambletonian, his dam Lightfoot (the dam of Pride) by Flaxtail, a son of Prudeu's Blue Bull.

DESCRIPTION.

Singleton is a dark brown horse, tan flanks and muzzle, a little touch of white on hind feet and one fore foot, and star in forehead. He is 15¾ hands high and weighs 1,100 pounds. He was bred by Dr. M. W. Hicks, foaled spring of 1878.

TERMS.

Fifty dollars the season. Mares not proving in foal will be hred the following season free of charge. Mares from a distance will be pastured without charge during the season. Mares shipped to Chico, consigned to me, will be received on arrival of traiu, and taken to the ranch. Mares kept in any manner their owners desire, at reasonahle rates. There is every convenience on the place, boxes, paddocks and plenty of shade and water.

LA HARPE

Will also make a short season at the above place on private terms. La Harpe is by Fame, a son of Aicxander's Belmont, his dam Prairie Bird by Flaxtail, the dam of Flight and Prompter, Address

J. T. McINTOSH, Chico, Cal.

THE CELEBRATED TROTTING STALLION

ERWIN DAVIS

WILL MAKE THE SEASON OF 1883 AT OAKLAND TROTTING park.

DESCRIPTION.

Erwin Davis is a beautiful mahogany bay with very hlack points and one hind foot white; 15 hands high; of superior good disposition and fine trotting action.

PEDIGREE.

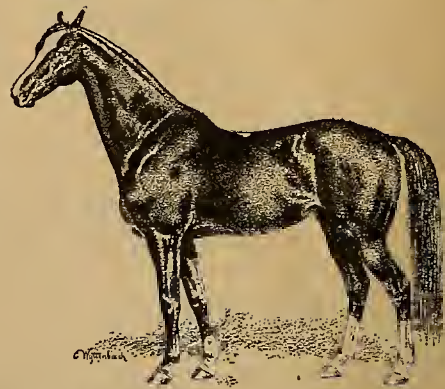
Erwin Davis was sired by Kentucky Hunter (Skenandoab) by brokenlegged Kentucky Hunter (the sire of Flora Temple) by Ferguson's Kentucky Hunter, by old Kentucky Hunter, by Highlander. Erwin's dam was Lost Diamond, by Vermont Hambletonian.

TERMS.

Twenty-five dollars fort he season, payable at the time of service. Good pastnrage at $5 per month. No responsibility for accidents or escapes. For particulars apply

JOHN ROGERS,
Oakland Trotting Park.

THE THOROUGHBRED STALLION



WHEATLEY

WILL STAND THE ENSUING SEASON, ENDING JULY 1ST, 1883, at the Oakland racetrack.

TERMS—$50, payable at the end of the season. Satisfactory arrangements can be made for pasturage near the track for mares from a distance.

PEDIGREE AND DESCRIPTION.

Wheatley is a golden chestnnt, 15 banda 3 incbes high, and of fine style a tdappearance, and is by War Dance.
First dam sister to Pryor, by imported Glencoe.
Second dam Gipsy, full sister to Medoc, by American Eclipse.
Third dam Young Maid of the Oaks, by imported Expedition.
Fourth dam Maid of the Oaks, by imported Spread Eagle.
Fifth dam Annette, by imported Shark.

STOCK FARMS.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TABles, with trotting statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

TWENTY Fine & Highly-bred Broodmares

bred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There are in use at Fairlawn over one hundred HIGHLY-BRED BROODMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and raising fine, highly-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, made in 1881; another with a record of 2:23½; another with a record of 2:23¾, made in 1882; another with a record of 2:23½, and a grandson with a three-year-old record of 2:23¾, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20½ to 2:30, a larger number than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records ranging from 2:15½ to 2:27½. No son of Rysdyk's Hambletonian has made as good a showing at same age.

ETHAN ALLEN JR., full brother of Daniel Lambert, who has twenty-two of his get with records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Etban Allen, dam Fanny Cook, by old Abdallah; second dam by Stockholm's American Star; third dam by Red Bird, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23½ to 2:25¼, all of them being out of mares of unknown pedigrees.

The Fairlawn stallions have in 1882 had eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaughter to drop into the 2:30 class, viz.: Maud T, 2:26, by Hamlin's Almont Jr.; Carrie Medium, 2:27¼, by Happy Medium Jr.; and Carrie B, 2:25½, by Elial G, son of Aberdeen. The stallions on no other breeding farm in America have made such a showing in 1882.

These stallions will be permitted to serve

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares, at $50 the season, with privilege to return such mares in 1884 as fail to stand. A few approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE IS VERY REASONABLE. FOR SALE IS PRINTED IN THE CATALOGUE. These prices will neither be advanced nor reduced A SINGLE DOLLAR until after May 1, 1883. PURCHASERS FROM A DISTANCE CAN BUY ON ORDERS AT EXACTLY THE SAME PRICE AS IF PRESENT IN PERSON AND ALL STOCK SOLD ON ORDERS WITHOUT THE PURCHASERS SEEING THEM CAN BE RETURNED BY THE PURCHASERS IF THEY DO NOT IN EVERY RESPECT COME FULLY UP TO THE DESCRIPTIONS GIVEN. Full written descriptions will be given any applicant who contemplates purchasing.

Time will be given responsible parties at regular bank rates of interest.

For catalogues or further information address

WILLIAM T. WITHERS,
2-13y1 Lock box 392, Lexington, Ky.

ASHLAND PARK TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

2-17y1 **B. J. TREACY**, Lexington, Ky.

Jerseys and Guernseys.

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Scituate, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost, and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the acc epted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

TO

Sportsmen & Pleasure-Seekers.

TH

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING

Summer and Winter Resort of the Pacific Coast,

with its beautiful Groves and delightful Drives. Front in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Barracuda, Pompino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE

"HOTEL DEL MONTE,"

ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains

SPACIOUS SWIMMING TANKS

(150x50 feet) for warm salt water plunge and swimming baths, with

ELEGANT OOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ.

IS VIA TH

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISSIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to

FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggageman. Train Baggagemen are instructed to issue CHECKS for all dogs received in Baggage Cars.

☞ In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, and No. 2 New Montgomery street, Palace Hotel.

A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. and Tkt Agt.

5th " Bonnets o' Blue, by Sir Charle
6th " Reality, by Sir Archy.
7th dam—By imported Medley.
8th " By imported Centinel.
9th " By Mark Anthony.
10th " By imported Janns.
11th " By imported Monkey.
12th " By imported Silvereye.
13th " By Spanker.

See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.
Will make the ensuing season, 1883, from February 15th to June 15th, at the Oakland Trotting Park. Terms $50 the season.
JOSEPH CAIRN SIMPSON,
Oakland or 508 Montgomery street, San Francisco.

THOROUGHBRED STALLION

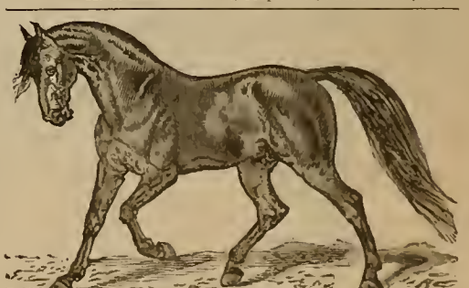
X X,

BY MALCOLM, HIS DAM COLUMBIA, WILL MAKE THE ENsuing season at the Oakland Trotting Park. Terms, $25 the season.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam, Columbia, also by imported Bonnie Scotland, hence his name. Malcolm was one of the best racehorses of his day, and Columbia was also a fine race mare. For extension of Columbia's pedigree see advertisement of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauanita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as, if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

JOS. CAIRN SIMPSON, Oakland, or 508 Montgomery street.

Mares intended for either of the above stallions, and sent by Donahue, Petaluma, Sacramento or Stockton boats consigned to J. W. Morehead, City Front Stables, will be received, good care taken of them and forwarded to Oakland



THAD STEVENS.

THIS THOROUGHBRED HORSE WILL BE AT AGRICULTURAL Park, Sacramento, for the season commencing Feb. 1 and ending the 1st of July next. Good pasturage for mares will be provided at $3 per month. For terms and particulars apply to or address

W. M. MURRY, Agent,
Sacramento Racetrack.

[From the Jewelers' Circular.]
"The Centennial chronograph (fly-back) or horse-timer, recently introduced by Messrs. Cross & Beguelin, is, regardless of price, one of the most substantial and accurate pieces of timing mechanism we have seen. This timer is constructed on scientific mechanical principles that must excite the admiration of every intelligent watchmaker, and it will doubtless become universally popular." Ask your jeweler for them or write to

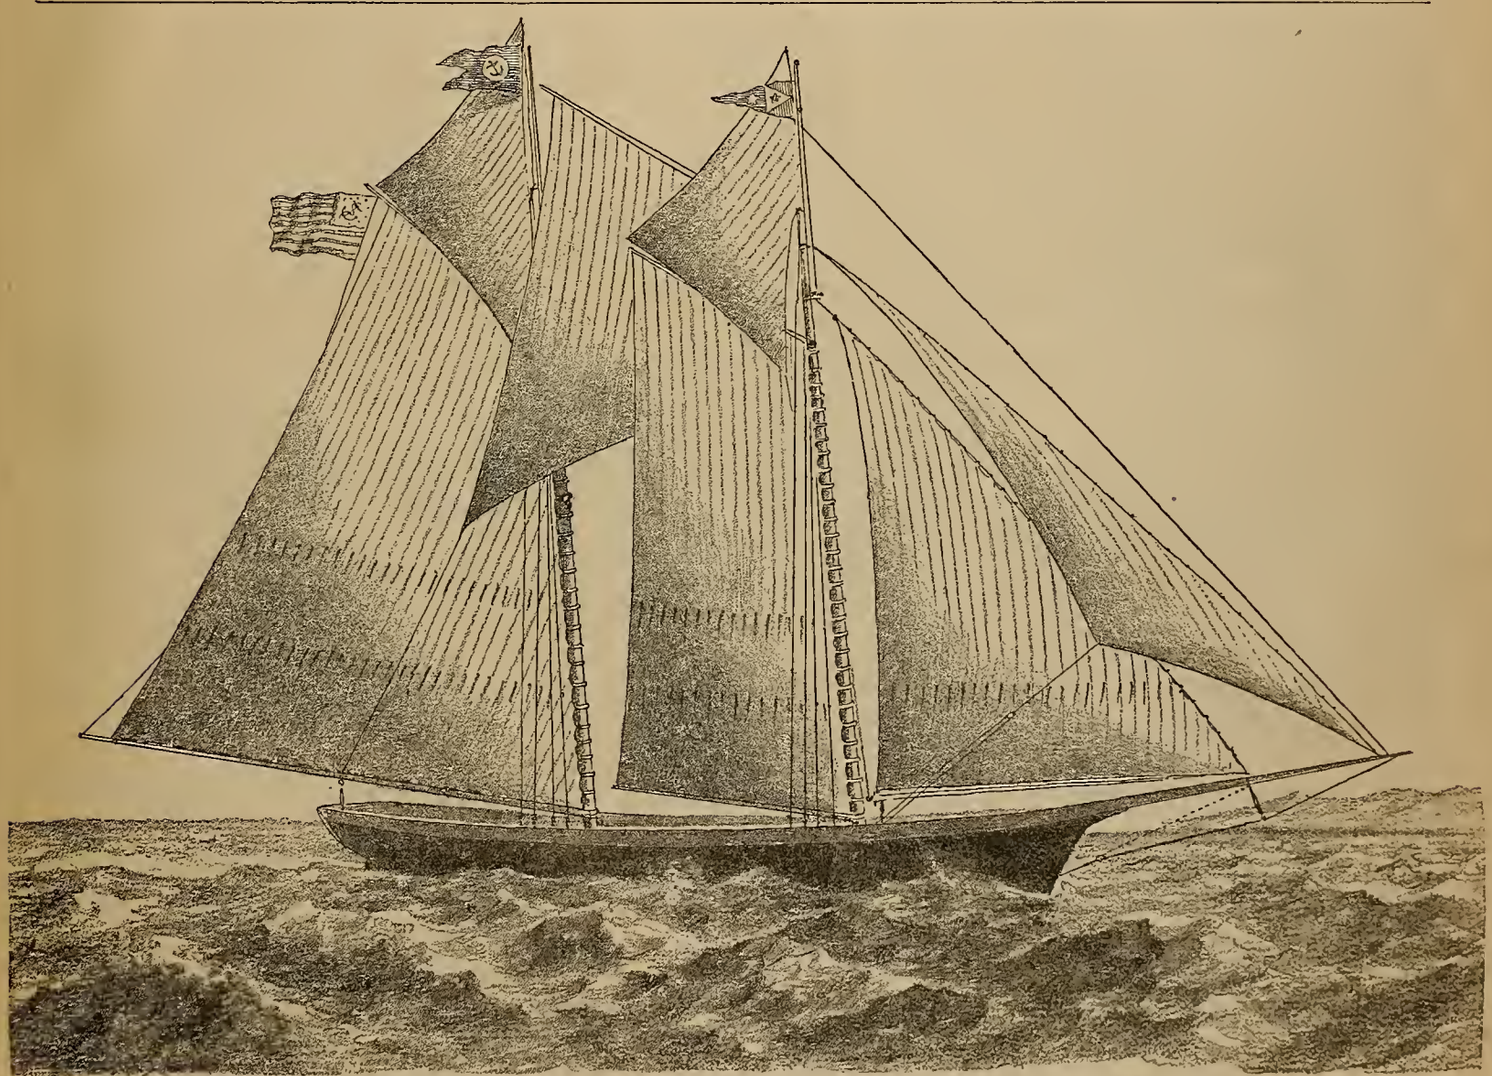
Vol. II. No. 25.
NO. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, JUNE 23, 1883.

SUBSCRIPTION
FIVE DOLLARS A YEAR



Schooner Lurline, Owned by Spreckels Brothers, San Francisco Yacht Club.

No better example of the vast improvement made in the yacht building art by San Francisco designers could he selected than the yacht Lurline, a picture of which adorns the front page of the BREEDER AND SPORTSMAN this week. Our artist has not heen as successful with this picture as with the horse pictures he has prepared for us, hut while the cut can hardly he called a perfect picture of the Lurline it presents enough of her individuality to show to the practical eye exactly what sort of a hoat she is. Our artist confesses himself nnder great ohligations to Messrs. Simpson & Fisher, the sail-makers, who prepared for his use a reduced sketch of the Lurline's hull and sails, and also to Captain Matthew Turner, who furnished us with the vessel's lines accurately drawn to scale from the original model. The drawing we present is prepared on a scale of one-sixteenth of an inch to the foot. The owners of the Lurline are the hrothers John D., Adolph B. and C. A. Spreckels, sons of Sir Claus Spreckels, whose vast business and possessions in the Hawaiian Islands have made the name of Spreckels famous everywhere. The Spreckels Brothers wanted a fine, fast, staunch, sea-going yacht, and Captain Turner, who built the Lurline for them, most admirably filled their expectations in every particular. Besides the Lurline Captain Turner also built the Chispa, owned hy I. Gutte, the Nellie, owned hy Mervyn Donahue, and the Consuello. The Lurline is huilt on a design originated hy Captain Turner. Her keel is a single stick, 24 inches square and 70 feet long. It is 21 inches across the top of the keel, giving a base for the floor timbers of that many inches. The construction is an improved one, to gain strength. The upper part of the keel is roundod out, and where the garboard straike usually is, is solid keel. The bottom of the keel had compositiou holts put in it at various angles, and the lead was cast around the hea s of the e holts. Then the keel was turned over in place, so the lead is very firmly secured. Half the floor timhers are natural crooks. The frames are Port Orford cedar, instead of the usual Oregon. They aro 24 inches between centers. The kelson is 10x12 inches. The ceiling is 2 and 3-inch stuff. The planking is 2½ inches throughout. The stem is a piece of laurel, sidod to 6 inches at top of keel. The deck plank is Port Orford cedar, 3 iuches square. She has a 5-inch plankshear. The rails are of oak and the stanchions of cedar. The bitts aro made of oak and miro wood. The yacht has 8 hanging knees on a sido. She draws feet, 3 inches aft, aud has considerable of a "drag line." Her dead-rise is 35 degrees. Her overhang is 6 feet and she has more shear than Turner's former models.

She is 72.40 feet on water line and 80.50 over al

(CONTINUED ON PAGE 389).

THE KENNEL.

An Ex Post Facto "Kick."

EDITOR BREEDER AND SPORTSMAN: Will you permit one who was neither a judge, exhibitor, member P. C. K. C. nor manager (?) in the late bench show to have his little fling? If you will, I'll try not to fling mud.

What is a bench show for?

One would think it should be originated by sportsmen and lovers of the dog simply to afford opportunity, in open competition, to determine who owns the best types in the various classes, and, by bringing such owners into contact, to make it possible so to combine blood strains as to grade up and improve the dog stock of the State.

I conceive it to be foreign to legitimate show ends to give people an opportunity to show what may be valuable only to the owner, or to make it possible for inordinate vanity to be fed with undiscriminating praise of dogs which have more disqualifying defects than legs.

You can readily recall the "numerous" exhibitor, who stands expectant before his dog bench, full to overflowing with the standard points of Stonehenge, and ready, nay, even anxious to presonify the standard in the particular cur in which his affections are bound up, and in whose hide it is a pity the exhibitor is not on show himself. The gentle, persistent, intelligent, vivacious fool exhibitor, who is sure a "mahogany nose" means the smutty dab on his dog's muzzle, and who absolutely knows that a "gently curving tail" is just exactly like the "teapot" narrative characteristic of his liver exterminator. The wonder-exciting, commiseration-arousing, nausea-creating fool exhibitor, who sees in every deprecatory remark a deep-laid scheme to influence the judging so as to make his threo-dollar outry unproductive in the way of magnificent awards, the least of which shall be worth at least two dollars, not counting the diploma, which would be invaluable if it was not so uncertain as to any particular diploma whether it was issued by the P. C. K. C. under the direction of the judges, or was merely a placebo to some muscular exhibitor given to insure his not eating a "manager" or so.

If I am right about the proper reasons for showing dogs in public, then it can't be a prime end of such a show to advertise any man, or any man's dogs except in so far as sterling merit shall cause remark and rivet attention. And any award made merely because an exhibitor is urgent tends by so much to weaken confidence and destroy the usefulness of such shows.

Admitting a "bench show" to be a good thing, it is perhaps worth while to ask what assurances should be offered exhibitors, first as to the safety of dogs and second as to judging and awards.

It goes without saying the management of a show should be able, truthfully, to say to gentlemen owning good dogs: "Send up your animals; they will have such care as conscientious solicitude and a proper appreciation of the trust assumed would insure." If this assurance can not be given, who would exhibit?

What man, who has bred, raised, handled and liked a dog, a good one or a poor one, would knowingly expose his pet and servant to risks unnecessarily?

Who wants mange of any sort in his kennel?

"Who hath redness of eyes?" Ans.—"The dog distempered, and the man who owns him."

To illustrate, not because the late show was worse than another, but because it is fresh in the minds of your readers, who would not exhibit if they thought their animals would suffer as have some shown there.

Three poisoned. Not in the class most interesting and most creditable, it is true, but yet good dogs and valuable to the owners.

Of three thoroughbred pups shown in the Irish class, two have since died distempered. A bitch, d above, likely to die yet, same trouble. The two pups taken home from the show gave to one not shown the disease and it died.

Here is one gentleman who has suffered an actual cash loss of $80, with a prospect of losing a bitch worth in prodnctive value at least $500.

Take another instance, that of a gentleman who showed without hope of medal, deploma or anything else other than the consciousness of having done what he could to help in a thing in which his brother sportsmen were interested. One of his dogs has died since the show, of disease contracted there. The other, the most magnificent bit of dog flesh that has ever come under my eye, whether for color, coat, proportion, relative measurement or otherwise, has been fed with a spoon for forty-one daye eince the show, and it eeeme even now that we are likely to lose.

True Blue, ex MacGregor, Rob Roy—Queen Mab, and Lnlu Laverack, Carlowitz—Petrel, from disease resulting from expoeure at the late Bench show.

Such loesee can only tend to dishearten and discourage exhibitors, and the outcome will be the failure of future shows unless it can be made to appear that the losses are the result of imperfect arrangements, misunderstood needs, and general mismanagement. What is true as to these latter factors in the late show?

If I know what a dog needs in the way of care, and I think I do, the dogs in the last show were not well cared for. The etrange surroundings and exciting conditions preeent made it difficult to keep a dog on hie feed and regular.

So much the more reason for not expecting one irresponsible attendant to look after twenty or thirty dogs.

They were not taken from the henchee and run upon a straw pile at regular intervals as should have heen done. Tney had not water enough, nor often enough, nor clean enough, nor, in some instauces that I noted, fresh enough. Tho eportiug doge had not that gentler handling to which they were accuetomed, and which they chould have had.

Somo of them I suspect were not taken from their tirceome perchee more thau once in twenty-four hours, and theu but for, say, five miuntes. All of which neglect could only work to their disadvantage. A dog ie quite as susceptible to colds and drafts as a hunan heing; yot those poor hrutes were, part of them, exposed for fourteeu hours a day, in their fevered condition, to currents of air eo strong as to make it dangerous to etaud iu their vicinity. Summed up, the flagraut need was the need of a manager—a man intelligent enough to learn, with experience enough to teach him, conscientious enough to labor without ceasing, and with executive capacity enough to make him more thau the ehow.

It is said that the show wae a pecuniary venture purely, gotten up with an eye eingle to profite, and with utter disregard of proprieties. If this be so, it was a grievous error. Such a show should be merely the floweriug of the desiree and hopes of a large number of gentlemen. It should be arranged in its every detail by men who hold the good of the dog first, and any miserable little emolument laet. These exhibitors ehould become, and feel, responsible for the elightest neglect, and should insist upon extraordinary care during all the time that dogs are absent from their owners. They should, when they delegate power, choose such trustworthy persons as may be available, and hold them to the strictest accountability.

Now, to what association can we look for such qualifications?

Patently, not to the present Pacific Coast Kennel Club.

It has, through carelessness and failnre to appreciate the gravity of the enterprise, permitted bench shows in California to suffer an almost irreparable injury. It has quite lost the confidence of many hitherto warm adherents. It has really forfeited ahout all claim to recognition and support from those who know with what culpable neglect its members permitted the positive control of the late show to pass from its hands.

Now, sir, if it be granted that it is worth while to inaugurate a system of legitimate bench shows, to what source shall we look for responsibility and management?

My plan is this: To have a widely-circulated call issued through the BREEDER AND SPORTSMAN, so that it will reach all of those interested, for a number of weeks, setting a time for the formation of a Bench Show Club. Secure the co-operation of gentlemen, dog-owners or not. Get the presence of as many as possible, and the advice and support of those who cannot come. Organize a club on such basis as shall appeal to every man's confidence. Make such men officers as may lend stability and respectablity to the organization. Organize on such basis as will enable the club to give a properly arranged show, with such awards as shall excite the emulation of the best dog men, and give a show that shall develop to its fullest what good there is in such a thing. This plan entails some labor, a little expense, and if the club be formed, some draft upon the public spirit of its members. But it can be done. Will you not ask through the BREEDER AND SPORTSMAN for the views of such practical men as Aldrich of Marysville, Gale of Oroville, Martin Briggs, the Bassfords, Post, J. B. Martin of San Francisco, Major Woods of Stockton and others of that ilk? X

A Kick With Foundation.

EDITOR BREEDER AND SPORTSMAN: Being a successful exhibitor at the late San Francisco bench show, it will, I presume, be somewhat out of place for me to make any comments on the management, or rather mismanagement, of the show, but to guard against a similar infliction of the kind in the future I feel that too much cannot be said even if one does succeed in winning a few medals. It has been said by many that the show was grossly mismaneged; the number of valuable dogs that have since died and that are still sick will bear me out in this assertion. Why, a few more such shows will kill off what few fine dogs we have in the State instead of improving them. The question has been asked why so many dogs came home sick? In the first place the hall was poorly ventilated and, consequently, not suited for a bench show. After 10:30 p. m. till 10 a. m. everything was closed up tight, consequently the air became very foul. Instead of carrying out of the hell the cleanings from the stalls, they were thrown under the benches. After the fourth day the stench early in the morning became very "loud." This in itself was enough to make all the dogs sick and it is a wonder to me more have not died. Add to this a lack of sufficient exercise and you have the whole secret. As I was at the show from 7 a. m. to 10:30 p. m. every day, only going to my meals and room, I think I was in a position to know just about how the thing was maneged. Of my three entries two were very sick; one bitch has since given premature birth to five puppies, from the effects of sickness, all of which were sold at $20 apiece when eight weeks old. One dog is still sick and has not been on his feet for three weeks. Add to this the cost of exhibiting three dogs from a distance of 150 miles with an additional cost of a week's stay in San Francisco, one can readily see the medals won have cost me dear. Still, I am willing to exhibit again next year, but before doing so, must know beforehand, first, if the manager is competent to manage a bench show; second, if the hall is suitable for a show of the kind, and third, if there is a yard suitable for the exercise of dogs. The care of my dogs I will attend to personally as I did at the last show.

Of the officers of the clnb, though a stranger to them all, I have nothing to say only in the highest praise. They did everything in their power to make the show a success, and had it not been for Mr. Dixon the dogs would not have been classed at all. And to Messrs. Stack, Dixon and Post, exhibitors are indebted for such success as the show attained. Mr. Levy, the manager, seemed to be the right man in the wrong place. He did not seem to understand the duties required of him, and was far better adapted to manage the ticket office and "cash box" than managing the bench show.

Bow.

The Chicago Bench Show.

A regular correspondent of the BREEDER AND SPORTSMAN makes the followiug comments anent the Chicago bench show, confining his remarks to breeds with which he is perfectly familiar:

Greyhounds—Very, very poor.

Deerhounds—Miserable; in fact, no true deerhounds on exhibition.

Setters—Entries good, and as a lot very good, especially the Irish red and Gordone.

Spaniels—Irish water, that most useful breed, well represented, and some very good specimens; small King Charles—some very pretty members of this now rather uncommon class.

Pointers—Did not take my fancy. All wanted quality and the larger ones showed much hound.

Mastiffe—Ono fine example of breed, but not very large. The second-prize dog larger, but an inferior dog.

Old Irish Wolf Hound—A more miserable mongrel, the *American Field* notwithetanding, never entered a ehow.

Fox Terriers—Contained two nice dogs, the first-prize dog especially a good, useful dog. The bitches in this class were very poor and unworthy of prizes.

Bulldogs—Not one worthy of putting on a bench.

Bull Terriers—One very nice specimen, powerful and active.

Beaglee—Fair.

Foxhounds—Very poor.

Puge—In quantities, and as ugly as usual.

St. Bernarde and Newfoundlands—All mixed up, crossed and recrossed; some fine dogs, but nothing truly typical of either hrced.

At a meetiug held by the Pacific Coast Coursing Club last week it was decided to hold the fall coursing meeting at Merced on October 23. This club has an increasing list of members and plenty of funds on hand.

The Gilroy Field Trials.

We have received the following announcement from Gilroy:

Decemher 3, 1883, the third annual field trials of the Gilroy Rod and Gun Clnb will commence on Monday, and are open to all pointers and setters, the bona fide property of residents of the Pacific Coast. The trials will take place near Gilroy, on grounds preserved for the purpose.

The following stekes will be run:

All Aged Stakes; entrance fee $5; first prize silver cup, second, gold medel; third, silver medal.

Puppy Stekes, for dogs whelped on or since January 1, 1882; three prizes same as in All Aged Stakes.

In addition to the above prizes, others are expected to he added—donations from leading sportsmen.

Entries close at 8 p. m. on the evening before the trials.

All entries must be accompanied by the entrance fee; also a full description of the dogs entered, with name of sire and dam (if known), age, color and markings.

Applications for entry to he made to the Secretary of the Gilroy Rod and Gun Club, who will furnish, on application, a copy of the rules governing the trials.

E. LEAVESLEY, Secretary.

ROWING.

Muscle Versus Science.

The *Turf, Field and Farm* comments as follows on the Hanlan-Kennedy contest:

"The Portland school of scullers has met with another defeat. The claim was set up for it that it is the only scientific and really artistic school of rowing in the country; and it was argued that science, with a good exponent, must trinmph over mere muscular strength. Edward Hanlan, it was further argued, had become champion of the world, not for the reason that he had made a study of rowing and handled the oars with artistic skill, but becanse he was clothed with superior strength. It was said that he did not know how to properly rig a boat, that he did not understand how to make the most use of natural gifts, and that his style was crude and faulty. John A. Kennedy, according to the same critics, was the reverse of all this. He was scientific to the marrow, was the very embodiment of Portland knowledge and he wae certain to make Hanlan haul down his flag, although the ignorant public might at first scoff at the suggeetion. The Portland party justified their faith by forming a syndicate to back Kennedy for $2,500 in the steke and to invest some on him in the pools. The sculler from Maine had shown a three-mile trial in nineteen minutes, and he had the benefit of the knowledge of the astute Mr. M. L. Davis, a shrewd matchmaker, an inventor of note and an instructor of rare merit; therefore the strong undercurrent of talk in his favor wae not surprising to those in the secret, although it was treated with scant courtesy by the thousands who base their judgment upon form shown in public. * * * Kennedy evidently had had the story drilled into him that the way to beat Hanlan was to collar him right at the start and to hold him by the throat for three-quarters of a mile. At least he forced the pace from the word, but no matter how repidly he propelled himself, the boat of the champion held its place abreast of him. Those who held the watches realized that the work was terribly in earnest and they wondered how long it would last. When half the distance to the turniug bnoy remained to be rowed Kennedy weakened and both he and Hanlan lost considerable by getting off the conrse. The first to recover was Hanlan, although Mr. M. L. Davis so far forgot himself as to attempt to coach Kennedy into the liue with his white pocket handkerchief. The champion was the first to round hie stake, and then he pulled an easy stroke and gradnally widened the gap between his boat and that of Kennedy. The race was prectically decided at the end of the first mile, but Kennedy gamely stuck to his work and forced his shell over the conrse in 19:52. Hanlan's time wae 19:4 and he smashed the record with so much ease that experts doubted the measnrement of the course. A competent surveyor, however, went over it three separate times, and he has certified that it is correct. Had Kennedy rowed up to the reputed time of his trial, Hanlan would have been forced to beat nineteen minntes, which he could have done. The race confirmed the opinion of Hanlan's admirers that he is the most wonderful man that ever sat in a boat. On Tuesday, June 5, we paid, on the order of the referee, the stakes, amounting to $5,000, over to Mr. Geo. F. Johnson, the representative of Hanlan."

Edward Hanlan, almost more than any man living, has contributed toward making Canada well and favorably known all over the wide world. Always striving to win, he has placed himself head and shoulders over the remainder of his profession, living or dead. When he first distinguished himself, Canada was surprised and delighted. It could not do too much for the man it delighted to honor. To-day he stands the hero of over a score of aquatic contests, and Canada has almost forgotten to think of him. And yet he remains a greater phenomenon in his way than any other man in the athletic world. Brute strength has placed John L. Sullivan at the head of the debased, prize-fighting, short-haired mob. Skill, patience and perseverance has placed Hanlan in the proud pre-eminence he now occupies in the rowing world. The one has contributed largely to the degeneration of his race, morally if not physically; the other has aided largely in fostering a love for healthy, beneficial recreation that must tend to the improvement of his species. The one owes his worldly goods and notoriety to his ability to maim and pound the life out of his fellow creatures. The other owes the little he has, and his position, to superior physical culture, ability and a desire to honestly accomplish all that he undertakes. In which should the world and the country to which he belongs take the greatest pride?—*Toronto Globe.*

John Davis of Windsor, Ont., who acted as judge for Hanlan in his race with Kennedy, is as lucky as the champion. In the toss for choice of courses Davis won for the eighth successive time for Hanlan. The *Turf, Field and Farm* says: "Mr. Davis' success in coin-flying is remarkable, and hereafter he will appear to the representatives of the scullers, matched against Hanlan as a holy terror."

It appears that M. L. Davis did attempt to coach Kennedy when the Portland sculler was rowing out of his course. It is now announced that in consequence of this action of Kennedy had led the procession home, Hanlan's judge would have claimed the race.

Wallace Ross hes begun training at Portland, Me. His headquarters are at the boat-house of the Cumberland Rowing Association. Mr. F. Davis, who acted as coach to John Kennedy in his race with Hanlan, will probably attend to Ross.

TURF AND TRACK.

TROTTERS AT PETALUMA.

The Great Green Mare Out for a Jog.

Broken-down bands of barn-storming actors on their return to thie city after a terrorizing trip tbrough the interior are wont to speak in terms of reproach of Petaluma. The name Petaluma is redolent of rnsticity, cheese, fine cows, Swiss dairymen, but one hardly ever hears it used as a synonym for go-ahead push, for enterprise or wealth, yet for all these Petaluma is not surpassed by any interior city in the State, and, though her citizens occasionally decline to be despoiled by a band of highbinders under the guise of amateur actors, or turn a cold shoulder on some burnt-cork combination, yet they have the satisfaction of knowing that their beautiful city is well up with the boom just now being experienced by all parts of the State. Minstrel troupes, fakirs, drummers, and others, who have made a flying trip to Petaluma, probably failed to see any beauty in the town, and for this reason: One reaches the place hy rail, and unfortunately the depot is situated in a sort of marsh, from whence the view is limited to the rear of a tannery, a brace of stables, a narrow bridge and a winding creek—not a very picturesque lay-out. But go through the town just four or five hlocks, and there can be seen the loveliest collection of handsome country residences to be found anywhere. Pretty houses surrounded by trees and literally embowered by beautiful flowers go to make up as charming an *ensemble* as one could wish for. The tree-laden, dark green hills at the back of the city, the winding roads, the luxuriant growth of orchard trees and vines, present a picture of still life that compares with any one of the half dozen Swiss towns over which poets gush and tourists rave. The city proper contains a few fine brick and stone blocks and a good many prosperous, enterprising merchants. They do business on a business basis there. One can take into town 1,000 tons of wheat and get for it spot cash at the highest market rate, or can eell a dozen eggs on tbe same terms. Unlike other cities in the center of a farming district, Petaluma does no trade on a barter basis. The producer sells his stuff for cash and pays cash for what goods he wants. Quite recently the townspeople raised about $40,000 to straighten and widen the creek and to pave with granite blocks one of the main streets, and even now a couple of huge dredgers are at work dredging out the creek to improve navigation. Petaluma is the center of the fine stock-raising portion of thie State, and around it are more fine horses and cattle than one can easily enumerate. We paid a flying visit to the racetrack and fair grounds last Sunday, and were much surprised at the large number of trottere and runners there in training. The mile track is one of the safest in the State, albeit the last one built, though a little loam or sand mixed with the adobe crust would make it still better.

The first acquaintance we met on the track was Chauncey Kane, who has about thirteen trotters in training, principally owned by Mr. Dan Brown of Petaluma, the owner of the late Volunteer. Among Mr. Brown's lot is a dark bay two-year-old horse, Jackson Temple, by Volunteer, dam Alice Daniels, by George M. Patchen. Two weeks ago Kane started to break Jackson Temple. The first time he was hitched up he was driven on the road at a jog and the day after Kane drove him a mile in 2:42¼, a fine performance for a green colt soft and fat from pasture.

In the next stall was a likely hay mare, four yeara old, by Volunteer, dam hy Emigrant.

Bay gelding Johnny, hy Robinson's Auctioneer Johnny, who won a district race last fall in 2:38¼.

Two-year-old horse Connemara, hy Brown's Volunteer, dam hy Don Juan, hy Speculation.

Five-year-old gelding hy General Dana, dam by Maillard'a Eclipse, unhroken.

Bay mare by Lodi, dam hy Maillard's Eclipse.

Steve Crandall has also a fine lot in training at the track and is doing good work with some of them. First and foremost is Mr. A. P. Whitney's ch c Dawn, hy Nutwood, dam Countess, by Whipple's Hamhletonian. Dawn won the Embryo Stake at Oakland last fall in 2:59.

Ideo, hy Abhotsford, dam Countess.

Pasceda, record 2:44, hy Alexander, dam Countess.

Bay colt Johnny, four years, hy General Dana, dam by John Nelson.

Bay mare Blanche, hy Gen. McClellan, dam by John Nelson, owned hy W. Bihler.

Bay pacing mare Fanny Wilaon, by Gen. McClellan, dam by Belle Alta.

Bay colt Joe Dake, hy Gen. McClellan, dam a thoroughhred mare, Fairy Queen.

S. Sperry is also working a lot at the track. Amoug them is the great mare Nellie R, record 2:20, hy McClellan Jr., dam Susie Rose.

A Rustic colt owned hy Judge J. McM. Shafter.

Bay colt hy Alexander, dam hy Napa Chief.

Bay gelding by Inauguration.

Lupe and Fred Carrillo are training some thoroughbrede. Tbe pick of the lot is a sorrel filly, three yeara, hy Wheatley, dam by Cheatem, owned hy P. Carroll. She is enterd for the three-quarter-mile and repeat race to come off at Petaluma to-day and is said to have shown a half in 0:50 and repeated in 0:50½, weight up unknown.

J. B. Hinkle, h c hy Shannon, dam hy Lodi, a full brother to Ironwood, hy Ironclad, and Jack Merrick, hy Bayswater, dam by Gilpatrick, make up Carrillo's string.

After looking through the atables we went out to the track to see the horaes worked out. Twenty or thirty people in the atand and a dozen or ao more around in buggies gave an air of life to the place, but as nearly all of them had their watches out, the drivers were a bit chary of showing the best they could do. The first horse speeded was Carroll'a sorrel filly hy Wheatley. A boy jogged her three miles and then Fred Carrillo gave ber a fast half. The morning was dull and heavy and she did not sweat out good, which is perhapa the reason that ber hest quarter was 0:26¾ on the back atretch. She will have to cut that more than tbree-quarters of a second to win to-day. Then Steve Crandall brought Dawn on and jogged him several times around, doing little hetter than a three-minute gait on any part of the track. Dawn had hurt hia foot the day hefore and was all handaged up, and when the boys told us that he could beat thirty we helieved them. A white-footed, dark brown colt by Volunteer was then given hia second lesaon in harness and ahowed a fine hurst of apeed. By this time there were a dozen horsea ou the track and when Chauncey Kane came out with Jackson Temple he found plenty ready for a brush. Temple did not act very well, and though he showed hetter than a forty gait in three trials he failed to make the circuit hetter tban three minutes. Chauncey laid the blame to ill-fitting hoots.

We waited until nearly 1 p. m. and at last were rewarded by eeeing Mr. W. Bibler'a Blanche given a fast mile. She went to the quarter in forty, made the second quarter in 38¾, reached the three-quarter pole in 1:57 and got home in 2:36¾. Steve Crandall drove Blanche, and it seemed that be had pretty hard work to keep her from getting home some fifteen seconds faster. Blanche has no record, she was barred in several races last season and did not start in others on account of sickness. It is generally thought that she can trot in 2:17 or better, and if she is entered in the low classes thie season, will give the hoys an experience similar to that given in the East by the green horse Phallas, who made his last heat in 2:18¼ and thereby showed his ability to scoop every one of the low purses.

Tbere was a black mare on the track sired by A. W. Richmond, the sire of Romero. She has the same action as Romero, a peculiar gathering of the fore feet, and in good hands would make a fast trotter.

One of the sights on the track was a gentleman dubbed by the Petaluma sports "The Mystery." He arrived at the track two weeks ago, bringing his family, two horses and a sulky. To some inquirers he said he had come from Mendocino to show the folks some trotters. Naturally enough his horses were closely watcbed and tbe boys were surprised to find that the fastest of them could not better a tbree-minute gait. Day after day the Mystery is out on the track always ready to give any horse a brush and generally getting left behind in spite of vigorous clucking and whipping. On Sunday last old Mr. Haskell drove his twenty-year-old mare Dolly on the track, hitched to a heavy buggy. Here was a chance for the Mystery and boldly he went for Haskell. But the old mare could trot a bit herself and on the backstretch amid the cheers of the boys, the great man from Mendocino was forced to take a back seat. He came out again later to give Blanche a brush, and expressed deep disgust that Sperry refused to allow Nellie R to be speeded. W.

Light Weights and Heavy Weights.

The rapid increase of important race meetings, and the largely increased value of the stakes run for, are causing an enormous increase in the number of horses which go into training; especially in races over short distances of ground the fields have enormously increased, and ere long as large a field of horses may run in a Newmarket Handicap as started in the memorable Stewards' Cup at Goodwood, won by Croagh Patrick, when forty-five obeyed the etarter's signal. But with all this increase of horses in work, there is no commensurate increase in the number of steady, reputable and able horsemen, whilst each day sees the whip-flourishing and coarse-spoken boy throwing away any chance the animal he bestrides may possess.

Of horsemen who can scale 6st. 7lbs. the present minimum in handicap races, the number is few indeed, Cracknell and Kilby being almost the only two horsemen of any celebrity in Victoria who can scale that weight; whilst in Sydney they are more fortunate, Donald Nicholson and other excellent riders being still available. Under 7st., Hales, O'Brien, Walker, Williamson, Sullivan, Hughes, Williams and Aspinall are perhaps of greatest celebrity, whilst between 7st. and 8st. a dozen excellent horsemen may be found, but, outside of these and those over 9st., the jockeys of Victoria may be counted on the fingers of one hand.

With the number of horses in training, this state of things should certainly cease to exist; hut until the Victoria Racing Club adopts the principle of a minimum top weight in all handicaps, to which the highest weight accepting must be raised, there is little prospect of their numbers increasing, whilst through the strain which incessant wasting has brought on their system some of our most hrilliant horsemen, notably Hughes, Hales, Sullivan and O'Brien, have suffered sadly in health, and the records of the past point to more than one skillful rider who has succumbed to the strain repeated wasting has imposed on the vital force.

Among the lads in the various training stables of Victoria are many really smart hoys, hut they obtain few opportunities of becoming finished horsemen, for while they may get a few mounts while under 7st., directly they get over this their occupation is gone. They find it almost impossible to get a mount, and either abandon riding altogether or give way, having no motive for ambition, to habits which tend to rnin and degrade them for life.

That a horse races hetter in the hands of a jockey who has thoroughly learned his trade than it does in those of an inexperienced hoy, goes without saying, and in the short races of the present day, in which quickness in getting away is essential, the man who has a clever professional in the saddle is certainly in a far hetter position than he who has to rely on the efforts of a willing hut half-trained lad.

It has been argued that carrying increased weight has a tendency to break horses down. Now, altbough in work since two years old, the fact remains that both Commotion and Darehin, the two best horsee of the past year, and two of the soundest horses on the Australian turf, have always carried over 8st., hoth in work and in their races, and there is no douht that, being properly held together by the heavier rider, these horses have escaped numerous ills and accidents which, in the hands of a child, they could hardly have avoided.

Those who are in the habit of witnessing the starting of our short races cannot have failed to notice the trouble which small boys give at the poat, and the manner in which they are left at the post when the flag falls. Then comes the mad hurry to catch their field; the whip comes out, the horse's head is let go, and, instead of aittiug quietly, with a strong hold, watching for an opening, the unfortunate animal is driven on to the heels and against tbe quartera of tbose in front of him. If he is lucky enough not to fall, the chances are greatly in favor of his crippling some valuable animal among his opponents; meanwhile hia uncontrolled exertions utterly deprive him of all chance when an openiug is given. With a horaeman in the saddle, how differently are things managed. Giving the starter little trouble, he is yet alwaye on the alert, and directly the flag falls he is away, and, riding hia horse into his stride, aecurea a good position, and then, with a nice hold of his horse's head, notes which of hia antagonista need watching. As tbey are about to turn for home, he watches hia opportunity, and, if they awing out, shoots up through the opening. Then, if on a stout animal, he makes the pace merry, but, if on a horse which hae but one brilliant run, again catches hold of him, and nurses bim to within fifty yarda of the post, when, shooting out, he brings bis 8 at. home in front of equally good animale weighted at 6 at. 7 lhs., but which their juvenile riders are utterly incapable of handling properly.

Some time ago we advocated the institution of a riding achool in which lads could he instructed by competent profeasionals in tbe mode of riding various kinds of horsea, and we still deem the idea worthy of realization. We have also advocated the incorporation of a race in the V. R. C. programme which shall he ridden without whip or spur, by lads who have never won an advertised price, whilst lads who have never ridden in public should be allowed 7 lbs.; but, although such a race has proved successful in England, as yet it has not been adopted here.

The principal difficulty which obtains against an increase of good jockeys is the fact that, owing to the flattering handicaps which are the rule, and the absence of any provision for raising the other horsee entered when the top weight goes out, there is no prospect of earning a fair position in the profession for any lad who gets above 8 st., and consequently respectable and educated youths will not embrace a profession which, whilst it offers an income which equals that of a chief justice to its most successful light-weight votaries, shuts the door in the face of those who grow above 8 st., and relegates them to the position of obscure stable boys, unless they take to the jumping business.

Until a minimum top weight of 9 st. 5 lbs. is enforced in handicaps, these troubles will continue, and owners and the public will continue to intrust their money to the pilotage of children who ought to be in the nursery instead of on the back of a racehorse.—*Federal Australian, June* 10.

The California Trotters.

Ex-Governor Stanford's stable of California trotters reached Chicago last Wednesday, and were at once forwarded to Lincoln, Ill., wbere they will remain until a week or two previous to the Chicago meetings, in which they have engagements. The lot includes Wildflower and Bonita, four-year-olds; Hinda Rose, Flower Girl and Helen, three-year-olds; and Chiquita, Gypsum and Alban, two-year-olds. Wildflower was very sick with pinkeye early in tbe spring, but has now improved so much that the second payment in tbe four-year-old race at Chicago has been made, Bonita being also kept in. Both fillies are also in the five-year-old race, in which they will be called upon to give a year to such flyers as Jay Eye See and Bronze; but in spite of this disadvantage one of them will start. Helen, Hinda Rose and Flower Girl were in the three-year-old race here, but the first-named has been declared out. Of course, Hinda Rose is the principal reliance of the stable in this event, and in case she keeps well Flower Girl will not start. Tbe other entries are Orphia, Frank Sprague, Fugue, Lexington Wilkes, Victoria Sprague, Silver Leaf, Helen M, Strathern, Strathbane, Box Underwood, Elvira, Wildmont, Aloise, Reve, Early Dawn and Ruby. The best of these, so far as public performances are concerned, is undoubtedly Fugue, but as Hinda Rose defeated her easily enough at Lexington, last fall, the chances of victory this season would seem to be in favor of the California filly. Fugue has been doing very well, however, and at Louisville, May 9, beat Elvira, Lady Almont, Prince Edward, Albert B and Early Dawn, all three-year-olds, in 2:45, 2:43, 2:34¾. The last heat was trotted on a track that was heavy from rain the previous night, and yet in spite of this unfavorable circumstance Fugue trotted the last quarter of the mile in 35½ seconds. In the four-year-old race at Chicago, Wildflower or Bonita will have for opponents, should all that are now in remain, Connaught, Jersey Lily, Orion, Dainty, Endymion, John Waxey, Silver King, Butterfly, Algath, Vau, Sarah C. Snooks, Eva, Code, Billy Clinker, and Mary Miller. Eva and Code are the best of these, and as the last-named trotted the last quarter of his race at Louisville, the first week of May, in 33½ seconde, he ie clearly in great form, and the Californians must go pretty close to Jay Eye See's record of 2:19 if they beat him.—*Breeder's Gazette, June* 7.

Probable Error.

The horse Woodbury, that ran at the Los Angeles (Cal.) races this spring, was entered and run as hy Woodhuru, out of Moss Rose, by imported Knight of St. George. This pedigree is, we are authoritatively informed, fraudulent. There is only one horse Woodbury, hy Woodburn, out of Moss Rose, a hay horse, foaled 1871, which is now in the stud at Salem, Oregon, and not on the turf. Jockey clubs and racing associations should, in order to keep the turf pure, take summary action in all such instances of fraud as the above.—*Turf, Field and Farm.*

The name claimed for this horse by bis owner is Woodbury Jr., and from what we know of the matter we feel satisfied that whatever in it that appears irregular is the result of ignorance and carelessness and not from any intent to deceive or impose upon anybody with a false pedigree. Wo think an examination of the original entry will disclose that no such pedigree as "hy Woodhurn out of Moss Rose" was given. Woodbury Jr. is by Hardwood, a son of Woodhurn and Moss Rose. His dam was a chestnut mare hrought from Texas hut her breeding is entirely unknown. If we understand the business aright no other claim was ever made for him in the way of pedigree.

In the track gossip in the New York *Spirit* a correspondent says: "Mr. Hickok has here with him one of the most wonderful two-year-old fillies that ever made a footprint on a trotting track. She is by Sultan, and was bred in California. Yesterday was the first time she had been in harness for several days; he drove her up and down the stretch at a 2:25 gait. Mark me, tbis one has a Maud S or St. Julien future before her, and if the trotter that is destined to go a milo in 2:00 is yet foaled I guess it is sbe. But the name should be changed, as they call her Alouise. All of Mr. Hickok's striug are working well; St. Julien never looked finer, and we expect him to trot here in about 2:16, which he will have to do to beat Fanny Witherspoon, and at Chicago he is expected to heat 2:10¼, good day and track."

Let no one be discouraged who owns a fast, young, flighty trotter. Age frequently brings steadiness, if the education ia conducted by a patient trainer of phlegmatic temperament. For example, Catchfly was as wild as a hawk when handled by Macey Bros. and Pete Johnson, but this season Hayes is doing wonders with her. Recently she won a race at Chester Park, making a record of 2:22½, with a bad break, on a half-mile track, and Orrin Hickok saya she can trot in 2:16.

Rarua and Pickard are being driven together hy Mr. Robert Bonner, and make a clipping team. Wben driven aingle on the road, Rarus has a habit of shying, but in double harnese is as steady as a clock.

Tho trotting mare, formerly known as the Mohawk Maid, whoae name was changed last season to Morse'e Yellow Dock, will begin her present season's work under the name of M. Y. D.

The prospects of Mulkey'a July meeting at Silver City, Idaho, are very flattering. Horses will be present from Oregon, Nevada and Utah, in addition to those owned in Idaho, which are numerous.

Another fifty-mile race is on the card at San [illegible] July 7.

Pedigrees of Trotters.

Because the breeding of the ancestors of some first-class trotters is unknown, it does not follow that they were not well bred; on the contrary, it is highly probable that, could the facts be ascertained, such animals would trace directly back to individuals which possessed the qualities of speed and endurance in a marked degree. A well-known trainer in New England, who has followed the business for upwards of a quarter of a century, during which time he has brought to the front some very noted trotters, was lately asked the breeding of a green horse in his string which looks and acts like a trotter. The reply was: "He hasn't any pedigree yet, but wait till he wins a few races in fast time and they will find one for him. The best trotter I ever drove had no breeding. That was Belle Strickland. I believe they gave her a pedigree, however, after she proved herself a trotter." This trainer is an excellent judge of a horse, but not much of a student of the breeding problem. He was sincere in his statement concerning Belle Strickland. It is known, however, that her sire was Whalebone, sometimes called the Clarke horse, he by Sherman, son of old Justin Morgan. Sherman was also sire of Vermont Black Hawk. Whalebone got Pollard Morgan, and he in turn got Lewiston Boy, quite a trotter in his day, and sire of the roan gelding Dispatch, which also trotted under the name of Windsor. His record is 2:24½, but this was no measure of his speed, as every one acquainted with the horse fully understands. Lewiston Boy got the dams of Emperor (2:29½), and Knox Boy (2:23½), the former by the Newman Horse, he by Rollins' horse, he by Rising Sun, the latter by Gen. Knox. It is true that the breeding of dams of some of the very best, including Andrew Jackson, Henry Clay, Vermont Black Hawk and Mambrino Chief, were never traced, but it was due to the fact that no effort was made in this direction until after the parties from whom the information might have been obtained were dead, and not because the ancestors from which these animals descended were bred from obscure or inferior stock. That every apparently well-bred horse is not a good one is a fact admitted by all breeders, and too well known to need repeating, but the fact that only a small proportion of well-bred colts makes first-class horses is a strong argument against breeding from anything that is not known to have descended in every line on both sides from first-class stock.—*Am. Agriculturist.*

A Prepotent Family.

That the descendants of the noted stallion Justin Morgan are still popular among Vermont breeders is shown by the following communication from our Tunbridge correspondent: "In the early part of this century the farmers of Tunbridge extensively patronized the famous horse Justin Morgan, and as his colts grew up his popularity increased. During the last three years of his life, proving incapable of procreating, he was mostly used as a draft horse; and in February, 1820 or 1821, when he had just returned from Boston in a heavy team, he got so severely kicked that Gilman Folsom, now of South Royalton, Vt., mercifully killed and buried him near the line between Tunbridge and Chelsea, and only one mile from the present stage route from South Royalton Central Vermont depot to Chelsea. The Bulrush horse and Gifford were foaled in Tunbridge, and Morgan Eagle near by. Woodbury, Bulrush and Morgan Eagle stood there season after season, sweeping all before them, and so great was the demand for Morgans fifty years ago that Charles Morris Lamb, then a young man in Tunbridge, now a venerable and noted lawyer in South Royalton, bred six colts from Woodbury in a single season. Thirty years since Mr. Hutchinson sold for the Western market an old stallion from Morgan Eagle that left in Tunbridge much superior stock. The present very large Morgan, bred and still kept by Hutchinson, continues to get excellent and high-selling colts, at the advanced age of twenty-three years. The Goodwin horse, of Woodbury and Bulrush blood, a beautiful animal of moderate size, now sold and gone, was raised here, and his progeny possesses the true Morgan characteristics.

At present the Morgan stock of this town is well represented by the stallions Young Justin and Vampire, both by Taggart's Abdallah, ont of a Morgan mare called Nancy, formerly owned by Ansel Burbank; Taggart's Abdallah was by Farmer's Beanty, he by Gifford, he by Woodbury, by old Justin Morgan. The dam of Taggart's Abdallah was Lady Mack, by old Abdallah. Young Justin made his first race last fall at the Tunbridge fair, for a preminm, and easily won without a skip in 2:35, on a soft and long half-mile track, being five seconds better time than had ever been made on that course. The performance of Young Justin on that occasion surprised everyone, and disinterested amateurs declared they had never seen his equal in an untrained horse that had never been handled by a professional driver. He had been used for stock purposes to within four days of the race. Vampire is larger than his brother and by many considered more beautiful, and his speed greater according to his age.—*American Cultivator.*

National Trotting Association.

We have received from Secretary Vail the first circular for the year 1883. The following are the items of interest on this Coast:

Penalties—By order of the Embryo Trotting Stakes Association, San Francisco, Cal., D. P. Derrickson, Marysville, Cal., and the b f Brigantine, have been suspended, for non-payment of entrance money (of which previous notice was omitted).

Reinstatements—Stemler & Ayres, Portland, Ore., and the b g Joe Howell (runner), who were suspended by order of the Golden Gate Agricultural and Mechanical Fair association, district No. 1, Oakland, Cal., for non-payment of forfeit, as notified Sept. 25, 1882, have been reinstated, said claim having been paid.

Steve Crandall, Santa Rosa, Cal., and the b m Blanche, who were suspended by order of the Golden Gate Agricultural and Mechanical Fair Association, district No. 1, Oakland, Cal., for non-payment of entrance money, as notified Sept. 25, 1872, have been re-instated, said claim having been paid.

[N. B.—Steve Crandall, Santa Rosa, Cal., and the b m Blanche, remain suspended, as notified Oct. 17, 1882.]

Time Extended.

The National Association of Trotting Horse Breeders have extended the time for closing the following reopened stakes from July 1 to August 1, 1883:

The Atlantic Stakes, for five-year-olds (foals of 1878), by stallions whose get has never beaten 2:35 at five years old or under.

The Initiation Stakes, for stallions that have never beaten 2:25.

The Confirmation Stakes, for stallions that have never [illegible] 2:25.

The Standard Stakes, for mares that have never beaten 2:30.

The Sequel Stakes, for mares that have never beaten 2:40.

The Stallion Stakes, for foals of 1883, to be trotted for as three-year-olds.

Burning of the Olympic Club Rooms.

Last Wednesday morning a fire totally destroyed the Club rooms, and aparatus, furniture etc., belonging to the Olympic Club and situated in the old Morton building on Post near Kearney. So far the cause of the fire has not been determined but it is generally thought to have been carelessness with hot ashes or cigar stubs. The Clnb is a frighfully heavy looser though it had no interest in the building except a five years lease from Ed Barron, the owner. It had cost the Club for furniture, fittiugs, apparatus, pianos, carpets, etc., rather more than $52,000 and on this there was only an insurance of $10,000 making a clear loss to the club of $42,000. In addition to this 500 of the individual members lost from $20 to $200 worth of clothes, foils, boxing gloves, jewelry, etc., it being the custom of many of the Oakland members to keep a couple of suits of dress clothes in their lockers along with their exercise clothes, running shoes etc.

The full amount of these individual losses will never be known. Fulda came near leaving in his locker a valise in which he had placed $300 in gold with some valuable jewelry, but a prudent friend had advised him to take the valnables away and he did so. Mr. Charles Dall lost two business suits and a new dress suit worth $85, and hardly a member escaped scot free of personal loss.

The appatatus alone cannot be replaced for less than $12,000. Besides all the losses that can he made up by time and money there are others that can never be made good. All the archives of the club, its records, pictures of old Presidents and officers and all the thousand and one curious and valuable mementoes of its long and prosperous existence. Shortly after the fire a meeting of officers and others was held. Mr. Russ, the Treasurer, was authorized to collect the insurance on the club's property, which was insured in the California Insnrance Company and a New Zealand company. A communication was received from F Company, offering the privileges of their rooms, corner of Sutter and Powell streets, to the clnb. Other letters were read, proffering both money and quarters. A committee was appointed, consisting of Messrs. Brown and Jennings, to obtain temporary accommodations for the organization. Also another committee, consisting of Messrs. Russ and Jennings, was chosen to call upon Edward Barron, the owner of the destroyed structure, to learn whether or not he would rebuild. There is not a single member of the clnb despondent over the affair. They all say that they will pull through and pnt the club if possible on a better basis than ever. Mr. Flavin, the acting president, is a live, energetic man, and with his colleagues has already evolved a half dozen plans for securing temporary accommodations or permanent ones if needed.

This evening at 8 p. m. the directors will meet and call a general meeting of the clnb to take decisive action.

Lena Dunbar Dead.

W. L. Pritchard's chestnut mare Lena Dunbar, by Leinster—Tibbie Dunbar by imported Bonnie Scotland, died at E. J. Baldwin's Santa Anita ranch on the 11th inst. The cause of death is reported to be "swelling of the neck," whatever that may mean. Lena was foaled in 1874, and was one of the gems of the Mr. Pritchard's stable. Her career on the turf was creditable. As a two-year-old she started once, but failed to get a place. The race was one mile, and was won by Ralston in 1:46. In 1877 she started three times. At Sacramento, April 17, she ran second to Mollie H in a purse for three-year-olds, 1½ miles; won in 2:48½, 2:45¼, the first run being declared void. On the same course, September 17, she won a purse and stake for three-year-olds, mile heats, beating Three Cs, Ironclad-Viola colt and Centennial Belle in 1:44½, 1:45½. At Oakland, October 8, she won a purse for all ages, mile heats, beating Josie C, Vanderbilt, Cosmo and Queen Emma. Josie C took the first heat in 1:45½, Lena winning the second and third in 1:46, 1:49. Eighteen hundred and seventy-eight was Lena's brilliant year. She started four times and scored a victory in every contest. At Sacramento, June 3, she beat Glen Dudley and Ecliptic, mile heats, in 1:44½, 1:46½; same course, June 7, beat Henry Ward Beecher and Madge Duke, two-mile heats, in 3:42½, 3:36¾; same course, September 17, beat Lottery, Clara D and Maggie S, mile heats, in 1:44¾, 1:42¾; September 21, with 108 pounds up, she won a handicap sweepstake, mile heats, beating Modoc Chief, 100 pounds, Santa Anita, 92 pounds, Ecliptic, 100 pounds, and Mark L, 95 pounds; time—1:45¼, 1:44. In 1880 she also faced the starter's flag four times. At the Bay District Course, San Francisco, May 22, she won a purse for all ages, 1½ miles, beating Clara D, Neapolitan and Lillie R in 2:10½. May 26 she started for the Pacific Cup, 2¼ miles, but was beaten a length for first place by Neapolitan; time, 4:02. May 29 she ran second in two mile heats won by Clara D, Lena winning the first heat in 3:38½, Clara D taking the second and third in 3:36, 3:42. At Sacramento, September 30, she was third in a mile dash won by Jerome B in 1:42¾, and there her turf career closed. She was bred to Bazaar and retired. It is reported that Mr. Pritchard refused an offer of $6,000 for the mare not many months ago.

Girofle to run at Goodwood.

T. F. Walton has nominated the famous Girofle, and also his two English horses, Sutler and Mr. Pickwick, for the Goodwood Stakes. The race is a handicap, at £25 each, £15 forfeit, £5 if declared, with £300 added. The distance is two miles and a half. The race has thirty-six subscribers and will be run on the 31st of July. Among the other nominations are Mr. Pierre Lorillard's Pinafore, Mr. T. Davis' Fortissimo (last year's winner), Lord Rosebery's Vesta (winner of the Great Metropolitan), Lord Ellesmere's Wallenstein, Sir Fred Johnstone's Corrie Boy (winner of last year's Cesarewitch), and a dozen more of the best distance horses in England. Mr. Walton's trio are being trained by Mr. A. Day at Cholderton. There will be some interest to learn the weight assigned to Girofle by the Messrs. Weatherby, and it is safe to say that it will not be much less than 122 or 124. If such be the case Girofle's chances will be slim, for since the race was first run in 1823 it has been won only nine times by horses carrying 120 pounds or more.

For the Goodwood Cup, at the same distance, to be run on August 2, Mr. Lorillard has nominated Iroquois and Pinafore, Mr. Walton Girofle, and Lord Ellesmere Wallenstein, while of the English "cracks" Tristan, Barcaldine, Macheath, Corrie Boy, Bonnie Jean (winner of the Oaks) and a dozen others are nominated. Under the conditions of the race Girofle will carry 116 pounds, should she not win a race in England before running for the Goodwood Cup. If a winner she will carry 123 pounds.

The San Jose *Mercury* of last Thursday says: For some time past there have been rumors of the existence of that fatal disease, glanders, in this county, and occasionally the public authorities or owners have been called upon to kill infected horses. Abram King, President of the Agricultural Association, has had two valuable horses with symptoms of the disease for some little time, and has kept them where there could be no danger of their spreading the disease to other horses. After having them examined by two veterinary surgeons, who unqualifiedly pronounced the disease to be glanders, he, Monday, had them shot—a clear loss of $500. The disease always terminates fatally and is highly infectious. Therefore, persons who have reason to fear that their horses are so affected should at once isolate them, and as soon as the fact is determined, promptly follow the example of Mr. King.

Market Report.

FLOUR—We qnote Best City Extra, $5 25@5 85 medium gradee $4 25@$4 75; Shipping Superfine, $4@$4 25 ℔ bbl.

WHEAT—Business light. Milling, $1 65@$1 67½; No. 1 shipping, $1 62½@$1 65; No. 2, $1 57½@$1 60.

BARLEY—We quote: No. 1 feed, 95@97½c; good Brewing, $1@$1 02½ offered.

OATS—Fair Feed, $1 80@$1 90; Good, $2@$2 10; Choice $2 15 ℔ ctl.

RYE—Qnotable at $1 45@$1 60 for fair to good.

FEED—Gronnd Barley, $22@$23 ℔ ton; Cracked Corn, $36 ℔ ton; Shorts, $16@$17 ℔ ton; Oilcake meal, the oilworks sell to the trade at $35 ℔ ton, less the usual discount; Middlings, $20@$22 ℔ ton for lots at the mill.

HAY—Alfalfa, $6@$9; Wheat, $13@$15; Barley, $10@$12; Wild Oat, $13@$15; Mixed, $9@$11 ℔ ton.

STRAW—50c@70c per bale

PROVISIONS—Eastern Hams, 16½@15½c; California, Hams, 15@15½c for plain, 15½@16½c for sugar-cured canvased; Eastern Breakfast Bacon, 16@16½c; California Smoked Bacon 15@15½c for heavy and medium, and 16@16½c for light and extra light; Clear Sides, 15½@15½c; Pork, $18 50@$19 for Extra Prime, $20@$20 50 for Prime Mess, $24 50@25 for Mess, $25 50@$26 for clear and 26 50@$27 for extra Clear; Pigs' Feet, $16@$18 ℔ bbl; Mess beef, $15 50 for bbls and $8 50 for bf bbls; Extra Mess Beef, $15 50 for bbls and $8 75 for bf bls; Family Beef, $18@18 50 ℔ bbl; California Smoked Beef, 13½c.

FRUIT—We quote lots as follows: Apples, new, 50c@$1 25 ℔ box; Apricots, 40c@75c ℔ box for Pringle and $1@$1 25 ℔ box for Royal; Cherry Plums, 40c@90 ℔ box; Currants, $3 50@$5 ℔ cbest; Raspberries, $6@$9 ℔ cbst; Strawberries, $8@$10 ℔ cbest; Cherries, $9@$11 ℔ chest for good to choice; Gooseberries, 4@6c ℔ lb; Peaches, 35@70c ℔ bskt; Lemons, $9@$11 ℔ box for Sicily; California Lemons, $1@$2 ℔ box; Limes, $8@$12 ℔ box for Mexican; Tamarinds, 12@13c ℔ lb; Bananas, 1 50@$3 ℔ bnnch; California Oranges, $1 for common and $1 50@$2 50 for good to choice.

VEGETABLES—We quote: Summer Squash, 3@10c ℔ lb; Carrots, 37½@50c; Turnips, 60@75c; Cauliflower, 50@75c ℔ dozen; Cabbage, 60@80c ℔ ctl; Garlic, 2@3c ℔ lb; Celery, 60c ℔ doz; Dried Okra, 20c@25c; Dry Peppers, 10c@12½c ℔ lb; Green Peas, 2½@3½c; Rhubarb, 6@8c per lb; Mushrooms, 75c@$1 ℔ box; Tomatoes, $1 75@$2 50 ℔ box; Cucumbers, 12c@50c per doz.; Asparagus, $1@$1 25 ℔ box; Sprouts, 3c ℔ lb.; Artichokes, 10c@15c ℔ doz.; String Beans, 6@8c ℔ lb.; Green Corn, 8@15c ℔ doz.

POTATOES—75c@$1.

ONIONS—75c@$1 for good.

BEANS—Bayos, $5 37½; Butter, $4 25@$4 50, according to size; Lima, $3 25; Pea, $3 25; Pink, $4 40; Red, $4 25@$4 50; small White, $3 25; large White, $3@3 25 ℔ ctl.

BUTTER—We quote jobbing lots: Fancy, 24@25c; choice, 22@23c; fair to good, 19@21c; inferior lots from country stores, 16@17c; firkin old, 20@22½c for choice; new, 22@25c; pickled roll, 22½c; Eastern 17@20c. Sometimes under.

CHEESE—California, 12½c for choice: 10@11c for fair to good; do, factory, in boxes, 14@16c; Eastern, 16@17c.

EGGS—California, 27@28c ℔ doz; Eastern, 25@27c per doz.

POULTRY—Live Turkeys, gobblers, 23@24c; do, Hens, 21@22c; Roosters, $7 50@$8 for old and $8 50@$10 for young; Hens $6 50@$7 50 Broilers, $2 50@$6, according to size; Ducks, $6@$8 ℔ dozen; Geese, $1 25@$1 50 ℔ pair; Goslings, $1 50@$2 per pair.

GAME—Hare, $1 25@$1 75; Rabbits, $1 25@$1 50.

WOOL—We qnote: Choice Northern Free, 22@24c; Choice Northern Burry, 17@19; Calavaras and middle counties, 20@23; San Joaquin and coast, choice, 15@18c; San Joaquin and coast, inferior, 14@15; San Joaquin and coast, year's clip, 14@18c.

HIDES AND SKINS—Dry hides, usual selection, 16½@17o ℔ lb; culls one-third less, and Mexican Hides 2c ℔ lb less; Dry Kip, 17c; Dry Calf, 17c@22; Salted Steer, over 55 lbs, 11c ℔ lb; Steer and Cow, medium, 9½c@10c; light do, 8@8½c; Salted Kip, 15 to 30 lbs. 9½@10c; Salted Calf, 13@15c ℔ lb; Salted Veal, 12@13c; Sheep Skins, 25@30c for Shearlings, 30@50c for short, 50c@90c for medium, and $1@$1 40 apeice for long wool and wool skins. Butchertown Green Skins bring higher prices.

TALLOW—Quotable at 8@8½c ℔ lb for rendered and 11@12c for refined, both in shipping order.

MEATS—Following are rates for whole carcasses from slaughters to dealers:

BEEF—Prime, 8@8½c; medium grade, 7½@7½c; inferior, 6@7o ℔ lb.

VEAL—Large Calves, 7@8c; small ones, 9@10c ℔ lb.

MUTTON—Wethers are quotable at 4½@5c and Ewes at 4@4½c ℔ lb, according to quality.

LAMB—Spring is quotable at 5½@6c ℔ lb.

PORK—Live Hogs, 7½@8c for hard and 7@7½c for soft; dresse do 10½@10¾c ℔ lb for hard grain hogs.

MULDOON'S PICNIC.

GREAT TUG OF WAR.

The Event of the Season.

LAST APPEARANCE OF

MULDOON

The Wonderful Græco-Roman Wrestler, Previous to His Departure for the East,

TO TAKE PLACE AT

Oakland Trotting Park

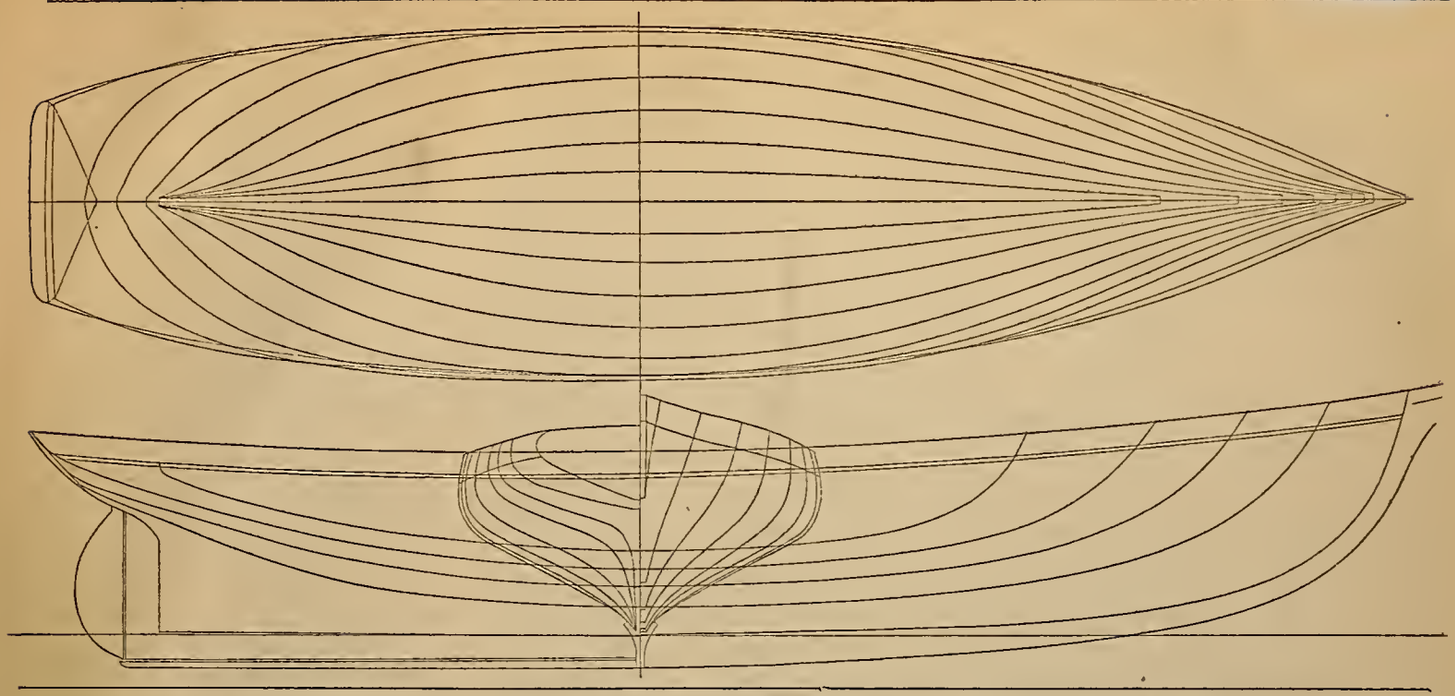
ON SUNDAY, JUNE 24, 1883.

PROGRAMME OF SPORTS:

Mile dash for boys 15 years old.
Mile race, free for all.
Half-mile race, free for all.
Four-hundred-and-forty-yard race, free for all.
One-hundred-yard-race, free for all.
A football match between a team captained by Muldoon and a picked team.
Grand tug of war, thirteen on a side, between Muldoon's team and a team elected from the athletic clubs.
William Muldoon will contest in Græco-Roman wrestling with any man on the ground and will give $500 to any man who will throw him. He will also wrestle all comers, catch as catch can, for $100.
Muldoon will also box, with soft gloves, any man on the ground either for fun, $100 or $500.
Prizes for heavy lifting, dumb-bells and hammer-throwing.
A fine band will be in attendance.
Special trains to the track at 10 a. m. and 1 p. m.

Admission - - 50c.

Admission to grand stand, $1. Children, 25c.



(CONTINUED FROM PAGE 385).

21.05 feet wide over all and 20 feet wide at water line. Her depth of hold is 8 feet and draft eft 8.25 feet. Her displacement with this draft is 74.83 tons. She carries 8 tons of lead ballast on her keel and has 34,495 pounds inside. The area of her greatest transverse [section below the ballast line is 61.59 feet. The center of buoyancy aft of the longitudinal center is 3.20 feet. The center of lateral resistance aft of center of buoyaucy is 1.15 feet. The greatest transverse section aft of the longitudinal center is 6.10 feet.

Her mainmest is 75 feet long, 68 feet of it being from deck to cap. The foremast is 72 feet long. The topmasts are 21 feet, with 5-foot pole. They are made sliding, and can be lowered and raised from the deck, a "tumbling fid" being used to secure each one, and a tripping line to handle it. The bowsprit outboard is 20 feet; jibboon, 24½ feet. When first rigged the Lurline had a Bermudian mainseil with a 50-foot boom. The fore boom was 2½6 feet with a 22-foot gaff. The mainsail was 47 feet on the boom, 55 feet 6 inches hoist, with 64 feet 11 inches leech, making an area of 1,424 squere feet. Since then a new mainboom has been rigged 52 feet in length and with a 22-foot gaff. The new gaff mainsail is 48 feet 3 inchea on the foot, 50 feet 6 inches hoist, 62 feet 5 inches in the after leech, 20 feet 3 inches on the head and contains an area of 1,854 square feet or 430 feet more than the old Bermudian sail. The foresail is 25 feet 6 inches on the boom and has an area of 1,192 square feet. The jib is 38 feet 10 inches on the foot and has an area of 960 square feet. The flying jib has an area of 495 square feet, the staysail of 818 square feet, and the new gaff topsail, which hes been substituted for the old ringtail, of 640 square feet, making a total area of sail of 6,009 square feet. These figures look rather small but it must be borne in mind that the Lurline wae built for an ocean cruiser, and even with the extra size of her gaff mainsail does not carry the spread of canvas of a heavily-sparred light draft hay boat. But though the aaila are not large, they are effective and are the moat perfect samples of the sailmakers' work we have seen for many a long day. No expense was spared in their construction. Of twelve-inch Mount Vernon duck, specially imported by Messrs. Simpson and Fisher, they are beautifully put together, and in a good whole-sail breeze stand out without crease or wrinkle as though carved from a piece of white marble.

The rigging of the Lurline was fitted by Captain George Cummings, formerly of the Three Brothers, who, not content with superintending the work, did much of it with his own hands. While noticeable enough for strength and symmetry, the rigging is most remarkable for the immense amount of beautiful and tediously-executed fancy work put into its construction. The riggers and sailers aeem to have exhausted their art to make the Lurline handsome. Turk's heads, stop knots of various designs broidered with fancy silk and odd bits of color, Mathew Walkers and other difficult knots are among he finishes of the rigging. The langarde are matted with fine cord and much of the work is coachwhip finished. The wire rigging is made of 133-strand flexible wire that will give and take under a strain, makiug the yacht easier and saving the hard jerka which invariably are part of a rigid metallic rigging. The deck finishing is elaborate, costly and beautiful. The bitts are all of hardwood capped with brass. The boom's jaws are made of tomano wood. and eo are the blocke and rails. The skylights are of fancy Mexican and Spanish woods with stained glase windowe and burnished brase rods and all that taete could euggest and mouey procure has been used to give the yacht's deck-fittings an appearance of strength and beauty. The cockpit is comfortably roomy, the wheelbox is of hard wood decorated, and the wheel is a fine epecimen of the woodworker's art. There is lots of room on deck for the men to work the yacht, especially forward of the deck house, where most of the work of getting under way, tending forward sheets, etc., has to be done. To finish off all is a pretty brass cannon for salute-firing, and which would not be unaerviceable ehould the gallant owners of the Lurline chance to meet a war canoe of unfriendly Friendly Islanders on procuring fresh meat bent, or a delegation from Captain Cook's Island just when the cocoanut end bread fruit had failed. A heudsome yawl boat is seen on deck, a fit match for the beautifully-kept booms, and other evidences that the owners know how a yacht should be kept.

But while all parts of the yacht are pregnant with evidence of wealth, taste and skill, it is in the cabin that the Spreckels brothers have lavished their wealth and have succeeded in producing an *ensemble* at once the wonder and admiration of all who have the good fortune to see the yacht. Descriptive articles anent the cost and appearance of yachts owned by the Russian Czar, Jim Gordon Bennett, Gould, Vanderbilt and other foreign nabobs frequently appearing in print having surfeited us, so to speak, of fine interiors, we were prepared to dismiss the Lurline's cabin with the damning faint praise: "Oh, it was very good for California," but an inspection revealed the fact that it surpassed in design, execution end finish any yacht cabin we had ever seen or ever read about. We can remember well when the public prints teemed with lurid descriptions of the beautiful fittings of Mr. Stephenson's yacht, the Northumbria. They were handsome enough, 'tis true, but summed up were nothing but fine mahogany framing and satin upholstery. The cabin of Queen Victoria's yacht, the Alberta, is only finished in ebony and blue silk rep; the Czar's yacht is ablaze with gilt, and Gould's yacht, perhaps the finest of them all, evidences more of wealth than of taste, but the Lurline's cabin surpasses them all for the unique variety of its fittings end the tastefully directed art bestowed on even the smallest details. It is e perfect mosaic of rare and costly woods. All countries were ransacked for fine woods to make the picture as complete as was possible, using unstained timber. The cabin panels are of yellow mallala wood from the Samoan Islands, which wood, chameleon like, changes its hue with every varying shade of light, and in accord with its surroundings. Rosewood from Mexico is worked into the stiles and rails of the doors; the brackets and pilasters are of Mexican mehoghany; the side brackets are of rare Australieu tiger wood; the casings of polished Spanish cedar. The ceilings are painted in soft tints, being the only portion of the cabin that is colored, the remainder being finished in hard woods of varying shades. The berth fronts, drawers, lockers, etc., are of black walnut and the sides of the staterooms are finished in birdseye maple and Spanish cedar. The cabin and stateroom hangings are all of silk embroidered with the yacht's initial. There are four staterooms, two on either side of a wide gangway, all elegantly fitted in different colors. The cushions are mostly of crimson plush. The cabin is entered by a wide companion-way of polished tomano wood, with curved silver hand rails and stair rods. On either side are mirrors, and the lockers have plate-glass doors. The beautiful extension table is inlaid with rare woods. The mainmast is paneled to match the sides of the cabin. The carpets are soft and rich, the washstands and recks are fitted in silver, and nothing but lace and silk is visible in the drapery of the rooms. The *ensemble* of this gorgeous cabin is rich and warm, and inspires the onlooker with a sense of languid Oriental luxury. We find it difficult, nay, beyond our powers, to faithfully describe all the beautiful and expensive fittings of the Lurline, and can only say to those who may think that we have inclined to over-admiration, "get permission, if you can, and go see for yourselves what a lovely floating palace the Spreckels brothers have had built for their enjoyment." The quarters for use of the crew are handsomely and comfortably fitted. If the anticipated ocean race to Honolulu comes off, we are sure that, whether the Spreckels brothers make the festest trip or not, they have all the facilities to make their sail most thoroughly enjoyable. The Lurline is a credit to all who have shared in her construction aud a proof that California yacht builders are up with the march of improvement.

A Professional Foot-Race.

A gentleman who has just returned from Salt Lake tells a remarkable story about the way Archie McComb has gathered the Mormona into camp. It appeare that Archie aud his friends raked in a very large sum by the performance, variously estimated at from $20,000 to $30,000. The affair is thus described. "About two months ago Archie McComb made a flying trip to Mormondom and under the name of Laurence ran a 100-yard race against a local foot man named Reed. The match was for $200 a side, and was easily won by Reed, Archie apparently all out at the finish and claiming to be out of condition. Two weeks ago Archie made another match for $1,000 a side and declared that he was going to get even by beating Reed hollow. This was looked upon by some of the local bettors as brag and by others as a scheme to boost McComb's stock aud make the profit greater to Reed's backers. It is also claimed that a man who seemed to be very close to McComb told a few intimatee that the match was fixed for McComb to lose. In any event the public were divided in opinion between the idea that Reed could aud would win on his merita and the idea that the race was fixed for him to win anyhow. There was a fearful rush to get in on Reed and some men went as far as to bet their ranches after betting all their crops. Every available medium in Salt Lake was bet on the race except wives and no doubt some of the Mormons would have put up those along with their cattle if the other party would have accepted them as stakes. So sure were Reed's backers of winning that some of them actually induced stake-holders to bet the money placed in their hands. It is always the unexpected that happens in this world and that rule is doubly sure in foot-racing. The start was even enough. McComb literally ran away from Reed as he pleased and at 75 yards was 15 feet ahead. The last 25 yards he ran looking over his shoulder and laughing at his opponent and won the race as he liked in 10½ seconds. The Reed party made a vigorous protest but the referee was all right to the McComb party and awarded McComb the race and stakes. Archie got away all right and and is said to have cleared up $7000 for his own share."

Pacific Yacht Club.

This afternoon the Pacific Yacht Club will hold a reception at Saucelito, preceded by a sail around the bay. Following are the orders of the day:

The yachts of the Pacific Yacht Club will sssemble off Front street wharf on Saturday, June 23, 1883, at 2 p. m.

At 2:10 p. m. a gun will be fired by the Commodore, at which signal the yechts will prepare to get under way.

At 2:20 p. m. a second gun will be fired by the Commodore, at which signal the yachts will get under way.

The course will be around Mission Rock, passing same on the east side, returning on the west, thence to Red Rock, passing same on the east side, returning on the west, thence through Raccoon straits to the Pacific Yacht Club house, Old Saucelito.

Yachts of the club will carry the club flag.

Other vessels accompanying the fleet are respectfully requested to comply with these orders.

PHILIP CADUC, Commodore.

W. R. MELVILLE, Secretary.

An informel reception for members only will be held from 5 to 10 p. m. Accommodations will be made for the return of members and lady guests.

Deep Water Fishing.

The fishing around the bay during the past week hss heen but a repetition of the fishiug of the week previous. The smelt fishing is quite lively along the city front. At the bridge, near Saucelito, these fish are taken in great numbers, as they are also at the railroad wharf at Oaklaud.

Last Saturday afternoon Spreckels' new yacht, Lurline, started for the Farallone Islands, but it was so calm that the boat did not reach the islands for twenty-four hours. In an hour's fishing off the south Farallones over eighty fish, whose aggregate weight was over 200 pounds, were taken.

Walter Apted of the Golden Gate Market during the past week has had excellent luck near the whistling buoy outside of the "heads." One day he caught 200 plaice; on another day he took over 75 of the same kind and also six young halibut and one barracouta. On another day he caught uine barracoutas that weighed about ten pounds each. It is unusual for these fish to come so far north, but they are taken in large numbers farther south.

To-morrow evening at seven o'clock the steamer Edith will make a pleasure aud fishing excursion to Half Moon Bay.

The recent meeting of the League of American Wheelmen in New York was a success, not only as an exhibition of the strength of this National Association of bicyclers, but of the material composing it. When we read of delegates from localities as far distant as Milwaukee, St. Louis, San Francisco and Washington, being present, not excepting those from the nearer localities of Boston, Philadelphia, Buffalo and Springfield, we are apt to wonder at the rapid growth of this popular branch of athletic sports.

Mr. Chas. G. Yale has recently been on a trouting expedition among San Lorenzo, Boulder and Bear creeks and has had excellent luck. In one day's fishing he caught 176 trout.

The foot-race between Ross and the Salinas man is off. The Salinas man having backed out and surrendered $[illegible] The hose race between the Gilroy and Hollister [illegible] also off, Hollister having surrendered the forfeit.

HERD AND SWINE.

Pacific Coast Jersey Cattle Club.

On May 17 was issued the following call to owners and breeders of Jersey cattle:

The undersigned breeders and owners of thoroughbred Jersey cattle, believing it to be advisable, desirable and necessary that a Jersey herd book be established for this Coast, including all territory west of the Rocky Mountains, cordially invite you to attend a meeting to be held at Room No. 1, Stock Exchange building, Pine street, San Francisco, June 16, 1883, at 1 o'clock, p. m., when all matters pertaining to that great interest, and the formation of a Pacific Coast Jersey Cattle Club will be fully discussed.

A. Maillard, Robert Beck,
P. J. Shafter, James McM. Shafter,
J. D. Fry, I. M. Requa,
P. A. Finigan, E. H. Miller Jr.,
Albert Dibblee, R. G. Sneath,
Wm. T. Coleman, William D. Bliss,
Jno. W. Coleman.

In accordance with this call a number of gentlemen assembled last Saturday afternoon in the rooms of J. W. Coleman, No. 1 Stock Exchange Building. Mr. Maillard was first on hand, and then came P. A. Finigan, Major Beck, Judge Mc.M. Shafter, and many others. The business commenced by the election of J. W. Coleman as temporary chairman and Major Beck as temporary secretary.

Mr. Adolph Maillard, who first signed the call for the meeting, was called upon to explain its objects. He said: "I have got here Volume I of the Jersey Herd Register of the New York Jersey Club, which was organized with forty-four members, and now includes more than 200, and has published twelve volumes of herd books. As they commenced in the East, so we are about to commence in the West. There are many reasons why a herd book is needed for the Pacific coast. Many of our rich men, in times past, have imported pure Jersey stock from the island of Jersey and from the East. Moses Ellis, Milton S. Latham, W. C. Ralston were among the number. Their stock has produced a good deal of Jersey stock, which, for many reasons, cannot be recorded, yet it is known to be pure. To show the importance of the Eastern club I may mention that they now employ fourteen clerks and have a cash surplue of $34,000. When that club first got up a herd book, no stock was accepted that did not come direct from Jersey. English stock was ruled out. The first year 1,400 cows and 539 bulls were recorded. Owing to the refusal to admit English stock a New England herd book was started and contains none but pure Jerseys, though to gain admission to it does not require so much red tape nor the surmountal of so many trivial objections as to the other book. There is now an English herd book containing none but pure stock and in time the New York Club will have to accept it as a standard. Now, in the forming our club, let us get first a foundation stock. The stock of Ralston, Latham, Ellis and my own came here before the herd book was first started, and consequently, though pure, cannot be recorded East. Mr. Haggin has a lot of such stock and I fail to see why he and others should be deprived of the advantage of recording just because New York red tape so wills it. The idea is to record all the pure stock we have here and make it easy for all Pacific Coast breeders to have their stock recorded.

Colonel J. D. Fry remarked that that was his idea of the work of the club. To do on the Pacific Coast what the New York Club had done in the East eleven years ago. Breeding pure stock needed some encouragement and people should be made familiar with the value of pedigree.

Mr. W. W. Cameron, who owns a lot of fine Jersey cattle, gave an instance of the foolish technicality enforced by the "American Jersey Cattle Herd Book." His Princess Eliza, by imported Pilot, ("A. J. C. C. Book 3,") from imported Princess, ("A. J. C. C. Book 761,") could not be recorded because be could not get a certificate from the man who had charge of the bull, though his bill of sale was all-sufficient proof.

Judge J. McM. Shafter asked what could be done in such as a case.

Mr. Maillard replied that it would be well to be more leinent. Accept any proof that was good and not demand proof of a specific nature.

Judge Shafter then said that he had two or three bulls running with his cows, all pure, and ehould have to ask a good deal of leeway in his pedigrees.

Colonel J. D. Fry said that it would he easy to trace all the Jersey stock here, as it came from one or two sources.

Mr. R. G. Sneath of the Jersey Farm said that all his stock came from standard stock, imported by Moses Ellis. He had recorded only a portion of it. His idea was to be liberal in entering foundation stock and afterwards he strict. He suggested a committee on herd book.

Judge J. McM. Shafter introduced the following resolution, which was unanimously adopted:

Resolved, That all who eign the roll at thie date or shall sign in the future under thie resolution ehall conetitute the Pacific Coast Jersey Cattle Club.

To this was immediately signed the namee below, who constitute the charter members of the club: J. McM. Shafter, Adolph Maillard, R. J. Sneath, Albert Dibblee, Judge W. J. Mcseick, Colonel J. D. Fry, Jacob Short, John F. Drum, Alexander Martin, Fredrick Clay, P. A. Finigan, W. W. Cameron, James Aekew, J. W. Coleman and Major Robert Beck.

On motion of Shafter, Messre. A. Maillard, P. A. Finnigan, R. G. Sneath, R. Beck and J. McM. Shafter were appointed a committee on by-lawe and conetitution, with J. W. Coleman the president, pro tem, added. The oommittee decided to meet at 10 a. m., Monday.

W. W. Cameron proposed to make the charter fee $50; P. A. Finigan suggested $25, and after somo discussion the matter was left over and the club adjourned until Friday, 10 a. m., June 22.

A recent arrival in this city is a large steer, bigger than the tallest elephant ever seen. He comee from Australia, where be wae bred by W. Powers of Gippeland from a Hereford cow, by a Durham bull. His dimensions are: Height, 7ft. 2in., length, 12ft. 6in., 10ft. 3in. round the girth, 3ft. 6in. across the hips, 5ft. 4in. from the wither to the brisket, weight, 3,200 pounde. This fine piece of heef ie lodged at McCord & Scott's Fashion Stable.

Finely-flavored, aromatic, eweet huttor can only be eecured through the use of a percentage of new milch cows in the dairy at all seasons. Darlington, the famous Philadelphia butter-maker, milks his cowe for butter only three or four [illegible] after calving, then diverts their milk to cheese or to [illegible] supply of the city milk trade. Butter made from the [illegible] of farrow cows is inclined to crumble and taste cheesy.

Cows that Kick.

How many farmere and dairymen properly appreciate the importance of training young heifers to stand quietly while being milked? A great many milkers approach a young heifer that is to be milked for the first time just as they would approach an old one. The heifer has never been milked, knows nothing about it, is sick and weak, and perhaps frightened, with teats that lack the toughness of the teats of old cows, and, as far as the heifer herself is concerned, needs hut slight assistance to become a kicker. A hired man who has judgment enough to milk a heifer the first week, in the condition that young heifers are in during that time, and learn her to stand quietly and give down her milk freely, is a jewel indeed. A great many milkers depend too much upon intimidating cows. If a cow does not stand quietly, she is to be whipped; if she kicks she is to be kicked in return; if she switches the milker across the face the milker in many cases must needs lose his temper, and at the same time his common sense, and punish the cow with the milk stool. Heifers, while being learned to milk, have frequently acquired serious vices of temper that have detracted greatly from their value for dairy purposes. Habits of restlessness, of switching not alone confined to flytime, of moving from side to side or away from the milker, and even confirmed habits of kicking—nearly all these habits of cows are due directly to the education of the heifer. A soothing touch and tone of voice and the confidence of the animal will go a great way in milking a heifer the first time. Great patience is also required, even if it takes two or three times as long to milk the heifer as it might to milk a cow. If the teats are inclined to he sore or too sensitive, it is well to wet them with some of the last milk drawn; such treatment will cause them to keep soft and pliable, and to heal rapidly. But we have cows that have already learned to kick, and some that seem to kick without having learned it. Some cattle are often so vicious that it is quite dangerous to milk them without assistance. In an ordinary case it will suffice to have some one card or brush the cow while being milked. Again, when all other resorts fail, and not until then, there are ways of compelling the cow to stand while being milked. All of these methods compel submission through pain and hy means of restraining the cow so that she is deprived in a measure of her liberty. It is unadvisable to attempt any of these methods while any other source promises success, for then it becomes a fight between the cow and the man which should be avoided. I have in some cases found it a good plan to tie a rope quite tight around the cow's body just in front of her udder. Whenever this plan works satisfactorily it is probably due to the fact that the cow can not make the exertion necessary to kicking without tightening the rope. This is a method that is painful to the cows, and restrains a kicker without effecting a cure. Other methods of dealing with kickers consist in tying up a foreleg or tying together the two hind legs. All these methods of tying are effective in restraining for the time being, and often of doubtful utility in effecting any permanent cure. No other work upon the farm requires the same judgment and good sense as doee the task of dealing with kicking milk cows.

The "Movement Cure" for Blackleg.

In 1879 the blackleg visited our valley (Missouri Valley, Mont.), and my hrother and I had some eighty grade calves in a big corral or pen, so we could get the cows up evenings to breed, not having sufficient pasture fenced at the time. The first calf that took sick hreathed very loud, and seemed to have a sore, swollen throat, and would go down to the creek and lay its head and throat on the muddy ground, as if to cool it, till it died. In a week or so another complained like that one, only got lame and died. Then the death rate continued to increase, till one day we dragged out four; and then we concluded to brand some of the bulls and put them upon the mountains, as high as any cattle run. So the next morning we started them up. We had six calves that were sick, and two of them so bad they would not drive, but lay down not more than one-half mile from home, and died before night. I don't believe any of the six would have lived over twenty-four hours, but we drove them all day with the herd. It wae very warm, and moet all the cattle lolled their tongues out in the heat of the day, and we got them about twelve miles from home at night. The four sick ones that were ahle to stand the drive got well, and we always helieved that warming them up was what cured them. In speaking of it since, I have only heard of one man who run them for a cure, and have forgotten his name. I feel convinced it is a good remedy. We lost half we had in a month or two. I never saw any blackleg before and little since.—*H. L. Keene, in Breeder's Gazette.*

Points of a Jersey Cow.

Following is the scale and judging points and full description of the Jersey cattle as adopted by the American Jersey Cattle Club and now in force:

Head—Small, lean and rather long	2
Face—Dished, broad between eyes and narrow between horns	1
Muzzle—dark and encircled by a light color	1
Eyes—Full and placid	1
Horns—Small, crumpled and amber color	3
Ears—Small and thin	1
Neck—Straight, thin, rather long, with clean throat and not heavy at shoulders	4
Shoulders—Sloping and lean, withers thin, breast neither deficient nor beefy	3
Back—Level to the setting on of tail and broad across the loin	4
Barrel—Hooped, broad and deep at flank	6
Hips—Wide apart, fine in loin, rump long and broad	4
Thighs—Long, thin and wide apart, with legs standing square, not to cross in walking	4
Legs—Short, small below the knee with small hoofs	3
Tail—Fine, reaching the hocks with good switch	3
Hide—Thin and mellow with fine, soft hair	4
Color of hide where the hair is, white, on udder and inside of ears, yellow	5
Fore-udder—Full in form, running well forward	8
Hind-udder—Full in form and well up behind	6
Udder—Free from long hair and not fleshy	5
Teats—Rather large, wide apart and squarely placed	6
Milk veins prominent	5
Escutcheon high and broad and full on thighs	8
Disposition—Quiet and good-natured	3
General appearance, rather bony than fleshy	6
Perfection	100

Same scale for bulls except 17, 18, 19 and 21, making moderate allowances for masculinity.

Heifers omit 17, 18, 21.

A West Cornwall, Conn., dairyman does not permit a word spoken in his dairy stable during milking time, unless absolutely necessary, and the employe who would raise a hand to strike a cow or open his mouth to deliver an oath, would be discharged at once. One of the most successful dairymen in this state is nearly as exacting of his men, and his hord of cows are as gentle and quiet as pet lambe.

BICYCLING.

A Peal For The Wheel.

Let's ring a peal
For the merry wheel,
Silent courser of sparkling steel,
That whirls away
Like a bird at play,
Glimmering,
Shimmering,
Blithe as May.
Over the road it bowls along,
And its spokes are singing a silent song;
For the sunlight glints
From the steel, like hints
Of harp chords touched by a fairy hand,
And a spirit ear
That song might hear,
As a harmony well planned.
A peal for the wheel!
Let it whirl and reel
Over hill and dale,
And mountain and vale.
On breeze and zephyr, on storm and gale!
The wheel! The wheel!
What a thrill we feel,
As it spins along on the heaten path!
What joy
For a boy
Or a man, it hath!
As around and around the pedals go,
So around and around do his fancies flow;
The wind in the race
Must lose its place,
For he passes the wind at a rattling pace;
And fences and trees and rocks skim hy,
And the birds are heaten as they fly,
And a shout
Sent out
On the summer air,
Scarce reaches the goal ere the wheel is there.
So it's well
To dwell
On the magic spell
Of the wheel and its course over hill and dell,
For there's nought to exceed
In its joyous meed,
A ride on the hack of the Silent Steed.

The recent election of officers to the L. A. W. has brought an infusion of new blood and promises to give the association a vigorous push ahead for the ensuing year.

The local riders are preparing themselves for hot work at the midsummer meeting, and the races promise to be even more interesting than those of Decoration Day.

L. B. Hamilton will represent Yale College at the hicycle contest in Springfield, Wednesday, September 19.

Foals of 1883 at the Cook Farm.

March 20—Chestnut filly by Steinway, three-year-old, record 2:25¾. First dam by Almont, the sire of Early Rose, 2:28½, Piedmont 2:17¼, Allie 2:20, Aldine, record 2:19½, and to pole 2:15¼; second dam by Mambrino Prince, record 2:29, by Mambrino Chief, the sire, of Lady Thorne, record 2:18¼; third dam by Cripple, son of Medoc; fourth dam by American Eclipse.

March 20—Bay colt by Del Sur. First dam by Norwood, (sire of Tommy Norwood, record 2:29), by Rysdyk's Hambletonian; second dam by American Star, third dam by a son of Harry Clay. The dam of this colt is the property of A. T. Hatch of Suisun and the colt is the property of Samuel Gamble.

April 22—Bay filly by Steinway. First dam by Woodford Mambrino, record 2:21, hy Mambrino Chief; second dam by Alexander's Abdallah, the sire of Goldsmith Maid, 2:14. Rosband 2:21, and the sire of the dam of Jerome Eddy, 2:16¼; third dam by Robert Bruce, son of Sir Archy.

May 12—Brown filly by Steinway. First dam the Tiffany mare, the dam of Gibraltar, record 2:22½. Property of A. T. Hatch.

May 5—Bay or roan filly by Steinway. First dam Phaceola, two-year-old record 2:47½, hy Silverthreads, a son of The Moor, sire of Tommy Gates, 2:24½, Sur Guy, 2:28, Beautiful Bells, 2:29; second dam Minnehaha, the dam of Sweetheart, three-year-old, 2:22½, Eva, two-year-old record 2:29 and Beautiful Bells, dam of Hinda Rose, yearling record 2:36½, by Bald Chief, he hy Mambrino Chief; third dam hy Strader's C. M. Clay Jr.; fourth dam hy Abdallah; fifth dam hy Engineer.

April 8—Bay colt by Steinway. First dam Grapevine, hy Whipple's Hambletonian, sire of Graves, 2:19; second dam by Rysdyk's Hambletonian; third dam by American Star; fourth dam by Abdallah, mare and colt hoth dead.

April 24—Brown filly hy Steinway. First dam hy Tom Dudley; second dam hy Bertrand Jr.; third dam by Pacolet; fourth dam hy Sir Solomon, son of Sir Archy; he hy imported Diomed. The property of James Tennent of Pinole, Cal.

April 26—Bay filly hy Steinway. First dam Dazzle by Billy Golddust; second dam by John, a son of Sherman's Black Hawk; third dam Red Eye (5,143), son of Imported Sarpedon. The property of Capt. Wm. Kohl, San Mateo.

April 23—Bay colt hy Steinway. First dam by Stockbridge Chief Jr.; second dam by Belmont. The property of T. Woolskill.

April 10—Bay colt hy Steinway. First dam Katie G, hy Electioneer, the sire of Wildflower, two-year-old record 2:21, Bonita, two-year-old, 2:24; second dam by Niagara, sire of Cohh, 2:31, Crocker mare, trial 2:22½, Starke mare, trial 2:21; third dam hy imported Herald; fourth dam hy imported Trustee.

April 22—Iron grey filly by Steinway. First dam Carrie Clay, hy Coaster, 2:26, son of Caliban, a son of Mambrino Pilot; second dam by Mambrino Chief; third dam hy Senator; fourth dam hy Woodpecker, sire of Gray Eagle.

May 15—Bay colt hy Steinway. First dam Annie Lawrie, three-year-old record 2:30, by Echo; second dam by Jack Hawkins, a son of Boston.

June 16—Bay colt by Steinway. First dam Kitty (the Fay black eaddle mare), said to be by a son of Denmark.

March 24—Chestnut filly hy Billy Hayward. First dam Dr. Pardee mare. The property of Dr. E. H. Pardee.

April 11—Brown colt hy Buccaneer. First dam Sigal, by Admiral, a son of Volunteer. The property of A. T. Hatch.

April 23—Bay filly by Buccaneer. First dam Mora, hy Admiral, a son of Volunteer. Property of A. T. Hatch.

April 18—Brown colt, hy Buccaneer. First dam Lura by Admiral. The property of A. T. Hatch.

May 5—Chestnut colt, sire unknown to me. First dam Miller & Lux's Bloomfield Maid, by Whipple's Hambletonian. Property of Miller & Lux. Samuel Gamble.

Jr Danville, June 16.

It is not good policy to let work horses get thin. It costs more to put on flesh than to keep it on. Flesh that comes hy exercise can he kept up with less food under the same work than it took to put it on.

OUR NEW YORK LETTER.

Opening of the Regular Racing Season at the East—Jerome Park and Brighton—Louisville Jottings—General Sporting, Theatrical News, etc.

Since my last letter turfmen in most sections this side of the Rockies have had their hands full, either in active racing or trotting at the various great centers that have been in full blast since the opening days of May, or in overseeing the preparation of their equine charges for the great struggle this month and next.

Louisville has enjoyed a long and sensational meeting, today being the fifteenth successive day's racing since the 23d of last month, when Leonatus galloped down his field for the Kentucky Derby. Five races a day have been run and some fast records made, notably, the 1:13¾ of Pearl Jennings at three quarters of a mile, Rosary, two years old, 1:01½, at five furlongs, Pearl Jennings, nine furlongs in 1:54 (catch weights), etc., etc. Probably the greatest excitement during the two weeks' carnival was on the Saturday following Derby day, when all Kentucky, Tennessee and Ohio turned out in full force to see the great race for the Cup. What promised to be a splendid struggle between the two great mares, Thora and Lida Stanhope, the wires have already told you the result of, as well as the untoward accident to, and downfall of, the famous daughter of Longfellow and Susan Ann. That her break-down, when, according to unprejudiced observers, she had the race in her grasp, was totally unexpected by everyone, and regretted greatly by all, goes without saying, and it only remains to say a few words on the folly of owners giving known good ones a fast trial on the eve of a great race. On the Tuesday before the Cup, or four days prior to the race, "Jimmy" Lee and Mr. Reed gave Thora a trial run of a mile and a half, with her full weight up, 116 pounds, in 2:37. Accounts say that the mare pulled up apparently all right, but the sad sequel of a few days later can probably be traced to this unwise and foolhardy proceeding, under the circumstances. The same thing did the business for her famous sire, whose grasping owner, the late John Harper, ran him at Monmouth Park, eleven years ago, in a trumpery small purse race at mile heats, three in five, which he won of course, but was compelled to run the third heat in 1:43¾, after it, pulling up lame, and his break-down at Saratoga followed the week after in the Saratoga Cup, won by Harry Bassett. Following up the coincidence still closer, we find a fact that should have set Mr. Reed and Lee thinking, and probably will now, when it is too late. The animal that ran Longfellow the fast third heat at this Monmouth race, that proved the culmination of his meteoric career on the turf, was none other than Susan Ann, the dam of Thora. This trial business with proved good ones such as Thora has shown herself to be is all wrong, especially when she had all her speed left, as she demonstrated at Nashville by beating Checkmate and Pearl Jennings in a canter. The latter has since shown herself a nailer, while Checkmate afterwards beat Bondholder, who conquered Lida Stanhope, the Cup victress. But there is no use tracing up this "line" any farther. The damage is done, and it is irretrievable as far as Thora is concerned, but by all that is sensible and practical in the tuition of racehorses, let no more racehorses be sacrificed by these trial runs, which are the *bete noir* of all true lovers of the high-class thoroughbred. We had few good Cup horses in training before Thora's untimely fate, and her elimination lessened the list. Forester's reported break-down at Jerome this week, and Eole, Checkmate and others being under suspicion, reduces our distance cracks to Lida Stanhope, John Davis, Gen. Monroe, Monitor, Montalboni, Apollo, Ella Warfield, Herbert, etc. To-day, at Jerome, three of these contested the race for the Westchester Cup, and Monitor beat Monroe half a head, Eole ten lengths off, he having made a bad stumble in the last, which threw his chances out. The time was 4:07, a fair race for the track, which is sinuous and shaped like a figure 8, but as said before we are fast attaining in this country what has long been the state of affairs in England, viz., the elevation of the "spurter," or horse capable of running short dashes, over the horses capable of staying a distance of ground. Probably there are not half a dozen real stayers in England to-day, and the same may now be said of the present situation on the American turf.

We will in a few weeks, however, receive a new accession in the shape of the famous Iroquois, who has run his last race on the English turf. Mr. Lorillard has ordered him home and the horse is expected to arrive some time in the next four weeks, and run at Monmouth Park. That he is sound yet, his second to Tristan this week in the Ascot Cup shows, and in this race he beat Shrewsbury and some others. That the owner of Rancocas has taken a step in the right direction in this matter the crowds of people who will throng Monmouth Park when the horse runs will show, and he and Mr. Keene had better bring all their horses home, and thereby add to the racing interests here. They have now won between them the greatest prizes on the English and French turf, and further experimenting in this direction is both costly and useless, it seems, for the equality of our thoroughbreds with any in the world has been fully demonstrated.

Jerome opened on Decoration Day to an immense attendance and heavy speculation, the features of the racing being Geo. Kenny's debut for 1883 and Bootjack's great race for the Metropolitan, where he defeated a strong field with ease. On the second day, Saturday, the Withers' Stake was decided and excitement ran high. Pizarro and Kenny were the observed of all observers as they took their preliminary canter, the Brooklyn colt being in clearly the better condition of the two. At the start Kenny shot out with a lead of two lengths, but at the half mile the imported colt had closed the gap and was running under a pull, while the other, a sluggish goer at his best, was already being ridden. Going round the last quarter it looked dollars to cents on Pizarro, and as they rounded into the stretch the two were nearly on even terms, Kenny getting the whip at every jump, which made his backers look blue. Midway up, however, when the race was yet in the issue, Pizarro stopped as if he had been shot, and Kenny ran "all out" by three lengths in 1:45, the fastest Withers yet run under the new weights, 118 pounds. The quitting of the Rancocas colt was like a thunderbolt in a clear sky, and, after the race, all manner of speculation was indulged in. He will be a better horse, beyond a doubt, at Sheepshead Bay next week, and the extra time will help him, for his condition was not good. The other principal events of the meeting were Gen. Monroe's double event for the Fordham and Jockey Club Handicaps and Reveller's Juvenile. The great success of the meeting now in progress is due entirely to the temporary injunction obtained by the parties representing the Jockey Club, restraining the police from interfering with the betting privileges. Can this injunction be in any way made a lasting one, or can the much-debated pool bill be passed at the next meeting of the Legislature, the year 1883 will not wind up the racing history of this famous course, a sequel sure to follow if relief in this direction is not obtained. Saturday next closes the meeting with the Belmont Stakes as the principal attraction, and as Pizarro needs more time he will not be likely to start against Kenny, whose principal antagonist will be Mr. Kelly's Jacobus, the winner of the Preakness Stakes at Baltimore. Jacobus is by the Ill-Used, and may possibly stretch the Brooklyn colt's neck, but this is not very probable. However, in horse racing, the unexpected is forever happening, and Jacobus is fast and can go the trip. Kenny may be a second Hindoo or Blackburn, but his two races thus far do not give that impression. Indeed, Miss Woodford, his stable companion, won her race for the Ladies' Stake with so much dash and resolution, and with al so easily, that she is already considered the best of the two. What lucky (?) men the Dwyers have been year after year with their three-year-olds. In 1879 Bramble, 1880 Blackburn, 1881 Hindoo, and last year Runnymede, have won for them in stakes and purses over two hundred thousand dollars. Tuesday next Sheepshead Bay begins a ten-day meeting and, being a much faster and safer track than Jerome, large fields and great racing will be the order of the day. Brighton Beach, immediately adjacent, has now some 250 or 300 horses in its stable, and as many more will come from Jerome, Monmouth and the West and South, making its success a certainty. Indeed the Coney Island Jockey Club (Sheepshead), is the best paying association of the kind in America, the stockholders last year receiving a a dividend of 27 per cent. From Louisville, that closed to-day, most of the Western stables will go to Covington, Ky., opposite Porkopolis, where the New Latonia Club will hold its inaugural meeting, beginning on Saturday, the 9th. After that will follow St. Louis and Chicago, when your Californians will make their debut for '83 it is hoped. Certainly the great trotting meeting at the Lake City will see some of your lot at the post, and the great special race set for July 19, between St. Julien and Cingstone for a purse and stake of $7,000, is exciting great interest here, though New Yorkers would have liked to have had this great trot decided at our Fleetwood Park. But the great liberality of the Chicago Driving Park is deserving of success, and they will have a grand meeting beyond the shadow of a doubt.

The evergreen and irrepressible "beach combers" by the "sad sea waves" at Brighton have started on what promises to be another hundred days' racing, as was given last year. Decoration Day saw 5,000 or 6,000 persons in attendance there, despite the counter attractions at Jerome, and since then they have given racing every other day, five races a day. Mr. Engman seems determined to give no cause for scandal of any sort, and Messrs. Simmons, Burke and Ryan, the associate judges of the racing, have the confidence of all disinterested persons, who believe them to be capable of, and determined in, a fulfillment to the letter of their duties, which which means an exposure of rascality of any kind whatsoever, be the offender or offenders of high or low degree. Probably the most notable win yet recorded for '83 at this popular track was Bocaccio's nine furlongs, a week ago, in 1:56½ carrying weight for age and beating easily Hartford, Babcock and another. This three-year-old colt by Bonnie Scotland from a Brown Dick mare belongs to old "linen duster," Burnham, the cheesemonger from Cassadaga, this State. He was very highly tried last year as a two-year-old, and great things were expected of him, but he went amiss, and was let up. He has now grown into a magnificent racehorse, and when old "cheese" takes his baby riders off his back and puts up a jockey capable of controlling the colt, he will win some good races, if nothing goes wrong with him. Leonatus, the Kentucky Derby winner, is said to be a certain winner for the Coney Island Derby at Sheepshead Bay, on the 21st. He will fulfill three engagements at Covington, where he has at his mercy stakes worth $5,000 or more, and then be shipped here with five or six days to spare, before he meets Kenny and others in the above great race. He ought to win, if reports about him are half true.

New York, June 7, 1883. PACIFIC.

Sale of Fine Stock.

On next Saturday, June 30, there will be a complete sale of all the fine horses and registered Jersey cattle bred and imported by W. W. Camron, and now on the Camron ranch, Contra Costa county, about ten miles over the hills from Broadway, Oakland. Mr. Camron has been well and favorably known as a shrewd, intelligent breeder of Jerseys and fine road stock for some years past, and he has certainly succeeded in stocking his beautiful ranch with a fine lot of animals. Last Monday evening we paid a visit to the ranch in company with Mr. W. J. Dingee of the firm of Taggart & Dingee, Oakland, real estate agents and auctioneers, and who are conducting the sale for Mr. Camron. The cows were all in the corrals being milked when we got out to the ranch, and most of the young horses were around the yard, so we had a splendid chance to see them without the trouble and fatigue of hill climbing. The most noticeable thing about the place was the perfect quietness and the remarkable gentleness and docility of all the animals. "That comes," says Mr. Camron, "from my enforcing the rule that no animal on my place shall ever be lassooed. I would discharge the oldest and best man on the ranch if he threw a rope or yelled at either a horse or cow. You see this Jersey stock is bred very much for family use, and it would never do to have them made restive and ugly by rough handling. All those colts (pointing to a fine lot of big bay two and three-year-olds) are only halter broke, yet I can walk up to any one of them and catch them with my hand without corn or salt to lure them. Man has never ill-treated them, and so they are not afraid of man. I have not a mean horse, an ugly bull nor a surly, kicking cow on the place, nor would I have one at any price."

The first animal shown, and also by virtue of his position, as lord of the harem, the first on the sale catalogue, was the thoroughbred bay horse Henry Williamson. He is a fine large upstanding horse, a shade under sixteen hands, but possessing lots of bone and size, and a splendid stock getter, as is evidenced by the fact that all the young stock on the ranch is, or bids fair to be, bigger than the sire. Henry Williamson is of the famous Belmont stock, celebrated for being one of the strains of thoroughbreds which are natural trotters and sires of natural trotters. He was first trained as a runner, but before he made any performance showed such speed as a trotter that he was driven and, after showing a trial better than 2:50, was put into the stud. He took the first premiums at the Bay District agricultural fair in 1870 and 1871; at the State fair held at Sacramento in 1870 and 1871; also first premium for the best family, consisting of himself and nine colts, at the Golden Gate agricultural fair in 1880. He is by California, dam Silver Cup, by American Boy Jr., grandam Liz Givens, by imported Langford; third dam, Charlotte Pace, by Sir Archie. Californian was by Belmont, dam Maria Downing, by Eclipse; second dam Brown Lock, by Tiger, the dam of Red Morocco. Belmont, by American Boy, out of imported Prunella, by Comus, her dam by Partisan, out of Pann, etc., etc. Comus is of Sir Peter stock. Henry Williamson is of standard thoroughbred stock clear through except in one cross of the third generation of his second dam, and while this single cross is not absolutely accepted as standard yet from circumstances well known and from the character of the breeder there is no doubt but that the strain was perfectly pure. As before stated, all the get of this horse on the catalogue are fine large animals, perfectly kind and clever and what will perhaps be more esteemed by intending purchasers for road work, they are all natural trotters. None of them have been trained, but as we saw them moving out of the corral and around the pasture, every one of them trotted with a reach and action that spoke well for their coming speed. Among them we particularly noticed Harry 1879, from Minnis Patchen; Emmet, 1880, same mare; Belinda, 1881, same mare. These three colts and their sire and dam presented a fine picture standing side by side. The two-year-old was as big as the dam, the three-year-old as big as the sire and the four-year-old filly an inch higher than the sire and bigger all over. All of Minnis Patchen's colts were dropped in April between 23d and 30th.

Major, by same sire, dam Mollie Bartlett, four years, 16¼ hands, weight about 1,200, is a fine, big horse of remarkably taking appearance. He shows some speed and is as gentle and playful as a puppy. A better horse for family use it would be hard to find, and, in fact, he is the ideal American road horse.

John Hancock, same sire, dam an imported Kentucky mare Lucy, four years, is a fine-looking, big, stylish bay, kind and gentle and with quite a turn of speed.

Fred, four years, dam Topsy, is a handsome young horse, holds his head high and without a blemish. Like all the rest of the stock offered for sale he is young and fresh, well broken and has in him all his work.

Colonel, by Captain Webster (2:40) (by Belmont out of a mare by Rysdyk's Hambletonian), dam Bell, is a stylish, fast young horse. He has been driven five times, and shows a good gait. His ancestry promises trotting speed, and his form and style all that could be desired.

Penal, three years, by Henry Williamson, dam imported Addie, is a very promising colt. He weighs about 1,100 pounds, stands 16 hands, and will probably weigh 200 more when he gets his growth. He is kind and agreeable and broken to halter.

Jane, a dun filly from a dam weighing 1,600 at five years, is a promising work animal.

In all there are sixty-one head of horses, mares and foals to be sold, and not an old nor mean animal in the lot. They have been bred with care and well handled. Among the fine saddle horses the most promising animal is Don Juan Jose, a five-year-old gray horse by Romeo, dam Fannie by Peacock. Don Juan is a ladies' horse par excellence. Kind and gentle, big and strong, he is so thoroughly trained that a word of command does as well as a touch of the bit. He will lie down on his side when ordered to allow a lady to mount, dance, turn, as the vaqueros say, on a dollar, and is sure to be a prize taker in ring tournaments.

Peacock, by Grey Patchen, and Swiftsure, by Geo. C. Gorham, dam by Jack Hawkins, are the perfection of saddle horses. The latter has all the gaits.

The cattle Mr. Camron will offer for sale include fourteen full pedigreed, standard herd book Jerseys, about twenty-eight Jerseys, full-blooded but not recorded, thirteen milking Durhams and one or two nice family Devon cows.

The Jerseys are principally from stock imported by Mr. W. B. Dinsmore of New York, the largest importer on the "Jersey Herd Book." They were selected specially for their milking and butter qualities and not for fancy colors. The evidence of the care in their selection is shown by Mr. Camron's butter book for last week. He had nineteen Jerseys milking, among which were nine two-year-old cows, with their first calves. These gave an average of nine pounds of butter each in seven days, though the pasture is getting rather dry and they were given no extra feed of any kind. The butter sold for twenty-four cents per pound, one cent above the regular market price for best butter. This is a splendid showing, and while it is more than twice as much as would come from common stock the Jerseys eat fully 25 per cent less than ordinary cows, are more docile and require less room.

The king of the Jersey herd is Menlo Park (5976), bred by L. C. Powers of Watsonville, Sept. 19, 1879, by Silver Cloud of the Glen (3383), dam Maid of Oakland (6089), having in his veins none but the best standard milking blood.

Carefully compared with the standard list of points adopted by the American Club and by the Royal Jersey Club of Great Britain he ranks a perfect bull. Not a point could we see lacking in him. Color solid dark gray, shading into black; black tongue and switch; dished face; fine head, with rich amber crumpled horns, tipped with black; muzzle dark and encircled by a light color; eyes full and placid; he has a rich yellow hide, is symmetrically formed, level back, fine tail and limbs.

Alameda Chief, registered yearling, and Duke of Orinda, yearling, registered, are a fine pair of young bulls with but little to choose between them. Gov. Butler is not registered but has none but standard blood in him and is eligible to appear in the "Pacific Coast Stud Book" which will soon be published.

Among the Jersey cows Mr. Camron gives the palm to Susan Titus and she is really a perfect specimen. She is only recorded in the "Herd Book," and is from stock imported by Mr. Maillard from W. B. Dinsmore of New York. She is now in calf to Menlo Park. Frou Frou, Lilly Nix, Rosita, Corday, Malinda Jane, Lizzie, Covita, Minnie Mum, Lady Graves, Della of Marin, Lady Lita, Maid of Contra Costa, Fron Fron 1st, Lillie Nix 1st, are all of standard stock. For families who need a Jersey the stock that is not pedigreed will answer every purpose. It is from pure-bred Jerseys but is not eligible to admission to the "Herd Book" by reason of neglect of breeders in allowing records to be lost or more than one bull to be with the cows. In preparing the catalogue Taggart & Dingee, the auctioneers, were particular to state exactly the true character of every animal and after a careful inspection we feel justified in saying that the representations they have made are correct. The sale will, no doubt be well attended, but there will probably be many a chance to secure fine cattle cheap, as it is only the more advanced breeders who are fully alive to the value of fine Jersey stock.

A New York farmer declares that an acre of Hubbard squash will fatten ten more hogs than the corn that can be raised on the same ground. He has gathered from six to eight tons from an acre.

There are a number of horses training quietly on the Vallejo track, and, as the story goes, there are some colts among them.

ADVERTISING RATES.

Displayed, $1 50 per inch each insertion or pro rata for less pace. Reading Notices set in brevier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, Saturday, June 23, 1883.

The Santa Rosa Meeting.

The directors of the Sonoma County Agricultural Park Association have prepared their programme for the fall meeting, and it can be found duly displayed in our advertising columns. The directors have shown a good deal of spirit and enterprise in offering liberal purses. Five thousand five hundred and seventy-five dollars is the aggregate of the stakes and purses. Keeping well up with the procession of ideas, the association offers a purse of $400 for three-year-old trotters, thus showing a determination not to leave Sonoma county behind in the march of progress that has recently been made in the handling of young stock. This county is remarkably prolific of speedy young animals. The get of Gen. McClellan Jr., Volunteer, Auctioneer, Johnny, Rustic, and several other good horses have left their mark on the stock in this district. The largest purse offered by the Association is $1,000 for the 2:20 class to be trotted on Saturday, the last day of the meeting.

Nellie R, Abbottsford, Albert W, Brigadier and perhaps Blanche, are all the material now in the State eligible for this class and likely to enter, unless some fast green one shows up before August 1. Nellie R's 2:20 at Stockton was all she had in her, and it is by no means sure that she is any better mare this season than she was last. There is a chance that this race will not fill and the Association may be called upon to substitute something else for it. Instead of the usual 2:30 class a 2:28 class is substituted and will doubtless receive many entries. The 1⅛ mile and repeat for three-year-old horses running is evidently intended to attract only district horses, as no horse from a distance would be likely to start for a chance to win $125 off a $30 entrance. There are some three-year-olds in the district and they will have a chance to try conclusions without the interference of Gano and others of that ilk. So much money is apportioned to the trotters that the runners do not fare very well, but doubtless the association canvassed well the probable entries and calculated on that basis before they made up the purses. Santa Rosa has one of the best tracks in the State and the meeting cannot fail to be ahead of previous years.

The New Jersey Club.

A movement took place in this city last Saturday, in which every cattle man in the State is most deeply interested. We refer to the initial steps taken towards the formation of a Jersey cattle club and the production of a Jersey herd book for the Pacific slope. The causes that led to this action and the need for a herd book are not generally known. It has been almost impossible for the local breeders of Jersey cattle to get their stock recorded in the "A. J. C. C. Herd Book." It does seem as if the rules of that club were specially formulated to rule out as much stock as possible, regardless of its purity. The rules go beyond reasonable safeguards, and have become a vexatious and almost unendurable nuisance. One gentleman who has a heifer from a recorded cow and bull was unable to record her because the bull's owner died before he procured a certificate. Another was put to great delay, annoyance and expense because he omitted to mention the color of his calf's tongue. Then, also, a rule exists refusing to take the color of a bull calf until he is six months old, and so on with vexatious rules ad infinitum. Pure standard stock imported from England is refused admission, and the fact that a ship touches at any port while on its way from the Isle of Jersey debars all cattle on board from registration. These restrictions are annoying to breeders living near New York, but to people on this distant coast they positively amount to prohibition. Much of the foundation stock on this Coast was never registered and consequently the produce cannot be registered, though no one attempts to deny that the original stock was standard. The formation of a Pacific Coast Jersey Cattle Club will put Jersey breeding on a proper basis here. The Herd Book Committee must honestly and impartially pass on the right of all cattle to registration, and as soon as the stock now on the Coast is classified, the greater part of the work will have been done. The club roll is open to respectable Jersey breeders and we advise all to join, for not only will they save considerable money in registration fees, but they will have a voice in the rules and regulations to be made. The business transacted by the club so far will be found in another column.

English and American Guns.

The introduction of the Anglomania to New York appears to have been only the commencement of a wave that is rapidly sweeping over the whole country. Men send to England for their clothes, ornaments, horses, harness, vehicles, grooms, whips and guns, and Colonel Stuart M. Taylor, well-known here, is recently reported to have said that there was not a decent dog outside of Great Britain. The fashion for English guns is vastly on the increase and perhaps much of it can be traced to the liberal and judicious advertising done in America by Messrs. Scott, Greener, Westley Richards and other noted English makers. We cannot see the sense of sending abroad for guns. We do not claim to be an infallible authority on this or any other subject, but we do know that American guns are as much superior to English guns of the same cost as American watches are to English or Swiss watches. During the past week a friend showed us with much pride a gun that he had just imported from England at a cost of $200. It was a plain gun, with no ornamentation except some well-executed engraving on the locks, and could only be classed as a good well-finished gun. We compared the gun with an American-made gun that cost only $75, and could find no evidence of outward superiority in the more expensive gun, except that the English gun had a trifle the finer finish. We told our friend that we thought he had thrown $125 away, to which he replied: "Oh well, but everybody is shooting an English gun now, and I did not want to be out of the fashion. Besides, you will find that my gun shoots much better than the American gun." Chance gave an opportunity to test the matter, and we were rather pleased to find that our friend's expectation was not realized, and he was bound to confess that his gun had no advantage over the domestic article except a little engraving that could be done here nearly as well as in London or Birmingham. We do not of course claim that one such test as this proves our assertion, but we have had other experience on the subject. Of all the crack shots at the traps and in the field now living in this State, we know only one who claims any superiority for an English gun, and among those we know are several to whom expense is of no consequence, and who would send abroad and pay $1,000 for a gun, if they thought they could derive any advantage from its use. The American gunmakers are forever on the lookout for some new invention that will give them an advantage, and there is no secret in the English gunmaker's art that they have not mastered, and to-day there is no country in the world that can make so good a gun at reasonable cost as America. This being the case, and we venture to think that no one will deny it, we can only class as folly the fashion that impels young and inexperienced shooters to send abroad for their guns.

The Olympic Club Fire.

Ever since it moved into its Post street quarters the Olympic Club has been the pride of this city, and all over America has been acknowledged as the most superbly fitted institution of the kind extant. And well might the members feel proud of their organization and property, for they and their predecessors had spent some $50,000 or more on purchasing the one, and much more time and trouble in creating the other. In times past some exacting critics have had fault to find with such of the club's affairs as came within the range of legitimate criticism. We ourselves have, on one or two occasions, felt that the club's athletic managers had made mistakes, and did not hesitate to say so, but we found much more to praise than to blame, and have always held the opinion that, in its sphere, the Olympic Club was better managed than any similar institution of which we have knowledge. But, no matter what opinions we or others might have held about the club, we are sure that everybody will feel that the entire city has suffered a loss by the destruction of the club rooms by fire on Wednesday last. It is a loss not easily estimated in dollars and cents, but a heavy loss none the less. Just when the Board of Directors had declared that the expiration of their official terms would see the club free from debt, just when a president had resigned and allowed his duties to devolve upon a vice president, just when the club, full of enthusiasm, was looking forward to a career of increased activity and usefulness, the blow fell and much of the work of twenty-five years was consumed in a night. Not one-fifth of the material loss was covered by insurance, and by a spark the club was made $42,000 poorer. This represents $60 per member on the 700 members, besides the individual losses that the members suffered by the burning of their clothes, gloves, foils, etc. Now, the club does not propose to stand idly by and mourn its losses. Already discussions have been had relative to the best plan to reinstate the club in becoming quarters, and though we do not know what has been done, we venture to say that in less than six months the club will be better lodged than ever. We are very sorry, indeed, for the club's misfortune, and propose to show our sorrow in as practical a manner as possible. The club will hold an athletic meeting at its Oakland grounds on July 4, and we intend to all that lies in our power to help along the substantial results of that affair. We have been given to understand that the club will not entertain the idea of outside assistance from any source, but here is a chance for everyone to help in a way that the club can neither refuse nor take exception to. Other means may offer in the future but this one is at hand and we want to see everyone who feels any interest in athletics take hold and boom the thing along. Athletes will of course need no hint to do all in their power. There is not one of them who has the slightest claim to respectability that has not received many favors from the club, as a club, or from the members. We know that the entire press of the city, both daily and weekly, will fall in and render valuable aid, and apart from this coming meeting if the club will only indicate some way in which we can serve it they may be sure that we shall esteem it a pleasure.

The Santa Cruz Drowning.

From Santa Cruz comes the news of the drowning of a young man named Stone which could have been prevented if any one of the bystanders had acquired the art of swimming and had courage enough to help a fellow creature at some small risk. Master Gros of San Francisco, a young hero who could not swim a stroke, went to Stone's assistance and was nearly killed by being dashed against the rocks. After the youth was dead Messrs. Henderson, Berry and Liddle, who style themselves swimming teachers, went to the scene of the accident and started to recover the body by making casts with a weighted fish-line, not caring to enter the surf. The sea was not high, for a fisherman named Pistota went round in his boat and, with a rope around his waist, went into water and secured the body after it had been washed up by the surf. Then this wretch, with the instinct of a Mediteranean pirate and as little sympathy as a shark, demanded $300 for his wetting, and was only placated on receipt of $130, all the money Stone's friends possessed. The *Call* and *Examiner* in reporting the accident said that the boy's father was at hand but could not save him. This is incorrect for the boy's father has been dead eighteen months. We think that the spectacle of swimming teachers fishing for a body with a line is hardly an edifying one and further that it does not redound to the credit of Santa Cruz for one of its citizens to charge $300 for recovering a body. If the bathing season is to be successful, some life-saving service ought to be provided, and, above all, bathers ought to seek out some reliable teacher and learn the easily-achieved art of swimming.

Proposed New Kennel Club.

A Communication from "X" in our "Kennel" column is worthy the attention of all gentlemen interested in dogs and dog breeding. He is indisputably right in his premises, and his deductions are in accord with our own views except that we do not attach quite so much blame to the P. C. K. C. as he does, knowing how the members fell into the mistake they made. We concur in the need for a general call and for a new healthy club, and we freely offer the use of our columns to all who desire to give their views on this subject to their brother sportsmen. "X" writes in the right spirit and we hope to hear from many more such sportsmen.

EDITORIAL NOTES.

The efforts of Mr. Shippee and his confreres to secure a lease of one of Stockton's public squares for the purpose of erecting thereon a pavilion for the San Joaquin Valley Association have come to naught, the Directors and the City Council failing to agree on the terms. As a consequence, there will be no pavilion exhibit this year, except such as is made at the racetrack. From the proverbial energy and determination of the board, there is little doubt that they will have a creditable showing even under these disadvantages, but the pleasant evening exercises usual to the Stockton fairs will be missed by visitors.

The Regatta Committee of the Fourth of July committee will meet on Monday and decide the amount of money to be given for the various events. The disposition is to give $100 in three prizes, of $50, $30 and $20 for the single scull race; $100 in two prizes of $70 and $30 for the barge race, $40 for the lapstreak race, $60 in three prizes for the wherry race, $40 in two prizes of $25 and $15 for the whitehall race, and appropriate trophies for the amateur barge and wherry races.

The *Turf, Field and Farm* chides Myers for not getting in good condition for his race with Brooks of San Francisco and alleges that as the canse of defeat. It would have been better to have berated Brooks for running so fast. The trouble seems to be that Californians have bragged so much that when they do send a good man East he can get no credit.

Jos. Cairn Simpson is ill with a slight attack of malarial fever. His private correspondents who may have noticed the lack of his usual promptness in answering their favors will receive attention during the coming week, as he expects to be about again in a couple of days at the furthest.

Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

W. E. P., Watsonville:

1. The gray gelding Frank Charles has a record of 2:44¾ in second heat, made at Jan Jose, September 29, 1873.

2. A eketch of the career of Chicago was published in this paper on September 23, 1882. He has a record of 2:24¾, made at Indianapolis, Ind., September 28, 1871. He was foaled in 1859, and is consequently twenty-four years old.

W. O. H., Salinas:

We know nothing of any thoronghbred Argyle that ever saw California; neither do we know any mare called Orphan Girl, except one by Haddington. If yon have any points in the case, send them to us, and possibly we may be able to unravel the matter.

L. B., Artesia, Cal.:

1. Our hoped-for success in tracing Black Warrior has turned to failure, and the best we can do is to say that he was undonbtedly a son of Vermont Black Hawk. His hreeding on his dam's side is entirely unknown.

2. Abdallah was by Ryskyk's Hambletonian, first dam by Roebnck, second dam by Sir Henry. He was bred by Chas. Hultz of Orange county, New York, foaled 1854, and brought to California about 1860. He was in the stnd in 1861-2, bnt added nothing to the fame of the Hambletonian name.

M. L., Rohnerville:

1. No changes have been made in the rules of the Blood Horse Association since the organization, except the change in weigbts and a slight addition to Rule 3. The new weighte were printed in this paper Sept. 30, 1882. The amendment to Rule 3 is as follows:

In all races of every description, provided for by these rules, except for a purse or a post stake, it shall be the duty of the owner or party having control, on or before the hour of 6 o'clock p. m., upon the day preceeding the one upon which such race is to take place, to name the particular horse or horses which it ie intended to start, and after such hour, all other horses entered in said race by said owners or parties having control will be ineigible to start.

This amendment was adopted November 4, 1879, and at the same meeting the association, by a unanimous vote, decided that the definition of a contest—Rule 60—shonld be, "Two or more horses, run in different interests, and not under the control of one man."

There have been eome changes in the National Trotting rules within the period yon name hut no very important ones.

2. The amended game law, so far as it relates to deer, reads as follows: 626 * * * * Every person who, between the first day of November in each year and the first day of July in the following year, hnnts, pursues, takes, kills, or destroys any male deer or buck is guilty of a misdemeanor. Any person in the State of California, who has in his posesssion any hides or skine of any deer, elk, antelope or mountain eheep, killed between the first of November and the first of July, is guilty of a misdemeanor. Every person who shall at any time in the State of California hunt, pursue, take, kill or destroy any antelope, elk, mountain sheep, female deer or doe, shall be guilty of a misdemeanor. Every person who shall at any time hunt, pursne, take, kill or destroy any spotted fawn is guilty of a misdemeanor. Every person who shall take, kill or destroy any of the animals mentioned in this section at any time, nnless the carcass of auch animal is used or preserved by the person taking or slaying it, or is sold for food, is guilty of a misdemeanor. Every person who shall buy, sell, offer or expose for sale, transport, or have in his posession any deer from which evidence of eex has been removed, or any of the aforesaid game at any time when it is unlawful to kill the same, as provided by this and subsequent sections, is guilty of a misdemeanor.

ATHLETICS.

The Amateur Champions.

Lack of space makes it impossible for us to give more than a brief resume of the amateur championship meeting held at Mott Haven, June 2:

The committee offered special "best-on-record" medals to all contestants who shonld surpass the best previons American performance at any championship game. Four of these were claimed: By F. L. Lambrecht, in the shot-putting and 56-pound weight-throwing; by W. L. Coudon, in the hammer-throwing; and by H. H. Baxter, in the pole-leaping, as follows:

Putting the shot—F. L. Lambrecht, P. A. C., 43ft.; C. A. J. Queckberner, New York city, 40ft. 4in.; W. L. Coudon, B. A. C., 37ft. ½in. Lambrecht's four puts were 41ft. 7in., 41ft. 8½in., 41ft. and 43ft., an average of 41ft. 9½in. His 43ft. beats all previons amateur records, English or American.

Lambrecht is a bookkeeper, 20 years old, 6ft. 1in. high, and weighe 210 pounds. He won in 1881 at 37ft. 5½in., and in 1882 at 39ft. 9½in. Queckberner was fourth in 1882 at 32ft. 7½in., and Coudon was second at 36ft. 6in.

The best American amateur record was 41ft. 4½in., by F. L. Lambrecht, Pastime A. C., at Canadian amateur championship meeting, Montreal, P. Q., October 7, 1882, and the best English amateur record is 42ft. 4in., by G. Ross, Paticroft, at amateur championship meeting, Stoke-npon-Trent, July 1, 1882.

Thowing the 56-pound weight—F. L. Lambrecht, P. A. C., 25ft. 1¾in.; C. A. J. Queckberner, New York city, 25ft.; W. L. Condon, B. A. C., 24ft. 2in. Lambrecht's snccessive throws were 23ft. 2in., 23ft. 6in., 24ft. 4½in., 24ft. 10in., 25ft. 1¾in., and 24ft. 1½in., an average of 24ft. 2 7-24in. Queckberner's throws were 24ft. 5in., 24ft. 3in., 24ft. 8½in., 25ft., 23ft. 4in., and 24ft. 11in., an average of 24ft. 5½in. Queckberner made the best average, and beat all former records, hnt only took second place.

Throwing the hammer—W. L. Coudon, Baltimore (Md.) A. C., 93ft. 11in.; F. D. Lamhrecht, P. A. C., 93ft. 2in.; C. A. J. Queckberner, New York City, 86ft. 7½in.; D. R. Porter, M. A. C., 82ft. 6in. This wae the most remarkable hammer-throwing ever seen in America. Coudon's snccessive throws were 88ft. 5in., 90ft. 10in., 93ft., 92ft. 10in., and 93ft. 11in. Lamhrecht's successive throws were 86ft. 8in., 87ft. 8in., 89ft. 8½in., 92ft. 3½in., 90ft. 6in., and 93ft. 2in. Coudon's throws averaged 91ft. 9½in. and Lambrecht's 90ft. ½in. Lambrecht beat all former records, yet only obtained second place. Coudon's style is peculiar. He stands left foot formost, although a right-handed thrower, and straightens his arms very early in each revolution of the hammer. He is nnusnally agile for a heavy-weight performer, can clear 9ft. 6in. at pole-leapiug, and is a first-class wrestler. Lambrecht has heaten the then existing amateur record at this game at three snccessive championship meetings.

Pole-leaping—H. H. Baxter, N. Y. A. C., 11ft. ½in.; J. C. Keene, P. A. C., and W. J. Van Houten, Park A. C., tied at 10ft. 6in., and Keene won by a toss; H. P. Toler, Princetown College, B. F. Richardson, M. A. C., and J. J. Van Houten, Park A. C., tied at 10 feet. Baxter won at 10ft. 9in., and then, at the request of the judges, attempted to beat the American record, which he did at the second trial. Baxter's victory, like Baird's in the 3-mile walk, was fairly earned. He practiced faithfully all the past winter and spring at John Woods' gymnasium, despite much ridicule and annoyance from his associates, and has now the satisfaction of winning double honors, a championship and a best on record. If several hnndred young amateurs of New York City would follow Mr. Baxter's example—talk less and work more—they would make better recorde. This is the first year, since the beginning of the Championship Meetings, that this game was not won by the Scottish-American Athletic Club.

Baxter is a student, 21 years old, 6ft high, and weighs 145 pounds. In 1881 he cleared 10ft. 3in. Keene cleared 10ft. 2in. in 1881, and 9ft. 8in. in 1882. W. J. Van Honten won at 10ft. 4¾in. in 1879, 10ft. 11in. in 1880, and at 10ft. 6in. in 1881. Richardson cleared 9ft. 4¾in. in 1879, 10ft. 7in. in 1880, 10ft. in 1881, and won at 10ft. in 1882. J. J. Van Houten cleared 9ft. 6in. last year, while Toler was a new comer.

The best American amateur record was 10ft. 11in., by W. J. Van Houten, Scottish-American A. C., at Amateur Championship Meeting, Mott Haven, N. Y., Sept. 25, 1880, and the best English amateur record is 11ft. 4in. by T. Ray, Ulverstone Cricket Clnb, at Bradford Sports, Aug. 12, 1882.

The sensational race of the day is thus recorded hy the New York *Spirit*:

Two hundred and twenty-yard run—H. S. Brooke Jr. of California, Yale college, 22¼-5s.; L. E. Myers, M. A. C., 2, by 1 foot; S. Derickson, M. A. C.. 3, by 10 yards. There was much talk about this start, many claiming that Myers had the hest of it; was "shot off his mark," was away before the pistol, etc. None of this was true, and the cause of the error was two-fold. Firstly, many people do not know enough of athletic sports to discriminate between a man who has the best of the etart and a man who etarts best. Put three men on a mark, and, when all are standing even and still, fire a pistol. One of the three will be the quickest to move, and will, in the first step or two, show a foot or two, or may be a yard, ehead of the others. This would be a fair etart, and the man did not get the best of the start, or of the starter, or of the pistol, hut he started quickest and best. Tho quick starting, constantly practiced by all intelligent professionals, is almost totally neglected by amateure, and Myers, who hae practiced it and starts quickly, is often accused of getting the best of the etart when he actually started fairly, hut better and quicker than his opponents. Secondly, on the Mott Haven grounds the start of the 220-yard run is just below the middle of the hack straight side, and all spectators in or about the grand etand look at the etart acroes the grounds diagonally from behind. From thie point of view each euccessive man toward the outside of the path seems to be a yard behind his next inside neighbor, and if they kept as even as they started, while running the first 40 yards, each man would etill look to he a yard behind his next inner neighbor. Thus it was in this race that the majority of the epectators thought Myers started ahead of Brooks, aud was ahead of him during the first 40 yarde. But, as an actual fact, Myers never started slower, and Brooks never started quicker than in this race. Derickson, on the ineide, bungled at the start, lost 3 or 4 yards, and then ran on in pursuit, so that Myers and Brooks had a fair field and no hindrance. James Watson, one of the officials, who is both intelligent and cool-headed, measured off 4 yards up the course from the start. He reports that when the men passed him, 4 yards from the start, Myera and Brooks were as nearly even as it was possible to be. So much for the absurd talk about the start.

Failing to pass Myers in the first 40 yards, Brooks wisely dropped behind him rather than to run outside of him around the long turn at the upper end of the path. The referee, who stood just at the head of the straight, 90 yards from the finish, reports that at this point Brooks was directly behind Myers, and at least 8 feet in the rear. Once fairly into the straight 90 yards, Brooks ran a grand race, reduced Myers' lead inch by inch, and would just about have made a dead heat but for Myers breaking down. Myere faltered at 25 yarde from the tape, being then still a yard ahead, and, not more than 2 yards from the finish, being still a few inches in front, staggered and fell across the line. He did all that he could, and made a gallant but unavailing struggle against nature—Brooks' running all the way down the final straight was remarkable. If it had been separately timed, the watches would, no doubt, have shown that he ran the final 90 yards, with flying start and against a fresh breeze, in about 8½ seconds. Such a sustained burst of speed at the end of a race was never before seen in America. Owing to the shape and size of this path, the inside man in a 220-yard race has 2 or 3 yards advantage over the outside man, who must run behind or outside of the insider all around the long lower turn. If he runs behind he will be 7 or 8 feet in the rear when they reach the final straight 90 yards, and if he rune on the outside he will be compelled to run 7 or 8 feet farther hy swinging around a larger circle. This performance by Brooks, 220 yards in 22¼-5s., around a half circle, against a freeh breeze on the final 90 yards, and starting from the outside position, although technically a little slower than the best American record, is really the most meritorious race ever run in America, and Brooks richly deserves the championship honora he so gamely won. Any man who fairly beats L. E. Myers in a 220-yard race is a genuine champion, no matter what the time may be.

Brooks is a student, 21 yeara old, 6ft. 2in. high, and weighs 170 pounds. He won in 1882 in 22:3-5s. Myers won in 1879 in 23 2-5s.; in 1880 in 23 3-5s.; in 1881 in 23½s., and was second in 1882, 5 feet behind, 22 3-5s. Derickson was third in 1882.

The best American amateur record is 22½s. by L. E. Myers, Manhattan A. C., in his match with H. Hawes, at Manhattan Polo grounds, New York city, Sept. 15, 1881, and the best generally-accepted English amateur record is 22 2-5s., by W. P. Phillips, London A. C., at London Athletic Club gamee, Lillie Bridge, London, Sept. 28, 1875, although it has been claimed that at same grounds, May 25, 1878, Philipe ran 220 yards in 22s.

The other performances were:

One-hundred-yard run—A. Waldron, M. A. C., 10½, Brooks of California 2, by 3 inches, S. Derickson 3, by 3 yards.

One-quarter-mile run—L. E. Myers, M. A. C., 52½, S. Derickson 2, 52 3-5, J. A. Hodge, Princeton, 3, by 3 yarde.

One-half mile run—T. J. Murphy, 24 2-5, W. Smith, W. A. C., 2, by 15 yards.

One-mile run—H. Fredricks, M. A. C., 4:36 4-5, R. Farres, P. F. & O. C., 2, by 50 yards.

Five-mile run—T. F. Delaney, W. A. C., 26:47 2-5, J. Kearns, G. A. C., 28:39 2-5.

Hurdle race—120 yards, 10 hurdles, 3ft. 6 in., S. A. Safford, A. A. C., 19 2-5, R. Mulford, N. Y. A. C., 2, by 2 yards.

One-mile walk—F. P. Murray, M. A. C., 6:46, W. H. Purdy, M. A. C., 6:51 3-5.

Three-mile walk—G. D. Baird, A. A. C., 22:8 3-5. F. P. Murray, W. A. C., 23:7 1-5.

Seven-mile walk—W. H. Meek, W. I. A. C., 56:48 2-5, R. McCausland, W. A. C., 1:3:0 3-5.

Two-mile bicycle—G. M. Hendee, Springfield, Mass., 6:47-1-5, C. Reed, N. J. A. C., 6:53 4-5.

Five-mile bicycle—R. S. Rood, I. B. C., 17:37 5-5, C. A. Reed, N. Y. A. C., 18:46 3-5.

Running high jump—M. W. Ford, N. Y. A. C., 5ft. 8½ in., A. Harriman Jr., 5ft. 7½ in.

Running long jump—M. W. Ford, N. Y. A. C., 21ft. 7½ in., A. A. Jordan, 20 ft. 5½ in.

All scoring in the Championship Meeting is done on the basis of 5 points for a winner, 3 points for second man, and 1 point for third man.

Manhattan's 17 starters scored 33 points, New York's six starters ecored 24 points, Pastime's 10 starters ecored 21 points, Williamsburgh's 9 starters scored 19 points, American's 11 starters scored 16 points, New York City's 5 starters scored 13 points, Yale's 2 starters scored 8 points, Baltimore's 3 starters ecored 7 points, West Side's 3 starters ecored 6 points, as did also Ixion's 2 starters, Princeton's 4 starters scored 5 points, as did also Springfield's 1 starter, Gramercy's 1 starter, and Philadelphia's 1 starter each scored 3 points, and Park's 2 starters scored 1 point.

Of the 19 gamee, Manhattan won 4 firsts, 3 eeconds, and 4 third prizes; New York, 3 firsts and 3 seconds; Pastime, 2 firsts, 3 eeconds and 2 thirds; Williamsburgh, 2 firsts and 3 seconds; American, 2 firsts 1 second and 3 thirds; New York City, 1 first, 2 seconds and 2 thirds; Yale 1 first and 1 second; Baltimore, 1 first and 2 thirds; West Side and Ixion, each 1 first and 1 third; Springfield, 1 first; Princeton, 1 second and 2 thirds, Gramercy and Philadelphia, each 1 second, and Park, 1 third. Of the 15 competing clubs, 11 won one or more championships, and each of the 15 won one or more prizes, so that no club went home empty-handed.

During the past week Muldoon has been engaged in giving exhibitions of wrestling in this city and interior towne. At San Jose he showed to a poor house. At the pavilion last Sunday D. A. McMillan threw Donald Dinnie two out of three falls, collar-and-elbow. Muldoon threw Dietman five times and failed to down Rijal inside of half an hour including rests. Dinnie threw McMillan two falls out of three, Cumberland style. In the evening Muldoon threw Rijal twice, Dinnie twice, and Dietman three times in 22:37. Dinnie won a mixed match of McMillan by two falls Cumberland to the latter's one fall collar and elbow.

Donald Dinnie talke as follows: "In reply to Muldoon's challenge to wrestle the catch-as-catch-can, I have to say that it is too similar to the Graeco-Roman etyle for me to have an equal chance, but I will agree to wrestle him at the five etyles most popular both in Europe and America, viz., catch-as-catch-can, Graeco-Roman, back-hold, side-hold and collar-and-elbow, the winner of three to claim stakes. I now deposit $50 for a match on these terms, to come off in this city at a date to be mutually agreed on within three months.

DONALD DINNIE."

Patsy Hogan directs the following to Muldoon: "I hereby challenge any man on the Pacific coast to wrestle an unknown man whom I will produce for $1,000 a side in catch-as-catch-can etyle, best three in five falls; first [illegible] served.

PAT [illegible].

THE GUN.

Sweepstake Shooting.

On Snnday last at the Oakland Trotting Park a numher of pigeon shots assemhled to contest for the ssveral swespstakss purses made up for ths occasion. The day was pleasant, with littls or no wind to assist the hirds in their flight. The first match made up was a twelve-hird affair for two pursee of $22 50 for first and $12 50 for second. The ehooting was done nnder the Hurlingham rnles. Fay led the score with a good heginning hut hroke np along to the last. Slads also started in well hnt likewise spoilt his score. Rohinson varisd the monotony of his nsnal shooting hy letting his elsventh hird get away, hut that did not prsvent him from taking the first mouey. Lamhert lost three out of ths first fivs and withdrew. Mr. Bassford did soms pretty killing and took second money on a score of ten hirds. Pearson's eighth hird flew over the heads of the spectators and soms commotion was cansed hy his shooting at it. Pearson did not leave the stand but when the pigeon was started from ths shed roof, where it had alighted, he gave it ths other harrel. This called forth considerahls discussiou, for in the first placs, ths hird heing over the heads of the psopls, the first shot shonld not have heen fired, and secoudly, ths hird should not havs heen flushsd. The judge ordersd another hird hut allowsd only ths nse of one harrel. This was an error in his jndgmsnt, as there are no rules to justify such a dscision. Peace and order was restored hy his reconsidering ths cass and ordsring "another hird." Roche did not shoot so wsll as nsual. Following is the score:

Fay	1†	1†	1	1	1	1†	0	0	0	1	1†	0	8
Slade	1	1	1	1	0	0	1	1	0	1	0	1*	8
Robinson	1	1†	1	1	1	1	1†	1†	1†	1	0	1	11
Lambert	1	0	1	0	0	w							2
Bassford	1†	1	1	1	1	0	1	1	1	1	1	0	10
Pearson	1†	1†	1	0	1	0	1	1	0	1	0	1	8
Rocbe	1	0	0	1	0	1	1	0	0	0	1	1	5

† Killed witb second barrel.

After this another twslvs-hird match was shot for $22 50 and $12 50, hut the shooting was done at 21 yards, the State Sportsman's rules governing. Rohinson made a clear score of twelve kills and again took first mouey. Roche, Bassford and Lamhsrt tied on ten and shot off the tie, miss and out. Roche killed two and took second monsy, Bassford and Lamhsrt only gstting one each. Ths scores wsre:

Fay	1	1	1	0	0	0	0	1	1	1	1	1	8
Rocbe	1	0	0	1	1	1	1	1	1	1	1	1	10
Slade	1	0	1	0	1	1	1	1	1	1	0	1	9
Egan	1	0	1	1	1	1	1	0	1	0	0	w	7
Robinson	1	1	1	1	1	1	1	1	1	1	1	1	12
Bassford	1	1	1	1	1	0	1	1	1	0	1	1	10
Lambert	1	1	1	0*	1	1	1	1	1	0	1	1	10

* Died ont of bounds.

Ths next match was at nine hirds, thirty yards rise, for two pnrsss, $20 and $10. The pigeons in ths first matchss wers a strong-flying lot hut hy this tims thsy were prstty wsll cnlled ovsr, which acconnts for the thres ties on clsan scores as helow seen:

Pearson	1	1	1†	1	1	1	1	1	1	9	Rocbe	0	1†	1†	1	1†	1	0	1	1	7
Fay	1	1	1	1†	0	1	1†	0	1	7	Lambert	1	1	1	1	1†	1	1†	1	1	9
Robinson	1	1	1	1	1	1	1	1	1	9	Tuttle	1	0	1†	1	1	1	0	w		5

The tis among ths thrse was shot off at four hirds. Psarson made a clean score and took first money. Lamhsrt killed three and took second money. Ths tie:

Pearson	1†	1†	1†	1	4	Lambert	1	1	1†	0	3
Robinson	0	1†	0	1	3						

(†)Killed with second barrel.

The last match was hstween Roche and Nic Williams at twslvs hirds for $10 a side, which resulted in favor of Williams hy ten hirds to Roche's six, as seen below:

Rocbe	0	0	1	0	1	1	1	0	1†	1†	0	0	6
Williams	0	1	1	0	1†	1†	1†	1†	1†	1†	1†	1	10

Lincoln Gun Club.

The Lincoln Gun Club held a clay-pigeon shoot at Colma last Snnday, at which the following scores were made at twenty clays, eighteen yards rise:

FIRST TEAM.

Parke—00110 11110 11110 00101—12.
Hawkins—10001 11111 11110 01011—14.
Edlar—01011 10101 10100 11011—12.
Heino—11111 10101 00011 11111—15.
Potter—00010 01001 00110 00111—8.

SECOND TEAM.

Johnson—10101 10001 01011 00111—11.
Lohner—00010 00100 01000 11100—6.
Lakely—10011 11011 11111 01011—15.
F. Venker—01101 00010 00011 01111—10.
Honck—01100 00100 01100 01111—9.
Palmer—10110 11001 11111 10111—15.

THIRD TEAM.

Schendel—00011 01111 10100 01010—10.
Calvert—01000 00000 00000 00101—3.
Cohen—10011 11100 10110 11101—13.
Lieke—00000 01000 00000 01000—2.
Richter—00110 00100 11101 01110—10.

Pigeon Shooting is Legal.

We are pleaeed to record the fact that Mr. Charles Eckert, a member of the Cincinnati Independent Shooting Club, who wae arrested, charged with a violation of the Ohio law hy shooting live pigcons from a trap, has been acquitted of the charge by a jnry of his peers upon tho second trial of the caeo. The first trial, as was reported in our issue of May 26, took place May 17, and resulted in a disagreemcnt of the jnry which stood eight to four in favor of acqnittal. The prosecution was vigorously pushed by the Cinciunati Society for the Preventation of Cruelty to Amimals, represeuted hy Prosecnting Attorney Caldwell and the society's attorney, Mr. Charles C. Davie. Messrs. Scott Symmee and Charles Phares condncted the defense in an able manner. The jnry were out but fifteen minntes. Eleven other arreets for the same offense were made when Mr. Eckert was arrested, and his being looked upon as a test caso, the remainder will prohahly bo dismiseed. The costs of this test to tho city are said to he ono hundred and fifty dollars, and Judgo Martels, hefore whom the caso was tried, very properly intimated that if the assoc ation desired to bring any moro such casos beforo tho police court, it would bo a good plan to first secure the city for ..ets. After the trial, the society held a meeting, at whi.., aftsr a warm discussion, tho whole matter was refer..d .o the law committee, to decide whether to appeal tho case ... a question of law, or abido hy the result of tie trial, ...deavor to secure from the next Legislature such legislation as will sffectually prevent trap shooting. The latter course will prohahly he adopted, and ths sportsmen of Ohio muet he on the alert to proteot their interests, as ths society will prsvent field shooting as well as trap ehooting, if in thsir power to do so. Ws shall have more to say on this matter hereafter.—*American Field.*

The monthly shoot of the Pacific Gnn Clnh will taks place to-morrow, Sunday, June 24, at Birds Point, Alameda, as usnal. Two clnh medals are to hs shot for at twenty-ons yards, twelve hirds each, ties three pair douhles; California rules to govern. Plenty of hirds for pool shooting after cluh match.

Ths dove law is openly violated in ths neighborhood of Colusa hy parties claiming to he sportsmen and law-abiding citizens. Oh! for a game warden!

THE RIFLE.

The First Competition.

Last Sunday the first of a ssries of fivs competition prac tices to sslect a team to go to Carson, Nevada, to shoot for ths Pacific Coast Trophy, was held at Shell Mound Park. Ths attendancs was much smaller than was expected, and the scores wers far below the averages nsually made by the shooters. Ths trophy to hs competed for was won last fall hy the Carson team at ths meeting of the California Rifle Association, and, in order to hring it hack to this side of the moutsins, ths California tsam must go to Carson and do ths shooting thers. The tsam is to he composed of tsn men, with two to act as rsserves. The men making the best scores at the five competitions will be sent to Nsvada. An entrancs fee of $2 50 was charged, to pay for the targets and markers. Only fifteen men entered. The shooting was nnder ths management of State Rifle Inspector Chas. Sontag aud Major Klose, Inspector of Rifles of Second Brigade. The scores made are capahle of mnch improvement, as ths following shows:

TWO HUNDRED YARDS.											FIVE HUNDRED YARDS.										
Sime	4	4	4	4	5	5	4	4	4	4—42	Kelley	4	5	3	5	4	5	4	4	4	4—42
Townsend	3	4	4	5	4	3	3	4	4	4—38	Sime	4	5	5	4	3	5	5	0	3	5—39
Kelley	4	4	4	4	5	4	4	5	5	4—43	Townsend	0	2	0	0	3	5	5	3	4	4—25
Kellogg	4	4	5	5	5	5	5	4	5	4—46	Mangels	0	3	3	0	3	0	4	5	5	5—28
Burns	4	4	4	4	4	3	5	4	4	4—40	Sherman	3	4	4	3	5	5	4	5	5	4—42
Sherman	4	3	3	4	4	4	4	5	3	3—37	Waltham	4	5	4	5	5	5	3	2	3	3—39
Mangels	4	4	4	4	4	5	4	3	4	5—41	Burns	3	4	4	5	5	3	3	5	5	4—41
Waltham	5	5	4	4	4	5	5	4	4	5—45	Klein	3	4	4	4	5	5	5	5	3	5—43
Fredericks	3	4	3	4	4	3	4	4	4	4—37	Fredericks	4	5	5	5	5	4	4	2	4	2—40
Klein	4	4	5	5	4	4	4	4	5	4—43	Templeton	4	3	3	3	5	3	5	3	4	8—37
Cummings	5	5	4	3	4	5	4	4	4	5—43	Cummings	5	4	4	5	5	5	4	4	5	5—46
Templeton	4	4	3	3	5	5	5	4	3	4—40	Sprowl	4	5	2	2	4	4	5	2	3	2—33
Sprowl	3	4	4	4	4	4	4	4	4	4—39	Kellogg	5	5	4	5	5	3	4	5	5	4—45
Klose	4	4	4	4	4	4	4	5	4	4—41	Klose	4	5	4	5	4	3	4	4	4	3—40
Clark	5	5	4	4	4	4	3	4	4	4—41	Clark	3	4	5	2	5	4	5	3	4	3—38

Next Sunday ths men will again meet at Shell Mound to continue the competition. After the shooting Col. Bnrns and Col. Kellogg shot a string of ten shots each off-hand, at ths 500-yard targst which is worthy of notice, as the wind was blowing very hard, which mads off-hand shooting quits difficult. Ths scores:

Kellogg	5	4	4	4	5	5	4	5	4	5—45	Burns	4	4	4	4	4	4	4	2	5	5—40

He Deserved the Ticket.

Daily, the swimmer, is a great practical joker and his humor has gained him nearly as much celehrity as his aqnatic feats, hut last Saturday he met his match in the person of a ten-year-old San Jose hoy. When Daily first took hold of the San Jose swimming haths, the tariff for hoys under the age of twelve was ten csnts. Daily finding that the boys took np as mnch room and needed as much attention as men raised the price to fifteen cents and posted notices to that effect all aronnd the haths. It was hot in San Joss last Friday, and whsn Daily noticed a small hoy looking wistfully at ons of ths aforesaid notices aud tightly clutching a ten-csnt piecs on which the inscription had faded away to a small, dim lins, his heart warmed towards the yonngster and he was jnst ahout to say, "take a hath free," when the hoy sidled up to the counter hehind which the great life saver was dealing out suits and towels.

"Say, Mister," murmnred the boy, "have you raised the price to fiteen cents?"

"Yes, sonny, I have; you see the man that pnmps the water for me strnck for higger wages and I had to get even somehow."

"But, euppose a poor hoy only had a dime and had walked two miles for a swim, wonld you turn him away?"

"Well, no, if he only had a dime I guess I'd let him bathe."

Then the hoy, brightening up, laid down his dime and received therefor the coveted hathing suit. He moved away towards the hath when, as if suddenly recollecting eomething, he turned hack and, holding out a hig dollar, said: "Please, Mister, take care of this while I'm in the water."

"Why, you young scamp," roared Daily, "you told me you only had a dime."

"No, I didn't. I only said snppose a poor boy only had a dime, and theu you took my money and gave me the suit."

A rosr of laughter went np from the crowd, and Daily could find no hetter way to pay forfeit than hy giving the smart San Josean a free hathing pass for the season.

It is said that the gruh may he easily removed by exposing the sheep to the eun during the day and removing them to cover at night. The gruh likes the light and heat of the sun, and for the eake of these is induced to leave its secret place up in the sheep's head, and crawl down so low in the nostrils that it can he hlown out or pulled from them hy the shepherd. Blowing tobacco or other sickening or disagreeable emoke up the nostrils seems to have little or no effect in dielodging the gruh, so irritating and often injurioue. The best way ie preveution, and to guard against the gad-fly (*Estrus ovis*) depoeiting its eggs in the nostrils of the sheep. When the eggs hatch, the gruh crawls up into the head. If the nostrils he kept well smeared with tar during July and August, the fly ie prevented from depositing its eggs. Instead of doing thie emearing by hand, a much easier and more expeditious method is to put fine ealt in a trough and cover this with tar. As the sheep come up to lick the salt, they get their nosse well smeared. A good thing also is to turn up a furrow in the pasture for the sheep to thruet their noses in the loose ground. Thie also assists in keeping off the fly.—*American Agriculturist.*

A farmer obscrved a flock of quail running along hetween the rows of corn, which was just eprouting; conceiving the idea that they were pulliug up his corn, one of the hirde was killed and its crop examined. Instead of corn, it was found to contain one cutworm, twenty-one etriped hugs, aud over 100 chinch buge.

BASE BALL.

The Haverly Club Defeated.

Ths Havsrly and Redington nines met on ths diamond last Sunday for the first time since the beginning of the league series of games for the present season. Ths Redingtons wers short two players—Fitzgerald and Moran—and, as if to acknowledge this disadvantage nnder which the hoys in hlue wers placed, ths Haverlys put Ed Morris in the catchsr's hox and Fred Carroll went to Morris' placs at third hass. Ths numerons victories of the Haverlys of late have mads ths hahitues of ths gronnds long to ses them snffer a crushing defeat, hut the expectation that the Redingtons wonld hs the ones to make them hanl down their colors was not entertained hy those who keep ordinarily well informed. McElroy's delivery puzzled the Haverlys from the start. Hs was erratic and ths hatter was just as likely to get the hall in the sids or on ths head as in front of him at a proper distancs for a strike. This pitcher reminds one of Charles Sweeney, who recsntly went East, in the manner of his posing hsfore delivering ths ball. He stands firmly on the left foot, faces thres-quarters towards the hatter, raiseshis right hand with ths hall in it np over his head and hrings the left hand up to meet it. He then rolls or twists ths hall around in the palm of his right hand, looks at the first hasemen, if there is anyone on that hass, and then delivsrs the sphere with a swiftness that causes ths batter to fan the air wildly. Ths ball is seldom put twice in the same place. The only base hits that were made off his pitching last Sunday were made by the Haverlys' hest men at the hat—Barnes, Lsvy, Morrie and Meegan. Creegan, ths Rsdington catcher, had an ardnous task in securing the wild halls that came at him, first high, then low, then an out curve, followed by a high ball that hs wonld havs to jump for to secure. The gams at the beginning of the sixth inning looked so favorahle for ths Redingtons that Carroll was sent to his post in the catcher's hox and Morris went to third hase. McElroy had scorsd a run in the second inning for the Redingtons, and in the fifth he started np an inning that resulted in thres heing addsd to ths score of his nine, Creegan and Mooney heing the other players who got safely over the home plate. Thess runs were douhle the numher of ths Haverlys', only two of thsir players, Barnes and Morris, having scorsd.

In the first half of ths seventh inning Pops, who had ohtained his first on a hit, stols his second and leaving his hase was canght off by Gagus. Pops attempted to go to third hnt the hall was ssnt to Morris and then returned to Gagus, who was closing in on Pops. The lattsr then attsmptsd to run hnt was overtaken and put out hy Gagus. The heaviest hit dnring the game was made hy Barnes in the last half of the eighth inning. Hs sent the hall to csnterfield and tallied a home run. Ths ninth inning was qnickly playsd hnt thers were no runs made the score, at the close standing four to thres in favor of the Rsdingtons:

REDINGTON.	TB	R	BH	PO	A	E	HAVERLY.	TB	R	BH	PO	A	E

A game was played at Sacramsnto Sunday, hy the Unions of that place and the Californias of this city. The game resulted in a victory for the Californias hy a score of 16 to 5. Donohue of the Woonsocket Cluh and Carroll of the recently disorganized Niautics played with the Unions.

Aug. Pratt, the manager of the Haverlys, is mnch annoyed at the defeat his club suffered Sunday at the hands of the Redingtons and it is said he will soon give np the management of the cluh.

Ed Morris, third haseman of the Haverly Olnb, will go East this week to join the Athletic Cluh of Reading, Pa. Carroll, the catcher of the Haverly Cluh, will accompany him.

The Acme and Elite Cluhs played at the Presidio laet Sunday. Acme 4, Elite 3.

Names Claimed.

By Sam'l. Gamble, Cook Farm, Danville, Cal.:

CONCLAVE, for hay colt, star in forehead, off hind pastern white, foaled May 15, 1883, hy Steinway (three-year-old record 2:25¾), hy Strathmore, sire Santa Claus (2:17¾), and eight in 2:30 list. First dam Annie Laurie (three-year-old record, fourth heat, 2:30), hy Echo (sire of Belle Echo 2:23¾, Gihraltar, 2:22½, Echora, 2:23½), hy Rysdyk'e Hamhletonian, sire of Dexter (2:17¼), Nettie (2:18½), and thirty-live in 2:30 list; second dam hy Jack Hawkins (a sou of Boston, the sire of the second dam of Maud S, 2:10¼, and Nutwood, 2,18¾).

CARRIE S, for iron gray filly, small star in forehead, foaled April 22, 1883, hy Steinway. First dam Carrie Clay, hy Coaster (record 2:26), he hy Calihan (a son of Mambrino Pilot); secoud dam hy Mambrino Chief (the sire of Lady Thorne, 2:18½); third dam hy Senator, a thoroughbred; fourth dam hy Woodpecker, the sire of the renowned Gray Eagle.

T. A. Roseherry, who has had a lsrge experience in raising and hreaking horses, has arrived at the conclusion that if a colt is handled carefully in hreaking he will never "hnck." Great care must he used when the colt is first canght np. Early this spring Mr. R. hroke several colts to the hit and saddle; many of these have heen running on the range since that time. During the past few days they have hesn ridden and were found to he very docile. Never having heen ahused hy their master, they know nothing of the art of "hucking," and are of mnch more value in the market than "huckers." Many so-called horse trainers take delight in showing their dexterity in riding bucking horses. The sport ie interesting, no doubt, bnt, alas! a good horee ie often ruined in thie way, "to make a Roman holiday."—*Adin Argus.*

P. J. Shafter's two-year-old colt Viking, by Ruetic, meaeures twenty-three inchee around the arm, and Mr. Shafter wants to hear from the colt that can show a greater span of muscle at the samo age.

Sheep Breeders and the Fairs.

Very few of the fairs of the country have such an exhibition in their sheep departments as seems warranted hy the importance of that interest. One need not go far to find reasons for this. In quite a number of instances the management of fairs is largely made up from men who are not practical breeders. Tbey are active, earnest men, who, having succeeded in the management of private business, have been designated by their friends and neighbors as likely to make a success of an enterprise undertaken for the public good. What these men fail to provide in the way of securing success in the sheep department is to be charged to other causes than design to place any one interest above or hefore another. In other instances, men crowd themselves, or are forced hy others, into fair directories for the purpose of advancing special interests. Of course these men are liable to overlook others while attending to tbe interest nearest their hearts—or pockets. These and other influences less apparent quite commonly operate to make the prizes offered in the sheep lists such as are likely to fail in attracting the cupidity of would-be exhibitors, who seek more inviting localities, or keep their stock at home. In other instances the money offerings are liberal enough, but when the critical breeder scans the classification and rules under which they are to be distributed, he finds himself exposed to the risk of losing deserved honors through the devices of professional showmen or the incompetency of so-called "judges."

Imperfect classification has unquestionably operated, in numerous instances, to the dwarfing of what would otherwise have been a good sheep show. Men whose energies have been directed toward the perfection of a certain variety of sheep, and whose success is worthy of recognition and reward, are deterred quite often from entering the lists of exhibitors hy regulations which would force their animals into competition with those of a different type and hred with a different purpose in view. In euch instances the exhibition pen becomes a lottery, with even chances for exhibitors only where the jury is prejudiced; but such chances often fail to attract the coveted numher of takers. Hence it is that so many faire must depend for their sheep show upon local breeders, who send in stock to "fill up," and peddlers who are present because they find on the fair ground a good audience and possible buyers.

There is here not the practical difficulty to overcome that is met with when the complaint of inadequate offerings is to be met. Not every fair directory can afford to take tbe risk of offering large money prizes. Uufavorable weather, or some other unforeseen oecurence, may interpose to reduce gate receipts, and disappoint those who are to pay and those who are entitled to receive the offerd prizes. But no equally good argument can be advanced in behalf of failure to remove the otber obstacles enumerated. Shrewd business men who may be called to direct live-stock shows will detect the weak points in any policy with one or two years' experience. Wbere there is a determination to free an exhibition of the incubus of specialists or adventurers in any of its departments, not many elections need be passed without accomplishing that object. So, after all, if the majority of live-stock fairs are not what they ought to be, the responeibility for the pplicy pursued by them comes home to the people in whose interest they are ostensibly managed. If the breeders of sheep, with any approach to unanimity, will apply themselves to placing the right men on fair directories, and to keeping them advised when there is thought to he need for a change in policy, a great improvement may confidently be looked for in the sheep departments, which are in too many instances a travesty upon the importance of such an interest as the sheep husbandry of the United States has grown to be. Let them move in the matter.—*Breeders' Gazette.*

Poultry Fence.

F. E. Marsh, in the Poultry Meesenger tells how he constructe a poultry fence. How to construct a cheap and durahle one, he eays, has heen a problem in his mind, and after repeated trials of different kinds he thinke the fence queetion ought to he taken up in the journale, and perhaps eome fence would be suggested which many have in vain, thus far, looked for. He then gives hie method of constructing euch a fence: I have nsed a fence made in the following manner. I take common fence board, rip them in two, then take three ehort pieces three feet long, nail one to each end of tbe two pieces and one in the middle, then it is a panel ten or twelve feet long, just as yon like; now nail on lathe three inchee apart. The way I fasten ie hy a wire around the post and the end of the panel. Where there ie not mnch wind, a post at each end will do, bnt here, in the spring, you wonld have to have one in the middle and a good strong man to hold them beeides. The advantage of the panel fence is, you can move it very readily. The other fence that I have nsed is made hy setting posts thirty feet apart, then stretching plain fence wire from one post to the other; the first wire six inches from the ground, the other thirty inches higher up. Then I stretch a small wire (such as hinding wire), parallel with the other two, also one between the two large wires, then weave laths in as close as yon choose. The large wire muet he made faet to the posts by staples; the small ones left loose till the laths are in place, then drawn tight. Tbe main trouhle with thie fence is, yon cannot get the laths so fixed as to prevent them from slipping either one way or the other enough to let a hen through. Tar netting and woven wire cost too much. What we poultry-men of the West want, is some kind of a ponltry fence that does not cost more tban all onr fowl are wortb.

The Secret of Raising Turkeys.

One of our most enccessfnl breeders remarks upon this point: One great eecret of raising turkeye is to take care, and take care all snmmer; and even then you cannot raise them, for sometimes they will not lay, or they will not hatch, or something will hefall them. Sametimee we raise turkeye without much care, when the eeason is specially favorable, hut generally the meaeure of care is the measure of euccese. A boy ten or twelve years old, with a little direction from his father, can easily take care of 200 turkeye, and he cannot earn so much money on the farm in any other way. It ie an old maxim that if a thing is worth doing it is worth doing well. Some may think thie constant care is too much trouble to raise turkeye. This is a free conntry, and you can omit any part (or the whole) of tbeee suggestione. If you know a better conrse, hy all means pursue it. This painstaking hae made turkey-raising ebont ae sure as any other branch of farm indnstry. I have usually kept from eight to ten turkeys for breedere, and have raised from ninety-nine to one hundred in a summer. In 1860 I sold my turkeye for 27 cente a pound; they amounted to $280 40. In 1869 I eold for 25 to 27 cents per pound; groes amount of ealee $386 14. That year I kept an account of expenses and calculated the net profit at $213 58. In 1870 I eold for 25 cents a ponnd; amount of sales $311 32. In 1871 I eold for 18 cents a ponnd; groee amount of sales $286 13. I would ratber raise turkeye and sell at 15 cente a pound, than to raiee pork and eell at 10 cente a ponnd.

The turkey crop is steadily increaeing in value, not more by the increased nnmber of farmere wbo make thie a epecialty in their poultry raieing, than by the increaeed attention and ekill of those who have long heen in the business. Care in selecting stock for hreeding bringe ample rewarde. The proepect was never hetter than now for the extension of the bnsinese among the farmere who have a good range and good markets. The average size of turkeye in the districte where the hneinees ie made a epecialty is steadily increasing, and we look for etill furtber improvements.—*Lancaster Farmer.*

He Loved His Horse.

Tbe Kentuckian'e admiration for fine horees ie the etrongest feeling in hie nature. He cares very little whether or not the public entertaine a favorable opinion of him, bnt he wants everyone to think well of hie horse. Some time ago the editor of the *Kentucky State Journal*, published at Newport, Ky., puhliehed a local item concerning a horee well known in the community. Shortly afterwarde a man entered the office with a revengeful air and eaid:

"My name ie Sqnire Jaggles and I rm not a tender-hearted man, let me tell you. I understand that yon have flung reflectione on the character of my horee."

"I don't know," replied the editor, "that I said anything derogatory to the character of your horse. I merely ineinnated that you etole the animal, hnt I did not say anything to, in the least, injure hie character."

"That'e all right, then. I don't care who says I stole him, hut hlamed if any man ehall say that he can't run."—*Arkansas Traveler.*

TAGGART & DINGEE,

REAL ESTATE AGENTS & AUCTIONEERS,

NOS. 460 AND 462 EIGHTH STREET,

OAKLAND.

San Francisco office at Easton & Eldridge's, 22 Montgomery Street.

J. O. ELDRIDGE, AUCTIONEER.

SPEED PROGRAMME

OF THE

Sonoma County AGRICULTURAL PARK ASSOCIATION

FOR THE

Annual Meeeting

TO OPEN

MONDAY, AUGUST 20, AND TO CLOSE ON SATURDAY, AUGUST 25.

First Day, Tuesday, August 21.

1—Trotting; three-minute class; purse $500.
2—Trotting; Stockholders' Plate; value $200; conditions with the secretary of the association.
3—Running; free for all; three-fourths of a mile and repeat; stake $150, $25 to second horse, entrance $20, $10 forfeit.

Second Day, Wednesday, August 21.

1—Trotting, for three-year-olds; purse $400.
2—Pacing; 2:25 class; purse $400.
3—Running; free for all; mile dash; stake $150, $40 to second horse, entrance $30, $15 forfeit.

Third Day, Thursday, August 23.

1—Trotting; 2:28 class; purse $600.
2—Trotting; 2:40 class; purse $500.
3—Running; two-year-olds; dash of three-fourths of a mile; stake $150, $30 to second horse, entrance $20, $10 forfeit.

Fourth Day, Friday, August 24.

1—Trotting; 2:24 class; purse $600.
2—Running; three-year-olds; 1½ miles and repeat; stake $175; $50 to second horse; entrance $30; $15 forfeit.
3.—Running; free for all; dash of 1¼ miles; stake $150; $50 to second horse; entrance $30; $20 forfeit.

Fifth Day, Saturday, August 25.

1—Trotting; 2:30 class; purse $1,000.
2—Running; free for all; two miles and repeat; five to enter and three to start; purse $500.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five except the two-year-old trot, unless otherwise specified; five to enter and three to start; entrance fee, 10 per cent on purse, to accompany nomination; purses divided at the rate of 50 per cent to first horse, 25 per cent to second, 15 per cent to third and 10 per cent to fourth.

National Association rules to govern trotting; but the board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, three or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry 110 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 118 pounds, with the usual allowance as above.

Starters in all races must be named to the secretary or clerk of course at 6 p. m. the day preceding race, any other rule to the contrary notwithstanding.

No added money paid for a walk-over.

Horses entered in purses can only be drawn by consent of judges.

Rules of the Pacific Coast Blood Horse Association to govern running races, except when conditions named are otherwise. Non-starters in running purses will be held for entrance under rule 3.

All entries to be made in writing, giving name, sex, color and marks of horses; also name and residence of owner. In running races full colors to be worn by rider, and drivers of trotting races are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated on programmes by colors worn by drivers. This is necessary to enable spectators to distinguish the horses in the race.

Entries to all the above races except No 25 to close with the secretary on Wednesday, August 1, 1883.

Write "Entries to Races" on outside of envelope.

In the three-minute purse and the 2:40, a horse distancing the field takes only first money.

WYMAN MURPHY, President.

JAMES O'MEARA, Secretary.

Bay District Association

TROTTING.

RACES. 1883 RACES.

Aug. 11, 15, 18, 22 and 24 and Sept. 1.

☞ NOTICE FOR ENTRIES. ☜

FIRST DAY.

August 11—Three-minute class; purse $800, $450 to first, $190 to second, $100 to third, $60 to fourth horse.

SECOND DAY.

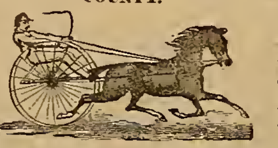
Races.



Races.

SPEED PROGRAMME.

MONDAY, SEPT. 3, 1883.

No. 1—Running; Golden Gate Purse, $500, for all two-year-olds; three-quarter-mile dash; $300 to first horse, $150 to second and $50 to third.

No. 2—Same day; running; Alameda purse, $500, for all three-year-olds; one-and-one-quarter-mile dash; $300 to first horse, $150 to second, $50 to third.

No. 3—Same day; running; Pardee Purse, $500; free for all; one mile and repeat; $300 to first horse, $150 to second, $50 to third.

No. 4—Same day; trotting; free for all horses that have never beaten three minutes; purse $600; $360 to first, $180 to second and $60 to third.

TUESDAY, SEPT. 4.

No. 5—Trotting; purse $800; free for all four-year-olds; $480 to first horse, $240 to second and $80 to third.

No. 6—Same day; pacing; purse $500; free for all pacers that have never beaten 2:20; $300 to first horse, $150 to second, $50 to third.

No. 7—Same day; trotting; purse $ 00; free for all big horses that weigh 1,400 pounds or over; $120 to first horse, $60 to second, $20 to third.

WEDNESDAY, SEPT 5.

No. 8—Running; California Record purse; one-mile dash; purse $1,000, $90 to first horse, second to save entrance; for two-year-olds, three-year-olds, and horses of any age; to be run in classes, the two-year-olds in one class, the three-year-olds in one class and the horses of all ages in one class, under the following conditions: The horse beating the record in California in his special class to take the first money; the horse making the next best time, all the classes being considered, to save his entrance; should the record be beaten in more than one class, then the first money to be divided equally among the winners, but should the record not be beaten in any of the classes, then the horse or horses coming nearest to it shall be entitled to first money.

No. 9—Trotting; same day; purse $1,000; free for all horses that have never beaten 2:24; $600 to first horse, $300 to second, $100 to third.

THURSDAY, SEPT. 6.

No. 10—Trotting; Purse $750; free for all horses that have never beaten 2:35; $450 to first horse, $225 to second and $75 to third.

No. 11—Same day; trotting; purse $500; free for all three-year-olds; $300 to first horse, $150 to second and $50 to third.

FRIDAY, SEPT. 7.

No. 12—Running; Combination Purse; purse $500; free for all; one-quarter-mile dash, to be followed by one-half-mile dash by the same horses, with fifteen minutes between heats, the horse making the best average time in the two heats to take first money; second horse to save entrance.

No. 13—Same day; trotting; purse $800; free for all horses that have never beaten 2:28; $480 to first horse, $240 to second and $80 to third.

SATURDAY, SEPT. 8.

No. 14—Same day; competitive military and cadet drills; purse and conditions will be named through the press after conference with the various military companies.

No. 15—Trotting; purse $400; free for all two-year-olds; $240 to first horse, $120 to second and $40 to third; heats of a mile.

No. 16—Same day; trotting; purse $1,200; free for all horses that have never beaten 2:20; $720 to first horse, $360 to second and $120 to third.

No. 17—Same day; bicycle race; dash of one mile; free for all; purse $50, $35 to first and $15 to second; entrance free; the nominations to be made, at the latest, on the first day of the fair, at 3 p m., with the secretary, at the track.

No. 19—Same day; ladies' riding tournament; prizes and conditions to be named hereafter.

CONDITIONS.

All trotting and pacing races are best three in five, except the two-year-old trot, unless otherwise specified. Entrance fee, ten per cent on all purses, to accompany nomination.

In all, five to enter and three to start. National Trotting Association rules to govern trotting, but the board reserves the right to trot heats with any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

Those who have entries in the running purses must name to the secretary, in writing, the horses they will start on Monday, on the Saturday previous; those on Friday, the Wednesday previous. No money will be paid for a walk-over.

Horses entered in pursee can only be drawn by consent of the judges.

Rules of the Pacific Coast Blood Horse Association to govern running races, except as specially provided.

All entries to be made in writing, to give sex, color and marks of horse, also name and residence of owner, and, in running races, colors to be worn by rider.

Entries to all the above races to close with the secretary on Wednesday, August 1, 1883.

Write "Entriee to Races" on outside of envelope.

CONDITIONS AND REMARKS.

National Trotting Association rules to govern all trotting and pacing races.

In all trotting and pacing races, five to enter, three to start. Entrance, ten per cent, to accompany all nominations.

The Pacific Coast Blood Horse Association rules to govern all running races.

Non starters for running races will be held for entrance.

No money paid for a race without a contest.

Non-starters must be declared out the day previous to the race they are engaged in, before 8 o'clock p. m.

Horses distancing the entire field in one heat will be entitled to first and third money only.

Horses entered for purses can only be withdrawn by consent of the judges.

All entries for races to close with the Secretary at Chico, August 1, 1883, at 11 o'clock p. m.

The Board of Directors will have absolute charge of the track and grounds during the week of races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the races will be strictly enforced in every respect, and all purses and stakes will be paid after the judges have rendered their decision, and before leaving the stand.

STOCK FARMS.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TAbles, with trotting statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

TWENTY

Fine & Highly-bred Broodmares

bred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There are in use at Fairlawn over one hundred HIGHLY-BRED BROODMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and raising fine, highly-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, made in 1881; another with a record of 2:23¼; another with a record of 2:26, made in 1882; another with a record of 2:28¼, and a grandson with a three-year-old record of 2:23¼, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20¼ to 2:30, a larger number than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records ranging from 2:15¼ to 2:27¼. No son of Rysdyk's Hambletonian has made as good a showing at same age.

ETHAN ALLEN JR., full brother of Daniel Lambert, who has twenty-two of his get with records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Ethan Allen, dam Fanny Cook, by old Abdallah; second dam by Stockholm's American Star; third dam by Red Bird, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23¼ to 2:28¼, all of them being out of mares of unknown pedigrees.

The Fairlawn stallions have in 1882 had eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaughter to drop into the 2:30 class, viz.: Maud T, 2:26, by Hamlin's Almont Jr.; Carrie Medium, 2:27¼, by Happy Medium Jr.; and Carrie B, 2:28¼, by Elial G, son of Aberdeen. The stallions on no other breeding farm in America have made such a showing in 1882.

These stallions will be permitted to serve

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares, at $50 the season, with privilege to return such mares in 1884 as fail to stand. A few approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE OF EVERY ANIMAL FOR SALE IS PRINTED IN THE CATALOGUE. These prices will neither be advanced nor reduced A SINGLE DOLLAR until after May 1, 1883. PURCHASERS FROM A DISTANCE CAN BUY ON ORDERS AT EXACTLY THE SAME PRICE AS IF PRESENT IN PERSON AND ALL STOCK SOLD ON ORDERS WITHOUT THE PURCHASERS SEEING THEM CAN BE RETURNED BY THE PURCHASERS IF THEY DO NOT IN EVERY RESPECT COME FULLY UP TO THE DESCRIPTIONS GIVEN. Full written descriptions will be given any applicant who contemplates purchasing.

Time will be given responsible parties at regular bank rates of interest.

For catalogues or further information address

WILLIAM T. WITHERS,
2-13y1 Lock box 392, Lexington, Ky.

ASHLAND PARK

TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

2-17y1 **B. J. TREACY**, Lexington, Ky.

Jerseys and Guernseys.

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Scituate, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the accepted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

TH

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING

Summer and Winter Resort of the Pacific Coast,

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE

"HOTEL DEL MONTE,"

ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains

SPACIOUS SWIMMING TANKS

(150x50 feet) for warm salt water plunge and swimming baths, with

ELEGANT OOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ,

IS VIA TH

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISSIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to

FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggageman. Train Baggagemen are instructed to issue CHECKS for all dogs received in Baggage Cars.

☞ In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, and No. 2 New Montgomery street, Palace Hotel.

"Standard Time" Furnished by RANDOLPH & Co Jewelers, 101 and 103 Montgomery St. S. F.

A. N. TOWNE, Gen. Manager. **T. H. GOO[illegible]AN,** Gen. P[illegible] Agt.

A writer in the *Scientific American* says he cleared his premises of rats and mice by making whitewash yellow with copperas, and covering the rafters and stones in the cellar with it. In every crevice in which a rat may tread, he pnt the crystals of copperas, and scattered the same in the corners of the floor. The result was a perfect stampede of rats and mice. Since that time not a footfall of either rat or monse has been heard abont the honse. Every spring a coat of yellow wash is given the cellar as a pnrifier, as an exterminator, and no typhoid, dysentery or fever attacks the family.

Sonoma AND Marin District ASSOCIATION.

—AGRICULTURAL DISTRICT NO. 4.—

At Petaluma

CONDITIONS.

All trotting races are best three in five, except the two-year-old races which are two in three. Entrance fee, 10 per cent on purse, to accompany nomination.
Purses divided at the rate of 50 per cent to first horse, 25 per cent to second, 15 per cent to third, and 10 per cent to the fourth horse. In the walking races all money goes to first horse.
In all, five to enter and three to start. National Trotting Association rules to govern trotting, bnt the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a race between heats.
No money will be paid for a walk-over.
Horses entered for purses can only be drawn hy consent of the jndges.
Rules of the Pacific Coast Blood Horse Association to govern running races.
All entries to be made in writing, to give sex, color and marks of horses, also name and residence of owner, and, in running races, colors to be worn by rider.
Marin barred in 2:45 class, and Blanche and Dawn will not start in District races.
Entries to all the above races to close with the Secretary on Wednesday, Angust 1, 1883.
Write "Entries to Races" on ontside of envelope.

J. McM. SHAFTER, President.
W. E. COX, Secretary.

IN THE STUD.

J. F. CARROLL'S GREYHOUND DOG, PAUL JONES, GENTLEman Jones—Branch. Fee, $25. Apply at this office.

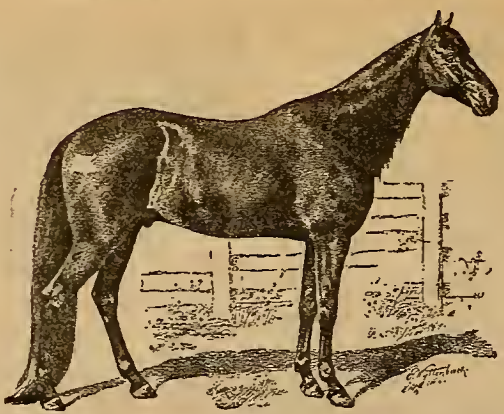
MAMBRINO WILKES.

Black Stallion, sixteen hands in height, by George Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christman by Todhunter's Mambrino or Idol, son of Mambrino Chief. Second dam by Pilot Jr. Third dam by Kentucky Whip. Idol's dam was thoroughbred and was by American Eclipse.

THIS IS THE LARGEST AND ONE OF THE BEST COLTS OF George Wilkes (weighing at this date 1,200 pounds) combining the Hambletonian and Mambrino strains and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the sam[illegible] faculty of transmitting the family qualities to his offspring which [illegible] at George Wilkes in the front rank as a sire of trotters.
☞ George Wilkes has twenty representatives in the 2:30 list, of which [illegible] have records of 2:25 or better, 4 of 2:20 or better and 3 of 2:18 or better.
[illegible] make the ensuing season, beginning February 1st, 1883, at STOCKTON.
[illegible]ting the price by the season at the low figure of $40 the owner [illegible] acknowledge, thereby, any inferiority on the part of this horse to [illegible] sire of Trotters.

IRVIN AYRES.

MAMBRINO TROTTING STALLION



ABBOTSFORD.

☞ Record at Six Years old, 2:21½. ☜

PEDIGREE.

BY WOODFORD MAMBRINO, HIS DAM COLUMBIA BY YOUNG Colnmhns. Woodford Mamhrino hy Mamhrino Chief, his dam Woodhine hy Woodford, a thoroughhred son of Kosciusko.
Woodford Mambrino is recognized to be the best son of Mambrino Chief. His own record is 2:21¼, and there are a large number of his get in the 2:30 list. Among them: Abbottsford, 2:21¼; Convoy, 2:22¼; Magenta, 2:24¼; Lady McFatridge, 2:29; Dacia, 2:29¼; George A. Ayer, 2:30.
Besides those having pnblic records, he is the sire of the two celehrated mares owned by Robert Bonner—Manetta and Malice. Manetta, with a running mate, and harnessed to a road wagon, trotted two miles in 4:27¼, and Malice trotted a trial, on the same track, a mile in 2:19¾. Woodford Mamhrino is also the sire of Princeps, the sire of Trinket; record, 2:14. Woodhine is also the dam of Wedgewood, record, 2:19. Young Columbus, the sire of the dam of Ahbottsford, has nine of his get in the 2:30 list, so that on both sides of the house there are notable performers. Abbotsford is a rich rosewood brown, 15¾ hands, and of very high form. His get are very promising, his danghter Jasmine having won the Embryo Stake for yearlings in 1881, and every one which has been pnt in training has ehown good speed.

TERMS.

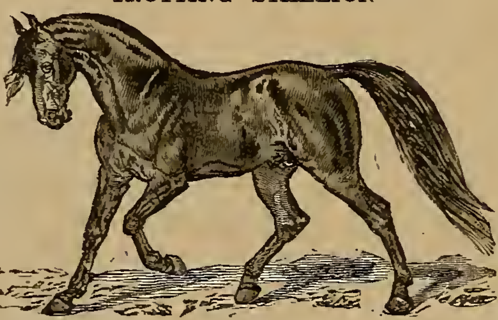
Seventy-five dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season free of charge. Good pasturage at reasonahle rates, and extra pains taken, bnt no liability for accidents or escapes.

LOCATION.

Abbotsford will make the ensuing season, 1883, on the ranch of S. B. Whipple, Esq., San Mateo, eeason commencing February 15th and ending June 1st, 1883. For full history see the issue of BREEDER AND SPORTSMAN of Angust 5th, 1882.

GEORGE BAYLIS. Agent, San Mateo, Cal.

TROTTING STALLION

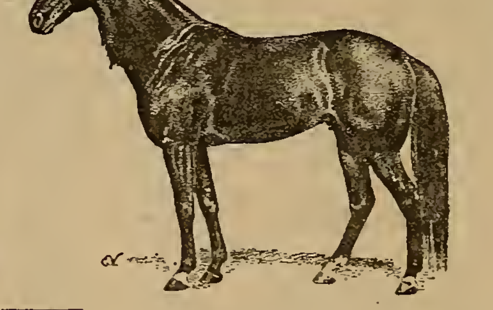


Eugene Casserly.

SIRE OF SWEETBRIAR, 2:26¼; NAPA QUEEN, 2:33¼; ROCKwell, 2:39; Bill Woodward, 2:40; Smoothbriar, two-year-old record 2:57; May Day, two-year-old record 2:59¾. Will make the season of 1883 at Oakland on Thursdays, Fridaye and Saturdays and at Walnnt Creek Sundaye, Mondays, Tuesdays and Wednesdays. He was sired hy General Taylor, dam Jennie by Lexington. Terms $30 for the season. Good pasturage at reasonahle rates. No responsihility for accidents or escapes. Address

THOMAS S. BREMNER.
Seventeenth street and Telegraph Ave.,
Or J. M. Heinold, 1426 San Pablo Avenne, Oakland.

THE TROTTING STALLIONS



SINGLETON AND LA HARPE.

SINGLETON WILL MAKE THE COMING SEASON, FROM March 1st to July 15th, 1883, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

PEDIGREE.

Singleton is hy Willie Schepper, a eon of Rysdyk'a Hambletonian, his dam Lightfoot (the dam of Pride) by Flaxtail, a son of Pruden'e Blue Bull.

DESCRIPTION.

Singleton is a dark hrown horse, tan flanks and muzzle, a little tonch of white on hind feet and one fore foot, and star in forehead. He is 15¾ hands high and weighs 1,100 pounds. He was bred hy Dr. M. W. Hicks, foaled spring of 1878.

TERMS.

Fifty dollars the eeason. Mares not proving in foal will be bred the following season free of charge. Mares from a distance will be pastured without charge during the season. Mares shipped to Chico, consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner their owners desire, at reasonahle rates. There is every convenience on the place, boxes, paddocks and plenty of shade and water.

LA HARPE

Will also make a short season at the above place on private terms. La Harpe is by Fame, a son of Alexander'a Belmont, hia dam Prairie Bird hy Flaxtail, the dam of Flight and Prompter. Address

J. T. McINTOSH, Chico, Cal.

THE CELEBRATED TROTTING STALLION

ERWIN DAVIS

WILL MAKE THE SEASON OF 1883 AT OAKLAND TROTTING park.

DESCRIPTION.

Erwin Davis is a beantiful mahogany bay with very black points and one hind foot white; 15 hands high; of snperior good disposition and fine trotting action.

PEDIGREE.

Erwin Davis was sired by Kentucky Hunter (Skenandoah) by brokenlegged Kentucky Hunter (the sire of Flora Temple) by Ferguson's Kentncky Hunter, by old Kentncky Hunter, hy Highlander. Erwin's dam was Lost Diamond, by Vermont Hamhletonian.

TERMS.

Twenty-five dollars fort he season, payable at the time of service. Good pasturage at $5 per month. No responsibility for accidents or escapes. For particulars apply

JOHN ROGERS.
Oakland Trotting Park.

JOSEPH CAIRN SIMPSON,
Oakland or 508 Montgomery street, San Francisco.

THOROUGHBRED STALLION

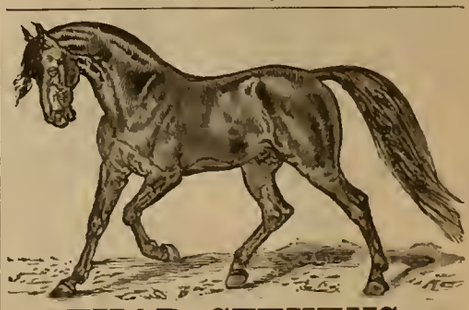
X X,

BY MALCOLM, HIS DAM COLUMBIA, WILL MAKE THE ENsuing season at the Oakland Trotting Park. Terms, $25 the season.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam, Columbia, also by imported Bonnie Scotland, hence his name. Malcolm was one of the best racehorses of his day, and Columbia was also a fine race mare. For extension of Columbia's pedigree see advertisement of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauanita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as, if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

JOS. CAIRN SIMPSON, Oakland, or 508 Montgomery street.

Mares intended for either of the above stallions, and sent by Donahue, Petaluma, Sacramento or Stockton boats consigned to J. W. Morshead, City Front Stables, will be received, good care taken of them and forwarded to Oakland



THAD STEVENS.

THIS THOROUGHBRED HORSE WILL BE AT AGRICULTURAL Park, Sacramento, for the season commencing Feb. 1 and ending the 1st of July next. Good pasturage for mares will be provided at $3 per month. For terms and particulars apply to or address

W. M. MURRY, Agent.

[From the Jewelers' Circular.]

"The Centennial chronograph (fly-back) or horse-timer, recently introduced by Messrs. Cross & Beguelin, is, regardless of price, one of the most substantial and accurate pieces of timing mechanism we have seen. This timer is constructed on scientific mechanical principles that must excite the admiration of every intelligent watchmaker, and it will doubtless become universally popular." FIVE DOLLARS A YEAR

BOB MASON—By Echo, from Belle Mason.

In the BREEDER AND SPORTSMAN of September 16, 1882, there is an illustration representing Exile, and the above representation ie that of his "full" brother. It ie rather a singular phrase which horsemen have adopted of denominating colts of the eame parentage as full brothers, but inasmuch as a query oftentimes follows the omission of the adjective, it ie interpolated to exprese the idea that Exile and Bob Maeon are by Echo from Belle Mason hy Belmont. It ie no mean praise to etate that Echo and his eons and daughters have furniehed four illuetratione for thie paper and others of hie get are well deeerving of a niche in the pantheon of equine notahilitiee. Neither ie it a rash assertion to state that, for harmony of proportione and beauty of color, the trio which have appeered would be hard to excel if ehown among a picked hundred of the whole country. Belle Echo nearly a model of the highly hred trotter, and eo are the hrothere. The three are alike in combining the blood of Echo and Belmont, eo that it is not surprising that there ehould be a likenese, and the "happy nick" has not only given good looks, hnt the still more highly prized qualities of epeed and endurance. Back of the Belmont in Boh Mason are the stoutest of thoroughbred strains. His grandam was Lucy Johnson hy the Poney, a eon of imported Leviathan and a game, honest runner, with etamina to carry him over the longest courses. Leviathan was one of the most successful stallione ever imported into America, and in his day stood at the very front of the eires of the period. The etars of the Southern courses were chiefly Leviathans forty years ago, and his daughters proved as successful in the stnd as they were on the turf. They were generally large, "roomy" mares, and their produce had the faculty of running to the end of the route as well as a great flight of epeed. Peytona who won the great stake at Nashville, heats of four miles, and who heat Fashion two years afterwards at the same distance, was hy Glencoe from a Leviathan mare, Giantess, and there ie ecarcely a douht that she was the best mare of her eize that ever faced the starter in this, or, in fact, all countries. The third dam was Catalpa, by Frank, and Frank was a son of Sir Charlee, and his dam was Betsey Archer, by Sir Archy. The fourth dam was hy John Richards, so that there ie a preponderance of Diomed blood, which many of the moet thorough students of trotting linee hold to he ae good as that of Meeenger; not a few consider it euperior. Frank being a "donhle Archy," and John Richards a eon of the "patriarch of the Americen turf," there are three strains from these eources alone, and were the pedigree carried o[illegible] both sides, it will be found that there are few [illegible] much of it. The junction of Messenger and [illegible]

has so many exemplars of the potency of the mixture that it is as well to have plenty of both, and this Bob Mason has. Heretofore we have given a sbort history of most prominent sons and daughters of Echo and in this connection it may he well to summarize them. Those in the 2:30 list are:

Gibraltar	2:22½
Belle Echo	2:23¾
Echora	2:23½
Annie Laurie	2:30

Annie Lanrie made her record when a three-year-old, since which she has been relegated to the stud, and in the paper of last week in the list of the foals dropped at "Cook Farm," she is credited with a hay colt by Steinway. In that the error of the "Stud Book" has been followed, giving her dam hy Jack Hawkins, whereas the old California racehorse Ten Broeck shonld have the credit. The dam of Echora was by Jack Hawkins so that three of the four have the warm hlood of the turf direct, and there are good reasons to believe that "Old Gih" has a direct share of it too. Thongh on the coarse order himself, his yonnger sisters—the "full" is left ont in this case—show lots of quality, and the invincible resolution which he displays in a tight place is a characteristic which strengthens the ground. There is another Echo, an older hrother of Boh Mason, which would heve had a high place in the family if it had not been for an accident to his leg. This is Jo Hamilton and he was within a neck of Brigadier in a four-year-old race at Chico, and was of so great promise that Mr. Titus took him East hoping that the difficulty could be overcome. He was unahle to trot, however, though it was conceded hy those who saw him in his work there that withont the mishap he would have been a sure victor in the big purse for five-year-olds at Buffalo. Exile has shown very fast trials and had he heen kept in training there is little question that he wonld make his mark. A good horse of a good family is far better, when it comes to hreeding, than the brilliant exception to his kindred, and this point is so well estahlished as to be considered an axiom among those who rear horses for the turf. It is not beyond he scope of these sketches of California horses to take into consideration well-authenticated trials, though, of course, they do not carry the same weight as "actual" performances, viz., the time made in a race. There are numhers of horses which are valned at thousands of dollars, which never have, and, in all probability, never will take part in a race, and in estimating the value of strains this is rightfully a factor in the calculation.

What Bob Mason has done comes under this head, and snffice it to say that his performances have been so satisfactory that he was sent from Los Angeles and put nnder Donathan's charge to be trained at Oakland and take part in the fall races. It wonld hardly be an act of justice to his owner to make the trials public so soon before the closing of the entries, and then again the associations might claim that the entries were curtailed by injudicions publicity. Those who are anxious to learn can visit the Oakland Trotting Park, and there heve been instances when all the skill of the most accomplished tont was set at naught hy the management of the trainer.

As good looks do not frighten people, it will he no breach of confidence to accompany the capital likeness which Wyttenhach presents with a written description.

Boh Mason was bred hy F. M. Slaughter of Los Angeles county and was foaled in 1879. In color he is the hrightest of haye. The shade is difficult to describe, and an artist would find it trouhlesome to match, mix as he might on the palette. It is impossible to imagine a handsomer color. The sheen is as hrilliant as the hnes on a pigeon's neck, and it fairly glitters in the aunbeams. Although immensely powerful, he ie one of the most highly-finished trotters ever seen, and there is little to show the admixture of otber than thoroughhred blood. He is so evenly made that it is difficult to select any point from hocks and knees up which is euperior. The head is as clearly cut as that of an Arab and a crescent-shaped star in the forehead gives a lively expression. The eye is full, hrilliant, but glowing with kindness. The nostrils thin, with a wide orifice. The muzzle small, with rather prominent jowls. The neck is small at the settiug on of the head and muscular. It seems supererogatory to add to the graphic delineation of the artist further than to give the color, though many are impressed with the idea tbat a picture is always a flattering representation, aud require the indorsement of worde ere they pnt much faith in it. Were it the desire to embellish, Mr. Wyttenbach would have heen troubled to pnt touches which wonld heigbten what is already shown. It will be seen that the shoulders have the proper angle; that whilo the back is ebort, there is plenty of room nnderueath; that the hip is long; the quartera well let down and the gaskiue and arms hulging with muscles. The hair of the maine and tail is fiue, and the "hlack points" merge with the bay eo as to produce the hest effect, while the touch of white abovo the coronet ie a handsome mark. Altogether the following quotatiou from the immortal hard is appropriate:

> "Look, when a painter would surpass the life
> In limning out a well-proportioned steed,
> His art with nature's workmanship at strife
> As if the dead the living should exceed."

To-morrow morniug tho ateamer Edith will leave for the Farallono Islauds with a party of fishing excursionists many of whom, aside from the fishiug, wish to witness a novel kind of sport in the shape of captnring sea lions on the south Farallones. Captain C. A. Eastman, who supplies most of the Eastern gardens and menageries with seals and sea lions, will take hie usual lot of rope casters and expects to make quite a catch. The aft cabin will he reserved for lady spectators.

ATHLETICS.

Plans for the Future.

Last Wednesday night the members of the Olympic Clnb met in Dashaway Hall, M. J. Flavin presiding. Mr. Flavin seid that it was necessary to discuss the future course of the clnb. Money was no source of anxiety. The clnh had $8,000 on hand, was free from deht, and no douht could easily raise $8,000 more within its own organization. Every athletic organization in the city had promptly and generously offered the nse of their rooms for the clnh until it shonld he again permanently estahlished. Wm. Muldoon had offered his services for any entertsinment the clnh might give, or would give an entertainment himself for the henefit of the clnb.

As to immediate quarters the directors reported that they had engaged five rooms in the Phelan hlock, on Market street. The qnestion of returning to the old quarters when the Barron block shonld be rehuilt was discussed, hut left open. Dissatisfaction was expressed hy memhers that the owners of the huilding in which the cluh was lately located had leased rooms in the building for a har and hilliard place. An agent of William Dunphy was present, and stated the desire of his principal to erect a four-story huilding, 50x137½ feet, on the northwest corner of Ellis and Stockton streets, if the clnh would rent all ahove the gronnd floors for a monthly rental of $450. This offer was left for the consideration of the directors, Mr. Dunphy's agent assuring the meeting that if his offer was accepted the huilding would he constructed after any plans the cluh might snggest.

Mr. Flavin, having got the memhers up to the proper pitch of enthnsiasm, called for suhscriptions to the general fund of the club, starting the list with $200 himself. Henry B. Russ followed with $200 more amid lond cheers, and James Jennings $100. Then suhscriptions ponred in from all parts of the hall, and before the lists closed $2,500 was put down. "Very good for the young memhers," said Mr. Flavin. "Pretty soon we will see what we can do with the old memhers."

It was decided to get up an entertainment for the henefit of the clnb, to be held iu the Grand Opera House on Jnly 20, in addition to the meeting on Jnly 4 at Oakland.

For the henefit of N. Martin, an old servant of the cluh, who lost all his clothes hy the fire, $75 was raised.

The sentiment of the meeting was in favor of accepting Mr. Dunphy's offer, but no definite action will be taken until another meeting.

Olympic Club Games.

The Fonrth of July promises well this year to those who enjoy all kinds of sports and ont-door games and an especial treat is promised in the athletic meeting of the Olympic Cluh, which will come off during the afternoon on the clnh's grounds, Fourteenth and Center streets, Oakland. Ladiee and gentlemen from the interior who have never seen a respectahly conducted athletic meeting, conld find no hetter way of spending the afternoon away from the hlare of the aggressive fish horu and the loud sound of the Mongolian homh. To athletes the meeting will he very interesting, as it hrings out a stronger lot of first-class men than have run here before. Brook's recent victory over Meyers, the Manhattan champion, has turued the eyes of the Eastern people once more to this Coast. They are looking for another prodigy and who knows hut what this meeting will prodnce him. The large nnmher of entries in the three-quarter handicap is remarkable, as that has never been a favorite distance out here, and the same may he said ahont the mile handicap. In addition to the races C. L. Leonard, of the Olympic Cluh, has promised to give an exhibition of fancy hicycle riding, and also a game of cricket will be played hetween the Occident and Merion Cricket Clubs for a prize silver goblet. Tbe cricket game will comemnce at 9 a. m. sharp. The entry list follows:

One-hundred-yard-handicap-run—W. R. Stewart, O A C, A. L. Harris, C. J. Bosworth, O A C, Jos. Masterson, O A C, John W. Flynn, Barney Benjamin, M C C, Frank J. Ebner, O A C, E. Freese, E. Foster, U F B C, Gaston M. Ashe, M C C, J. H. Walker, U F B C.

Two-hundred-and-fifty-yard scratch run (Haley and Masterson harred)—W. R. Stewart, O A C, A. L. Harris, John W. Flynn, Walter Lnhhock, E. Freese, Gaston M. Ashe, M C C, J. H. Walker, U F B C.

Three-qnarter-mile handicap run—Jos. T. Gorevan, G G A C, A. W. Brown, C A and L C, Elias Styns, Jos. B. Benjamin, M C C, Barney Benjemin, M C C, John W. Flynn, F. Freese, H. Cullinane, C A and L C, Rohert Gibson, C A and L C, G. A. Vernon, G G A C, Albert Strunz, G G A C, Thos. McGovern, G G A C, Fred Hancock, G G A C, Ed Long, G G A C.

One-mile handicap, (professional)—G. Guerrero, W. H. Wood, Peter McIntyre, M. Kennedy, J. Larkey, C. Lonergan, Lew Smitters, Ray Locke.

Half-mile handicap (hicycle)—F. W. Gihsoh, R. F. Varrinder, F. A. McLaughlin, H. C. Finkler, H. Tenny, E Mohrig.

Mile scratch bicycle—J. C. Quinn, E. Mohrig, H. C. Finkler, G. R. Bntler.

Five-mile professeonal bicycle scratch race—A. A. Bennett, Wm. C. Hull, E. Wilson.

The Beckwiths.

Those famous English natatorial artists Willie and Miss Agues Beckwith gave their initial swimming and diving entertainment on Friday evening, June 8, at the New York Natatorinm, 2 and 4 East Forty-fifth street. It was a special performance, given to the press and professional people, and consisted of exhibitions of varions styles of swimming, the performance of feats in and under the water, some of which would he deemed next to impossihle by those who have not witnessed their accomplishment, the entertainment conclnding with an instructive illustration of the easiest and safest way of saving life from drowuing, in which the hrother assnmes the part of the drowniug man, and is saved from an imaginary watery gravo by hie devoted sister. The programme included twenty-three separate performances, and the skill, grace and power shown hy these human fishes proved them to he thorough masters of tbe art of natation, while the entire entertainment afforded the fullest satisfaction to tho mauy present who from having wituessed the similar exhibitions given hy other artists were capahle of judgiug the merits of the show. They will repeat the exhibition at various wateriug-places and elsewhere during their stay in America, while they will he gratified if they succeed in their efforts to secnre matches to swim any distance against any person or persons who may he willing to meet them.

New York Athletic Club.

No less than two thousand invitations were sent ont for the invitation games of the New York Athletic Clnh, which were held at Mott Haven on Saturday, June 9. There was an excellent hand in attendance, and every one seemed to exert himself in order to make the field meeting attractive to the many ladies present. One of the curious features of the affair was the ahsence of all the well-known Manhattan men, who do so mnch towards making an athletic meeting attractive.

One hnndred-yard run—First heat—N. Linicus Jr., Am A C, 7 yds, 1; C H Liehert, N Y A C, 8 yds 2; S Marks, Am A C, 8 yds, 0; won easily; time, 10 4-5s. Second heat—H W Kraft, Ad A C, 8 yds; 1; C A J Queckberner, New York, 6½ yds, 2; S A Safford, Am A C, scratch, 0; won by five feet; time, 10 3-5s. Third heat—Wm Halpin, American A C, 2½ yds, walked over. Fonrth heat—F. Adams, American A C, 3½ yds, walked over. Final heat—Kraft, 1; Linicns, 2; won hy a foot; time, 10⅗s.

One-mile walk—F P Murray, Williamsburg A C, scratch, 1; time, 6:41; J T McDonald, West Side A C, 200 yds, 2; time, 6:41 1-5; W H Meek, West Side A C, 40 yds; 3; time, 6:53.

Throwing the base hall—J W Spalding, American A C, 118 yds 1 ft 6 in, 1; E F Ferdinand, New York A C, 115 yds 5 ft, 2.

One-mile bicycle race, handicap—Chas A Reed, New York A C, 15 yds, 3:14⅗, 1; Frank Howard, Jamaica, L I, 20 yds, 3:17⅗, 2.

One-hundred-yard run (Travers' diamond medal)—First heat—M W Ford, scratch, 1; N H Stewart, 10 yds, 2; won by a yard; time, 10⅗s. Second heat—W M Jones, 12 yds, 1; A H Van Cleve, 8 yds, 2; R N Morton, 9 yds, 3: W C Wilmer, scratch, 0; won easily; time, 10⅗s. Third heat—G W Odell. 12 yds, 1; J Gilgar, 8 yds, 2; won easily; time, 10⅗s. Final heat—Ford, 1; Jones, 2; won hy a yard; time, 10⅗s.

Qnarter-mile run, handicap—D J Tompkins, N Y College, 33 yds, 1; W. Halpin, A A C, 12 yds, 2; R Stoll, A A C, 6 yds, 3; won easily; time, 52 2-5s.

One-sixth mile hnrdle race, handicap—S A Safford, A A C, scratch, 1; C F Bostwick, Crescent A C, 18 yds, 2; J I Smith, N Y A C, 12 yds, 3; won easily; time, 38s.

Running high jump—M W Ford, N Y A C, 5ft 5½ in, 1; J T Rhinehart, A A C, 5ft 3½ in, 2.

One-mile run, handicap—J King, A A C, 130 yds; 1; W S Yates, W A C, 90 yds, 2; T F Delaney, W A C, scratch, 0; won by 12 yds; time 4:33.

Three-mile hicycle race, handicap—R G Rood, Ixion B C, scratch, 1; time, 10:33 3-5; F Howard, Jamaica, L I, 40 yds, 2; time, 10:34.

Running hroad jump—M W Ford, N Y A C; 21ft 3½in, 1; A A Jordan, A A C, 20 ft ½in, 2.

Two-hundred-and-twenty-yard run, club handicap (Oelrichs' gold medal)—N H Stewart, 32 yds, 1; J. Gilgar, 18 yds, 2; W C Wilmer, scratch, 3; won hy 2 yds; time 23⅗s.

Half-mile run—E M Yeomans, N Y A C, 40 yds, 1; R Stoll, A A C, 5 yds, 2; W Smith, W A C, scratch, 0; won in a canter in 2:4.

Tng of war, married vs. single—The latter won in the five-minute limit.

Professionals and Amateurs.

Wm. Cummings, the champion professional runner of Great Britain, whose mile record, 4:16 1-5, has never heen equalled hy man, arrived on the Gnion steamer Wyoming, Thursday, June 17. Cummings, as announced last week, has heen matched hy Geo. D. Noremac to run five miles with Wm. Steele, the Pennsylvanian champion, for $1,000, the race to take place on the 16th inst. Relative to the visit of Cummings, a writer in an English contemporary says: "It is his intention to try and come to some arrangement with the New York Amateur Athletic association, wherehy he will he enahled to try conclnsions with L. E. Myers at the three distances at which W. G. George competed with the Manhattan crack, of conrse, presnming Myers will he agreeahle. I give the Yankee credit for heing pretty smart, and I don't think for one minute Cummings will succeed in arranging a match. Myers has a lively recollection of what Hntchens could do with him, and I don't think he will he in a hnrry to tackle any of onr 'pros,' especially if they are acknowledged champions." The same authority, understanding that W. G. George, the amatenr runner, has decided to revisit America, adds: "I have no doubt while he is out there Cummings will again throw down the ganntlet to run him a mile. I hope George will think twice before entertaining sucb a challenge. The association out there wonld no douht give its consent, and he glad of the opportunity of seeing two snch grand milers meet. I helieve the Yenkees are in favor of these amateur and professional matches, hut I am sure if snch a match did take place, our Amateur Athletic Association would take the matter up and deal harshly with the offender."

For the henefit of our "helieving" friend, we will state that the association "out here" is not in favor of any snch arrangement, and would he more likely to deal harshly with snch an offender than wonld the association over there.—*Turf, Field and Farm.*

The Wrestlers.

Edwin Bihhy, who had authorized Professor Hogan to challenge any man on the coast to wrestle catch-as-catch-can or Græco-Roman, arrived here overland last Monday. He comes from St. Louis, where he has heen in attendance at the national wrestling tonrnament. He is a man five feet four and a balf inches in height and weighs 170 ponnds. Although rather undersized in comparison with Muldoon and Dinnie, he has a stnrdy and prepossessing figure. His reputation is principally hased on his skill at the catch-as-catch-can style. Immediately on his arrival, his challenge to any man on the coast was accepted by Jules Rijal, the match to come off at an early date.

At Oakland last Sunday Mnldoon and Rijal gave an exhibition of Græco-Roman wrestling, Hiram Cook acting as referee. Muldoon won two straight falls in 17½ and 20 minutes.

To-morrow afternoon, Snnday, Muldoon will appear at a picnic and athletic meeting to he held at the Oakland Trotting Park. The programme of sports includes a hig tug of war hetween Mnldoon's team and a picked team captained hy J. Nealon; mile dash for hoys; mile race handicap, free for all, in which McIntyre, Woods and Guerrero will start; 440-yard handicap, free for all; half-mile open handicap; 100-yard open handicap; foothall match between Mnldoon's team and a picked team; heavy-weight lifting and dumh-bell exercise. To conclude the day's sport, Muldoon will wrestle Græco-Roman and catch-as-catch-can against all comers, and will give $500 to any man who tbrows him in the former style and $100 in the latter style. If Bihhy appears, as is expected, and wreatles catch-as-catch-can, a good match will result.

The Pacific Coast Jersey Club.

On Friday, June 16, the original signers to the roll of the Pacific Coast Jersey Cattle Clnb met in the rooms of John W. Coleman, Stock Exchange Building, and perfected their organization. John W. Coleman was elected President, Robert Beck Treasurer and Secretary. A. Mialliard, J. McM. Sbafter, R. G. Sneath, J. W. Coleman and Rohert Beck were elected to form an executive committee. The following constitution and hy-laws were adopted:

CONSTITUTION.

PREAMBLE.

We, the undersigned, breeders and ownere of Jersey cattle, recognizing the importance of a trustworthy herd hook that shall he accepted as a final authority in all questions of pedigree, and desiring to secure the influence and co-operation of those who have a genuine interest in jealously guarding the purity of this stock, do hereby agree to nnite in forming an Association for the publication of a herd hook and adopt for our government the following Constitution:

ARTICLE I.

NAME.

This association shall he styled The Pacific Coast Jersey Cattle Cluh.

ARTICLE II.

MEMBERSHIP.

The members of the club shall comprise only the original signers of this Constitution, and such other persons as may be admitted as hereinafter provided.

ARTICLE III.

OFFICERS.

The officers of the association shall consist of a president, a treasurer and aecretary, who, together with three members of the cluh to be elected at the same time with these officers, shall constitnte an Executive Committee, with power to manage the affairs of the club, subject to the provisions of the Constitution.

They shall fix the location of the headquartere of the club and shall prescribe the manner in which its business shall be transacted.

The choice of officers and members of tbe Executive Commitee for the first year shall he made hy the original signers of this Constitution.

The officers and members of the Executive Committee thus chosen shall serve until the first regular annual election as hereinafter provided, or until their successors shall have been chosen.

ARTICLE IV.

ANNUAL MEETING.

The annual meeting of the cluh shall be held on the second Wednesday in April of each year, at sucb place as shall he designated hy the execntive committee (of which notices shall he sent to members at least one month previously), for the discussion of questions of general interest to the club and for the election of officers and members of the Executive Committee for the ensuing year.

ARTICLE V.

APPLICATION FOR MEMBERSHIP.

Each applicant for membership shall he recommended hy one or more members of the cluh as a hreeder or owner of thoroughhred Jersey cattle. The executive Committee shall examine and pass upon each application and may admit the applicant by an unanimous vote; upon the admission of such applicant, the secretary shall notify him of his admission and the terms of such membership, which, if complied with in thirty days, shall constitute such applicant a member.

The secretary may sign the constitntion upon the written authority of the applicant. An applicant having heen rejected shall not he eligihle for membership until one year efter his rejection.

ARTICLE VI.

DEBT.

No officer or member ahall be authorized to contract any deht in the name of the cluh. All its transactiona shall he for cash.

ARTICLE VII.

HERD BOOK.

The herd book shall be edited hy the secretary, under the immediate control and supervision of the Executive Committee, and shall be puhlished only with its official approval.

The charges for the entry of the pedigree of each animal belonging to a member of the clnh shall he $1.

Animals not helonging to a member of the clnb may be entered in the herd book, with the unanimous approval of the Executive Committee, npon the payment of $3 for each animal.

The charges for each transfer shall he fifty centa.

All funds, from whatever eource they are derived, ahall be appropriated under tbe direction of the Executive Committee, to the puhlication of the herd hook, the examination of pedigrees, the payment of aalaries, if any are incurred, and other necessary expenses of the club.

The price at which the herd book shall be sold to members and othere shall he determined hy the committee.

The secretary ahall keep on file all documents constituting his authority for pedigrees, and ahall hold tbem subject to the inspection of any member of the club.

ARTICLE VIII.

IMPROPER CONDUCT.

Should it occur at any time that any member of the club ahall he charged with willful misrepresentation in regard to any animal hred or owned hy him, or with any other act derogatory to the standing of the cluh, the Executive Committee aball examine into the matter and, if the charge be true, the offending member may be expelled by a vote of two-thirde of all the members of the cluh, or their written consent.

ARTICLE IX.

AMENDMENT.

This constitution may he altered or amended at any time by the Executive Committee with the written consent of two-thirds of the members of the club.

BY-LAWS—ARTICLE I.

ORDER OF BUSINESS.

1. Calling the roll.
2. Reading minutes of previoue meeting.
3. Reports of officers.
4. Reports of committees.
5. New business.

ARTICLE II.

ANIMALS ENTITLED TO ENTRY IN THE HERD REGISTER.

All thoroughbred Jereey cattle, and no other, may be entered in the herd register on proof of their purity of descent to the satisfaction of the Executive Committee.

These entries must he completed hy January 1, 1884, and shall he denominated "foundation stock."

The progeny of cows registered (prior to January 1, 1884) that may be calved within nine months from the date of such registry, may he registered upon proof satisfactory to the Executive Committee that the sire of such progeny was a thoroughhred Jersey hull.

ARTICLE III.

RULES OF ENTRY FOR JERSEY CATTLE.

1. No animal shall he admitted to entry after January 1, 1884, until hoth sire and dam are recorded in the herd register, excepting as provided in Article II.

2. Blank forms and transfers shall he furnished hy the secretary on application, and no entry can he made except upon one of these forms.

3. Applications for entry of animals must be filled out in ink, and must state (1) the sex of the animal, (2) the name, (3) the name and herd register numher of the sire, (4) the name and herd register number of the dam, (5) distinguishing marks hy which it may be indentified, (6) the signature and address of the breeder, (7) the date of dropping, (8) the name and address of the present or last owner, (9), the signature of the applicant.

Care must he taken to write all proper names distinctly and without ahhreviation. The names of sire and dam must he written exactly as they are entered in the herd register.

Where the sire of an animal offered for entry was not, at the time of service, owned hy the hreeder of the animal, the owner of the said sire must certify to the service before the animal can be recorded, unless such service ia shown hy transfer under Rule 8.

4. The breeder of an animal is the recorded owner of the dam at the time she was served.

The first owner of a calf is the recorded owner of the dam at time the calf was dropped.

5. In case the animal offered for entry is owned by other than the owner of the dam at the time of dropping, a transfer is required to the present owner from the previous owner; and, if the animal has passed through one or more intermediate hands, transfers must he given in their regular order.

6. Among the distinguishing marks required in Rule 3, the color of the animal should not he included in the case of calves hefore the June when they are six months or more old; hut it is imperative that all other marks be given. All such indications as "solid color"—meaning therehy no white except the fillet around the muzzle—"white star," "white saddle," spot on left shoulder, "right-hind foot white," etc., are important, and must be described with care. The color of the tongue, switch and markings on belly (if any) must he stated. The expressions "fawn and white," "gray and white," etc., will not he accepted—the location of the white markings must be stated. An animal is not of solid color when it has a white switch; in this instance, description must read, "solid color, except white switch."

No marks on horn shall be recorded.

7. In case the name chosen shall he in use or claimed for this herd book the secretary will furnish a name, and if upon receipt of certificate of entry it should not be satisfactory to the applicant, certificate must he returned at once for correction, accompanied hy a list of names from which to make a choice.

Breeders have the privilege of claiming names in advance of nse on sending them to the secretary, who will notify them which of the names sent are not in use or claimed, and reserve them for their future use. The affix 2d, 3d, 4th etc., can be applied only to calves of the animal hearing the name used, if of the same sex; not to progeny of the second or succeeding generation. Names of different spelling but of the like pronounciation, cannot be admitted—for instance, Nilson heing in use Nielson is excluded, etc.

8. In case of a change in ownership of an animal, the huyer must obtain from the seller a certificate of transfer, a hlank form of which will be furnished hy the secretary, which will be recorded when forwarded to the secretary with the fee. In case of the neglect or refusal of the seller to give a certificate of transfer the record of transfer may he made by tbe secretary upon written approval of a majority of the Executive Committee on evidence of the sale and delivery.

In all certificates of transfer the full name and post office address of the party to whom the animal is transferred, aud the date of sale, must he given.

Whenever the animal transferred is a female, it must be stated whether or not she bas heen served, and if served, the date of such service and tbe name and herd register numher of the hull must he given, signed by the owner of the hull.

9. Application for entries not proving eligible will he returned with the fees.

Wheu entries or transfers are made the certificate given by the secretary shall constitute the receipt for the fees; but auch certificate shall not he hinding on the cluh in case of error.

10. No application shall be considered until the fees are paid; nor shall any number he assigned by the secretary until every requirement has been complied with.

11. The fees, as fixed hy the constitution, are:

Entries of animala owned by members of the cluh, $1 each.

Entries of animala owned by non-members, $3 eacb.

Entires of dead ancestors to complete pedigrees, $1 each.

Tranafers, 50 cts

ARTICLE XII.

AMENDMENT.

These hy-laws may be altered or amended only by a vote of the cluh at the annual meeting.

Provided that ten members shall constitute a quorum at any meeting, and that apecial meetings shall be called hy the order of the Preeident at the written request of three members of tbe cluh.

Bibby and Rijal are to wrestle on the evening of July 5, for a stake of $500.

Northern Notes.

Fred Barnehurg, of Eden precinct, Jackson county, Oregon, a short time since sheared 26 head of graded Merino sbeep and got 39½ pounds of wool, or an average of over 15 pounds per head. One two-year-old Spanish Merino yielded 23 pounds. Mark Conger, of the same place, sheared a Spanisb Meriuo buck, getting 27½ pounds of wool.

Tbe Portland *Rural Spirit* says that D. A. McAlister, of Union county, has a standing offer of $2,000 for his colt, Center Shot, hy Dead Shot. Mr. McAllister is now offered $3,500 for Lemont, by Almont. This stalliou he purchased a few years since in Kentucky for $500.

Jay Beacb will take some of his fine horses to the Willamette valley the forepart of next month, to put them in traiuing for tbe fall races, winding up at the Yreka fair. The epizootic has been prevailing among tbem, hut is now abating.

In the colt stakes to he trotted at the Oregon State Fair this year, second payments have heen made on ten colts in the two-year-old class, and eleven in the three-year-old. The four-year-old purse closed with six nominations.

Umatilla county is the sheep-growing district of Oregon. It is estimated that more than 100,000 sheep have been sold hy tbe farmers in that country during tbe present season, at an average of $2 12½ each.

H. P. Isaacs of Walla Walla, W. T., has sold to John Pender, of Vancouver, W. T., hlk h Patrick, 4, hy Dexter, 2:24¾, son of Milliman's Bellfounder; dam hy Snowatorm; grandam hy Old George; $1,000.

Millers are now offering seventy cents per hushel for wheat at Walla Walla, and are eager huyers at that figure. It ia thought that there is 50,000 in the hands of the farmer.

Wm. Beckwith is not the only English professional swimmer lately arrived in this "hlarsted couutry, you know!" Capt. Webh is also here and ostensihly for the same purpose that other European artists favor us with their presence. The following from the *American Register*, puhlished at London and Paris, simplifies the matter: "I am sorry to hear sucb bad news talked ahout Captain Webb. He is broken dowu in health, and his pecuniary affairs are not in a rosy condition. His last encounter with Beckwith appears to have been disastrous in every way, and he purposes leaving this country for America, where he hopes to give a series of swimming entertainments.—*Turf, Field and Farm.*

Keep a record of the number of quarts each of your cows and heifers gives. Weed ont all that don't pay for the feed, with a fair profit over and above the cost of keeping. If our farmers had begun this practice fifty years ago, we should now have a better lot of cattle than can be found in the known world.

Last Saturday the bachelors of the Occidental and Merion cricket clubs played a match against their benedict confreres. The married men won the match by 74 to 61 for the single men. The batting honors went to Bristow, who knocked up 29, and Waterman, as usual, got the howling honors.

At City View Park, Portland, Oregon, last Saturday a dash of seven-eighths of a mile for a purse of $200 was won hy Jim Renwick, Forest King second, Neyella third. Time, 1:32.

John A. Kennedy has returned to Washington, D. C., and will now give his attention to the Potomac B. C., whose trainer he is.

RACES RACES

Sacramento, August 1, 2, 3 and 4, 1883.

Proprietors' Purses of

$5,500,

RUNNING, TROTTING AND PACING.

First Day, August 1.

Running; one-half-mile dash; free for all; purse of $1,000.

Second Day, August 2.

Trotting; 2:40 class; purse $2,000.

Third Day, August 3.

Trotting; 2:30 class; purse $2,000.

Fourth Day, August 4.

Pacing; 2:27 class; purse $500.

Entries close July 15 with proprietor at Agricultural Park; ten per cent entrance in all cases to accompany the entry. Each purse to be divided in three parts, 60 per cent to first horse, 30 to second, 10 to the third; in each race seven required to fill. National Association rules to govern the trotting and pacing; B. H. A. the running other racing will be given each day.

ROBERT [illegible]

TURF AND TRACK.

Director at Hartford.

The following description of the six-heat race won by Director at Hartford on the 13th inst. is from the Hartford *Times:*

Five horses of the seven entered came up for the first heat, Steve Maxwell and Ezra L being drawn. Pools sold at $25 on Dan Smith, $15 on Director, $10 on Walnut and $5 on Cornelia. Director won the pole with Wilkes next and Walnut on the outside. After the first heat betting was nearly even, and towards the last changed in Director's favor. It took six heats to decide the race.

First heat—Dan Smith got the lead at the turn and increased it all the way around to the half, when Walnut began to crowd up. But Dan pulled away again at the third turn, and down the stretch had it all his own way. There was a nice little push between Walnut and Cornelia for the second place, but the former got it by a good half length. Time 2:22½.

Second heat—The horses started in splendid form, but Dan Smith disappointed his backers by going off his feet just as he passed under the wire. At the quarter Walnut was ahead with Amelia a good second and Wilkes third. There was no material difference in the positions at the half, excepting that Smith began to crawl up from his place in the rear. At the fourth turn he left Director half a length behind. The horses came down the stretch at a rattling gait, Walnut maintaining the lead he had taken from the start. He took the heat in 2:22½, Amelia coming in close on his wheel, Wilkes third. Smith was a fair fourth.

Third heat—Walnut took the lead at the start and kept it well to the quarter, when Dan Smith began to close up with him. At the half Walnut drew away a little, and gradually increased the gap to a half length. The horses rounded the last turn in pretty style, Walnut and Smith very close; but the latter made a handsome dash and won the heat in the fastest time of the day, 2:21½. It was nip and tuck between Director and Walnut for the second place, but the former got it by a scratch. Wilkes finished third, but was placed fourth for fouling.

Fourth heat—After four attempts at scoring, Director and Dan Smith got away even, with Walnut a good third. Smith went in the air at the quarter and Director got a lead, which he kept beyond the half, when Walnut evened up with him. But he went off his feet badly at the fourth turn and fell to the rear, while Wilkes began to push Director for first place. But it was no use. Director took the heat in 2:22¼, Wilkes second and Smith a poor third.

Fifth heat—Cornelia took the lead at the start and held it to the first turn, when she broke badly and ran to the quarter. Here she was passed by Director, followed by Wilkes and Smith. At the half, Director had a good lead, with Smith second and Wilkes close on his wheel. But Smith broke on the stretch, and Wilkes came in a good second to Director, with Smith third. Wilkes was placed outside for running. Time 2:22.

Sixth heat—Cornelia and Wilkes were barred from this heat, not having taken one in the five, and Director, Dan Smith and Walnut came up for the start. It was almost an even thing at the quarter, but Director had a good lead at the half, with Walnut crowding Smith hard for second place. They came down the stretch in pretty style, Director jogging under the wire amid immense enthusiasm, Smith second and Walnut third. Time 2:22½. Following is the

SUMMARY.

CHARTER OAK PARK, Second Day, Wednesday, June 13.—2:22 class; purse of $1,000, divided: $500, $250, $150 and $100.

The Coney Island Cup.

At Sheepshead Bay on the 16th Eole won the Cup as he liked, although Monitor was selected by the fancy for first place. The following is the *World's* description:

Fourth renewal of the Coney Island Cup, a sweepstakes for three-year-olds and upwards, at $50 each, half forfeit, with $1,500 added, the second to receive $300 out of the stakes: three-year-olds to carry 90 pounds; four-year-olds, 108 pounds; five-year-olds and upwards, 114 pounds; sex allowances; 23 subscribers; two miles and a quarter.

F. Gebhard's b h Eole, 5 years, by Eolus, dam War Song, 114 pounds ....(W. Donohue) 1

Yonkers Stable's b h General Monroe, 5 years, by Tom Bowling, dam Minnie T. Morgan, 114 pounds .... (Fitzpatrick) 2

G. L. Lorillard's ch g Monitor, aged, by Glenelg, dam Minx, 111 pounds .... (Hughes) 3

Time—4:04.

Pools—Monitor, 150; Eole, $140; General Monroe, $65. Betting—10 to 7 on Monitor, 13 to 10 against Eole, and 5 to 1 against General Monroe. Mutuels paid $12 90.

After Eole showed on the track he improved so much in public estimation that he sold nearly even with Monitor in the pools, while so freely was the money showered at the bookmakers that the odds against him came down with a run. With the flag General Monroe took the track, and with Eole second they ran the first furlong, after which Monitor took second place, and at the end of the quarter was a length behind General Monroe, and nearly two lengths in front of Eole. There was but little change in running the first three furlongs of the next mile until just before they reached the half, when Monitor took the lead and at the half had half a length the best of Monroe, he a length in front of Eole. They held the same relative position in the run back to the stand, with Monitor half a length in front of Monroe, he a length and a half in front of Eole. As they began the last mile Billy Donohue moved Eole up a trifle, and as both Monitor and Monroe seemed to tire, the three ran lapped past the three-furlong post. At the grove Monitor "cut it" and was passed by General Monroe and fifty yards further by Eole. Monroe just lead at the half by a head, with Eole second, a length in front of the favorite. Donohue continued to ride with the greatest patience until well round the stable turn, when with a flourish of his whip he called on the big horse, who, responding with a fine turn of speed, at once opened such a gap that, barring accidents, he could not well lose, seeing which, the crowd began shouting, some "Eole," some "Gebhard" and not a few "Langtry." The enthusiasm was warm and cordial, and as Eole galloped past the judges a winner by eight lengths, with Monitor a dozen lengths behind General Monroe, nearly all on the lawn turned round toward the stand to see how the occupants of box No. 3 were enjoying the scene. They found Mrs. Langtry clapping her hands, evidently well pleased at her friend's success, while Mr. Gebhard, if possible, was paler than before the race. Time, 4:04. Time scarcely as good as was expected, but as Eola ran the last three furlongs very easy, that was some explanation.

The quarters were run as follows:

First quarter	28	
Second quarter	23¾	—0:56½
Third quarter	26½	—1:23
Fourth quarter	26½	—1:49½
Fifth quarter	26	—2:15½
Sixth quarter	27	—2:42½
Seventh quarter	27	—3:09½
Eight quarter	26	—3:35½
Ninth quarter	28½	—4:04

Thus the total time is six seconds slower than it was last year, when Hindoo beat Eole and Parole, and five and a quarter seconds slower than when Glenmore won in 1881, with Monitor second and Parole third. Thus, with the exception of last year, Monitor has played an important part for the Coney Cup each year it has been run, he winning in 1880, when the distance was two miles and a half.

About "Crooked" Driving.

In the intervals between driving Fanny Witherspoon three exercising heats at the Cleveland track last Friday, John Splan imparted to a newspaper man who had sought him out for that purpose, his views on the subject of "crooked" driving, and as he is in charge of the best stable in the country owned by one man, what he has to say on a matter of such vital importance to the turf is worthy of reproduction. Splan's position, stated briefly, is that there is now very little "crooked" driving, and that there will be less in the future. After laying down the proposition that most of the talk about pulling horses comes from people whose faulty judgment as to the merit of certain horses has caused them to lose money, Splan argues that "under the present management of all the National Association courses, it is a hard matter for a driver to pull his horse, for the judges are all men of experience, and they are quick to tell whether a horse is being driven for what he is worth or not, and every driver knows that if he is detected in crooked work he will be disgraced and barred from driving on any of the tracks that hold a membership in the association. If he is once expelled, he might as well go to shoveling coal or sawing wood for a living, for he can never do anything as a driver. It is a stright tip, that I don't know of any driver of the least importance in this country to-day who would undertake to pull a horse for a consideration, unless the owner would command it, and there is no driver that I know of, and I am pretty well posted on all of them, who would not rather drive his horses on their merits than to scheme with them. Any man who handles a horse will naturally take pride in him, and would much rather see him win than lose, not only because it adds to the driver's reputation, but because he forms a certain affection for the horse. I would to-day rather take a smaller salary from a man who wants his horses trotted on their merits than to take a large salary from a man who would rather trot crooked, and I don't believe there are many drivers in the country, and certainly none of any prominence, who don't think the same thing. Now, Commodore Kittson, the gentleman for whom I am training, never thinks about other horses in a race in which he wishes to enter, but if he thinks one of his string is able to win, he says go in and trot them on their merits, and if they beat us, it is because they have a better horse."

There is some truth in these arguments, but there is also a good deal of sophistry. When Splan, or any other man of his experience, asserts that if a driver is once expelled, "he might as well go to shoveling coal or sawing wood for a living, for he can never do anything as a driver," he makes a statement which the facts of history do not in any degree bear out, and brings prominently into public view a state of affairs that is not at all creditable to the National Association. The root of the whole evil of "crooked" driving and all the other deviltry that has in many places killed trotting, is the fact that the National Association does not see to it that when drivers are proven guilty of fraudulent practices the penalty of expulsion is imposed and kept in force. It is because men who have been tried and convicted on the most overwhelming testimony were, after the lapse of a few months, given a free pardon, and with it opportunity to again commit crime with the horse and sulky, that others are tempted to try the same game. Training a trotter on the very track where Splan delivered his homily was a man who, in 1879, deliberately made a trip, thousands of miles in extent, which was a perfect carnival of turf lawlessness, and when finally detected and exposed, he boasted of his success in wrong doing, and defied the National Association. He was at once expelled, but a mistaken leniency reinstated him.

There are plenty of such instances. At Milwaukee, three years ago, a driver deliberately pulled his horse to a walk in order to lose a heat after going to the half-mile pole so far in advance of the other competitors that it seemed certain they would be distanced. He was at once expelled, but the penalty was removed by the influence of men who should have been in better business. The judge who imposed the penalty of expulsion was besieged with requests to sign a petition for this man's reinstatement, but steadily refused to do so, saying, and with truth, that where there was no doubt of guilt there should be no mitigation of the sentence. This is right. And yet, in spite of the fact that the judge opposed all efforts at reinstatement, the man was given another chance to pull horses.

Not many years ago there was a trotting race at Lexington, Ky., in which a well-known Chicago horse took part. He lost heats which it looked as though he should have won. The judges resolved to take a hand in the matter, but they did not adopt the usual plan of putting up a new driver, and thereby, perhaps, playing right into the hands of the crooked combination. They simply sent for the driver of the horse that was losing. He went into the stand. "The Lexington Association has never expelled but one man," said the starting-judge to the driver; "that was five years ago, and the man is still on the outside. Please see how well you can drive the next heat."

The Chicago horse won.—*Breeder's Gazette.*

A veterinary professor says that "the great majority of ringbones in young horses come from the failure to shorten the toes." To this may be added that ringbone is apt to be formed if colts are allowed to stand on plank floors, or anywhere else where the flooring is hard, during the first eighteen months of their age. Whether in stable or not during this period, let them have earth for standing or walking, and be free from stone or gravel.

There will be short racing at Jacksonville, Oregon, on the 4th of July.

Vanderbilt's Triumph.

A few days ago the interest in double team performances was freshened by the telegraphic announcement that W. H. Vanderbilt had driven Maud S and Aldine a mile in the unprecedented time of 2:15½. The following description of the performance is from the *World* of the 16th inst.:

Mr. William H. Vanderbilt yesterday afternoon drove his celebrated team, Maud S and Aldine, over the track of the Gentlemen's Driving Park in 2:15½, lowering the record of 2:16¾ made by Frank Work's team, Edward and Swiveller.

July 13, 1882, Mr. Frank Work's team, driven by a professional driver, succeeded in covering a mile on the Gentlemen's Driving track in 2:16¾, and a few days later the friends of Mr. Work caused a sign to be put on the judges' stand at the track with the words on it: "July 13, 1882. Edward and Swiveller, 2:16¾."

This sign in so conspicuous a place was an eyesore to Mr. Vanderbilt, who could not bear to think that any man should own a faster team of horses than he. He sent word to Charter Oak Park, Hartford, Conn., where his team Aldine and Early Rose were then quartered, to have them given a trial to break the record of Edward and Swiveller. A few weeks later the trial was made and the time announced as 2:16½. The correctness of the time was disputed by Mr. Work's friends and was as earnestly presisted in by Mr. Vanderbilt.

So warm did the discussion become that Mr. Thomas C. Eastman took up the cudgel in Mr. Vanderbilt's behalf and challenged Mr. Work to trot Edward and Swiveller against Aldine and Early Rose for from $10,000 to $50,000 a side. This Mr. Work refused to do. The open discussion was then dropped, but the Work constituency, to use the words of a member, "made it warm for Vanderbilt whenever he when to the track."

It was usual when Mr. Vanderbilt went to the track to have some one call his attention to the time of Edward and Swiveller on the sign on the judges' stand. It was then in order for some one else to "chip in" the remark: "Where's that great Hartford team ?" or "How about Charter Hoax Park ?"

When the spring election of the association came up, the Vanderbilt party attempted to oust the Executive Committee and elect a new one that would remove the obnoxious sign. In this, however, they were unsuccessful, and then W. H. Vanderbilt determined to hitch Maud S and Aldine to the pole, and break into the record.

As he had driven Maud S and Aldine for two days, he determined to go up to the track yesterday afternoon, give them a trial, and, if it was near enough the record to warrant him doing so, he was to have announced the fact that "the great Maud S and Aldine, driven by Mr. William H. Vanderbilt to a top road wagon, will attempt to break the mile team record of 2:16¾.

Yesterday he drove from his stable at 3:30 o'clock, and jogged slowly up to the Driving Park, where he was in time to see John Murphy drive Colonel Kip's team, Birdie C and mate, two trials to wagon in 2:24 and 2:24¼.

The track was in excellent condition, having been newly harrowed and rolled, while the air was almost perfect for a fast trial. There were about fifty members of the club at the club house, and, in answer to their entreaties to give them a trial, Mr. Vanderbilt answered, somewhat tartly, "I be durned if I don't."

He then ordered the team to be taken from the shed, and, as they were backed out and the wagon wheels were "cranked" to enable him to get in, he said: "This wagon and pole weigh 211 pounds, I weigh 200; that's 411 pounds—about 80 pounds more than Edward and Swiveller pulled around the track."

He drove down to the track, and, as the team came up the stretch to go under the wire, some one remarked, "Why, Maud is lame." So it seemed, as the same favoring of the off fore foot that was noticed by some on the previous day was again apparent. They went under the wire at a good gait, and as they passed the grand stand Maud "broke" badly, and the team was pulled up and walked back, when it was noticed that the toe-weight on the off fore foot had been dropped. This was remedied and another attempt to speed the team was made, with like results, as Maud again broke badly.

Investigation proved that the toe-weight on the nigh fore foot had been dropped this time, and the team were driven back to the stable, where new 5½-ounce toe-weights were applied and another essay was made.

The team was driven up to the distance pole at a lively gait, and then turned; as they came down the stretch to the wire, it was seen that, though not going at any great pace, they were going perfectly level and true, and as they passed under the wire twenty split-second watches were started.

The team tore around the turn close to the pole, and as they went down the straight to the quarter pole they were working like one horse. Maud S was nearest the pole, and she swished her tail as if in high glee, and carried Aldine along at a great pace. The quarter mile was passed in 0:32¾ seconds.

They were kept hard at work and went steadily, and, amid the cheers of the crowd on the club-house steps, passed the half-mile pole in 1:05½, the time for the second quarter being exactly the same as the first.

Turning into the third quarter they maintained the same level gait, and did the three-quarters of a mile in 1:41, having taken 35½ seconds for the third quarter, and having done the half mile from the quarter to the three-quarter mile marks in 1:08¼.

The crowd at the club-house then began to cheer, and it must be said that the millionaire driver of the priceless team heard the shouts, as he urged them on to greater speed.

As they swung round the sharp curve at the entrance to the homestretch, they seemed fairly to fly, and as they neared the wire their driver caught the lines in his left hand and swished his long whip through the air, never, however, striking them. As they dashed under the wire a wild shout went up and a cry of 2:15 announced to Mr. Vanderbilt his signal triumph over Mr. Frank Work.

Of the twenty watches on the trial, thirteen were stopped at 2:15½, four at 2:15¼ and three at 2:15¾, and it was decided that the majority should rule and the time was announced as 2:15½. This made the last quarter 34½ seconds and the last half mile was done in just 1:10.

The names of the thirteen men who made the time 2:15½ are Charles H. Raymond, Nathan Strauss, Allie Bonner, Colonel Kip, Alec Taylor Jr., W. Kidder, William Turnbull, Thomas C. Eastman, John C. Bouvler, Alfred De Cordova, John Murphy, Gabe Case, and Mr. Vanderbilt's rival, Frank Work.

The latter's face, as he stopped his watch, was a picture of distress.

Then the team was driven to the shed and the crowd cheered again. And when Mr. Vanderbilt said: "Let's go and have some wine," the crowd were struck dumb with surprise, from which, however, they soon recovered and cheered again, this time louder and longer than before,

While they were drinking the reporter of the *World* interviewed them. Mr. Vanderbilt said: "Have some wine. Hurrah for Maud S! Hurrah for Aldine! Hurrah for me!" the reporter hurrahed. Tom Eastman said: "I told you so. Hurrah for Bill! Hurrah for everybody! Ain't it great!" Charley Raymond said: "Jersey City! what a slashing performance." Nathan Strauss said: "Oh! my; wont old Frank toss and tumble in bed to-night." "Yes," said Alec Taylor; "he'll have a nightmare, and it wont be Maud S, either." At which everybody shouted for more wine.

It was 6 o'clock when the party left for home, and they fell in line behind the famous team and famous driver and made their way to John Barry's, where a large crowd had gathered to greet the conquerors of time.

Last night was a gala one at the Vanderbilt stables. Maud S was turned loose in her big box-stall, that was bedecked with flowers. Aldine's box was also decorated with jasmine and roses, and Maud's colored attendant sang: "I am as happy as the day is long."

Turf Chat.

Tom Merry runs on in this way, in the *Oregonian*, on current turf events:

The Oregon and California stables which participated in the Salt Lake races went no farther East, but returned to Sacramento, where they will remain until September, when the State fair begins. The chief cause for this was that the pinkeye disease had made its appearance in the stables of E. J. Baldwin, and his fine colt Lucky B was suffering badly from it. Stemler and Ayers would have gone on, but they feared their horses might have also caught it at Salt Lake, hence they preferred to stay home and take their chances on the California tracks. The Salt Lake Jockey Club have reinstated Patsy Duffy, the rider of Fred Collier, who was ruled off for cutting down Ordnance in the Cup race; and we think it nothing more than proper that they did. The idea that Duffy should do this thing intentionally is worse than absurd. That he is venturesome and often takes desperate chances cannot be denied; but it is not improbable that both jocks were at fault. He was ordered to run a waiting race and do his work at the finish. The track is only a half-mile track, and he had gone about a mile and three-eighths and was moving up rapidly on a turn, Jocko had the inside and Ordnance was so far outside of him that Duffy undertook to pass between them. The mare swerved inward before Duffy could pull his horse to the outside, and her hind legs came in contact with his fore legs. I saw just such an accident at Walla Walla four years ago, when Glen Dudley ran upon Sixty-six and fell down, save, in that case, the rider of Glen Dudley was badly hurt. My own belief is that Ordnance will be as good as ever this fall and win her share of the races in which she participates.

A correspondent of the Baker City *Tribune* says of this Salt Lake affair that "there was every indication of Ordnance sweeping the field, to prevent which Duffy resorted to his old tricks, and in so doing did his best to spoil a valuable animal. We trust the mare is not seriously hurt, and think, from a private note, the animal will be all right in a few weeks. Ordnance may yet prove to be the fastest animal on the coast, and probably would have done so at Salt Lake had fair play been exercised." This may be true, and it may not. Duffy committed two plain and palpable fouls when he rode here, for which he would have been ruled out anywhere else. But it does not look likely that he would deliberately attempt to cut down another horse in the race, as that would involve the risk of his own life. Again, he was under an engagement at a salary of $2,000 a year, to ride Pearl Jennings after July 1, and he could not afford to risk so valuable an offer for anything that his present employer could offer him. I think he deserved punishment of some sort, like a fine, for the desperate chances he takes; but no man can make me believe he crippled Ordnance on purpose.

Well, Romero was not good enough to beat Deck Wright, it seems, but Overman did, and made no great bother over it either. Goldsmith may have tried to win with the son of Richmond, and he may not. Remembering how he maneuvered Director through the circuit in California, last year, we should not be astonished at anything he did. Certainly it looks odd for a horse to trot in 2:19 at five years old and then get beat, a year later, in 2:25. Still when we reflect that Pballas trotted in 2:18¾, his first public race, we must naturally conclude that this is the year for miracles and Romero's defeat is one of them. If the gray colt does not show a different page for them to read, there's something wrong. Goldsmith is too shrewd to take a horse back East that can not trot better than 2:25.

Coming a little nearer home, we look over the entries for the Breeder's Stakes at the State fair and find ten in the two-year-old and eleven in the three-year-old class. The colts at City View are all doing well, and as for those at Walla Walla "they are darlings," as the emaciated Arberry remarked on his recent visit to this city. There is an especial interest centering in these two races for the reason that, for the first time, the get of two sons of Almont, one owned by Jay Beach of Jackson county, the other being Alwood, owned by Dr. C. H. Mack of Walla Walla, will meet on the track. The southern Oregon horse breeds a great deal of quality, while the sultan of Fleetmore imparts more size and bone to his progeny than any other horse I can name. Sixty odd colts were brought out for me to look at last July, and every one of them was big enough for a farmer's work horse. I mention this from the fact that most men lose sight of what a horse may be good for if he does not trot fast. In this respect Alwood is decidedly "a poor man's horse." His get show not only size, but great liberty of action; and as most of them are from Bellfounder mares, I expect to see some highflyers from them after they fill out and acquire size.

My own fancy is Jay Beach's Venita for the three-year-old event, and Dr. Mack's Souvenir for the two-year-old stake. I saw the latter move last year, and she trotted very mechanically for a yearling. There was no hitch nor hobble about it—nothing but clean work with heel and toe—and every muscle went as if propelled by the hair-spring of a watch. The doctor has a way of feeding all his youngsters well and keeping them growing all winter. He believes that "a merciful man is merciful to his beast," and carries his theory into practice. There is no straw burnt at Fleetmont. Everything is chopped up with roots and bran, and fed to the mares and colts. The consequence is that all his colts look about a year older than they really are. Indeed, we doubt if there is a four-year-old mare in Oregon that will weigh or measure with either Adelaide or Au Revoir. He has appropriated the name of Albicore for one of his two-year-olds, the name of the swiftest fish that swims the ocean. The albicore is a sort of salt water pickerel, and is modeled on lines that are infallible for speed. Hope that subsequent events will prove that the doctor's name is an appropriate one.

Among the nags that will be missed from the trotting tracks this year will be the little brown filly Jane L, that won the stubborn contested three-year-old trot at the last State fair. She stayed like a mother-in-law and proved herself too stout for the strong. The week after the race she was sold to a gentleman who never goes near a racetrack, but likes a fast horse of his own to drive on the road. The other day we heard a well-known groom bewailing this circumstance. "She didn't nothink but trot." said he, with a wail of anguish, "and she hoet to trot in twenty when she's seven or height. Hif you fired off a ton o' dynamite alongside her hears, she would go hoff in a big trot while hall the brother orses was a gallopin, ye knaw."

Rambles o'er Epsom Downs.

In a retrospective ride "o'er the Downs so free," one must, to begin with, obtain the company of that delightful of gossipers, Samuel Pepys, who was Secretary of the Admiralty in the reigns of Charles II and James II. Without his assistance it would be almost impossible to drag earlier records of Epsom out of oblivion.

How far the more or less favored Commons honored sports in Pepys' day is not set down, but the manner in which the Peers of the period mortified the flesh in the cause of the public weal would have rejoiced the heart of Sir Wilfred Lawson himself, as from Mr. Pepys' dairy we learn that a big race was put off in July, 1663, on account of their lordships sitting the same day. Mr. Pepys seems to have conceived a lasting affection for the neighborhood of Epsom; he was a frequent visitor to the town for the purpose of drinking the water. Possibly the gallant secretary was like the "Scotch lover at Epsom," whose woes were put into a pensive lyric some half a century later. Wailed that unhappy Stephon:

"Woe to me, that mun I doe,
Drinking waters I may rue,
Since my heart sae muckle harm hefel,
Wounded by a bonnie lass at Epsom well.

Ise hae bin at Dalkeith fair,
Seen the charming faces there;
But all Scotland now gued feth defye,
Like a lipp to shew, and lovely rolling eye."

At what period the waters of Epsom, presumably bitterer than those of Marah, began seriously to ebb—never, alas! to flow again—we need not inquire. Neither is it necessary to disinter many dusty scrolls in order to ascertain when the solid foundation was laid for the mighty reputation as a racing arena, which the chalky flats of Epsom now enjoy. The drying up of the water was a slow process. Some sixty years after Sir C. Bunbury's Diomed, by Florizel out of Pastorella's dam, made a great chapter in the history of the turf by winning the first Derby. Horse racing had long prior to Diomed's famous year, been celebrated in song along with stool ball—the parent of cricket—and one or two other national amusements. Of racing it is, however, sad to relate, that the minstrels of the sport had felt it incumbent upon them to denounce certain malpractices, not altogether unknown in these days, which they properly considered ought to be put down. Thus warbles one of those turf Allan-a-dales:

"Another makes a racing trade,
And dreams of his projects to come;
And many a crimp match is made,
By bubbing another man's groom."

Diomed's year—1780—was remarkable for many things besides the brilliant chapter it inaugurated in the national sport. George III was King, when the forerunner of Judge Clark placed the winner and his eight followers for the first Derby. It was the year of the Gordon Riots, so a Blue Riband year in a double sense. While Diomed—well named because he was first of a race of monarchs—led the way in acquiring the prize, whereto Benjamin Disraeli and Lord George Bentinck sorrowfully applied the epithet which clung to it ever after. Lord George Gordon's no-Popery rabbles were the first Blue Riband Army—of the streets—where of we have record. The followers of the feeble-minded fanatic wore the riband in their hats. Dr. Johnson was an old man when Diomed won the Derby; he was then hard at work on the long-delayed lives of the poets. Garrick had retired from the active pursuit of his profession. We were then at war with all the most powerful nations of Europe, and we had by no means settled up with what were then called the American Colonies.

Four years after the first Derby, Charles Dibden composed a comic opera called "Liberty Hall," which was produced at Drury Lane Theater. One of the songs is peculiarly interesting, not only from the intrinsic merits of the words, but from the side light it casts on the racing of the period. It was entitled "The High-mettled Racer." Part of it ran as follows:

See the course throng'd with gazers—the sports are begun,
The confusion but hear! "I'll bet you sir"—"done, done!"
Ten thousand strange murmurs resound far and near;
Lords, hawkers, and jockeys assail the tir'd ear.
While with neck like a rainbow, erected his crest,
Pampered, prancing, and pleased, his head touching his breast,
Scarcely sniffing the air, he's so proud and elate,
The high-mettled racer first starts for the plate.

Fancy the Derby being styled a plate! The event had not made much advancement then as the national race, or Dibdin, who was a keen observer of the signs of the times, would not have used the term "plate" to describe the typical prize for which his typical "racer" started. The poet's aim was to show the decline and fall of a horse that had once held the highest place on the turf—first as a flyer on the flat, then as a hunter "in at the death," and finally a "hack on the road."

At last having labored, drudg'd early and late,
Bow'd down by degrees, he bends on to his fate;
Blind, old, lean and feeble, he tugs round a mill
Or draws sand, till the sand of his hour-glass stands still;
And now, cold and lifeless, expos'd to the view,
In the very same cart which he yesterday drew,
While a pitying crowd his sad relics surrounds,
The high-mettled racer is sold for the hounds.

Without pausing to take note of the celebrities, biped and quadruped, that took part about that time in the national sport, let us jump at once some half century and pause there, and even then so little had the great classic race fixed the attention of any large class of people that the only sporting paper then published dismissed the subject with the briefest of notices; and the phraseology employed was couched in the most unsportsmanlike of terms, a fault we regret to say, by no means obsolete in the present day, amongst so called sportsmen. In the earlier history of Derby anniversaries, it was usual between races to get up a subscription purse in order to induce pugilists to contest for the amusement of their aristocratic patrons. Thus does *Bell's Life* in 1823 describe a Derby day. "Of all the races in this race-loving, cock-fighting, fisty-cuffing, bull-baiting, beef-eating, hard-working, money-spending, jolly, comfortable, careless nation, none are so multitudinously attended as those at Epsom—Epsom famed alike for fun and physic. Thursday was the grand day—the day for the decision of the Derby Stakes, and perhaps greater interest was never excited by a single race. So early as 8 o'clock in the morning all London seemed to be in an unusual bustle, and for fully three hours after the population poured into Surrey in continuous torrents. Princes and peers, knights and squires, merchants and shopkeepers of all sorts; jockeys, handicrafts-men, beggars, blacklegs and thieves, with ladies of every caste to match, all rolling, or spanking, or jogging, or trudging, or bagging, in barouches, in tilburies, in buggies, in carts, in wagons, on horseback, on donkey back and on blistered feet, yah-hip for Epsom! By 1 o'clock there must have been at least 80,000 persons on Epsom Downs. What they all went for is best known to themselves, for certainly one-twentieth never saw the race at all." But we must pull up—each Derby has a history, a reminiscence of its own, some memory we might wish to revive, of Lord George and the Admiral, of t'onld Squire and the Wizard of the North, of Lord Palmerston and Mr. George Payne, or of any other of the thousand and one celebrities of the turf, who since the great race was founded have clothed it with dramatic interest, with picturesqueness and distinction. "The old order changeth," but the race is essentially the same. Other than the race the amusements are not what they were. Yet if navigators no longer pound each other into unrecognizable jelly for purses, subscribed on the spot, is not the nimble Welsher equally objectionable?

Though the thoughtful pastime of prick the garter has disappeared, and we no longer hear the facetious artist thus hold forth: "Here you have, ladies and gentlemen, the royal game of tidly-wink! One, two, three, the fairest game that ever you see! No one can guess where is the little pea. Them as doesn't bet can't win; and them as does bet is sure to lose," yet those who may regret the absence of such concomitants on Epsom Downs may find their counterpart in exponents of the three-card trick. Anyone who wanders over Epsom, with Samuel Pepys as a guide, will irresistibly be attracted to the scenes and deeds of Derbys of the past, more than of the present, and will enjoy, as it were, a converse with old time.—*Canadian Sportsman.*

Phallas.

The *Breeder's Gazette*, Chicago, in its last issue gives the appended gossip about Hon. J. I. Case's green colt:

The principal trotting meetings of the past week, and the only ones, in fact, worthy of special mention, were those held at Cleveland and Providence, and at the first-named place the performances were in several instances of an exceptionally brilliant character. To the stable owned by Mr. J. I. Case of Racine undoubtedly belongs the first honors. Jay Eye See, on the Saturday preceding the meeting, was driven a mile in 2:17½, the horse going the entire distance well out towards the center of the track, and trotting the first and last quarters of the mile in 33 seconds each. This performance should have impressed those who witnessed it with the idea that the stable was in fine form, but such does not seem to have been the case, as when Phallas, the half-brother and stable companion of Jay Eye See, started in the 2:40 race on the opening day of the meeting Index, a horse that W. H. Saunders—who brought out William H., record 2:18½—has in charge, was made a hot favorite in the pools. The track was slow, and after Index had taken the first two heats in about 2:30, Phallas was given his head, capturing the time in 2:29¼. The race was then postponed, and on the following day the brown son of Dictator and Betsy Trotwood won the fourth heat handily in 2:23¼. This was certainly an exceedingly meritorious performance for a six-year-old, but when in the final heat he was driven from wire to wire he astonished even those who had faith in his speed and stoutness by trotting the mile in 2:18¼, thus putting to his credit the fastest heat ever trotted by horse, mare or gelding in a maiden race against other horses. This is the kind of work that needs no eulogy. The figures speak for themselves more eloquently than could any amount of words. Phallas now stands head and shoulders above any young stallion in the country, and this pre-eminence is not alone in the matter of performances, as his breeding cannot be surpassed. Last fall when the colt, then a five-year old, trotted the Chicago track in 2:22½, a Californian who was present and noted the easy manner in which he accomplished the feat went at once to Mr. Case and made a cash offer of $10,000 for Phallas. Mr. Case at that time had no particular need for a stallion, Governor Sprague being in the heyday of youth and health, but when the breeding of Phallas was discussed he soon decided that the colt should remain his property. Sired by Dictator, a full brother to the "King of the Morning," Dexter, he acquired through that source the blood of Rysdyk's Hambletonian in the direct male line, while in the veins of his sire's dam, Clara, there was the American Star cross that has proved so potent in conjunction with that of the "Hero of Chester;" and back of it all came the blood of the McKinstry mare, the dam of the old-time and famous trotter, Shark. And in the maternal line Phallas had an equally proud lineage. His dam, Betsy Trotwood, was a daughter of Clark Chief, whose brilliant career as a sire was cut short by death before Croxie, Woodford Chief and others of his get who have made their mark on the trotting turf, had come into public view. Clark Chief was one of the best ones of Mambrino Chief, and the second dam of Phallas was by Ericsson, another noted son of Mambrino Chief, her dam being a daughter of Sir William, thoroughbred grandson of Imported Diomend.

Mr. Gordon and Mr. Hickok have come to a better understanding. The owner of Clingstone was seriously out of humor with Hickok after the big Boston race last fall. He claimed that the driver of Santa Claus worked against him and in favor of Edwin Thorne. Hickok explained that he had simply tried to win the race himself and that he was not in league with Turner, but the explanation did not smooth the ruffled front of Mr. Gordon. The coldness between the two outlasted the winter. Secretary Hall called upon Hickok at Cincinnati and then upon Mr. Gordon at Cleveland, and now the announcement is made that Clingstone will trot against St. Julien for a special purse at Chicago in July. The meeting of the two famous flyers will interest the public, and possibly cement the bond of friendship between their owners. Both horses have been on the complaining list, but they are going sound, and it is the popular belief that the race will not be decided in straight heats. St. Julien has shown the most speed but it is questioned if he is as good a horse as he was the day he divided honors with Maud S at Rochester. Clingstone proved himself a trotter of remarkable powers in his race with Edwin Thorne at Cleveland last summer, and if de does as well at Chicago in July he will come pretty close to winning first money. He will have a fair field, and if vanquished the cry cannot be raised that he had to fight a combination instead of one horse. Secretary Hall [illegible] be congratulated on patching up a truce between M[illegible] and Hickok. The race which he has arranged [illegible] *Turf, Field and Farm.*

Running at Petaluma.

Last Saturday afternoon there was a good attendance at the Petaluma racetrack to witness the three-quarter-mile and repeat running race between three-year-old colts owned in the district. There were three starters, Marion, Alice and Emblem. Before the start, pools sold briskly, with Marion a strong favorite at $30 against $10 for the field. Marion went to the front from the start, Alice lying back. Emblem made a push for the lead at the last turn but could not stay the pace, Marion winning easily, Alice a poor third. Time 1:19. The second heat was the only exciting contest of the race. Fred Carillo got away first and had two lengths at the half. Then he eased Alice up and waited for the field to come up, riding with good judgment. When he turned into the straight he made his run and from the last furlong home rode a splendid race with Emblem, Marion lying back. A dozen yards from home Emblem was coming up fast, but Carillo lifted Alice to the front and won by a bare throatlatch. Time, 1:19½. This performance made Alice a great favorite and a good deal of money went into the box at odds of $25 on Alice to $12 for the field. But the bruising heat was too much for the Wheatley filly, and the third heat she could not come back. Marion won as she pleased in 1:21, Emblem second, Alice third by a length. Alice took second money.

SUMMARY.

PETALUMA, June 23, 1883.—Purse $200, for three-year-olds owned in District No. 4; heats of three-quarters of a mile.

J. B. Chase's ch f Marion, by Hubbard—Electra		1	3	1
P. Carroll's ch f Alice, by Wheatley—by Cheatham	(Carillo)	3	1	3
C. Underhill's Emblem	(Smith)	2	2	2

Time—1:19, 1:19½, 1:21.

Tristan and Iroquois.

The son of Hermit and Thrift is now such a very famous horse that in view of his victories in the Ascot Gold Cup and the Hardwicke Stakes last week, we have given all his performances on another page. It will be seen that he was a great two-year-old runner, having won four good races early and run second in four others. In one of these winning races the youngest sister of Parole, Paw-Paw, was second. She was a good one, and we have always regretted her untimely fate. At three years old Tristan was not a good horse, and Peregrine and Iroquois defeated him with ease, in the Two Thousand Gnineas and the Derby, at even weights. In the Grand Prix of Paris Foxhall beat him a head after a desperate finish in which Fordham and Archer did all they knew. Tristan only won two little races that year and a Queen's Plate. At four years old Tristan was a grand horse over a distance of ground. He won eight races, and was second in the Goodwood Cup, giving Friday, the winner, a year and thirteen ponnds. At five years old he has preserved his form. He won the Queen's Plate at Epsom, two miles and a quarter. But at Kempton Park, at a mile and a quarter, he met the famous Irish horse Barcaldine. Tristan had 146 ponnds and the son of Lord Gough 143 pounds, and the latter won. Then at Ascot Tristan won these two great races, the Gold Cup and the Hardwicke Stakes. In the latter he met his old friend Iroquois at even weights. They had 138 pounds each, including 10 pounds penalty. Tristan won, but Iroquois beat all the others, including Dutch Oven, the great daughter of Dutch Skater and Cantiniere. We have been asked by two or three gentlemen what excuse we are going to make now. We do not think there is any need for us, and we are sure that none is required for Iroquis. Tristan is probably the bost racehorse in the world to-day over a good distance of ground at heavy weights. Now, here comes a borse that has been laid up for ahont a year and nine months, not with one ailment only, hut with nearly "all the ills that flesh is heir to. We consider that his running a good second to Tristan, nnder all circumstances of the case, was an almost marvelous performance. It reflects the very greatest credit upon his trainer and rider, Tom Cannon, and stamps the horse himself as one of the best in existence, if not the very best. This is just what we have always helieved him to be, ever since he ran Bal Gal to a head in the July Stakes, and won the Chesterfield Stakes the next day, beating Tristan and otbers. It is said that he is now to be brought home. Tbis may be prudent, hut if Iroquois himself could be heard in the matter, he would say as Tom Sayers said when "the anctioneer" was disabled early in the great battle at Faruborough, and his backers wanted to take him out of the ring, "Let me fight him a little longer." Iroquois would naturally and certainly be a better horse if he remained in Englaud in Cannon's charge than he was in this, his only race for twenty-one months. He was always one of those that required plenty of work, and improved under it. This race would inspire the trainer, aye, and the horse himself! with increased confidence, and the "Indian" of our heart and hope might yet again beat the great horse who went before him once at two years old, and twice at three years old. This is our "excuse." What do you all think of it?—*New York Sportsman.*

Dangerous Steeplechasing.

On the 13th at Coney Island, seven races were run in heavy rain and fog. Among the events was a steeplechase in which five horses fell, one eustaining injuries that necessitated hie being destroyed. Fortunately none of the riders were badly hurt. Steeplechasing is a transplanted English idea that is at aome disadvantage in elippery weather. The following is the *World's* account of the knock-down affair:

Handicap sleeplechase sweepstakes, for all ages, at $10 each, with $550 added, of which $100 to the second and $50 to the third; 11 subscribers; inside course.

C. W. Medinger's b g Joe Lewis, 5, by Hiawatha, dam by Jack Malone, 125 lbs (Pope) 1
Arthur & Co.'s hr h Strychnine, 5, by Strachino, dam La Reive, 135 lbs (Delaney) 2
W. C. Daley's b f Belle of the North, 4, by Harry Bassett, dam Penny, 128 lbs (W. Meaney) 3
Hopson Bros.' ch g Auburn, aged, by Alroy, dam Gazelle, 125 lbs (Green) *
M. Kenny's ch g Yonkers, aged, by War Dance, dam Gray Nun, 130 lbs (M. Kenney) †
M. J. Daly's ch g Ranger, 4, by Tom Ochiltree, dam Bessie Woodville, 144 lbs (S. Henry) †
J. McLaughlin's b g Hartford, 5, by John Morgan, dam Calomel, 136 lbs (J. Kinney) †
A. B. Purdy's ch g Wamba, 5, by Harry Bassett, dam Wombat, 125 lbs., carried 126 lbs (Ford) †

(*) Fell and broke his back.
(†) Fell or did not finish.
Time, 5:47½.

Pools—Strychnine, $25; Ranger, Belle of the North and Yonkers, $15 each; Hartford, $10; the field, $20. Betting—2 to 1 against Ranger, 3 to 1 each against Strychnine, Belle of the North and Hartford, 5 to 1 against Yonkers and 8 to 1 each against Joe Lewis, Logan, Wamba and Auburn. Mutuels paid $403 05.

The race—With nine horses announced to etart in the steeplechase there was considerable speculation aa to how many would finish, the general opiuion being that about half would fall and that two of the remainder would go wrong and that two would finish. This calculation was abont right. Mr. Purdy's Wamba fell at the first jump, which lost him a bet made last Saturday that he would go further in the race than Vivian, and as he fell at the same jump the het was lost. In the meantime Yonkers took the lead, and with his head down between his knees he made the pace fairly fast, with Belle of the North second and Auburn third. As they went ronnd the turn hy the stables Hartford got out of the course, losing so much gronnd that he was virtually out of the race. Without further accident they made a complete circuit of the conrse, but in the second circuit at the rails by the half-mile post, Ranger, then running second to Yonkers, fell, while Yonkers, after running in the lead to the rails on the Ocean avenue turn, fell, which left Joe Lewis in front, with Anhurn second, where she remained until reaching the same obstacle that Ranger did when she went down, which left Lewis so far in front that he was ahle to keep on and win by half a furlong in 5:47½, with Strychnine second, nearly a hundred yards in front of Belle of the North.

The success of Joe Lewis was so complete a surprise that only fonrteen tickets had been sold on him in the mutuels each of which paid the handsome sum of $403 05, the largest return in the mutuels in this vicinity since the famons Nickajack winning at Jerome. Of all those that fell Anburn was the only one that was hurt, and he so badly that as the crowd left for home it was rumored that he bad been destroyed.

The Dwyers' Luck.

The Dwyer Brothers get their colors to the front with great regularity in important Eastern events nowadays. On the 13th Barnes won the Coney Island Derby in a most hollow style, carrying off a stake worth $4,800.

Fourth renewal of the Coney Island Derby; at $100 each, half forfeit, with $1,500 added; the second to receive $200 out of the stakes; 55 subscribers; mile and a half.

Dwyer Bros.' b c Barnes, by Billet, dam Mercedes, 118 lbs (J. McLaughlin) 1
Preakness Stable's b c Trombone, by Great Tom, dam Duet, 118 lbs (W. Hayward) 2
J. E. Kelly's br c Jacobus, by Ill-Used, dam Nellie James, 118 lbs (Barbes) 3
A. Burnham's ch c Boccaccio, by Bonnie Scotland, dam Madeira, 118 lbs (W. Donahue) 0
C. Littlefield's b or br c Fond du Lac, by Glengarry, dam Hop, 118 lbs (Day) 0

Time—2:40½.

Pools—Barnes, $300; Trombone, $45; Jacobus, $40; the field, $25. Betting—3 to 1 on Barnes, 5 to 1 each against Trombone and Jacobus, and 15 to 1 each against Fond du Lac and Boccaccio. Mutuels paid $5 85.

Just hefore the race the fog lifted some, so that, although the horses when at the post were somewhat obscured, they could he seen. At the start Trombone was in front, but was almost instantly passed hy Barnes, who secured such a lead that the result of the race, barring accidents, was never in doubt, he leading hy a length and a half at the end of the half mile, with Boccaccio and Jacobus together, a length in front of Trombone and Fond du Lac. They ran round the turn to the qnarter, Jacobus second, with Boccaccio third, bnt just before they reached the three-furlong post Trombone moved up third and joined Jacobus, the two gaining somewhat on Barnes as they passed the grove. Barnes, however, soon shook them off, and at the end of the mile led by two lengths. Half-way rouud the turn by the stables Trombone reached Jacobus and the two ran a sharp race for nearly a fnrlong, when Jacobus gave it up, and as Barnes galloped past the judges, a winner by half a dozen lengths, Trombone was second, fully eight lengths in front of Jacobus, with Boccaccio and Fond du Lac beaten, away off. Time, 2:40¾. The success of Barnes afforded the crowd a chance to make a noise, and with loud applause they welcomed the return of McLaughlin and Barnes to the saddling paddock.

It was the fonrth time that the stake had been run for, and the third consecutive time that the Dwyers owned the winner, they having won it in 1880 with Hindoo, when he beat Baltic in 2:46½, and Runnymede last year, when he beat Forester and Carley B in the very excellent time of 2:37. The first year the stake was run—1880—Mr. George L. Lorillard's Grenada was the winner in 2:40½, Quitto, owned by the Dwyers, running second, with Captain Cottrill's Kimball third.

It is stated on the authority of Arthur Hooke, trainer for J. T. Wisdom, the owner of Ordnance, that the mare was but slightly hurt by the collision at Salt Lake races and will be all right in a short time.

Doves and Deer.

July 1 is a red letter day to the hunters of California for it ushers in the open season for deer and doves and from the weary, smoky city dozens of eager hunters will go far into the mountains and over the plains to get the first shot at honest game they have had since the ducks and geese went north and the great cranes sailed away majestically to the nnknown land. 'Tis a royal and nohle sport, hunting the deer, and grandest sport of all to chase the stag with honnds both staunch and true. How oft has been told the story of the chase in poetry and prose from the days of those famous Spartan hounds of Hercules and Cadmns:

"When in the woods of Crete they bayed the deer
So flewed, so randed and their heads were hung
With ears that sweep the morning dew;
Crook-kneed and dew-lapped like Thessalian bulls
Slow in pursuit but matched in mouth like bells
Each under each."

The primest literature of any age teems with the history of hounds and hunting. Who has not read "the first fytte of Chevy Chase," that grand old poem that stirs the heart like a trumpet and tells in glorious measure the ill that fell the Earl Percy when the noble Douglass found he and fifty-two score good archers and spearsmen brittling the deer in Chevy Chase. And the beautiful lines in "Scott's Lady of the Lake" opening:

The stag at eve had drunk his fill
Where danced the moon on Monan's rill
And deep his midnight lair had made
In lone Glenartney's hazel shade;
But when the sun his beacon red
Had kindled on Benvoirlich's head,
The bloodhounds' deep resounding bay
Came swelling up the rocky way.

What eportsman has not read the beautiful story of that rare hound and stag which lay dead side by side after sixty milee' chase and over, where, on monument of marble, to-day can he seen the lines:

Hercules killed Hart O'Grease
And Hart O'Grease killed Hercules.

And who has not taken interest in the tales of Robin Hood and his merry men who slew the deer and danced 'neath the greenwood tree, and the well-told tales of the ill-fated French king who hunted the deer and petted his favorite hounds while a Parisian mob demanded bread or blood and his Queen and dauphin, fearing for their lives, prayed for his coming that they might fly. During a deer hunt Norman Rufus met his fate, and Henry of Navarre used a deer hunt as a subterfuge to gather together a body of armed men to go out and battle against religious fanaticism and powerful tyranny. The history of the chase goes hand in hand with the history of the world, and whether it is Esau with his rude weapons chasing his deer afoot, or Gerald Howard, the boldest rider in the North Countree, its records teem with noble men and brave deeds. The olden glory of the chase may have departed; its gild and pomp are surely gone, hut the old instinct and the old henefits remain. No more do hundreds of courtly knights and high-bred dames sally forth, clad in green and gold, to see the hunt, as in days of the Merrie Monarch. The master of Her Majesty's staghounds has well nigh a sinecure, and the Cockney sportsman's Easter hunt after some poor stag, carted to the meet in a covered van, is a travesty on sport, hut here in California every man who loves the chase can find game in plenty and hunting grounds unlimited. Near the city most of the land is pretty well preserved, but farther afield, in Mendocino, Plumas, Lassen, Merced, Mariposa, Mono, San Bernardino, San Luis Obispo, Santa Cruz, and all the coast counties north of Marin and south of San Mateo, deer are plentiful and the hunt is free to all comers.

Much has been written during the past three years about the so-called unsportsmanlike practice of hunting deer with hounds, but the authors of snch nonsense must have formed their ideas from pot-hunters' disconrse in the village grocery and confined their knowledge of hunting to shooting hedge birds, or they never would have penned a word against the noblest sport of old—the chase. Deer stalking and still hunting are well enough in their way, bnt inferior sport to a good old-fashioned hnnt with hounds. Seated on a stump near some pool, the cautious still hnnter can pot deer like quail as they come down to drink in the dnsk of the evening, all nnconscious of danger. But that is sport as tame as smashing clay pigeons or lead-bespattering targets in some shooting gallery. It may suit the hide and market hunter, bnt the true sportsman who gives his game a fair chance will none of it. Some say, that hound hunting drives the deer beyond their reach, high up in the mountains. Surely the still hunter cannot claim even that poor merit, for thongh his style drives no deer away it is only hecause dead deer cannot leave his murderous precincts. Better drive every deer in the State into Colorado than slay them and send their hides East. The winter and cold weather will bring them all back again to their old hannts, for nature has marked the boundary line for the black tailed deer's habitat and beyond the line it cannot stay for long.

Several parties of hunters with their hounds will take the field with camping outfits early next week. J. C. Murphy, N. Murphy, J. Callahan and Henry Hart are bound for Meucino county. Uncle Ike Brannan and Bill Henderson of San Jose, with a partyfrom the city, will probably be out to Coyote creek by the 2d. J. K. Orr and some friends will take the field in Marin county about a week later.

Dove shooting affords excellent sport, especially along the bay and coast counties. It is pre-emminently the sport for the big-bag men, and as the stock of doves is practically inexhaustible, if the close season is properly observed, there can be no objection to these gentlemen gratifying their fancy for record making. Dove shooting calls for less trouble than quail or duck shooting. From a well-selected stump one can mark the birds flying low and fast for water, and do often times more execution than hy vigorous tramping. Some hunters prefer to shoot aloug the road from a wagon. From all accounts received we conclnde that doves are very plentiful this season, though there has been considerable out of season shooting. The peninsnla from San Bruno down affords as good sport as one can wish. The only outfit needed is a light shotgun, plenty of cartridges and a good big game bag.

An International Match.

On June 13 the following articles of agreement were drawn up and entered into between John S. Prince of Bostou, Mass., U. S. A., champion hicyclist of America, and H. W. Higham of Nottingham, England, champion bicyclist of England. Said Prince and Higham have placed in the hands of Fred Jenkins, editor of the *Wheel*, New York, who is acting as referee and stakeholder, the sum of $50 each, as deposit for a series of races to decide the international championship; the stakes to be $250 a side, the contests to be five, twenty and ten miles, the winner of two of these contests to be the victor; a second deposit of $100 to be made on June 20, and the final deposit of $100 more to be made not later than June 26. The first race to take place at Washington, D. C., June 30, 1883; the second race to take place not later than one week's time after the first; and the third race not later than two weeks after the second, at cities best suitable for each party. It is also agreed that of receipts resulting from said races the winner shall have two-thirds and the loser one-third; the races to be run nnder the League of American Wheelmen's rules, and the referee's decisions to be final. In case of any sickness or acoident, the referee to appoint a given date suitable in such cases, and obtain a doctor's certificate proving sickness or accident. Either party failing to comply with the above articles forfeits all money deposited.

Winchester, 32 Caliber.

June 23, at Shell Mound, Mr. Ed Hovey, in a practice with a 32-caliber Winchester rifle made a very pretty score. The shooting was 40 shots, off-hand, at 200 yards. He made an average of 45 points or 90 per cent. Following is the score of 180 out of a possible 200 points:

5 5 4 5 5 4 4 4 5 5	45	180
5 3 4 4 5 5 4 4 5 5	44	
4 4 4 4 5 4 4 4 5 5	43	
4 5 4 4 5 5 5 5 5 5	47	

Last week Mr. Charles Sontagg desiring to make a complete test of the waterproof qualities of the U. S. Waterproof shells loaded one with powder and immersed it in water for twenty-four hours. At the end of that time the powder was found to be perfectly dry and the primer intact. Young Mr. Golcher put the shell in his gun and fired it. Such a test as this settles the question of waterproof shells, for no hunter would be likely to keep his shells under water that length of time.

Mr. John L. Lee, owner of the schooner Whitewing, took his family for a cruise to Stockton last week. All that was left of the family after the slough musquitoes had satisfied their appetites returned to San Francisco by steamer, leaving Mr. Lee to work his way home alone.

On her return from Stockton the sloop Spray fouled an ark, doing some damage.

ROWING.

A Rising Sculler.

The following account of the Pullman Regatta came by telegraph nnder date of June 23:

"The sculling match on Lake Calumet at the village of Pullman this afternoon developed a surprise and a prodigy in the person of young Teemer, the McKeesport oarsman, hitherto unknown, hut who displayed his mettle hy winning a place in the final struggle yesterday, but who failed to keep up with either Hanlan, Hosmer or Hamm, owing, it is now claimed, to his inexperience in rowing in rough water. To-day in what has been termed the Consolation race, open to all but the three leaders of the day preceding, he covered three miles in 20:14, thus lowering Courtney's best record of 20:14½, and making the best three-mile time on record, and upon which his reputation has been hnilt. The conditions were perfect for fast time; the sky was overcast, and the lake was placid, and there was everything to enconrage the contestants to show at their best. Five thousand people were on the grounds. The seven men were ready when the word was given at 4:07, and went off together, having been placed as follows; McKay, Lee, Gaudaur, Elliott, Parker, Riley, Teemer and Plaisted. Gaudanr showed to the front early, with Riley second, Elliott third, the latter pulling a stroke of 36 to the minute. At the half-mile huoy Riley and Gaudaur were ahreast, hoth leading Teemer and Lee four lengths. Teemer then drew np and passed Elliot, who dropped out; Lee then forged ahead and turned the mile-and-a-half huoy first in 9:15; Gaudaur second, with Teemer, Riley, McKay and Plaisted, in the order named. At the-mile-and-three-qnarters huoy Lee made a claim that Gaudaur fouled him. Gaudaur pushed ahead, and passed the two-mile huoy at 14:03, leading Lee one-half length, McKay in close proximity, with Teemer on his quarter, and Parker and Plaisted well in the rear. Lee stopped rowing soon after passing the two-mile buoy. Teemer all this while was rowing in fine form, and passing McKay, pulled for Gaudaur with a stroke of thirty-two to the minnte. At the two-and-a-half-mile buoy Teemer went to the front and held it to the finish, Gandaur coming in second, two seconds later, with Riley, McKay, Parker and Plaisted following in the order named, McKay and Riley being well up to the leaders.

John Teemer, who, by the decision of the judges in the Pullman race, is given the best record ever made for a three-mile pull in a shell, is a native of McKeesport, Pennsylvania, and is eighteen years old. He is comparatively unknown in the sporting world. He has done most of his rowing on the Monongahela river. He has a powerful physique and was trained under the eye of Morris, ex-champton of America.

The douhle-scull race was called at 5:20 o'clock, with five entries as follows, and in the order given: Hanlan and Lee. Plaisted and Parker, Hosmer and McMay, Gaudaur and Kennedy, Weisgerher and Clayter. The story of the race is easily told: Hanlan and Lee led off at a 40 stroke, and were pushed for one mile by Hosmer and McKay, Weisgerher and Clayter keeping well up, Plaisted and Parker dropping back early. Hanlan and Lee passed the mile-and-a-half buoy in 8:42; McKay and Hosmer second, Gandaur and Kennedy third, Weisgerher and Clayter fonrth, and Plaisted and Parker fifth. After starting for home, Hanlan and Lee increased the lead materially, and hefore passing the second mile buoy ceased rowing for fnlly ten seconds. They started again, leading by aix lengths, and pulled strong to the finish, increasing the gap momentarily, and crossed the line in 19:37, Hosmer and McKay coming in twenty-six aeconds later, Weisgerber and Clayter nine seconds after them, Gaudaur and Kennedy fourth, and Plaisted and Parker fifth.

The aquatic editor of the Philadelphia *City Item* is not favorably impressed with the style of George Hosmer's sculling. Says the critic: "Hosmer is very much overrated. We saw him at Newark, on Decoration Day, and of all the awkward acullers, he 'took the cake.' He rolled in his hoat like a Dutch sailor, and went back so far on his stroke that we never thonght he would come up for the next one. We think his awkward style is partly owing to the rig of his boat, which does not admit of getting on mnch power except at the finish, where it is least wanted."

John Largan, holder of the latest English championship sculling cnp, offers to row F. Bubear on the Tyne river for $1,000 a side, allowing him $125 for expenses. He had been challenged immediately after his return from Anstralia by both Bubear and C. Brightwell, the latter wanting a atart, which Largan declined to give to a man credited with sculling the championship conrse in the fastest time on record, but stated that he would accommodate him on level terms for whatever amonnt Brightwell proposed.

Mr. John Davis of Windsor, Ont., judge for Edward Hanlan in the Point of Pines race, says the three-mile course over which the Hanlan-Kennedy race was rowed was undonbtedly correct, that the tide was full when the race was rowed and that Hanlan would not have beaten Kennedy so badly only that he was determined to beat the record for three milea. Mr. Davis also says that Kennedy is the best man in the United Statea.

The Ariel barge crew has been rowing in the Pioneer barge, which the Pioneer Clnh kindly loaned them. Notwithstanding all the hard thinga said of the Pioneera, it is highly aignificant that when the rival clnbs ever want a courtesy extended to them they do not ask in vain of the old organization.

Hanlan has notified the committee in charge of the arrangements for the regatta at Silver Lake, Mass., for the henefit of the Little Sisters of the Poor, that he deema it unadvisable to give an exhibition of rowing there until after his race with Wallace Rosa at Ogdensburg, N. Y., July 18.

The Long Bridge writers think Fred Smith has "the call" on the first place in the Fourth of July ahell race, hnt each of hia aix or seven opponents demurs, and Leander Stevenson saya: "By gosh, if Fred gets home first, he will have to row me better than he did the long fellow."

Robert Crowley of the Pioneer Club aculled a very fast trial over the Long Bridge two-mile course last Sunday and has entered for the Fourth of July regatta. The Pioneer Clnb will have four representatives in the aingle-ecull race and two in the wherry race.

A remarkable change has come over the Pioneer Rowing Club. In former years the club was full of crews and short of scullers. Now it has not a single crew in training but has a regiment of scullers.

M. Price is again able to row, and can be frequently eeen akimming over the water as if such an affliction as a broken leg was entirely unknown to him.

The City's Regatta.

The Regatta Committee of the Fourth of July Committee met on Tuesday and decided on the aquatic programme for the national holiday. It was determined to have the races rowed on the Long Bridge course. The time for entries was extended to this afternoon. The programme consists of a single scull race with three prizes, $50, $30, $20; professional wherry race, three prizes, $30, $20, $10; amateur wherry race, for $20 medal; lapstreek race, two prizes, $30, $20; first-class harge race, two prizes, $70, $30; amateur barge race for $40 trophy; whitehall hoat race, two prizes, $20, $15. There was some discussion ahout the propriety of accepting the entry of Henry Peterson, the champion shell rower, but the committee very properly disregarded the interferences of some outsiders, who tried to run the meeting, and decided that as Peterson is a waterman he has a perfect right to enter whenever he pleases in a waterman's race and show whether he is also a champion in Whitehall hoats. The so-called Pacific Rowing Association was treated in a very courteous manner hy the Fourth of July Committee, and now that the affair is over it wonld he well for the representatives of the association to ask themselves by what right they presumed to direct the actions of a lot of gentlemen selected in a legal and decorous manner to expend the public funds. No one will deny that the National Amateur Rowing Association is a more potent and influential body than the Pacific Rowing Association. What would he thought of the National Association if it presumed to step into the councils of the Regatta Committee of Boston and attempt to dictate to the representatives of the people what the length of the programme should be and how much should be given in prizes for each race. The Regatta Committee of the Hub would promptly rebuke such impertinence and would not take the time to call in the redoubtable John L. Sullivan, hut would themselves quietly, in the manner befitting their official authority, take the intruders hy the slack of their small clothes and throw them into the street. The Pacific Rowing Association is to be congratulated on not having estahlished its headquarters in the cultured city of Boston.

Regatta Entries.

The entries for the Fourth of July Regatta up to yesterday afternoon were:

Single scull race—Charles Peterson, Robert Crowley, Thomas Flynn, J. Sullivan, Louis White, Fred Smith, Leander Stevenson.

Wherry race—(professional) H. Dobbins, Dennis Griffin, P. Brennan, R. Lyne, Tom Murphy.

Amateur wherry—A. Schuppert, A. Tuckey, J. Hanghey, Thomas Brown.

Lapstreak race—South End club, D. Doherty, E. Quigley, W. Toner, W. Thomas.

Ariel clnb—Chas. Peterson, John Blake, Eugene Flanders, Wm. Wall.

Golden Gate Clnb—Daniel Griffin, William Dunn, Jno. Flynn, Thomas Stanforth.

First-class barge race—Golden Gate club, J. F. Walthour, J. J. O'Connor, H. F. Gettings.

South End Club—D. Doherty, J. O'Brien, G. Duplissee, W. Thomas.

Ariel club—Engene Flanders, Ben Smith, Wm. Growney, Fred Smith.

Dolphin Club—F. Wessing, G. Van Gulpen, E. Petison, E. Lutzens.

Amateur barge—Golden Gate club, F. T. Quinlan, J. C. Crowley, J. G. McCarthy, J. Watson.

Ariel Clnb—Ed Bray, P. Smith, F. Branch, J. E. Christy. South End clnb, J. Campbell, J. Daily, J. Cleary, H. Lenuon.

Whitehall boat race—Henry Peterson, Chas. Peterson.

The fast time made by Teemer in the consolation race at the Pullman regatta shows how utterly unreliable is the time test in boat racing. With the ability to beat the record eo easily, Teemer should never have been reduced to the necessity of rowing in a consolation race. It is not necessary to go as far as Illinois for an example of the unreliahility of the watch as a test of an oarman's speed. The other day, over the Long Bridge course, four scullers rowed against the watch, and the man who made the fastest time has never, in an actual contest, heen able to keep within hail of the others. His rapid gait under the watch was not the result of a sudden improvement, for the very next day he showed his old form when rowing in company. It does not follow, however, that becanse Teemer made a remarkably fast record, he must not be considered a good man. Until he does more than win a consolation race in fast time, however, he must not he regarded as good enongh to beat the wonderfully fast men who, at the present day, hold the front rank in the world of aquatics.

The Long Bridge oarsmen now think the siugle-scull race on the Fourth will be between Smith and Peterson for the first place and the wherry race between Dobbins and T. Brennan. Dobbina is rowing very fast and the only question is "can he stay?" If he can stay, the veteran of the Pioneers must he content to race for the second place with R. C. Lyne, who is regarded as the next man.

The Fonrth of July Committee has appropriated $150 for a Whitehall sailing race for the North Beach hoatmen, the start to be made from the cattle wharf at South Beach. Captain Bonner, H. C. Hoyt and F. Jerome were appointed judges, and the appropriation was divided ao as to give $75 to the first boat, $50 to the second, and $25 to the third.

The Dolphin Swimming and Boating club has elected officers as follows: President, H. W. Wieland; Vice-President, A. Rothkoff; Financial Secretary, J. E. Peterson; Recording Secretary, F. W. Wessing; Treasnrer, A. Klumpp; Captain, G. W. Van Guelpen; Lieutenant Captain, George Lee.

Lonis White, of the Pioneer Club, has gone to the country on business and will be unable to obtain any work in his hoat before the regatta on the Fourth of July. He will enter, however. On Snnday last he and John Sullivan, of the aame club, rowed a dead heat over the two-mile course.

The rowing regatta at Long Bridge on the Fonrth of July will he under the rules of the National Amatenr Rowing Association so that all competitors in turning their stakehoats must turn from port to starboard, that is to say, pull with their right hands and hack water with their left.

The Triton Swimming and Boating clnb has elected the following officers: President, Edward Barrymans; Secretary, James Artigues; Treasurer, August Schuppert; Trustees, Emil Kehrlein, Robert Oliver, Al Tuckey Sr., J. W. Heerdink and Adam Schuppert.

The amatenr ecullers from North Beach are practicing daily at the South End, and, judging from their performances, the amateur portion of the regatta will not he by any means the least intereating.

FISH.

Learn to Catch Your own Trout.

The labors of Seth Green, Roosevelt and others interested in preserving and perpetuating our best fish, are rapidly re-stocking onr trout streams, and every farmer who has a running brook on his place can now, at very little expense, have trout of his own to order. The farmer boy looks with wonderful admiration at the fly-casts of his city cousin, who has come to the country for his July vacation, hut if he will give a little time and attention, he can very soon acquire the art of fly-fishing, and excel his cousin, for he has more strength in his arm and more endurance generally. Hear what David Foster, to whom we referred last month, has to say:

It is a well-estahlished axiom that in skillful casting lies the chief condition of success. "He can throw a good line," is equivalent to asserting the proficiency of a rodster, whether he he fly, mid-water or hottom fisher. The ordinary routine cast is the first to he practiced and acquired hy the tyro. This is accomplished by hringing round the rod so as to describe a half circle from over the left shoulder, and delivering it directly over the right, the action emanating from the wrist and elhow only. It is a capital practice for the young student to cast upon a lawn or any closely-cut turf. Line to the length of the rod should first be delivered efficiently and neatly, when a hat should be placed as the receptacle of the fly; after the distances have been lengthened at intervals, a tnmbler may he substituted, and finally a small wine glass. When these different exercises have been successfully accomplished, with a fair length of line, the rodster may safely try his hand upon the hosom of the watery element. Lightness and precision follow practice and experience.

Care and practice in execution are required, after the rudiments of the art have been acquired; a non-observance of these is sure to materially interfere with eport. Perseverance is all very well in its place, but when unaided hy the exercise of due care and tact in presenting the lnre, it will meet with small result. The tyro shonld therefore practice assiduously, ever hearing in mind that much as he may admire and aspire to a nearer acquaintance with the scaly beauties, they are coy and ungrateful. The instant they become aware of his paying them the least attention, they move contemptuously away, and no matter how lovingly he drops them a line, all farther correspondence is thanklessly declined. It behooves him, therefore, to keep out of sight as much as possible, never allowing the sun to extend his shadow across the stream, always also avoiding conspicuously bright clothing; for notwithstanding the naturalist's persistent assertions as to the dnllness of the eyes of fish, owing, it is affirmed, to the skin of the head covering the pupil of the eye, the trout-fisher knows very well that in their own element they habitually exercise the most keen and discriminating powers of vision, when the water is clear; and any moving or brightly-colored objects outside it attract their attention.

An accurate eatimate of the elasticity of the line, etc., ahonld be possessed, and the striking motion accelerated or modified accordingly. The action reqnisite is a short, quick wrist-motion, commenced sharply, hut ended almost instantly and abruptly, like a quick movement of the hand in bringing a foil in fencing from tierce to carte. The hand holding the rod is turned upwards and backwards, whilst the arm is stationary when a short line is out, the movement being lengthened when the intervening line is either long or loose. One of the greatest charms of fly-fishing lies, undoubtedly, in the comparative absence of routine and sameness. The plier of the rod must adapt himself to ever-changing circumstances.

Never play a trout against a stream, as by that means an additional weight is thrown upon the line and tackle, which in all cases is particularly undesirable, as, in the event of the tackle holding to its tether, there is danger of the fish being forcibly torn away from the hook. A small fish drawn against the atream strains the tackle inconceivably.

Whenever a fish makes for weeds, roots or submerged timher at the rodster's aide of the river, do not potter with the reel, but haul in the line hy the left hand, allowing it to fall at the feet. Wherever weede are most prevalent in a trout stream, there the hest fiah congregate. Like pike, they love to secrete themselves in the green shades of aquatic vegetation, from whence they can dart upon their unexpecting prey. Whenever surface food ia sufficiently tempting, they leave their cover, generally rising upon the less frequented side of the water, where they have still the fnll benefit of the weed heds which intervene between them and their would-be captors.

Fly-rods are made of many different woods and dimensiona. It is a noteworthy fact, however, that dnring the two centuriea that have elapsed since Cotton first wrote upon what afterwarda developed into the most artistic and scientifio branch of angling, the length of the fly-rod has diminished hy more than one-half. Notwithstanding this diminution of size, and, we may also add, of weight, the casting powers of the rodster have been so much augmented that almost double the distance may now be neatly covered by tho adult adept that was effected with the nnwieldy weapons of our forefathers. The propelling power of the fly-rod depends largely upon the material of which it is constructed. The fine-grained woods of the tropics exceed our own in point of atrength, durability and weight-snstaining powers.

The line should he plaited of water-proof silk. The eight-plait water-proof fly lines have gradually, during the last forty years, superseded the old hair, as well as the hair and ailk lines.

The rod for pike is now made little more than one-half the former dimensions; the cumhersome tool of from fifteen to twenty feet is being discarded in favor of a more efficient implement of about nine or ten feet. The old swing movement for getting out the bait is quite surpassed hy what may he termed the spring motion; the fisherman's right angle is reduced by this change, his general stylo and comfort vastly improved, and success rendered more sure. The very largest fish are held more under control and are much more easily landed when a short and sturdy rod is employed.—*American Agriculturist.*

Last Sunday morning the pleasure steamer Edith left the Howard street wharf for Half Moon Bay and arrived at that place about 10 o'clock. The pilot that had been engaged disappointed the party and after fishing around the bay till 1 o'clock, the steamer put out to sea and fished till 4 p. m., catching in all 110 fish, aggregating 350 pounds in weight. The fishing was done in fifteen to twenty-five fathoms of water and the catch comprised codfish, one of which weighed 12½ pounds, sea trout, cabersonna, rock-cod, blue rock fish and flounders. As the water was very smooth the party had a pleasant trip.

HERD AND SWINE.

Success in Butter-Making.

Of conrse the first essential to snccessful butter-making is tbe possession of a good cow or herd of cows, not only such as will yield a good quantity of cream and that which will make a large percentage of bntter, but also that which will produce butter tbat has the right texture, color and flavor, when properly handled. Healthy, tbrifty cows are all-important factors in tbe successful dairy. Again, a nervous or ill-tempered cow will ofteu spoil ber butter when frightened or excited. And tbe dairymen should be sufficiently observant to know tbat tbe cream yielded by the different members of his herd requires abont the same amount of churning. If one portion of tbe cream does not cbange to butter as quickly as tbe rest it will be apt to leave white specks of cream in the butter, which greatly injures it, and the cream itself is lost. Tbis is more easily attained by baving tbe cows all of one breed, and even better if all are of one family.

Proper food is tbe next important requisite. Bitter weeds in the pasture, browse from the trees, mouldy hay or corn fodder, damaged grain, decayed vegetables, always impart something of their owu unpleasant flavor to the butter, or, at least, destroy the desirable pleasant flavors that should be present in fine butter. Excess of cotton-seed meal imparts a greasy appearance to the butter, while dark-colored or rancid lots give an oily taste to the dairy product. An excess of sborts in feeding often gives a crumbly character to butter and a lack of flavor. Experience and observation soon dictate tbe amount and proportion in which these feeding materials may be judiciously nsed. Impure water works as great injury to the butter prodnct as unwholesome food. Careful, gentle bandling of the animals to prevent overheating, frightening or sickness will commend itself to every tboughtful farmer.

Cleanly habits in the stable or yard and abont milking mnst always be observed. The ndder and teats should be kept clean, that no dirt from tbem may drop into the pail to impart its noxions qualities to the cream. The air in the stable or the milk-room should not be scented with decomposing manure heaps, decaying vegetables or other disagreeable smells. So sensitive is milk to the effects of strong scents that allowing a load of onions to stand on the barn floor over night has been known to affect the milk taken the next morning, and thns the whole churning was flavored. Tobacco smoke works special injury to milk, cream, or butter.

The making of choice butter demands the selection aud use of proper ntensils. Well made cedar pails, or tin pails that are not rusty or battered, to nse in milking; pans without seams; a good chnrn, that will chnrn tbe butter by heating the cream rather tban grinding it; a butter worker that will press out the buttermilk that is not taken ont by washing, and that will work in the salt without breaking the grain of the butter; a hard-wood bowl and butter paddle, and a neat butter print, must be provided, and a room prepared that can be well ventilated, without taking odors from the kitchen or pigpen, and where a regular temperature can be maintained the year round, either by cooling with ice or warmiug when too cold. If not fitted with the modern creamery improvements, it should have convenient racks for holdiug pans. Racks are superior to shelves, as they permit a better circulation of air around the pans, allowing them to cool more rapidly. A table to work npon shonld be conveniently located, and screens to keep out insects should be provided for windows and doors. A good supply of ice is desirable.

I have spoken above of pans without seams. A seamed pan no washing or scalding can clean properly after it has been nsed a few times. Be as carefnl as you please, and, if your milk stands until slightly sour, you will notice a discoloration of the cream opposite the seam, showing the presence of something which bas imparted color, taste and odor to tbe milk. Such germs of decay are in the seam as caunot always be reached or destroyed by hot water. Pressed tin is tbe best material for milk pans. Some dairymen have tried glass, earthen or porcelain dishes, but the extra cost, extra weigbt aud greater risk of breakage more than counterbalance any advantage they may possess over pressed tin.

Whether it be best to set the milk iu shallow pans, deep pails, or in large tanks such as are nsed at the creameries; whether to cool radidly with ice water and with the milk completely sealed against tbe admission of air, or to cool gradually by exposure to cool air in the small pans, need not be discussed at tbis writing, since first-class butter can be made by either method. The small pans have one advantage —tbe milk of each cow can be kept separate, and a watch cau be kept to ascertain the per cent of cream in each cow's milk, and also to see that the milk is all right when the cream is takeu off. I have frequently known the milk of a cow slightly affected by some disease uot noticed in the animal nntil the bad taste was fonnd in the butter to spoil the whole of a large cburning. If tbe milk had been tasted at the time the cream was taken off, tbat lot of cream would not have gone into the butter, and quite a saving would have been secured. The length of time it takes the cream to rise can also be observed aud if tbe cow's milk does not form a good cream before tbe milk gets very sour, the animal had better be taken from the berd.

From my own experience I think the cream should be taken off while the milk is still sweet, or at best, but slightly sour, and then should be allowed to sour a little before being churned. Each time cream is added to the pot it should be lightly stirred. Some dairymen like to add a little salt at the same time, but if tbe milk room is kept at the proper temperature tbis is not uecessary. Caro should be takeu that sonring of the cream does uot reach the point where any mould appears.

When ready for churning first wash all the wooden utensils used in handling tbe butter with cold water. If used very frequeutly tbese articles may be wiped with a wet cloth or sponge, then scald tboroughly in water but little, if any, below boiling point, aud in a few moments take from the hot water aud cool off with cold water. The cream should be at a temperature of about sixty degrees. If the room is much warmer tban that tbe temperature of the cream may he three or four degrees lower when churning commences. Cream slightly soured churns at a lower temperature thau perfectly sweet cream.

If the cream is very tbick it will be well to add a e sweet skimmed milk, aud the temperature of the cream y be raised or lowered by warming the milk or cooling it h ice before adding it to tbe cream. The thinuing of tbe cream makes the process of churning longer and more laborious, yet slow churning is generally best. More butter will be obtained from the cream when the churning requires thirty minutes than when it is done in a third of that time, provided the temperature of the cream is kept at the right point. T be tested in large dairies by tboroughly mixing and dividing a lot of cream in equal parts, and trying one-half each way. Divide by dipping out for each lot alternately, as, if poured out, that at tbe top of the pot may vary from that at the bottom.

When the butter is in the grain, draw off the buttermilk, or take the butter ont of it, and wash it in pnre, cold water at a temperature of abont fifty degrees. Put it through tbree or four waters, or until the water runs away entirely uncolored by buttermilk. Be sure that the water is perfectly pure, free from auy sediment or any bad taste. If tbere is any donbt about the purity of tbe water it may first be boiled and then allowed to cool, or hastened by the nse of ice. The addition of a handful of salt to tbe water is a great advantage also; it seems to remove the buttermilk faster and prevents a possible taint from water that is not qnite pure. The salt used for this purpose should be perfectly pure and cleau, as shonld that used in salting the butter, which is the next process.

Many good butter makers wonld now set the butter away until the next morning before salting, but if tbe butter is neither too hard nor too soft I should advise salting it immediately. As the bnttermilk has all been washed out of it, it will require bnt little working—just enough to incorporate the salt evenly through the mass. The amonnt of salt nsed varies, with different makers, from a quarter of an ounce to the pound to a full ounce, according to the demands of consumers. Some patrons require the butter entirely fresh and without any salt. Salting is a matter of fancy, as is also the matter of coloring. Many customers are prejudiced against the use of artificial coloring, while others insist upon having butter of the same shade at all seasons of the year. This may be accomplished by the use of the various preparations of annotto. They contain nothing injurious to tbe flavor or keeping qnalities of the bntter, or the health of the parties using it, being only the coloring matter of a South American nut extracted by steeping in a solntion of potash.

If the coloring matter is good, but a little is needed. My method of using it is as follows: Having finished chnrning, I weigh my butter and then weigh out the salt sufficient for it. If the butter is very light-colored and I wish to give a June color, I add a few drops of coloring matter to the salt, and stir it thoroughly in until the salt takes the color of a dark brown sugar or of maple sugar. Then use the mixture as the salt would be mixed without the coloring. If the butter is but little "off color," it will do to bring the salt to a straw color. It is one of those matters in which the bntter maker must be governed by the eye, and, if a good judge of colors, a few experimeuts will enable him or her to have the December butter of the same shade as the June bntter. I prefer mixing the coloring matter in the salt to putting it in the cream, because the color may be determined more exactly after noting the appearance of the butter as it comes from the churn. Again, by such mixing, the annotto is not wasted through coloring the buttermilk. I do not fancy the nse of carrot juice for coloring, as it often imparts the flavor of that vegetable to the butter, and, unless containing some preservatives, the juice injures the keepiug quality of the bntter.

Having finished making the butter, it should be set away in a cool place for twenty-four hours, that the salt and coloring, if nsed, may strike through tbe lump, which it will do in that time, even if not very thoronghly worked in. The next operation is the pntting np in packages and getting it to market. If regular customers are desired at "gilt-edged" prices, it will be well to have a distinctive mark (a mould with the maker's initials, or something of that sort), so that those who pay the high price are sure they are getting the same butter each time. The half and quarter-pound lumps, neatly stamped, are popular for table use. In sending to market, the boxes in which it is sent should be perfectly sweet and clean on the outside as well as the inside, for many would be nnwilling to take their butter out of a filthy-looking box, though tbey knew it was clean inside. Still better if a clean white cloth, wet in salt water, is placed under the butter and another over it, or if each lump is wrapped in cloth.

The boxes, if sent far in hot weather, should be packed in ice, but if delivered near home early in the morning a blanket wet in cold water may be a sufficient protectiou. Never allow any to be sent in your boxes or bearing your trade mark which is not up to yonr standard of excellence. If you make any such send it to some other market and let it go for market rates.

Will all this trouble pay? ask my brother dairymen. There are but few who will pay 75 cents or $1 a pound for bntter when an ordinary good bntter can be bought for 30 cents, but there are many who would pay 35 cents; some who wonld pay 40, and a few who would pay 50 or more to be sure of having butter of just the right flavor and just the right appearance when put upon the table, and if you want the custom of that class you must take a little trouble to get it.—*Correspondence American Cultivator.*

Dry Fodder in Silos.

The preservation of dry corn fodder in silos is suggested by the editor of the *Science News*. He thinks that it may be of advantage to arrange to have a small quautity of green corn fodder to cut np with the dry—say about one-fourth of the bulk of the dry—and to have it well mixed. We believe the dry fodder from ripened corn, put into silos and slightly moistened after being cut up, will give as good results as green fodder, when fed to milch cows. We have, he says, certainly secured as good results from well-preserved dry fodder, with our herd of cows, as any claimed by those who have fed the green from silos. The trouble has been that dry fodder, after tbe removal of the ears, has not been well cared for, aud sometimes when wet has been allowed to rot in the heap. If put into a silo, and well pressed, atmospheric air is to a large extent excluded, and it will keep and become soft, so that animals can eat it well. When very dry the hardened stalks are not easily consumed by cows. The amount of nutrimcnt, hydrocarbon compounds and nitrogenons constituents, is as large in the dry stalks as in the succulent, and, to say the least, is as valuable, providing it is made appetizing and digestible.

It costs but a trifle more to raise a good field of ripened corn thau a field of green fodder, and if the dry fodder can be secured so as to be as valuable as the green a great gain will result to farmers.

F. S. Pear, Palmyra, N. Y., milks his cows at six o'clock morning and eveuing, throughout the year. This milking at regular iutervals be regards as very important in increasing the flow of milk; but it requires pretty early rising for wiuter, at least an hour before suurise for two or three months, duriug tbe shortest days. His cows are kept in warm basement stables.

Blackleg is againu tronbliug tbe young cattle in Klamath county, Oregou, a number having died recently.

Devon Cattle.

In these days, when the fashion among breeders of neat cattle, especially among those who are willing to lavish much money upon the objects of their fancy, tends either to exalt the peculiarly bntter breeds, like the Channel Island cattle, or great beef and milk-producing breeds, like tbe Shortborns or Friesians, the Devon gets only an occasional good word from some old-time friend, or a passing notice, in a patronizing way, from others.

The fact is, the Devon is a breed of snperlative excellencies, bnt is not large. This, we may say, is its own fault, and to characterize as a fanlt a point upon which some of the chief merits of the breed depend seems inconsistent. We speak of the "little Devon," rather as a pet term, as we use diminutives in other cases, than as one of depreciation. They are indeed small cattle as compared with some others, bnt, judged by quality and profit, rather than by mere size, they take the first rank.

One who sees a herd of Devons for the first time is struck with their extraordinary beauty and uniformity, and sees at once tbat they differ from every other breed or stock of cattle with which be is acqnainted. They are of a brilliant, rich mahogany red, without white npon the body, but with white switcbes to their tails, and frequently with white ndders. Though heavy in carcass they are light-limbed and the older cows low set. Their heads are small and clean-cnt, elegantly placed and carried high, while they are adorned with long, light, tapering white horns, curving upward and outward. Their throats are clean, withers thin, necks free from dewlaps, chests very wide, and briskets projecting and hung low. In girth they are large for their height; very thick through the heart and unequaled in the crops, which point carries the fullness of the shoulders back to the ribs without perceptible depression. The backs are very level from the withers to the setting of the tails, which are long and delicately tapered. The loins are wide and mnscular, the hips wide apart, the back long to the rump, while the thighs are loug to the hocks, and in the twist well let down, yet in the lower parts they are thin, giving room between them for capacious ndders. Tbe soft flanks are nsually very low, giving the barrels a cylindrical, level look upon the nnder line. Devons are commonly heavily coated, and the hair is wavy, if not positively curly, in many cases. The skin is plastic and mellow under the touch, even when the animal is in low condition, but when in good order it is typically fine, not thin and papery, but elastic and yielding under the pressnre of the finger tips, and offering a mobile, unctuons handful if grasped over the ribs. The skin color varies, but not a few show a rich cream color, inclining to orange nnder the fore arm, and in the ears. Add to this description that the legs are short, small-boned and clean, that the whole carriage and style are elastic and graceful, with a promptness and energy rarely seen in neat cattle, while the large, lively yet placid and fearless eye indicates at once intelligence, confidence and repose, and we have a picture of a high-bred, beautiful and useful race of cattle, such as has no equal anywhere. The oxen are much trained, very qnick in their movements, fast walkers and untiring workers. The cows are deep milkers. The quality of Devon beef is hardly snrpassed even by that of the half-wild mountain breeds of Wales and the Scottish Highlands. It is the best beef in the markets, if well fattened, being thick over the choice parts, and having the fat marbled and interlarded with the lean in the most approved way. In the native breed of the Devon hills there is one of those remarkable cases sometimes found of a race formed as it were by nature —really, nnder the influeuce of the climate of the hills, the grasses and the waters, modified somewhat by both wild and civilized man, but remaiuing little changed by all recently operating causes within the historic period. This fact gives to the breed remarkable prepotency, little tendency to change, aud when changed by the intermixture of other blood (as no doubt often occurred before the days of careful breediug), tbe power to tbrow off the introduced peculiarities, and revert to the primitive type, wbich has tbus beeu preserved in its original excellence. Nevertheless, its good qualities have no doubt been and will continue to be strengthened and perhaps improved by high breeding as time goes on. The cattle of Sonth Devon and Snssex, which are similar and of a lighter red, were early introduced into New England, but were snbsequently largely crossed hy the high-bred North Devons, which have largely imparted their characteristics to them. When crossed with other breeds the peculiarities of the Devon are almost always dominant in the offspring. Thus many of the grade steers, while they are of a great size, appear, "handle," and cut up like Devons and hence the "Connecticut red cattle" are great favorites in American markets and always command, other things being equal, the highest prices.

Queer Ideas.

A professor of agriculture in one of our Westeru States tells a good story illustrative of the ideas held by some farmers coucerning improved stock. In one of his classes he had taken pains to point out, as he thought, clearly and moderately, the advantages of well-bred stock; had tried to show the great help the purchase of a good and well-bred bull would be to the common farmer who rears a fair nnmber of steers, cautioning against needless expenditure in this direction. In the way of an object lesson enforcing these teachings, he had takeu his class to help in the weighing of a lot of steers being fattened on the college farm. Among the lot were fair "native" three-year-old steers, weighing about 1,250, and some good grade Shorthorns, several months younger, weighing 500 pounds more. One of the students, a farmer's sou, expressed his belief in the superiority of the Shorthorns, and his feeling that if one did not have to pay such an exorbitant price as $50 or $60 for a yearling bull it would pay a farmer to buy one. In the same line, a breeder was heard to tell, only a few days siu ce, of a neighbor, who, after repeated statements of his wish to bny a Jersey bull calf, decided he could not afford to pay as much as $20 for one. It is not alone coucerning live stock that like ideas of appropriate prices prevail. Quite recently a wealthy and not unintelligent farmer spoke of a charge of $1 50 per bushel for choice, carefully-selected seed corn, as extortion and swiudling.

For the uext year or so cows and beef cattle will be exceedingly scarce in Sau Luis Obispo county, and meat will be correspondingly high. The county has been scoured from its northeru to soutbern lines, and from easterly to the Pacific Ocean by Cattle men buying up anything in the shape of cattle that could be had for love or money, until now it is next to impossible to procure a milch cow or anything for beef, and cattle are consequently scarce and high, and almost impossible to be had.—*Tribune.*

THE GUN.

At the Traps.

Last Sunday at Adams Point the Pacific Gun Club held its third monthly shoot for the club's first and second medals. Only nine members entered into the competition. The shooting was at twelve single birds, 21 yards rise with 80-yard bounds. The pigeons were a strong lot, but they were also incomers or else right and left quarterers. Most of the tailers got away, but the otbers were killed in good style. Moore was the first to shoot aud scored seven kills. Galindo killed eleven birds, but as he shot his fifth one on the ground he only made a score of ten, which secured for him the second medal, which is a very pretty piece of workmanship. Nine birds each were scored to Precht, Gonyeau and Stewart. Lambert killed eleven straight, but missed his last, a hard-flying tailer. John Kerrigan and W. J. Morgan acted as judges. Mr. Morgan is the treasurer of Butte county. Later on he took part in several sweepstakes matches aud had good success. Below is the score:

Moore	1	1	1	1	1	0	0	0	1	1	1	0	0—7
Galindo	0	1	1	1	0	1	1	1	1	1	1	1	1—10
Precbt	1	1	1	1	1	0	1	1	1	1	0	0	1—9
Gonyeau	1	1	1	1	1	0*	0	1	0*	1	1	1	1—9
Schwaren	1	1	0	0*	1	1	1	1	0	1	0	0	0—7
Stewart	0	1	1	1	1	1	1	1	1	1	1	0	0—9
Vallean	0	1	1	1	1	0	1	1	1	0	0	0	0—7
Lynngreen	1	0	-0	1	9	0	1	1	1	1	0	1	0—7
Lambert	1	1	1	1	1	1	1	1	1	1	1	1	0—11

* Died out of bounds.

The next was a $40 match between Walton and Moore, which was won by the latter with five against four kills ont of eight birds. Following this came a freeze-out. Morgan, Lynngreen, Stewart and Gonyeau scored an 0, while Vallean scored 1 and took the first money. The tie of tbe misses was shot off and Lynngreen got second purse. The next was a match between Lamhert and Precht, the latter being allowed four dead birds out of twenty to start with. Hurlingham rules govérued. Stake $20 a side. Lambert killed nineteen of the twenty to Precht's seventeen, including the four allowed, as below seen:

Lambert	1†	1	1†	1	1	1	1	1	0	1	1†	1†	1	1†	1	1	1	1	1—19
Precbt	1	1	1	1	1†	1	1	1	0	1†	1†	1	1	0	1†	0	1†	1	1—17

(†) Second barrel used.

The next was a six-bird affair, 21 yards, for purses of $15 and $5, for first and second best. Morgan took the $15 on a clean score and Gonyeau the second money on five kills. Tbe tally was:

Morgan	1 1 1 1 1 1—6	Lynngreen	0 1 1 1 1 0—4
Gonyeau	1 0 1 1 1 1—5	Valleau	0 1 1 0 1 1—4

The next sweepstakes proved quite interesting, as there were three ties. The shooting was at six birds each for $12 and $8 purses. The scores stood:

Galindo	0 1 1 1 1 1—5	Johnson	1 1 1 1 0 1—5
Bishop	1 1 1 0 1 0—4	Gonyeau	1 1 1 0 1 0—4
Morgan	1 0 0 1 1 0—3	Adams	1 1 1 1 0 1—5
Jones	1 1 0 0 0 1—3	Precht	1 0 1 0 w —2

The tie was shot off at three paira of pigeons. Again Galindo came to the front and took first money. Johnson and Adams tied agaiu on four kills and shot off a double-bird "miss and ont," Adams winning the second money with two kills to Johnson's one. The double-bird tie score shows:

Galindo	11 11 10—5	Adams	10 10 11—4
Jobnson	01 01 11—4		

The last of interest was at four birds. Jones made a clean score and Galindo and Adams tied on three kills, dividing second money. The score was:

Jones	1 1 1 1—4	Adams	1 1 0 1—3
Morgan	0 1 0 0—1	Gregory	0 1 1 0—2
Galindo	1 0 1 1—3		

The shooting throughout passed off very quietly and all had a very pleasant time.

Game Law Breakers.

Some ardent lovers of field sports were out last week to see how the qnail were doing. Alameda and Contra Costa counties were pretty well tramped over. The birds seem to have been late in mating bnt nests and eggs were found in plenty. Besides these one gentlemen, Mr. Briggs, found and destroyed a large number of quail traps newly set. In going over the hills to the Fish ranch last week, we met a youth carrying over his saddle, two bags stuffed with trapped quail. He made scarcely any attempt at concealment. He was going citywarda and evidently had a market in view. The fact that we were riding witb a friend whose business was so urgent that he could not stop made it impossible to arrest the scoundrel and sorrowfully we saw the fellow ride away with his booty. Half the battle against such game law breakers as this fellow would be fought and won when tbe persons who purchased the game were found. Can any of our readers give a hint as to these people? At present it seems that game lawa are almost nseless and will remain so nntil regular game wardens are appointed in each county. The qnail trappers, giant powder fishers, hide hunters and poachera generally, have all the best of the game. The Sunday aalmou fishers of the Sacramento, defy detection, though a well planned raid any Sunday could not fail to result in the capture of a large number of them.

At the regular shoot of the Gilroy Gun club last week Ed Wright carried off the honors, breaking sixteen clays without a misa. On tbe first twelve Wright, H. Frutig and Elmer Rea tied with clean scores.

First class land in San Jose Valley is held at $200 to $500 per acre, and if well set in fruit from $1,000 to $1,500. This ia mnch more than it would be worth for raising atock or dairying. It ia not proposed to cultivate fruit exclusively, nor even generally. We must have bread, butter and meat. What we do say is that the climate of California ia adapted to the raising of fruit, ao much so, tbat we can furuish fruit for half the United States, including Canada aud the great wheat country of the Nortbwest, takiug such things in the way of trade as they will get for their wheat in the European and American markets. Instead of 48,000 acres of laud in one farm with a few wretched huts on it, where the sheepherder revels in luxury when he bas a sack of flour, a piece of bacon and a bottle of his delightful whisky, we want 500 pleasant homea snrrouuded by fruit trees, and blessed with women and children, where the voice of song sball mingle with the hum of hees. There are a hundred such ranches in the southern part of this State and a few of them in this country. —*San Luis Tribune.*

THE RIFLE.

For the State Team.

The second competitive rifle shooting for places in the State Team, which is to compete at Carson on Sept. 17, took place last Sunday at Shell Mound Park. A stiff wind was blowing across the range. The score follows:

AT 200 YARDS.		AT 500 YARDS.	
C. Barere	4445544445—43	C. Barere	5455555454—47
George Fredericks	5434445445—42	G. Fredericks	4454554555—46
D. J. Kellogg	5554454555—47	G. Clark	4545434555—44
Thomas Carson	4554454444—43	T. Carson	4454554555—43
T. Cummings	5545554444—45	H. Sine	4433554555—43
G. Clark	4534544444—41	L. Townsend	5453355454—43
H. Sine	4445445444—42	N. Williams	3425534445—41
L. Townsend	3444454454—43	T. Cummings	5453444444—41
J. E. Klein	4444455554—44	J. E. Klein	3443554445—39
N. Williams	4444443445—40	C. F. Waltham	4552444442—38
C. F. Waltham	4444345554—42	H. J. Mangels	3444343224—38
H. J. Mangels	4444543544—41	A. S. Klose	5555244035—38
A. S. Klose	4444434454—40	F. S. Sherman	3342533505—37
F. S. Sherman	3345444444—39		

The scores of yesterday and the former competition foot up as follows:

Kellogg	179	Waltham	164
Cummings	175	Klose	159
Klein	169	Sherman	153
Sine	166	Mangels	148
Fredericks	165	Sproul	144
Clark	164		

Presidio Rifle Tournament.

Next Saturday, July 7, there will be a rifle tournament under the auspices of the Presidio Rifle Club at the Presido range. Those matches will be the order of the day. The first is for tbe Presidio Challenge Trophy, opcn to teams of eight men of any organized rifle club. The entrance fee will be $4 each team; 75 per cent of which will be divided into prizes. The second is the Company team match, with the same conditions as the first, entrance fec $2 50 each team. The tbird match is free to all members and associates of the club, with six cash prizes. Pool tickets will also be for sale at a very small price. The shooting will he done at 200, 500 and 600 yards. Several teams of the National Guard, the Police Rifle team and the Presidio teams will enter in the competion. Only military rifles will be allowed.

Wonderful Instinct in Bees.

Many interesting accounts have been written of the wonderful instincts of honey bees, some, in fact, which would almost tend to prove that they possessed reasoning faculties. An Australian hee-keeper contributes to the *Queenslander* the following interesting incident, illnstrative of the sagacity of these wonderful little insects:

"A neighbor of mine who keeps bees in barframe hives had robbed them of some of their snrplus stores, but noticing a few days afterwards the honey running from the entrance to the hive, and the bees clogged with it, he raised the top to ascertain the cause, when he fonnd the bees in so woful a plight that he knew not what to do, and was quite disheartened. He mentioned the matter to me, and I went to his assistance. I found the hive in a dreadful state; the frames were very large, and the weight of honey proportionally great; the combs had fallen down, and the honey been set free. Thonsands of bees were suffocated and smeared with honey, and it was a work of some difficulty to set matters right. On the floor of the hive, and floating in the escaped honey, were dozens of white grubs, which had evidently been forcibly drawn from the cells of the hees, and the reason they sacrificed their progeny appears to be that, finding themselves overwhelmed with the disaster tbat had fallen upon them, and having filled every available crevice with the over-flowed honey, they had found it necessary to empty the cells of the young brood in order to find space to store the balance until the wreck could be repaired. There was a reason, certainly, for what they did, and the fact has not perhaps been noticed before hecanse the people who kept bees for observatory purposes wonld never have allowed such a calamity to happen to them."

Action of the Horse's Foot.

EDITOR BREEDER AND SPORTSMAN: Iu reading aome of yonr articles on tips and toe-weights the idea has suggested itself that those who advocate the full shoe and depreciate tips or lunettes are either ignorant or insensible of the anatomy and economy of the horse's foot; for when we reflect that the entire weight of the animal is supported by a member corresponding to one of the phalanges of the human hand, the idea is natnrally suggested that, in addition to great strength, they should be endowed with cousiderable elasticity, else the concussion consequent upon so heavy a body driven at any degree of speed must necessarily be very destructive to the foot, and in fact the whole osseons and muscnlar structnre.

It we examine the structnre of the foot we find the coffin-boue "dove-tailed" to the walls of tbe hoof by delicate little ribbons or laminæ nicely adjusted to each other, and its inferior snrface supported by a convex sole and the frog; now if we trace upon a piece of cardboard the outlincs of the unshod foot when free from the weight of the body, and then again when sustaining its proportion of the weight, we find a very considerable difference in the size of our two tracings, showing the degree of elasticity of these several attachments. Now supposing that the foot be shod, the shoe or clasp we find has arrested this elacticity, and the flexiou of the pastern and the cartilaginous articulations of the joints above are compelled to perform the functious of all, hence laminitis navicular disease, corus, aplints and sprains. It follows, theu, that if tips leavo the foot in the best shape, upon tips the auimal can develop the greatest degree of speed.

REFORMER.

San Jose, Juue 24, 1883.

Vallejo has met with a loss. Tho *Chronicle* of last Monday aays: "The valuable aud reuowned trotting horse belonging to City Marshal Ford died Suuday evening. The animal had a record of 2:16, and this season it was thought the record would he wiped out. Marshal Ford refused several thousand dollars for the auimal a short time ago." Either the types have been tricky or else some one has stuffed the guileless Vallejo reporter. As a betting proposition a thonsand dollars to a greou watermelon is safe odds that Marshal Ford's horso did uot have a record of 2:16 nor anywhere uear it.

George V. James of Portlaud lately sold to Smith Guild of Reedsville, h m Lady Bashaw, 7, by Warwick's Bashaw, hy Green's Basbaw; dam by Snowstorm.

BASE BALL.

Haverly and Woonsocket.

Tbe game between the Haverly and Woonsocket clubs last Sunday, the thirteenth of the league series, was a poor exhibition, relieved occasionally by an effort on the part of a player to show what he could accomplish in the way of base ball playing when offered an opportunity. The chances which presented themselves for the display for fine playiug duriug the game were many, but not all who attempted succeeded in taking advantage of them.

Swanton, who scored the first run of the game, obtained his base on an error of Barnes, first baseman of the Haverly niue, and afterwards crossed the home plate on an error of Hardie, the catcher of the same club. Fiun, the new pitcher of the Woonsockets, secured a hit of Barnes when he could easily have muffed and allowed the batter to go to his first. Meegan drove a grounder to Donahue, which the latter could have stopped, but which he let pass, aud Meegan having a good start from first base ended by making a run. The uext batter, Sheridan, who sent him in, rau the bases successfully and the ball being sent to third base to check his career was not secured by the player guarding tbat bag and he also scored. The catcher of the Haverlys, Hardie, gave an unlooked for exhibition of what he is capable of, during his turn at the hat. He drove the ball to left field almost down to the fence aud scored the only home run made during the game. R. McCord in the third inuiug stopped a hit by Lawton in a manner that shows him to be capable of good work in the field. Meegan in the last half of the third inning again succeeded in sending the ball where it would he difficult to reach and it was not recovered from right field until he had had made the round and reached the third base. Meegan waited a few minutes on his base for an opportunity to get in and Carroll did not keep him long in suspense but allowed the hall to pass him just as Meegan began to show signs of impatience. Donahue at the beginning of the fourth inning gave Sohr, right field of the Haverlys, a chance to make a good play by sending a ball within easy reach of him, bnt the right-fielder failed to be equal to the occasion. Egan, who followed Donohue, got his first and went half way to second when he concluded not to go further at that time, and attempted to return. He failed to beat the ball on the scamper back. Hardie next made a good hit and afterwards tallied on one of Carroll's errors. Lamb was on the alert when Barnes went to the bat. The latter had no occasion to show to the spectators his McIntyre-like pace. Lamb had expectantly waited for an opportunity and when it arrived he made the best of it and seconded the hot one Barnes sent him in a manner that was creditable. The noticeable feature of the fifth inning was Levy's hit to center field. He made the bases successfully aud got in on one of Carroll's passed balls. Donahue, in the sixtb, hit heavily to Levy, who made a good stop. Finn went out to the same fielder. Sullivau and Lamb were the heavy batters in the seventh inning; the latter was caught out by Levy but Sullivan made the tour of the bases and tallied. Sheridan of the Haverlys got as far as third base, but went out in trying to reach the home plate. Lawton, in the eighth, hit a hot ball to Meegan, who made a pretty stop. Hardie caught Donahue out on a foul. The Woonsockets had Egan up for their last trial at the bat, but neither himself, Fiuu, nor Lamh succeeded in alteriug the score. The Haverlys did not play their last inuiug, the game at the close beiug in tbeir favor by a score of 8 to 3:

Earned runs—Haverlys 1. Home run—Hardie. Three-base bit—Sullivan. Two-base hit—Sohr. Struck out—Haverlys 8, Woonsockets 6. First base on errors—Haverlys 7, Woonsockets 6. Balls called—Finn 54, Meegan 57. Strikes called—Finn 43, Meegan 36. Wild pitches Meegan 1. Passed balls—Hardie 3, Carroll 11. Base on balls—Donohue. Double plays—Barnes and T. McCord. Left on bases—Haverlys 3, Woonsockets 4. Umpire—Van Court. Scorer—Hennessey. Time of game—Two hours and a quarter.

In tbe game between the Unions of Sacramento and the Californias, at Sacramento, on the 17th, Lawtou, who caught for the Californias, had one of his hands so badly injured that he was unable to occupy his place in the pitcher's box last Sunday, and to this, more than to anything else, is duo the defeat of the Woonsockets by the Haverlys.

The Emerson Base Ball Club has organized for tho season with the following nine: R. Nagle, D. Hesketh, D. Ambuster, E. Donahue, F. McCarty, G. Lewia, J. Coleman and E. Thomas, and D. Crowley captain.

In our last issue it was stated that tho Californias beat the Unions of Sacramento by a score of fifteen to six. It should have been the Unions beat the Californias by that score.

A game of base hall was played on the Presidio reservation last Sunday by the Emersou and Acmo Clubs. The game was won by the Emerson Club by a score of 6 to 1.

At Sacramento the Eurekas beat the Unions of that place by a score of twelve to seven. Carroll of the Unions made a homo run.

Farmers in Santa Cruz and Monterey counties are complaiuing of the rapid spread of sorrel, a weed or plant that quickly covers arable laud aud is difficult to remove. Neither cattle, horses nor sheep will eat it, aud its presence on a farm is most unwelcome. It was first introdnced into this county several years ago in oat seed brought from Oregon and planted near Soquel. Since that time it has rapidly spread in that sectiou aud almost destroyed many good farms. The only successful remedy for it is dry plowing, and restiug tho laud for a season.—*Pajaronian.*

Col. Harding of Humboldt county went west on last night's emigraut train with three cars of cattle—one of beef for San Francisco and two cars of work cattle for the logging camps at Puget sound. The Colonel says he expects to commence his regular fall shipments of beef on July 10 [illegible] have about thirty carloads of prime cattle per ma[illegible] fornia markets from that time on.—*Reno Gazette.*

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith

JOSEPH CAIRN SIMPSON, - - - EDITOR

SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J street.

ADVERTISING RATES.

Displayed, $1 50 per inch each insertion or pro rata for less pace. Reading Notices set in brevier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, Saturday, June 30, 1883.

The Close of the Volume.

With this number volume second of the *Breeder and Sportsman* comes to a close. How far it has met the expectancy of our readers we only know in part, hut from the encomiums which have been volnntarily proffered it is fair to infer that the verdict of a large majority is favorable. There have been words of cheer and encouragement, expressions of friendliness which have been the best reward for the efforts we have made. Letters from all parts of the country, from men in various stations and in a variety of pursuits, testifying their approval of the course that has been followed. These friendly missives have been received without solicitation or a hint that such would be acceptahle, and we heartily thank those who have sent them. It is not necessary to recapitulate what has been done, as the pages of the paper are the history of the past. What will be the conrse in the future will come more appropriately in the initial number of the next volume.

It may be as well, however, to state that the first year of a journal is nsually the most trying ordeal, and that point gained there is smoother sailing thereafter. It was a hazardons experiment at the outset, now the experimental stage is passed, and the foundation firmly laid to support the building. This has been greatly owing to the aid which so many have rendered, and which has been so cheerfully given as to heighten the obligations. We point with pride to the correspondents who have made this department of the paper so very interesting, and it is not a vain boast to say that there is not a paper of its class that ontranks it in this respect. Where all are so good it is unnecessary to mention specially or to award other than general praise. There has scarcely been a topic within the scope of this journal which has not called out contrihntions of exceeding value, and in many cases there have been essays which will attract attention for years to come. Referring to the paper itself as to the manner the work has been done, in the next number we will present in detail what may be expected in the future. Our readers can rest assured that no pains will be spared, nor reasonahle ontlay wanting, to make the *Breeder and Sportsman* worthy of their support.

The Victory of Director at Hartford.

John A. Goldsmith has kindly sent us a detailed description of the race which was won hy Director at Hartford. The hlack horse has many friends here apart from the ownership being on this slope, and so has the driver. As will be seen from the report it took six heats to decide it, and the Californian showed his stamina hy capturing fourth, fifth, and sixth heats. There are good prospects that there will be many races to credit our horses with before long, as they are reported to be doing well, and condition is all that is necessary for the performance to come np to expectations. At least that is our belief.

An Acceptable Present.

We are much pleased to receive an oil painting of Anteeo from the artist, Mrs. M. E. Freiligrath, Pinole, Contra Costa County. It was copied from the cut in this paper, and the coloring from the directions of a man who had seen him. It is certainly a capital representation, and though the shade is a trifle dark, it is so little [illegible] is remarkable how it was done from hearsay. [illegible] Sattenbach agrees with us that it is very meritorious and shows a decided talent for animal portraiture.

The Pacific Coast Jersey Club.

The first step was taken a few weeks ago to organize a club for the protection of the hreeders of Jersey cattle on this coast, notices of which have appeared from time to time in this paper. It is now perfected hy the adoption of constitution, by-laws and rules, so that the association is fairly under way, and there is not a shadow of douht of success following. As has been shown heretofore, there was an imperative necessity for the movement. The Eastern clnh is not only bound hand and foot with miles of red tape, hnt some of the rules wrought injustice to animals which were of equal merit to those that found a place in the "Eastern Herd Book." At the same time the importance is realized of not opening the door for animals of inferior hreeding and from all we can see in the rules governing admission both objects are gained. If no fault could be fonnd with the Eastern management there would still he a necessity for a herd book on this coast. There are very many who are interested in Jerseys, hnt without stock enough to take the trouhle of a long Eastern correspondence. A favorite cow or two eligible for admission, though there may he trouhle in ohtainining the evidence, especially when it has to be put in shape to go so far from home, with everything so handy as it will be here, the trouhle is redneed to a minimnn.

The Secretary, Major Rohert Beck, has an intimate acquaintance with the stock of the State. He can give information of just what to do, and an interview of a few minutes will save, perhaps, the writing of a score of letters.

As the full copy appears in another column of this paper there is no necessity for analysis, and people can judge for themselves. The names of the members are a sufficient guarantee that the affairs of the clnh will be properly conducted, and the nnmber of men already associated (thirty) to start with is a further guarantee that the association will be strong. We cordially congratulate the hreeders of this popular race of cattle on the capital start.

California Record Purse.

From conversations with some of the Golden Gate Association we learn that they put a different construction on the race which is called the "California Record Purse" from what we did in an article of a few weeks ago, and before the time of closing will change tbe wording of the conditions so as to make the meaning plainer. They are also confident that, when fairly understood, it will be an attractive feature of the programme, and that owners and the public will be alike pleased with the innovation. Races are contemplated, not trials of speed as we construed the advertisement, and the idea met the unanimous approval of the board of directors. There is no nse to rehearse our arguments which were hased on the language of the notice. That gave every horse a right to a separate trial, and there were other complications which would bave made a tangling and unsatisfactory affair. We sincerely trust that every objectionahle feature may be eliminated and that the races may prove a novelty as desirahle as they are different from any we ever beard of. There is not a body of men connected with the fairs of tbe State who are more deserving than those which have carried the hurden of this Association. It was a grevious, heavy weight at the start, and after one trial there are few who would have held on. The first year entailed an actual loss of $1,500 to eacb of the directors besides the loss of time, and the entailing of labor which would not have been done for a pecuniary consideration. The whole aim was to huild an institution which would be an bonor to the district—an honor to the State. That this voluntary labor, so heartily assumed, should meet with encouragement from every one is evident without argument. That owners and trainers of horses should lend their co-operation and give warm snpport to tbose who have unselfishly labored to advance the interests of this class is so palpahle that it would be a waste of space to consider that phase of the qnestion. That the *Breeder and Sportsman* will do all it can to assist we guarantee, and the criticism was written for that very purpose. We saw a stumhling-hlock in the way which could only be removed hy the ahrogation of the purse and a change for the better hy suhstituting something else that would meet the approhation of owners. We are in the hahit of writing plainly, and, when it is deemed a duty, denounce without thinking of other results than that of forwarding the canse in which we are so deeply interested. We would a hundred fold rather applaud than condemn, especially when the condemnation is against those who are so well worthy of praise as the directors of the Golden Gate. When the explanations are offered, in all prohahility there will a light appear which will change the aspect, and turn that which was reprehensible into a thing to favor. This we sincelely hope.

Majolica.

It was a raw forenoon in November, 1871, when we sat on the porch of the hotel at Fleetwood Park. There had been frosty nights, and the sun, wben it did shine, had little power to thaw the congealed surface and ahsorh the moisture. There bad been many heavy rains, and the track was sodden. At that time, too, it was held to be at least four seconds slower than the Prospect Park conrse. There was a down grade of twenty-one feet from the stand to the half-mile pole, and, of course, the same amount of rise to come from there home. The reverse curve at the point of rocks, the sharp turns elsewhere, added to the depressing influences, so that, altogether, it was as unfavorahle as could he for the "making of time." The sun shone on the porch and gave a little warmth; in the shadow there was an eager and nipping air, the effects of which could scarcely be removed hy the watery sunheams, and the stove was the first place selected hy tbose who had driven from the city. There was to be a race that afternoon between American Girl and W. A. Allen, and tbe harrow was at work in the effort to stir up the lazy soil, so that the meager vivifying inflnences could reach it. It was still rongh, however, as it would not be policy to apply tbe smoother until a short time before the race was called. Trusting to recollection, the impression is that Startle was driven from the city, hut, inasmnch as Murphy had some of Mr. Bonner's horses at the track, he may have occnpied a box there. He was then four years old, and a remarkahly fine specimen of the race. Strong, muscular, and yet showing a deal of quality, powerful quarters, and especially so for an Eastern colt of that age, and thongh his coat was long, to meet the exigencies of a New York winter, it had a gloss unusual to the season. A handsome colt all over, save that he was a trifle over on the knees, and of the rosy cross hy Hamhletonion from an American Star mare. Mr. Bonner drove him, encumbered with an overcoat, and again, if memory can be depended on, the scales showed that there was 186 good avordupois pounds in the sulky. There were at least a dozen timers and the mile was made in 2:28, the slowest of all the watches 2:28¼, while some of them rated it a quarter of a second faster than 2:28. There was a qneer circumstance in connection with it. Mr. Bonner had loaned his watch to a friend, reqnesting him to take the time very accurately, and be was so anxiously watching the colt that he forgot to start. "What shall I do? Mr. Bonner will think me the greatest dunce in the world." "Start tbe watch and stop it at twenty-eight," was the response, and the advice was acted npon. Taking into consideration the drawbacks, we considered it one of the greatest trotting performances ever made, and had we been offered the "pick of the world" never would have looked farther thau the handsome hay. At all events it was faster than any heat made in the afternoon when the track was mnch faster.

April 22, 1872, we received a letter from Mr. Bonner, containing the following paragraphs:

"By tbe inclosed paragraph you will see that Startle trotted on Saturday last, an extraordinary half-mile—1:09¾ to my road wagon. The track was very heavy, much more so than it was the day you timed him in 2:28 last fall.

"All our horsemen now pronounce him the most wonderful young horse in the world; hut I remember that you were ahead of all of them when you said last November that you would rather own him than any other horse in the world."

On the 30th of the same month he hauled the road wagon a half mile in 1:09, and not very long afterwards trotted the mile out in 2:19½. Seeing a notice in a paper that Mr. Bonner designed allowing him to serve a few mares, we intended sending Columhia, by Bonnie Scotland, to him, but Mr. Bonner informed ns that such was not his intention. We had the same faith in his progeny as in him, and have been much disappointed that the only one to his credit at the close of the season of 1882 was Portia (2:29½). The impression was correct, however, and the prediction verified in a startling manner. His son Majolica, the wires tell, has jumped at one leap to the top of his class. At the Gentlemen's Driving Park, the same track, though much improved, where we saw his sire trot as a four-year-old, he won the three-minute class in straight heats, gaining a record of 2:17, and at Island Park, Albany, he won the same class, the heats being 2:21½, 2:18½, 2:20, 2:21. We will anxiously await the mail accounts to learn more of this wonderful trotter.

Races at Sacramento.

Only a short time before the forms had to be locked, an advertisement was received from Robert Allen, the proprietor of the Sacramento course, and which will be found in the appropriate column. The purses are startling: $1,000 for a half-mile running race, $2,000 for 2:40

and $2,000 for 2:30 trotting, and $500 for 2:27 class, pacing. The days selected are the 1st of August for the running, 2d and 3d for trotting, and the 4th for pacing. As the trotting and pacing come after the closing of entries for the circuit, there is no danger of surrendering eligibility. The entries close on the 15th of July, and next week we will have more to say in relation to it.

The same mail brought the intelligence that the 2:09¾ was, as we surmised, a myth. There is no question, however, that he is a very fast horse, and it is also true that Mr. Eldred paid $4,000 for him. We are promised his history.

Respond.

W. P. Chester, P. O. Box 1,021, New York, asks for information which we hope will meet with a hearty response. That is that the pedigrees of trotters which have ever figured in a race he sent him. Mr. Chester is compiling a book to be called the "Complete Trotting and Pacing Record," the publication of which has been deferred until 1884 in order to make it as accurate as possible. The delay has been caused by the feeling that a more complete registry of pedigrees could be obtained by extending the time. We do not know of any work, present or prospective, that will be more valuable to the trotting interests than this. From our acquaintance with Mr. Chester we know that he will engage in the work with enthusiasm, and it takes a "heap" of it and a further backing of plenty of pluck to carry a work of the magnitude which this will be to a successful termination. The plan is to include all races from the earliest time to the date of publication, and however remote, or, from the present standpoint, however slow, to incorporate them in the volume. In order to aid in furnishing the desired information, any one who has a knowledge of the breeding of the Pacific coast trotters which is not well known, by sending to this office the matter will be published in the *Breeder and Sportsman*, from which it can be copied. The object of this is to give the pedigrees publicity, whore errors can be corrected, and thus insure greater accuracy than by sending direct to the compiler. Should there be repetitions of pedigrees already in the hands of Mr. Chester, no harm will be done, but rather strengthen them by the indorsement. Everything that will tend to the verification should be sent and any circumstances that will throw light on the subject appended.

A Correction.

Three very serious errors crept into the advertisement of the Third District Agricultural Association published in the two last issues of this paper.

First, all the races are open to all horses in the State, which should have been distinctly stated.

Second, trotting race, No. 9, for four-year-olds, is not confined to district horses, as stated, but is open to all four-year-olds in the State.

Third, all entries close July 20 instead of August 1, as stated in the advertisement.

We trust that these corrections will be in time to prevent any injury that the errors might have done to the association and beg to refer our readers to the corrected programme, which will be found in this issue.

!!! 2:09 3-4. !!!

The telegram brought the intelligence to a daily paper that a green horse at Sacramento, Wednesday, trotted a mile in 2:09¾, and the fractions are thus given: First quarter thirty seconds, second quarter thirty-four seconds, making the half-mile time 1:04. We will defer throwing our hat up until there is a corroboration, as it looks as though some one had been trying the credulity of the sender of the dispatch. It is also stated that the horse was bought just previous to the performance for $4,000, and if he can repeat the feat, his purchaser has "struck it rich," sure. Thirty seconds around the turn and thirty-four down the stretch was rather queer judgment on the part of the driver, reversing the usual order of management.

Romero.

Although Romero did not obtain a better place than third in the 2:20 race at Morrisiana, won by Captain Emmons, he had the satisfaction of beating him at Island Park by being second to Joe Bunker. Although the papers say that he was not in condition when Emmons beat him he fought the battle out, and in the opinion of many of the lookers-on he was entitled to the fifth heat, as the victor made several gaining breaks and only beat him a trifle.

Joe Bunker has beaten all our horses that he has met, and is evidently a fast and staunch horse. He is by George Wilkes from an American Star mare, so that the old, favorite combination is coming prominently to the front again.

EDITORIAL NOTES.

James Eoff, the veteran driver and horseman, has given up the half-mile track on the Cliff House road and advertises in another column for a tenant. The place was once a popular resort and many of the oldest turf memories of this State cluster around it.

The Los Angeles Agricultural Park Association advertise for a tenant for the track and grounds. The track is one of the best in the State and there are so many horses in the district that a good man cannot fail to do well with the place. The particulars can be found in our advertising column.

On Wednesday next, July 4th, the Olympic Club will give an open-air athletic meeting at their Oakland grounds. In spite of the severe loss entailed by the recent fire at the club's headquarters, the enthusiasm of the members was too strong for trouble to affect them, and they have gotten up this meeting in a most admirable manner. No pleasanter way of spending an afternoon could be devised than looking at the fine young fellows who compose the entry list competing for the cups and medals offered as prizes. Such an event East would call out at least 3,000 people. Let San Francisco raise that figure a thousand or so and help the club along.

Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

EDITOR BREEDER AND SPORTSMAN: Your answer to my inquiry received and noted. In hurriedly writing my statement perhaps I was not sufficiently clear, but will endeavor to make the matter plain. The information as to color was received in answer to a question from me, and was known some time before entries closed, and was given in the entry, which was in writing and read "C. H. enters b c Gimlet, pedigree unknown." I enclose you the ad. under which the entry was made. The society refused to pay the purse on the ground of his being a "ringer" and claiming fraud had been used in getting him here. All the points made by them were carefully given you in my former communication—i. e. His being taken off at Astoria, and the different yarns told by his driver at various times and while under sundry influences.

Portland, June 10, 1883. PORTLAND.

The above query, the same which was propounded by "Portland" some time ago, and which was not definite enough to warrant an answer, is now put in shape. A strong point in favor of the entry is that it was accepted by the association, and the only thing that could be required of the nominator was to show that the colt he presented was Gimlet. This is the only point that would justify the retention of the purse, as all the other objections are frivolous. There is nothing in the advertisement other than the usual conditions. The claim of being a "ringer" cannot be sustained, as the eligibility depended upon age, three-year-old, which does not appear to have been questioned. From the data submitted we are of the opinion that Gimlet is entitled to the money won.

EDITOR BREEDER AND SPORTSMAN: Please give me your opinion of the cross I am about to state, viz.: Two mares, full sisters, one a year older than the other; the eldest has a colt and that colt is bred to her younger sister. I don't approve of it, but would like to hear your views on the subject. PLAY BOY.

Stockton, June 28, 1883.

Answer—It would depend a good deal on the blood of the sire of the colt. Though too close inbreeding to be advisable, there have been many instances of still closer resulting favorably.

Cruise of the Spray.

Stockton is so ambitious to become the headquarters of the yacht fleet that when a stray sloop braves the perils of the voyage and the tortuous windings of the slough and makes a landing near the town, the leading citizens turn out *en masse* to do honor to the daring voyagor and the *Independent* editor immediately writes a lurid leader on the advantage of Stockton as a safe harbor for deep sea ships. It was so last week when the sloop Spray, owned and commanded by Kent Catton, warfed up the slough. A banquet was given in honor of her daring crew. Johnny Gall was host on the occasion and in that capacity did the honors in a manner that quite eclipsed the reputation he had made as an entertainer during the late Democratic Convention held at San Jose. Apologizing for the absence of his running mates Jim Budd and Gibson, Gall opened the festivities by proposing the health of the Spray's crew, to which Kent Catton responded. J. E. Brown responded to "The Old Boat Club," Mr. Stangroom to "The Ladies," Captain Brooks to "The Merchant Marine, That Makes Stockton What She is," "The Land We Live in," by W. R. Johnson, "The Shaved Head Boat Club," by Lieut. Colonel Shirley and "The City of Stockton," by W. M. Hickman.

The Guernseys are not a numerous family. There are about 4,000 of all ages on the Island of Guernsey, and about 1,200 in this country. The pedigrees of most of these are recorded in the "Herd Register" of the American Guernsey Cattle Club. The number exported from the island is about 1,000 annually, the larger percentage going to England, where they have long been used to color the milk of other breeds. For this purpose they are without a rival as a brood. The English dairymen discovered this fact many years ago, and acted on this knowledge by taking nearly all the surplus Guernseys the island farmers could spare, when very few were exported to the United States. The extreme richness and intense color of the milk and cream are the most positive recommendations of the Guernsey breed, though they possess other desirable characteristics that commend them, especially to that numerous class whose acres run from 50 to 200, and who pursue a plan commonly designated by the term "mixed farming."

THE KENNEL.

A Distinguished Arrival.

From the steamship Circassia has recently landed at the port of New York one of the finest specimens of the Scotch deer, or staghound, which has ever been imported. He is from the celebrated kennels of his Grace the Duke of Sutherland, a gift from the Duke to Mr. G. S. Page, Vice-President of the American Fishcultural Association, who, our readers will remember, successfully transported, a year ago, a number of black bass to Loch Brora, in Sutherlandshire, in the highlands of Scotland. This magnificent animal is a practical illustration of reciprocity. The pedigree which we give below will be read with interest. Dunrobin is now luxuriating at Hillside, Stanley, Morris county, New Jersey, the residence of Mr. Page, and has already made the acquaintance of Neptune, a grandson of that most famous greyhound, Master Magrath. The following is the pedigree: Deerhound Dunrobin, by Duke of Sutherland's Torrom, Torrom by Wallace out of Loyal; Wallace, Lord H. Bentinck's breed, Loyal, by Stag out of Kendesch, Stag by Gillespie's Torrom out of Loyal (No. 119), Kendeach, by Cameron, of Lochiel's Pirate (No. 141) out of Loyal (No. 119), Gillespie's Torrom by McDonald's Glengarry out of Gordon Cumming's Lioness. Dam Lord Fitzhardinge's Loyal, by Tom (No. 9,742), Tom by Duke of Sutherland's Pirate out of Shelloch, Pirate by Cameron, of Lochiel's Pirate out of Loyal (No. 119), Shelloch by Cameron, of Lochiel's Pirate (No. 141) out of Loyal (No. 119). The same steamship also brought some beautiful Hamburg fowls, a gift to Miss Florence Page from Lady Kemball. Dunrobin is the name of the seat of the Duke of Sutherland in Scotland.—*Forest and Stream.*

Queer Collection.

One of the daily journals recently gave the following unique description of the opening day at the New York dog pound: Yesterday the United Kennel Club of the Streets of New York opened its annual bench show at the foot of Sixteenth street, East River. The entries were numerous and at 2 o'clock 108 dogs of every degree of nationality and respectability were on exhibition. Superintendent McMahon is the judge, and John Fitzgerald and a corps of able assistants were present to give information and make the dogs and visitors comfortable. The principal specimens of the fine breeds on hand were terriers, bone-hunters, stove-minders, stoop-warmers, sausage collies, brick-stoppers, boot-jack-dodgers, seldomfeds, hungries, nohair, notails and nogoods. There were also several which walked on three legs, a number that walked on two and six or eight that couldn't walk at all and lay down in disgust. Five or six of the very finest specimens were so very fine that visitors had to look twice to see them. One peculiarity of this show is that no prizes will be offered, and owners who wish to withdraw their dogs must pay the sum of $3 within forty-eight hours after the entry is made, or their pets will be sacrificed. Another novel thing about the show is that a separate exhibition, all new entries, is to be held every day until the first of November. All day long yesterday the gentlemen were scouring the city for specimens for the exhibition, and it must be acknowledged that they were efficient, when it is taken into consideration that before 2 o'clock they had secured a cool hundred, with eight over for good measure.

Exercise Wire for Dogs.

Many persons have no room for their pet dog to exercise in. Sportsmen often have one or two dogs which they use during gunning season, but which must be kept on the chain almost continuously, between seasons, to prevent them from being lost or stolen, or getting into mischief. The following device will be found useful in exercising dogs: Two solid posts may be planted twenty feet apart, near the dog house, and projecting about six inches out of the ground. Twenty feet is a good average distance. A stout wire may be stretched tightly between and fastened to these posts, first slipping the end of the wire through the last link of the dog's chain. The dog is fastened to the chain, and soon learns how to use his comparative freedom. Old telegraph wire is a good thing for the purpose, and instead of slipping the wire through the link of the chain, a stout hook may be made to fasten the chain loosely to the wire, as it will not wear out so quickly, the friction being very great while the animal is running up and down his twenty-foot track.

At an adjourned meeting of the Eastern Fields Trials Club, the treasurer's report showed a balance of over $900 in bank, and financial condition flourishing. The following gentlemen were elected regular members: F. A. Perkins, Providence, R. I.; B. F. Wilson, Pittsburgh, Pa.; J. W. Orth, Boston, Mass.; Howard Hartley, Pittsburgh, Pa. The secretary reported that Messrs. Luther Adams and D. C. Borgundthal have positively accepted to act as judges at the coming field trials, and that Mr. John C. Higgins has been requested to act as third judge, but his reply had not been received up to that time. It was agreed that the secretary should mail running rules and Derby entry blanks to all parties who entered in the National American Kennel Club. Entries to close July 1 for all American entries, and August 1 for English entries. There will not probably be another meeting of the club before September.—*American Field.*

Mr. E. Leavesley of Gilroy offers for sale in our advertising columns some fine English setter pups at reasonable prices. Mr. Leavesley has some of the best field dogs in the State, and we know that the old gentleman would sooner cut off his right hand than sell a poor dog or misrepresent the breeding of one. No man living has had more experience with setters and pointers in the field and all around than Mr. Leavesley, and what he does not know about breeding has not yet been made public.

The English Kennel Club announces that the twenty-first annual dog-show under management of the society will be held at the Crystal Palace, July 3, 4, 5 and 6. Provision is made for 161 classes. The judges are Mr. C. E. Holford, Mr. Edgar Hanbury, Rev. J. Mellor, Mr. J. H. Salter, Mr. S. E. Hurley, Mr. A. N. Radcliffe, Major Willet, Mr. R. Vicary, Mr. C. H. Colmore, Lord Alfred Fitzroy, Mr. James Locke, Mr. J. Percival and Mr. J. W. Berry.

Messrs. Luther Adams, D. C. Borgundthal and John C. Higgins are named as judges for the coming field trials at High Point, N. C., to be held in November next, by the Eastern Field Trials Club. The Secretary, Mr. Washington A. Coater, of Flatbush, L. I., announces the receipt of numerous entries in the Derby, and anticipates many before July 1, date of closing.

YACHTING.

An Open Question.

A correspondent of the *Forest and Stream* has taken a dislike to leg-of-mntton mainsails, and thus discourses:

"Lurline is afflicted with the horrible incongruity of a gaff foresail and Bermuda main. Surely esthetics need an apostle to check this inroad of monstrous ugliness. This ungainly cross, a sort of yachting "yaller dog," is, we think, in high favor among the San Francisco yachtsmen, upon no better grounds than the impression that a triangular sail keeps the center lower than a gaff sail, an impression which a little bit of sketching would quickly remove. We know that some who have tried the Bermuda return with unstinted praise in its behalf, but we also know that human nature is much the same on one coast as upon another, and that some yachtsmen here sent out under a night shirt hoisted to a broomstick would declare the device a superb conception, and report a gain of several knots in speed. Climate may be held accountable for some things, but it cannot very well cover claims so diametrically opposite to experience in the East, which is all in favor of broad-headed sails. The fault with California rigs is their lofty, narrow cut. Less hoist and more head would lower the center of effort and give better driving sails. When this was first set forth in *Forest and Stream*, intense opposition to such revolutionary counsels was manifested on all sides, but in due time the very changes we proposed have come to be regarded quite a matter of course. As experience in San Francisco is limited to sails of lofty, narrow cut, some one can earn laurels by acting upon our hint, and receive our dying gratitude besides for sending into Coventry the mixed-up rig of "yaller dog" extraction.

So the San Francisco yachtsmen have their sails too high and too narrow in the estimation of this expert, who speaks in such strong terms of the Bermuda sail. It is very funny that every new yacht the builders turn out knocks half a dozen theories on the head, and the fact that the Nellie, with a Bermuda mainsail and gaff foresail carried the whip more than two seasons, kinder endeared that style of rig to the San Francisco builders. However, Mr. Spreckels has discarded his Bermuda and given the Lurline a gaff and our friend of the *Forest and Stream* will be happy.

The Casco has been for a week to Monterey and thereabouts. They had fine weather, and a good time was enjoyed by those aboard. She is soon to go to the Cordell Bank on a fishing cruise.

The Lolita has been on the ways for a general overhauling. Though seven years old, everything was found sound. She now has on new copper, paint, and is in good order.

The little schooner Virgin has had her sails bent after having been laid up a long time. She was out last Sunday.

The Lolita has been up Suisun creek, into Wells' Slough, with Commodore Eckley's family on board.

The San Francisco Yacht Club will not go to Napa this year on the Fourth of July.

Commercial Fowls.

Under this head, Mr. Harrison Weir, a great English authority, discusses at considerable length the various breeds and crosses of fowls to raise and fatten solely for the market. He is most in favor of a cross of the old-fashioned English Game-cock with the Dorking, the Light Brahma, or the Buff Cochin hen, in the order named. These are small in the bone, broad in the breast, fleshy, beautiful to behold, and very hardy. The full-grown cocks of this cross weigh from nine to ten pounds, the hens are good layers, and the flesh of both is excellent.

Like most reliable English writers, he prefers for a pure breed the white-legged Dorking, not only as super-excellent for the table, but profitable for general market purposes. After the cross of the Game-cock, he prefers the Dorking cock with the Light Buff Cochin hens. The chickens of this cross lay earlier than the pure Dorkings, grow faster, and, when grown, appear larger. The cross of the Dorking with the Light Brahma hens gives a more compact fowl than the Cochin cross, and, on the whole, is preferable. Of a big, coarse fowl, he says what we all know, that it eats more and sells for less in market than the better bred. Choice table fowls are not so plentiful now in England as they were some forty years ago, when one used to see in the Newgate and Leadenhall markets, row on row, tier on tier, of bright, white-skinned, white-legged Dorkings and Game fowls, or crosses of both. He thinks the poultry shows have been an injury rather than a gain to the English people, for the decisions are more for fancy than for real value, and this, unfortunately, is to some extent true of the poultry judging in America.—*American Agriculturist.*

Up Coast Briefs.

The Cloverdale *Reveille* says that evergreen millett as a stock feed has been tried in that neighborhood and is a complete failure.

The fair of District No. 12 will be held this year at Willits, Mendocino county, commencing Sept. 24, and continuing six days.

John R. Truitt of Sonoma County has a Spanish Merino ram that sheared 17¾ pounds last week. He was sheared last fall.

The spring wool clip in the Russian River valley is exceptionally good.

Farmers above Cloverdale complain of the pest of rabbits.

The total acreage of hops in Mendocino this year is 1,600.

The City of New York, on her last trip, had a consignment of 172 American Merino sheep, which were insured for $25,000. They were selected with great care for breeding purposes for the colonial market. The Australian breed of Merino has gone toward fineness, and the American, if not so fine, gives greater weight and density. Other shipments are to follow, as the Australian breeders have engaged the deck space of the mail steamers for twelve months in advance. There is one great drawback to the prestige of California Merinos—the neglect of California breeders to keep a register of their flocks. This is regarded as so serious a drawback that, despite the merit of the sheep, they are not marketable for breeding purposes in Australia. When picked rams cost about $2,000, and ewes $400, the magnitude of this over[illegible] is apparent. The choicest specimens of the shipment [illegible] the City of New York were purchased in western New [illegible] and Vermont.

A Glance at Santa Cruz.

A pleasanter trip than a Saturday-to-Monday jaunt to Santa Cruz cannot easily be found, and coupled with that fact, the trip is so inexpensive as to be "within the reach of all," provided they happen to hail from these corporate limits or parts adjacent. The ride down would give one almost a surfeit of fine and romantic scenery were it nor that every new mile opens up an entirely new scene in the panorama of beauty. Leaving the city at 4:30 p. m. last Saturday I reached Santa Cruz before 9, and meeting Swift of the Ocean house, asked him how best to put in the interval before bed time. For an answer Swift rapidly ran over a list of the amusements the place afforded. "A moonlight ride to Big Trees, a walk to the beach, or around the cliff, a small poker game in the bar parlor and a big game up stairs, a game of billiards, a hand at cribbage and, last of all, a hop in the assembly room at the Ocean house." The last seemed to offer the most fun with the least risk, cards being out of the question, so into the ball-room I went and was soon put at ease by the hearty greetings of some kind city friends. An Ocean house hop, such as this one proved, is rare fun for all hands. Plenty of propriety without any restraint, music fairly bad, a good dancing floor and as jolly a lot of young ladies as one could wish to meet. Looking on is my best suit at any game, and rare fun I had watching the dancers. Everyone seemed to be having a good time, except one pale youth, who moped in a corner friendless and alone. His name was Cehieflin, his home Los Angeles, and he had evidently come to Santa Cruz with the intention of carrying on a first-class lady killing campaign. Of all the gentlemen present, he was the only one in full dress, which made him a most noticeable figure and a little extra attention was paid him on account of his having on a pair of brown dogskin gloves in lieu of the white kids usually donned with evening costume. On his rather narrow bosom he wore a large piece of crystal which refused to look like a diamond even in the glare of the gas, and his hands were busily engaged all the evening through in the sisyphian task of keeping his white neck tie from flying the track and halting over his shirt collar. For two mortal hours he leant against the door jamb, casting tender, though rather squinting, glances at the young ladies as they passed him in the dance. At last his patience was rewarded, and he secured a partner, who laughingly told a friend after the dance that she only consented to sanction through a quadrille with him to see if he was really alive. His dancing was as remarkable as his costume. He developed a wonderful faculty of giving surprises. To him "ladies chain" seemed to mean "turn your partner," and on one occasion "hands across" was mistaken by him for an order to introduce a few jig steps into the dance. Next day this youth appeared as a real live dude. Before breakfast he wore a light suit. After breakfast a bright green suit and a silk hat. For dinner he dressed in a black frock coat, and during the evening he wore a golden hued suit, fitting so tightly that the beautiful outward curve of his legs was as painfully distinct as the ill formation of a knee-sprung horse.

On Sunday morning I noticed a great commotion on the street and on going to see the cause found a crowd surrounding a little knot of sea-faring men on the blue bands of whose hats appeared the word "Lurline." No wonder there was a commotion for Mr. J. D. Spreckels had sailed his yacht to Santa Cruz and visions of lunches, sails to Monterey and all sorts of fun rose in the minds of half the ladies in town. When I got up to the crowd, the Captain of the craft was giving a short account of his trip.

"The best time ever made. Five hours and thirteen minutes to the buoy three miles outside the bay of Santa Cruz, or better than thirteen knots an hour," was the report of this worthy, and he had the records to show. Seven long hours' detention outside on account of calm and fog rather took the edge off this fine performance, but none of the party were seasick, and all enjoyed the trip and did not grumble at the delay outside. All day long there was a regular procession (ladies predominating) out to the Lurline, and so busy were all the available boats kept in conveying visitors out on board of her that some enterprising youths started to swim out. One found the tide rather too strong and gave up the attempt, another was seized by cramp and barely rescued by a boat, and, be it said to the shame of muscular male humanity, the only person who swam to the yacht and back to shore (about a mile) during the day was a young lady whose name I was specially requested never to mention.

During the afternoon I rode out to visit the racetrack—the prime object of my trip to Santa Cruz. In getting a horse to take me out there I received a genuine shock. There was a brisk demand for teams; nearly every animal in town was engaged two deep, yet Mr. Lincoln, the proprietor of the Lorenzo stables, was actually renting double teams, with four-seated buggy, for $4 for the afternoon, and when I, a perfect stranger, asked the price of a horse to ride to the track, he replied: "Well, I've only got one horse in; he ain't much of an animal, and I guess a dollar will be enough." Though I had seen the man rent a span of fine horses and a neat rig for $4, and single buggies for $2, $1 for a saddle horse, for which I expected to pay at least $3, seemed so low that I gazed first at the horse with a feeling of terror, and then at the man with a glance of pity for being so far behind the age in his ability to make the most of a good Sunday harvest. I really felt afraid to trust myself on a $1 horse, but when Lincoln called out, "Bill, bring the gentleman a good whip and a pair of spurs," my feelings changed, for I foresaw that I would have to pay fare and work my passage. I made the trip out to the track (two miles) in three quarters of an hour. It took just an hour to get back, but I was rewarded for the time consumed by Lincoln thanking me for taking good care of the horse and remarking in an approving way: "Why, he never turned a hair." A few minutes later, when in the seclusion of my chamber I wrung the perspiration out of my dripping under garments and bathed my aching limbs in St. Jacob's oil, I wondered what manner of horsemen could make that horse "turn a hair," and came to the conclusion that Santa Cruz riders must be a pretty tough set.

What I saw at the track was an ample reward for the labor spent in getting there. As fine a natural track as man or horse could wish for was my first impression, and subsequent inspection only strengthened that idea. Easy, gradual turns, well-thrown-up stretches and a surface that would not lame a two-year-old in six month's work, summarize the advantages from a horseman's standpoint. The soil, a sandy loam, looked as though it would dry very quickly and ought to be a great recommendation for the place as a winter training ground. To a lover of natural scenery the place is almost perfection. Within a few yards of the edge of the cliff, the blue waves were plainly visible from any part of the grounds and the roar of the surf beating against the rocks and working its way into the strangely-shaped caverns with which the cliff is honeycombed proved pleasant music to the listening ear. On two sides fine groves of fir and pine with here and there a gum or cypress tree made pleasant wind-breaks and suggested thoughts of picnics and luncheons, beneath their shading boughs, most delicious. Looking back from the sea the heavily-timbered slopes of the Santa Cruz mountains reached up and up until they met the line of white cloud that hung overhead and almost gave them the appearance of being topped with snow. Dark and huge and stern the mountains looked far in the distance, the splendid green of their tree foliage seemed black as night and the monster trees that covered their sides and shot up to tremendous heights from awful gorges and abyssamal canyons were as a pall of inky black draped in fantastic shapes. A horse brought out from the stables for a jog seemed to call attention back to the track and its immediate surroundings. A bonnie looking mare it was, and rightly named Bonnie Jean, by imported Hercules, not a miracle of speed and bottom, but handsome enough in form and symmetry to please the most fastidious judge of horseflesh. After a short canter the boy took her back to her stall and then I took a look around the stables. There was not much there worthy of note. In Mr. Ferguson's stable, besides Bonnie Jean, was a handsome horse, Johnny A, by imported Hercules. He is matched to run a 600-yard dash against Grey Billy, an Oregon quarter horse. The race is to come off at San Jose early in August. Among the trotters were a grey mare and a dark grey horse, both untried and said by the boy to be from A. W. Richmond, the sire of Romero. There was nothing doing around the track and I was glad to take a seat on the water-trough and listen to one of the stable boys who was full of the history of the dark horse that has shown so much speed at Sacramento in trials lately. According to my young informant, this coming wonder, whose origin and name are dark with mystery, was raised in Santa Cruz. He was the property of a boss in a logging camp and showed such speed when driven to buggy from the camp to town that some horsemen determined to possess him. The horse fell sick and was given into the care of a local vet, who, as part of his care, drove him fast half miles. Seeing that there was lots in the horse, this gentleman spoke dubiously of the chance of cure and finally purchased him from the lumberman for $500. A week later he sold him for $1,000 to the present owners. My young friend talked about 2:20 as being the animal's gait, but insinuated that besides an affection of the eyes the horse was not sound. Time will show the truth of this, but I shall certainly look out for the logging camp wonder during the coming circuit. W.

State Fair Premiums.

The directors of the State fair have been very liberal in setting aside money for premiums for cattle, sheep and swine. Their premium list is just out and every farmer and stock-raiser in the State should send to the secretary at Sacramento and procure a copy. In all classes of horses and mules the premiums offered are:

Best four years old and over	$40 00	Second best	$10 00
Second best	20 00	Best one year old	15 00
Best three years old	30 00	Second best	7 50
Second best	15 00	Best colt under one year	10 00
Best two years old	20 00	Second best	5 00

For a double team of carriage horses and roadsters $40 is offered for first best and a silver goblet or $20 cash to second. For cattle the premiums offered are:

Best three years old and over	$40 00	Best one year old	$20 00
Second best	20 00	Second best	10 00
Best two years old	30 00	Best bull calf	15 00
Second best	15 00	Second best	7 50

Alderney, Jersey and Guernsey cattle are all placed in one class; why, one is at a loss to know, and surely some of the directors who are interested in the new Pacific Coast Jersey Cattle Club will admit that a mistake has been made. The same jumping process was used to the Herefords, Holsteins and Holderness cattle. Sheep are classified into Spanish and French Merinos, Cotswold, Southdown, Leicestershire, Lincolnshire, and Shropshire, thoroughbred crosses and graded. Swine are classified as Berkshire, Essex, Poland-China and Duroc or Jersey Reds. The poultry classes include Brahmas, Langshans, Buff Cochins, Plymouth Rocks, Black Leghorns, Brown and White Leghorns, Black Spanish Houdans, Silver Spangled Hamburgs, Seabright Bantams, Game Bantams, Game chickens, Bronze turkeys, Wild turkeys, Tolouse geese, Rouen ducks, Pekin ducks.

Poverty Grass.

A great deal of growling was done some years ago about foxtail grass taking the country, but foxtail is of some account, as stock will eat it when green. Now, however, a new grass has appeared, which is too much for the foxtail and is spreading rapidly. This is called poverty grass. It looks like a very rich grass, having a fine, rich-looking head, almost as large as an ordinary head of club wheat, but no kind of stock will eat it. It first appeared upon the sheep ranges in Tehama county, about three years ago, and last year a little of it appeared along the foothills in the northern part of the county. This year it is thick all over the foothill country, north of Willows. It seemed to come all at once, so that many believe it to be the spontaneous production of the soil. If it has a seed at all, it is very fine, the large head spoken of being soft and spongy. We are inclined to believe that the seed is so small and light as to be carried in great quantities by the north winds. It has appeared thick and well set in large districts of country where no sign of it had been seen, which favors the idea of spontaneous growth.—*Colusa Sun.*

A correspondent of the *American Angler* furnishes the following as the proper method to prepare lake trout for the table: Clean, and split your trout open on the back; if then too large for a frying pan, divide again vertically; if still too large, cut into pieces four or five inches wide; roll the halves or sections in Indian meal or cracker crumbs—some prefer to dip their fish in eggs, white and yolk beaten together. Fry some clear fat pork in a frying pan over a hot fire, and when the fat is fried out, put in your fish, flesh side down; finish cooking with the skin side down. Cook quickly, and serve hot, with pepper and salt. When the crust which the frying forms is broken, you have the delicious, white, moist meat, with all the richness which a fat trout affords, making a dish fit for a hungry angler.

A case of paroxysmal madness has been developed in a horse belonging to Mr. J. B. Ude of Santa Barbara. The animal was the family horse, driven by Mrs. Ude and others, and heretofore gentle and safe. When Mr. Ude entered the stable last Friday, the animal seemed filled with madness at the sound of his voice and commenced kicking in the most frantic manner. Mr. Ude had a leg broken early in the battle and dragged himself out of the way, while the horse broke loose and is supposed to be still "going mad."

Forests and Forestry in Europe and America.

Historical records give us reason to believe that originally the entire earth's surface was covered with forests, and the vast areas of coal deposits in all portions of the globe are incontrovertible evidences of the fact. The physical history of each country proves that a moderate extent of forests promotes, in a high degree, both its agricultural and manufacturing interests, as well as its resources generally, and the beneficial influence of forests, from a physical, economical and hygienic aspect, is receiving more of the attention its importance deserves.

The countries bordering the Mediterranean sea have all suffered immeasnrably by the reckless destruction of the woods which formerly covered their mountain slopes. Springs which formerly existed have dried up, and the rainfall much changed in quantity and regularity of visits.

These facts deserve the serious consideration of our own people, for, though the quantity of timbered lands in America far exceeds that of any other section of the globe, yet by constant inroads upon them the original forests will be exhausted. Several distinguished scientists have ascribed the prime cause of the great famine in China to the denudation of her mountain slopes, and the consequent cessation of a regular rainfall thereby. In India the parching heat and absence of water have been materially overcome by judicious and extensive arboriculture; in truth, where the plan has been systematically and successfully practiced, the character of the climate has undergone remarkable changes.

Among the older countries of Europe, Germany leads in extent and thoroughness of the arboriculture system. There are eight schools in the empire where sylviculture, as it is termed, is taught. The students learn the economical principles of forests, and the practical planting, growing and preserving of trees. The graduates are consigned to the forestry department of the state, and are enrolled as "Foresters of the Empire." So thorough is the study of this science, the pupils, after graduating and being enrolled, have to pass two years under an *oberforster*, and still undergo two severe examinations, one in the theoretical and the other of practical (as applied to theory) forestry; after these inquisitions he passes to a college as assistant professor of the science, or is given charge of one of the imperial domains. The forestry of Germany forms a part of her internal revenue department, and is controlled by a cabinet officer, who is besides governor of the various academies devoted to teaching the science. With the existing system, and timber cutting being performed under governmental supervision, the forests of Germany are still very large, and, with a heavy annual drain upon them, are kept up to the standard average. We are particular in furnishing our readers with the above methods of forest preservation among these far-sighted and truly economical people, because they may find followers of their example among some of our people while the opportunity exists to do so under so many superior advantages.

Forest legislation in France dates back to the sixteenth century. In 1750 her forest area was estimated at 150,000,000 acres, but reckless destruction of it, and the constant recurrence of revolutions among the people, greatly diminished the amount of her timber. In 1860 laws were passed requiring certain denuded lands to be planted in forest trees, and thousands of acres in the High and Low Alps country were thus treated. Already much good has come from this comparatively new enterprise. Rivers, where the forests along their sources had been felled, devastated whole sections by floods, but now that young trees are growing on these formerly denuded spots the floods have ceased to occur. Not only have the tracts formerly in woods been replanted, but plantations have been formed along the coast of Gascony on the white shifting sand and dune lands until recently considered worthless, and now there is a continuous forest of *pinus pinaster*, a species of pine, from Bayonne to the mouth of the Gironde, a distance of 150 miles, varying in width from two to six miles. The government has a forestry school at Nancy, much after the pattern of the German ones, and where similar studies are taught.

Italy, Switzerland, Denmark and Russia each have a rigid system of forest protection and schools in which to teach foresty. Great Britain has but a small forest area, though the government encourages forest culture at home, and particularly in her colonies. India meets with a large portion of executive attention, and much good is resulting from the system. New varieties are being introduced into the territory; among them there is one which is likely to revolutionize a certain class of trade, called the "cinchona." It is said that the initial experiments in its culture have surpassed the expectations of even the most sanguine among the projectors of the enterprise.

In America there is a larger area of primeval forest than in any other country. Her trade in lumber has grown to colossal proportions, both at home and abroad, and though there are millions of acres of her timbered lands yet untouched by the axman, certain portions of her territory, where were formerly vast forests, have been destroyed, and the people of those sections rendered as uneasy about their timber supply as those of old Europe. The general government, though slow to act, has at last been aroused to the importance of the subject, and established a forestry department in connection with the Agricultural Bureau at Washington. In the older States of Massachusetts, Pennsylvania, New York, Delaware and Maryland, forestry associations have been organized. The general government encourages by donations of land forest culture on the plains, while several of the States offer individual premiums for the best-preserved forest lands and plantations of artificially cultivated trees within their borders. California, notwithstanding her vast resources, has a forestry department of her State government, and many other States are contemplating doing the same.

Having seen what has been done and what is doing in the forest preservation and culture in Europe and America, it will be of interest, particularly to Americans, to lay before them the varieties of trees which grow under certain climates and conditions, that they may select therefrom in the establishing of forest plantations in the West or anywhere where the original growth has been cut down.

Pine and birch grow in extreme northern climates, while oaks and beeches require temperate ones, and palms and heat-loving trees can only live in the tropical. Soil, of course, has much to do with tree growth, even where the climate appears similar, but these rules apply more particularly to Europe and Eastern countries than America, because here it is not uncommon to find a great many varieties of trees of entirely different characteristics growing luxuriantly side by side. Therefore in the selection of varieties of trees to be planted for their timber the necessities of commerce should be more closely considered than the condition of climate and soil, as these last produce graciously almost every variety of tree found on the continent, if we except a few which are decidedly of a tropical or a frigid zone character. For instance, it would be folly to attempt the growing of the cypress, orange or lemon tree in Nebraska, or the white pine of Maine in Florida, though with such extreme exceptions as these, oak, hickory, elm, maple, willow, plane, hornbean, poplar, horse chestnut, birch and mulberry will grow well anywhere in the temperate, and even in the northerly portions of the Northern belt of the country. There are regions of the world where a certain variety of tree grows exclusively, but these are few, and do not apply, as a rule, to be followed in forest culture in America. In Nebraska, ash, walnut and elm have been largely planted, and along the Pacific railroads the Australian gum thrives well. Kansas lands and climate produce admirably hickory, oak, walnut and cottonwood. This last rapidly-growing tree is destined to become a staple article of the timber commodity. It grows luxuriantly in Mississippi and Arkansas, and would doubtless thrive in Texas or anywhere outside of the frigid belt.

It would prove of inestimable benefit to our country if the State governments would establish schools of forestry similar to those in Europe, or at any rate have introduced a course of forestry in the existing public schools. Let the science of tree culture follow a botanical course, and thus diffuse the two important sciences over the land. With the certain denudation of the forest lands, and the necessity for settling the great Western plains, the knowledge of forestry taught as a science and coupled with practical experiments would be invaluable, as the subject is of vital importance to all persons connected with the agricultural interests of the country. —*Southern Lumberman.*

Oil Meal.

Within comparatively a few years the consumption of oil meal in this country has rapidly extended until at the present time there is scarcely an agricultural or stock-raising district in the older portions of the United States in which the article has not found a market. The value of cotton-seed oil meal as a fertilizer is too well known to require special mention by us. Its importance in this field has been long recognized by Southern planters and for many years they consumed nearly the total yearly product in enriching their lands. The Eastern States have more recently taken up oil meal, both for stock feeding and fertilizing purposes, and the farmers there are now among the largest consumers in this country. Since corn and other stock food have reached such a high cost, some of the Western cattle and hog-raisers have turned to oil meal, and have substituted it to a great extent for corn, especially in the fattening of hogs for the market. It has been found that oil meal is particularly adapted for this purpose, containing nearly all the essential elements of corn, its fat-producing quality being equal if not superior to the latter, while it is far cheaper and easily handled. The chances for an extensive growth of consumption in this direction are very encouraging, while for fertilizing it is one of the cheapest and most valuable composts in the market. Recently consumers have become somewhat fastidious regarding the quality and appearance of the meal, but the objections are being overcome by manufacturers who are paying more attention to the production of the article, and there is a marked improvement already noticeable.

T. G. Duncan reports Southern Texas as suffering from drouth, and cattle in that section very thin. But in the central and western portion of the State grass is said to be fine and cattle fat. A number of fine beeves have already gone to market from those sections.

The government is advertising for 5,000 rams, to be delivered at Navajo agency, New Mexico.

Who Will Make a Start?

The different agricultural associations throughout the State have arranged for holding race meetings during the next few months, and it looks as though they would be attended with success, judging from the number of horses in training at the tracks. In this vicinity something should be done towards getting up a meeting. This has been a prosperous year, and we see no reason why the people of Solano and Napa could not join together and arrange for a meeting at the Vallejo race park during the fall. Yolo and Sonoma counties would undoubtedly be represented, and, if properly managed, the race meeting could be made a success. Liberal purses could be made up, and parties having good stock could be induced to bring them. Everyone who has seen our track says it is one of the best in the State, and we cannot see why the people of the counties adjoining Solano do not arrange for holding exhibitions here every year. A number of persons have promising colts, and this would give them a good chance to show what the youngsters can do. If the proper parties take hold of this matter, we are positive it can be made successful. Places that cannot afford it as well as this district hold regular exhibitions, and we see no reason why they cannot be held here. Who will make a start in this important matter?—*Vallejo Chronicle.*

It is said that 500,000 cattle graze on the Wyoming ranges, valued at $13,000,000.

AUCTION SALE
OF

FINE STOCK

BY ORDER OF

W. W. CAMRON

Saturday, June 30, 1883, at 12 O'Clock, Noon, at

Camron Ranch,

ON SAN PABLO CREEK, TEN MILES FROM Oakland, on the road to Lafayette and Walnut Creek. To reach the ranch take Telegraph Avenue from Oakland.

FINELY BRED Saddle and TROTTING STOCK, Work Horses
AND BROOD MARES.

Among them are Belmonts, Patchens, the famous Gorham colts, which are descendants of the famous Bellfounder stock, McCrackens and other trotting strains. There are also some fine Normans.

These horses are all young, and need only to be seen to be appreciated, and with few exceptions have been sired by Henry Williamson, whose reputation as a sire of road horses is well known.

Also the finest and largest herd of
Thoroughbred Jerseys

Ever offered at auction in this State. Many of them are REGISTERED and have very SUPERIOR PEDIGREES of excellent milking strains. All of this herd are young and consist of cows, heifers, calves and bulls. Also some very

HIGH GRADE JERSEYS.

Valuable as family cows. Also a fine collection of

HIGH GRADE DURHAM COWS

And young Stock.

☞ The animals offered in this sale are the result of years of the most careful breeding and are sold only on account of the sale of the ranch. This is a RARE OPPORTUNITY for parties wishing such stock, as there are absolutely no inferior animals in the list.

National Association rules to govern. Entrance, 10 per cent of purses, to accompany entry.
☞ Entries close with the secretary on Monday August 1, 1883.

T. W. HINCHMAN,
N. T. SMITH President.

For ticks on sheep take linseed oil and add sulphur, a sufficient quantity to make it thick like paste. Now take a small paddle and put some of the sulphur and oil on top of the shoulders, rubbing it in well. It should be used just after shearing. One application a year is all that is needed. Another plan is to make a strong brine with common barrel salt—make as strong as you would to keep pork. Dip your sheep and lambs in it. If it does not kill every tick, repeat in about two or three weeks. This is seldom necessary.

Sonoma AND Marin District ASSOCIATION.

—AGRICULTURAL DISTRICT NO. 4.—

At Petaluma

FROM AUG. 27 TO SEPT. 1 INCLUSIVE, '83.

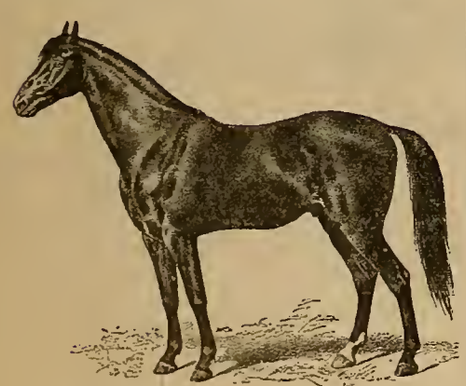
J. McM. SHAFTER, President.
W. E. COX, Secretary.

IN THE STUD.

J. F. CARROLL'S GREYHOUND DOG, PAUL JONES, GENTLEman Jones—Branch. Fee, $25. Apply at this office.



MAMBRINO WILKES.

Black Stallion, sixteen hands in height, by George Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christman by Todhunter's Mambrino or Idol, son of Mambrino Chief. Second dam by Pilot Jr. Third dam by Kentucky Whip. Idol's dam was thoroughbred and was by American Eclipse.

THIS IS THE LARGEST AND ONE OF THE BEST COLTS OF George Wilkes (weighing at this date 1,200 pounds) combining the Hambletonian and Mambrino strains and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.
George Wilkes has twenty representatives in the 2:30 list, of which 10 have records of 2:25 or better, 4 of 2:20 or better and 3 of 2:18 or better.
Will make the ensning season, beginning February 1st, 1883, at STOCK-TON.
In putting the price by the season at the low figure of $40 the owner does not acknowledge, thereby, any inferiority on the part of this horse to any other sire of Trotters.

IRVIN AYRES.

MULDOON'S PICNIC.

GREAT TUG OF WAR.

The Event of the Season.

LAST APPEARANCE OF

MULDOON

The Wonderful Græco-Roman Wrestler, Previous to His Departure for the East,

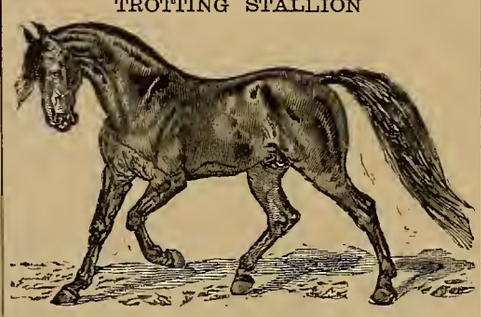
A fine band will be in attendance.
Special trains to the track at 10 a. m. and 1 p. m.

Admission - - 50c.

Admission to grand stand, $1. Children, 25c.

TROTTING STALLION



Eugene Casserly.

SIRE OF SWEETBRIAR, 2:26¼; NAPA QUEEN, 2:38½; ROCKwell, 2:39; Bill Woodward, 2:40; Smoothbriar, two-year-old record 2:57; May Day, two-year-old record 2:39¼. Will make the season of 1883 at Oakland on Thursdays, Fridays and Saturdays and at Wainnt Creek Sundays, Mondays, Tuesdays and Wednesdays. He was sired by General Taylor, dam Jennie by Lexington. Terms $30 for the season. Good pasturage at reasonable rates. No responsibility for accidents or escapes. Address

THOMAS S. BREMNER.
Seventeenth street and Telegraph Ave.,
Or J. M. Heinold, 1426 San Pablo Avenue, Oakland.

THE TROTTING STALLIONS

SINGLETON AND LA HARPE.

SINGLETON WILL MAKE THE COMING SEASON, FROM March 1st to July 15th, 1883, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

PEDIGREE.

Singleton is by Willie Schepper, a son of Rysdyk's Hambletonian, his dam Lightfoot (the dam of Pride) by Flaxtail, a son of Pruden's Blue Bull.

DESCRIPTION.

Singleton is a dark brown horse, tan flanks and muzzle, a little touch of white on hind feet and one fore foot, and star in forehead. He is 15¾ hands high and weighs 1,100 pounds. He was bred by Dr. M. W. Hicks, foaled spring of 1878.

TERMS.

Fifty dollars the season. Mares not proving in foal will be bred the following season free of charge. Mares from a distance will be pastured without charge during the season. Mares shipped to Chico, consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner their owners desire, at reasonable rates. There is every convenience on the place, boxes, paddocks and plenty of shade and water.

LA HARPE

Will also make a short season at the above place on private terms. La Harpe is by Fame, a son of Alexander's Belmont, his dam Prairie Bird by Flaxtail, the dam of Flight and Prompter. Address

J. T. McINTOSH, Chico, Cal.

THE CELEBRATED TROTTING STALLION

ERWIN DAVIS

WILL MAKE THE SEASON OF 1883 AT OAKLAND TROTTING park.

DESCRIPTION.

Erwin Davis is a beautiful mahogany bay with very black points and one hind foot white; 15 hands high; of superior good disposition and fine trotting action.

PEDIGREE.

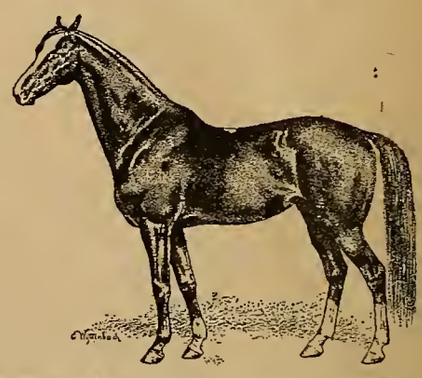
Erwin Davis was sired by Kentucky Hunter (Skenandoah) by broken-legged Kentucky Hunter (the sire of Flora Temple) by Ferguson's Kentucky Hunter, by old Kentucky Hunter, by Highlander. Erwin's dam was Lost Diamond, by Vermont Hambletonian.

TERMS.

Twenty-five dollars for he season, payable at the time of service. Good pasturage at $5 per month. No responsibility for accidents or escapes. For particulars apply

JOHN ROGERS,
Oakland Trotting Park.

THE THOROUGHBRED STALLION



WHEATLEY

JOSEPH CAIRN SIMPSON,
Oakland or 508 Montgomery street, San Francisco.

THOROUGHBRED STALLION

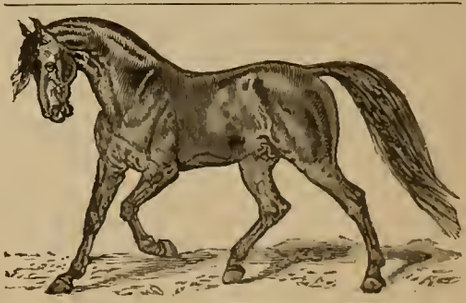
X X,

BY MALCOLM, HIS DAM COLUMBIA, WILL MAKE THE ENsuing season at the Oakland Trotting Park. Terms, $25 the season.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam, Columbia, also by imported Bonnie Scotland, hence his name. Malcolm was one of the best racehorses of his day, and Columbia was also a fine race mare. For extension of Columbia's pedigree see advertisement of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wsuanita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

JOS. CAIRN SIMPSON, Oakland, or 508 Montgomery street.

Mares intended for either of the above stallions, and sent by Donahue, Petalnma, Sacramento or Stockton boats consigned to J. W. Morsbead, City Front Stables, will be received, good care taken of them and forwarded to Oakland



THAD STEVENS.

THIS THOROUGHBRED HORSE WILL BE AT AGRICULTURAL Park, Sacramento, for the season commencing Feb. 1 and ending the 1st of July next. Good pasturage for mares will be provided at $3 per month. For terms and particulars apply to or address

W. M. MURRY, Agent,
Sacramento Racetrack.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five except the two-year-old trot, unless otherwise specified; five to enter and three to start; entrance fee, 10 per cent on purse, to accompany nomination; purses divided at the rate of 50 per cent to first horse, 25 per cent to second, 15 per cent to third and 10 per cent to fourth.

National Association rules to govern trotting; but the board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, three or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry 110 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 118 pounds, with the usual allowance as above.

Starters in all races must be named to the secretary or clerk of course at 6 p. m. the day preceding race, any other rule to the contrary notwithstanding.

No added money paid for a walk-over.

Horses entered in purses can only be drawn by consent of judges.

Rules of the Pacific Coast Blood Horse Association to govern running races, except when conditions named are otherwise. Non-starters in running purses will be held for entrance under rule 3.

All entries to be made in writing, giving name, sex, color and marks of horses; also name and residence of owner. In running races full colors to be worn by rider, and drivers of trotting races are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated on programmes by colors worn by drivers. This is necessary to enable spectators to distinguish the horses in the race.

Entries to all the above races except No 25 to close with the secretary on Wednesday, August 1, 1883.

Write " Entries to Races" on outside of envelope.

In the three-minute purse and the 2:40, a horse distancing the field takes only first money.

P. A. FINIGAN, President.

EDWIN F. SMITH Secretary.

STOCK FARMS.

My New Catalogue For 1883,

OF 180 PAGES, CONTAINING VALUABLE TAbles, with trotting statistics up to close of 1882, with descriptions and pedigrees of 276 high-bred trotting stock, now at Fairlawn stock farm, adjoining the city of Lexington, Ky., will be sent free to all applicants who contemplate purchasing, and to all others who send four cents in stamps to prepay postage.

TWENTY
Fine & Highly-bred Broodmares

bred to the Fairlawn stallions, and

138 Head of Promising Young Trotting Stock,

consisting of young stallions, fillies and roadsters, most of them sired by ALMONT, HAPPY MEDIUM, ABERDEEN and CASSIUS M. CLAY JR.,

ARE OFFERED AT PRIVATE SALE.

There are in use at Fairlawn over one hundred HIGHLY-BRED BROODMARES, with the standard-bred and noted trotting stallions ALMONT, HAPPY MEDIUM and ABERDEEN at the head of the stud.

It is confidently believed that no breeding establishment in the world possesses greater facilities for making judicious trotting crosses. Hence parties who wish to engage in breeding and raising fine, highly-bred and fast trotters, and those who want fast, stylish, game, level-headed and reliable roadsters, have an opportunity of obtaining just what they want at FAIRLAWN.

ALMONT already has twenty of his get with public records of 2:30 or better, and two with records below 2:20. He has a granddaughter with a record of 2:20, made in 1881; another with a record of 2:23½; another with a record of 2:26, made in 1882; another with a record of 2:28½, and a grandson with a three-year-old record of 2:23½, the fastest ever made up to 1881. No trotting stallion at the same age ever made such a showing.

HAPPY MEDIUM has sixteen of his get with records ranging from 2:20½ to 2:30, a larger number than any other stallion except Almont ever sired at same age.

ABERDEEN, with very limited opportunities in the stud, has eight of his get with public records ranging from 2:15½ to 2:27½. To-day at Rysdyk's Hambletonian has made as good a showing at same age.

ETHAN ALLEN JR., full brother of Daniel Lambert, who has twenty-two of his get with records of 2:30 or better, has recently been added to the Fairlawn breeding stud. He was sired by Ethan Allen, dam Fanny Cook, by old Abdallah; second dam by Stockholm's American Star; third dam by Red Bird, son of Bishop's Hambletonian. With very inferior opportunities in the stud, Ethan Allen Jr. has sired five trotters with records of from 2:23¾ to 2:28½, all of them being out of mares of unknown pedigrees.

The Fairlawn stallions have in 1882 had eleven new ones of their get to make records below 2:30 and one to make a record below 2:20. Besides this, each of the Fairlawn stallions has had a granddaughter to drop into the 2:30 class, viz.: Maud T., 2:26, by Hamlin's Almont Jr.; Carrie Medium, 2:27¾, by Happy Medium Jr.; and Carrie B., 2:28¾, by Enid G, son of Aberdeen. The stallions of no other breeding farm in America have made such a showing in 1882.

These stallions will be permitted to serve

A Limited Number of Mares IN 1883.

ALMONT, limited to twenty mares, at $300; HAPPY MEDIUM, limited to twenty-five mares, at $150; ABERDEEN, limited to forty mares, at $100 the season, and ETHAN ALLEN JR., limited to twenty mares, at $50 the season, with privilege to return such mares in 1884 in case foal to stand. All approved mares will be bred on shares to either stallion.

The ONE-PRICE PLAN is strictly adhered to at Fairlawn, and THE PRICE OF EVERY ANIMAL FOR SALE IS PRINTED IN THIS CATALOGUE. These prices will neither be advanced nor reduced. A SINGLE DOLLAR until after May 1, 1883. PURCHASERS FROM A DISTANCE CAN BUY ON ORDERS AT EXACTLY THE SAME PRICE AS IF PRESENT IN PERSON AND ALL STOCK SOLD ON ORDERS WITHOUT THE PURCHASERS SEEING THEM CAN BE RETURNED BY THE PURCHASERS IF THEY DO NOT IN EVERY RESPECT COME FULLY UP TO THE DESCRIPTIONS GIVEN. Full written descriptions will be given any applicant who contemplates purchasing.

Time will be given responsible parties at regular bank rates of interest.

For catalogues or further information address
WILLIAM T. WITHERS,
2-13y1 Lock box 392, Lexington, Ky.

ASHLAND PARK

TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks, at Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Bolsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address
2-17y1 **B. J. TREACY,** Lexington, Ky.

Jerseys and Guernseys.

Registered in the A. J. C. C. and the A. G. C. C.

THE YERBA BUENA HERD OF JERSEYS AND Guernseys won all the herd prizes for 1882. Since then have been added three young bulls and some females and it now contains Farmer's Glory, Jersey Belle of Scituate, Coomassie and Alphea strains. These, with forty head selected on the Islands of Jersey and Guernsey from the best without regard to cost and imported directly, make this the best herd on the Pacific Coast, and equal to any at the East, where the extraordinarily high prices ruling show conclusively that these are the accepted butter producing animals of the country. Bulls have recently sold in New York for $10,000 to $12,000. Animals of both sexes for sale at moderate price.

TO

Sportsmen & Pleasure-Seekers.

TH

SOUTHERN PACIFIC R R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING

Summer and Winter Resort of the Pacific Coast,

with its beautiful Groves and delightful Drives. Front in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Barracuda, Pompino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE

"HOTEL DEL MONTE,"

ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains

SPACIOUS SWIMMING TANKS

(150x50 feet) for warm salt water plunge and swimming baths, with

ELEGANT OOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ,

IS VIA TH

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to

FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggageman. Train Baggagemen are instructed to issue CHECKS for all dogs received in Baggage Cars.

☞ In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES.—Passenger Depot, Townsend street, and No. 2 New Montgomery street, Palace Hotel.

A. C. BASSETT, Superintendent H. R. JUDAH, Asst. Pass. and Tkt Agt.

[From the Jewelers' Circular.]

"The Centennial chronograph (fly-back) or horse-timer, recently introduced by Messrs. Cross & Beguelin, is, regardless of price, one of the most substantial and accurate pieces of timing mechanism we have seen. This timer is constructed on scientific mechanical principles that must excite the admiration of every intelligent watchmaker, and it will doubtless become universally popular." Ask your jeweler for them or write to
